ARM-CHAIR NOTES.

The canyon this year seems even more idyllic than last, whether it be the unusual heat of the city makes the shade of the dense forest and the bracing air of the mountains seem more perfect or not. It is like a dream of

Paradise to wander over trails cut through the forest under shadows of thick-leaved branches, and meet the cool breezes wafted down these sylvan corridors from mountain peaks, or in some nook fashioned by nature into leafy pavilions and listen to the tulling sounds of breeze-rocked branches, as one idles away the hours.

Few artificial parks can boast the ideal strips of roadway that thread this winding canyon way. Through its entire length the road runs at the foot of hills whose slopes are furrowed with emerald foliage of thick forests, and for the greater part of the way under a canopy of over-arching boughs. In wild hollows tucked coily in the canyon's width, or perched on the hillside amidst the pines and birches, are rustic cottages or tents, where the summer colony lives in scornful forgetfulness of thermometers, save as a warning to additional blankets for comfort in the cool nights.

The picturesque nooks stowed away in the length of the canyon are legion. Whether one takes a mountain trail leading to vantages of open view, or keeps to the path edging the stream, the way is full of constant pictorial surprises. The stream has evidently aliased its course in comparison to the labyrinths of willows and trees to develop here and there fascinating situations and sudden dell-like openings with cascades spilling over banks tapestried with moss, with tiny over-arching boughs, or hiding itself in miniature gorges and dark sylvan closets, whose interior one may see through interstices in their thick walls of shrubbery.

Close upon the track of these pretty retreats follow the feet of the home-seekers, and everywhere the glimpse of cottage and tent gives its comfortable human touch to nature's beauty. Twice the number of cottages have been put up since last summer, and the builders have still to be up at daylight fashioning the rustic abodes which are in constant demand from summer home seekers.

To follow the stream through mazes of pine and birch and aspen, with the sheen of silver gray birch-trunks gleaming along the way, the aspens leaves twinkling overhead like the whisper of cool air, and pine scents filling the atmosphere with bracing pungency is an experience worth in itself the trip to the retreat. Add to this the ride over the park-like road, in the cool of morning or evening and the ideal of sylvan life is hard to paralyze.

"Hotel Knob" is the name of a dome shaped prominence in the mid-air canyon where a hotel is to be built, and lower down is a comparatively level spot which will be converted into a lake stocked with fish to be the paradise of piscatorial adventures.

Among the season's home-builders in the canyon is Dr. Chas. Wilcox, who will have one of the prettiest places at the resort.

Mr. James T. Dunbar's family have also a choice portion of the idyllic domain as a summer home. The spot is close to the roadway, but so sheltered in forest and shrubbery as to be almost invisible. Mr. Dunbar's family has a cottage built on a miniature plateau edging the roadway, and the spot looks like a rustic citadel against the summer heat.
