MINING, BUSINESS AND STOCKS

GREAT MILL OF UTAH COPPER.

Plant is Nearing Completion and Will Go Into Commission About February 15th.

SUPT. JENNY IN FROM CAMP.

Will Commence With Daily Capacity Of 500 Tons -- Many Delays Experienced.

Supt. F. G. Jenny, of the Utah Copper company at Bingham, came in from camp last night and spent the day in his office to give attention to an accumulation of correspondence.

The finishing touches to the big 500ton concentrating mill are being rounded out and, Mr. Jenny said today, Feb. 15 is the date set for starting.

"We are getting along very nicely cow," continued the superintendent, after the series of annoying detays and other troubles in getting a prompt de-livery of machinery and material on top of which has come the severe winter weather in the camp. But the building is under cover and the machinery is being rapidly set in place." It is anticipated that the starting of the new plant will be attended by no serious difficulties. Long before the formation of the Utah Copper was even bought of, General Manager D. C.

ackling had made a study of the pro-position and knew exactly what method the ores required for successful treat-His familiarity with the property, then owned by Col. Wall Capt. De Lamar, is what led up to the acquisition of the ground and the subsequent organization of the present company, which promises in the near future to produce as much copper as some of the other big mining concerns of Bingham.

ON MINING EXCHANGE.

The Forenoon Sales Aggregated Only a Little Over \$800.

No animated scenes prevailed during the early calls of the mining exchange today. The total forenoon sales aggregated only 4,400 shares, the whole lot being purchased for \$804.

The traders were all weak. New York Bonanza fell to 18½ cents in the sales, 2,400 shares transferring. One of the surprises of the day was found in Grand Central; while none was sold it was offered as low as \$2.95, with the best bid registered at \$2.50. Con. Mercur offered as kew as \$2.95, with the best bid registered at \$2.50. Con. Mercur opened at 62%, then stiffened several points, but went back again, closing at president of the new company, and the the bid price. Century continues slumpish, with practically no demand for it. closing quotations and sales

IMPROVEMENT PREDICTED.

Yet an Eastern Broker Does Not Anticipate a Bullish Market. An eastern broker in giving a client is views as to the future of stocks,

said recently: do not expect anything like a bull market during 1904. For over a year we have been going through a slow panic, due to the overissue of securities, and this is a condition which it takes time to overcome. The people who made the bull markets of the past few

years have been the millionaires of New York, Pittsburg, Chicago, Phila-delphia, Baltimore and St. Louis, Many of them became millionaires through the liberal issue of securities by industrial corporations. On paper many of them were fabulously rich, and they speculated in the stock market in the most reckless manner. When the market started to decline, however, they found that they could not dispose of their stocks. The result of enforced liquidation has so crippled many of them that they are no longer in a position to become market factors, and with a vast amount of undigested se-I fail to see curities pressing for sale, who is going to make a bull market— that is, the kind of bull to ket we were accustomed to several 3 rs ago, Gen-eral conditions, however, have undergone a wonderful improvement, and what is of equal importance, senti-ment is more cheerful than it has been in over a year. I expect a gradual form at any price.

improvement in prices, but no bull market for at least a year.

BEGINNING OF OIL BOOM.

The Natural Gas Strike at Farmington Causing a Stir.

The tapping of the great reservoir of natural gas at the Guffey-Galey well near Farmington, and the subsequent sensational display of mud throwing, on last Tuesday has created much interest along brokers' row. The feeling pre-vails that the wealthy Pennsylvanians are going to make a success of their investigations in this state and that Salt Lake City is one the eve of a big oil boom. Brokers have sought the promoters of the recently organized com-panies, for options on their stock, but as far as can be learned none of the holders have consented to part with their holdings.

Several new companies are talked cand, within the next few days, at least one will be organized; its directory will be composed of several of this city's most prominent citizens.

was also learned today that oil experts have been looking over Ante-lope island in the lake and that they discovered there some of the most pro-nounced indications of oil yet found i Salt Lake valley. It was stated that a large tract of the Island lands had been acquired, and that ou in the water some distance from the shore, unmistakable evidences of the existence of oil had been found.

OLD JORDAN HEAD HOUSE. Machinery for New Plant Expected to Arrive Tomorrow.

The management of the United States Mining company has been advised that the machinery for the Old Jordan hear house, which is to replace that destroy by fire recently, has passed Denve Its arrival is expected tomorrow or Sat urday and no time will be lost in get ting it installed. While this branch of the tramway has been crippled other mines of the company have been sup plying the tramway with ore.

There has been no less tonnage trans ported than before and the bullion ship ments from the company smelter a Bingham Junction show no decrease.

NEAR LUCIN CUT-OFF.

Ogden Citizens Operating a Promising

Copper Mine on West Side of Lake. A company was formed in Ogden not long ago—the Utah & Nevada Gold & Copper company—to operate in the Newfoundland mining district, over of the west side of the Great tSalt Lake and within a few miles of the track of the Lucin cut-off of the Southern

Pacific railway.

Lewis and Thomas Cunningham o Ogden located a group of five claims there, since which time it has been known as the Cunningham group. The brothers did considerable developmen wok and succeeded in opening up three well defined copper veins, the or carrying encouraging values in silver and gold. Assays have shown copper values as high as 32 per cent, while the fire test has displayed gold and silver contents of \$12 and 17 ounces, re-

spectively. Four men are employed in doing de discoverers, the Messrs, Cunningham are members of the board of directors.

THE MONTANA-TONOPAH. Secretary Dunlap Makes His Weekly

Report-Ore Ready for Shipment.

Secy. Dunlap of the Montana-Tono pah, makes the following statement for the past week, says the Tonopah Miner "The property is looking very fine. On the 500 level, going west, the Macdonald ledge at 220 feet shows a full face of high grade ore. The raise is up 5 feet, and continues in ore of the samhigh values as heretofore. The eas drift on the hanging wall of this ledge. after passing through a few feet of diturbed ground, is now in a good quality of ore, most of which is of sufficient value to justify shipping. Or the 600 level developments continue as before on the Macdonald ledge, and both east and west the high grade of ore continues. These drifts are out 46 feet east and 50 feet west. We are just starting a cross-cut from the 600 leve west to connect with the winze which was sunk on the body of oxidized ore some time ago from the 500 level Ow-ing to a shortage of teams the ore has been accumulating very rapidly, showing a surplus on hand at present of 1,500 sacks. Quite a number of teams are reported on the road, however, and it is our expectation to ship our full quota during the month of January

WESTERN MARKET LETTER.

Special Correspondence.

Kansas City, Mo., Jan. 25 .- Cattle receipts at Kansas City last week were 45,800 head, including calves, 6,000 head more than previous week, and 6,000 more than same week last year. This This was the largest run since the range season closed. A much larger percent-age of stockers and feeders arrived than usual at this season, and declines were met with every day up to Thursday, amounting to 20 to 40 cents. western steers also declined daily till Thursday, losing 15 to 20 cents. Cows were off 10 to 20 cents. Friday the run checked up and there was no further losses. Conditions today are exactly the reverse of those of last Mon-day, and more than half of the losses in values of the whole of last week have been regained today. Fed west-ern steers sell from \$3.50 to \$4.40. A nice string of about 100 white face feeders from Colorado, weighing around 800 pounds, sold today at \$4.15. This was 15 to 20 cents more than they would have brought middle of last week. Fair grades of stockers and feeders bring \$3.25 to \$3.75.

Sheep receipts here last week were 21,000 head, about like previous week, and also corresponding week last year Packers started a big cry about break-ing prices account of heavy supplies in the east, but at the end of the week prices were only 15 to 25 cents lower than at the high time. Supply today is liberal at 5,000 head and mar-ket is 10 to 15 cents higher, prices on western ewes and wethers are the same today as at high time, namely \$4 for ewes and \$4.50 for wethers. Top lambs today \$5.75, yearlings \$5.15. Practic-ally no feeding stock has arrived within the past several weeks. Sheep run has fortunately been very consistent here, averaging four to five thousand each day during recent weeks, mark-et in this way escaping bad effects of

excessive runs. BIND YOUR MAGAZINES. Old Books, Music and Magazines, Put them in strong new covers for preservation. Many records of value can be

saved by having them bound. The "News" bindery can do the work in any

OF EAST TINTIC.

DEVELOPMENT

Several Good Properties Likely to Be Opened in This Portion Of the Camp.

THE SOUTH LILLY TUNNEL.

Winze Being Sunk - Some Good Assays-Much Activity Anticipated This Year.

Special Correspondence.

Eureka, Utah, Jan. 27 .- Everything ooks bright for the east end of Tintic district during the present year. Already several of the properties are beng worked and the mine owners and rospectors will make the east end rove good as soon as the snow begins o disappear,

At the South Lilly the tunnel is in distance of 145 feet and a winze unk to a depth of 113 feet. A force f men is hard at work developing the ine from which assays have been taka showing up well in gold, silver and

At the Ralph property the miners are orking through the shaft of the Silver ing mine, and are running a drift to p the ore body at distance of 100 feet. he shaft of the Silver King has reachd a depth of 200 feet and the tunnel in 40 feet. From present indicaons the mineral taken from the round shows that with diligent work he mine will soon be classed among regular producers of Tintic.

At the Gold King property, which oins the R. G. W. ground on the east, he tunnel is in a distance of 200 feet, ith a winze 80 feet deep, which passes hrough a splendid body of iron ore. ssays from this property shows gold and silver. Capt. George T. Bridges, he owner of the property, is highly leased with the future prospects of the roperty and will continue the work hereon indefinitely.

North on the same vein as the Gold (ing property, is the Emma group of laims, owned by Frank Cook and lessrs. Morgan and Bowers. A tunnel s being run and a winze sunk. Some me specimens of mineralized rock have ween taken from the ground, and the been taken from the ground and the owners are of the belief that they have truck a bonanga.

Development work is being done on the Ada group of claims; formerly the Minnie Argentum. This property is Minnie Argentum. This property is well known to the mining men of Tin-

The tunnel at the Gold Blossom is ompleted for a distance of 560 feet ompleted for a distance of 560 feet and sinking is now in progress on the ore chute. Some splendid lead ore has seen taken from the property which assayed 63 per cent, also showing good eturns in silver and gold. Supt. J. C. Burgess, who has charge of the property has great faith in its future of the property as well as in the whole on the

Maj. Dillon, Mike Sammon and Bat Sullivan, all pioneer prospectors of Tintic, have a good prospect in the B. S. Consolidated, which they located in 1892. Development work is progressing.

NEW ELECTRICAL PLANT. Machinery Now Being Installed at Daly-West Mine.

Milton D. Grosch, representing the local house of the General Electric com-pany, has returned from Park City where he has been looking after the installation of the new electrical plant ordered some time ago by the management of the Daly-West Mining company. The new equipment consists of one 100-kilowat 3-phase generator, two 40-horse power motors and one 160-horse power engine. One of the motors to be installed is to be used to drive the machinery of the new slimes plant now under construction and the other is to furnish power for the rock crush-

Inquiry made at the Daly-West of-fices this morning efficited the information that the new plant will probably be ready to run within the next 60 days; depending, however, on the promptness of the delivery of some of days: the equipment yet to arrive.

CONCENTRATES.

The Grand Central marketed several cars of ore today.

Four carloads of Horn Silver cres are in today's market.

Supt. W. J. Craig of the Yampa mine went out to Bingham again this morn-

Manager George H. Dern of the Con-solidated Mercur is in camp again to-

Manager M. M. Johnson of the Newhouse mines is at the Cactus in Beaver

county today. Supt. A. O. Jacobson of the Columbus Consolidated at Alta returned to camp

against this morning. Url B. Curtis, a prominent Tonopah mining operator is expected to arrive in the city in a few days on his way east.

Thomas J. Lynch, the Tonopah mining king, came in yesterday and departed today noon for the big Nevada

camp.

Grant Snyder, assistant manager of the Western Exploration company, ex-pects to pull out for California again in a day or two. W. J. Sinclair, a prominent Tonopah

mining man, has recently acquired ex-tensive interests in the camp of Search-Charles J. North, who came out from the east to attend the annual meeting

of the Blackbird Copper company, has returned home. An accident to a water jacket at the Yanua smelter caused a suspension for a few days. The plant will be go-ing again today or tomorrow.

The ore and bullion settlements reported late yesterday were: Crude ores and concentrates, \$28,200 base bul-lion, \$29,200. Total, \$57,400.

A number of eastern shareholders in the Red Boy mine, near Baker City, Or., allege they are the victims of a freezeout and threaten to resort to the courts for protection.

Director J. B. Thompson of the Copper Ranch mine in Beaver county has returned from a trip to that property

was called on account of the sickness and death of a relative. Reports from the Log Cabin mine at Marysvale continue to be most gratifying to the local management. Supt.

ores from the mine of Bingham at about the usual rate.

Ben T. Lloyd of the Copper Ranch

Copper Mining company returned from Cache county this morning where he

Larsen claims to have a full face of ore than averages \$32 to the ton in gold. A block of Blackbird Copper stock was sold on the open board of the Min-ing Exchange yesterday. The lot amounted to 55,000 shares and it was purchased by J. C. Lynch at the rate of 1% cents per share.

From Scattle word comes that a great many will outfit in the spring to go to Boulder Creek, near White Horse, Alas-ka, which promises to be the scene of stampede. Miners who have gone there have obtained 25 cents to the pan at a depth of six feet.

General Manager G. H. Robinson of the Tintic Mining & Development com-pany, who had the misfortune to break bone in his leg, a result of a fall at the Yampa smelter several days ago, is reported to be getting along nicely and that he will not be confined to his rooms very long.

The new camp of Goldfield in Nevada continues to attract attention and inlications for the opening of a second Tonopah are exceedingly bright. The first company was organized there last week and is soon to be followed by a number of others. The figures given out recently by the

director of the mint were incorrect in so far as South Dakota was concerned. The figures should have been \$6,889,137 in gold bullion, instead of \$2,889,137, The corrected sum is still \$1,000,000 under that given out by the state's min-

Dick Colburn, who spent the holidays at his home in Salt Lake, returned Friday. He came by private convey-ance from Calientes, by way of Hiko, Irish Mountain, Penora Springs and Cabin. The distance of 250 miles was made in nine days. Dick likes the looks of the country through which he passed and believes it offers great opportun-ities to the prospector.—Tonopah Miner Secy. M. C. Morris, of the Galena Mining company, operating in the Bea-ver Lake mining district, Beaver coun-

ty, has received some splendid samples

of ore from that property, two of which assayed, showed values of 71.5 per cent lead and 21 ounces silver, and 56 per cent lead and 41 ounces silver, respect-Seven bars of bullion, the result of the first clean-up of the Midway mill, will be shipped in about 19 days to the mint. The bars run about \$1,000 each and are from ore taken out of the Tamblyn lease on the Mizpah. This will be the first shipment of bullion ever made from Tonopah by home working, but it

is the forerunner of millions to come.

Tonopah Bonanza. An exchange says of John W. Gates: "I cannot sell stocks short. I could not sleep a wink if I did, for fear of being cornered, even if the capital stock amounted to 100,000,000 shares. The steel business will recover slowly this year from its depression last year. am new prepared to carry more stocks than I ever held before. There is plenty of bull enthusiasm in this country when it is once aroused."

LOCAL MARKETS.

There is a slight decline in butter, and 35 cents is now the highest ruling figure. Pears are out of the market, carrots are selling at 20 cents per peck, sweet potatoes at five cents per pound. and turnips, parsnips and beets are in the market. Standard oysters are due to the beds being frozen over, and the blocking of harbors with ice. ever, prices here have not yet risen. The prices obtaining today in the local retail markets are as follows:

STOCK MARKET

It Was Narrow and Irregular, Trading Moderate and Losses Predominant.

SOME RALLIES AND REACTIONS

They Alternated- Many Leaders That Have Been Up Go Down

New York, Jan. 28.-The opening stock market showed great irregularity within narrow limits and on a moderate volume of trading. Different members of the Pennsylvania group the Pacific and the fron and steel industrials moved in contrary directions. Stocks were sold freely and general losses ran from 1/2 to %. while Sugar, United States Steel preferred, Tennessee Coal, Consolidated Gas ai Baltimore & Ohlo suffered from 1 to 15. Atchison and Illinois Central offered good resistance, rising a large fraction and featly preferred gained over a point. The market was steadierin tone at 11 o clock and became dull at the rally Nashville, Chattanoga & St. Louis and Wa-bash preterred advanced 2 points, Selling was renewed before the raily had

bash preferred advanced 2 points.

Selling was renewed before the raily had made any headway and the grangers, racines, coalers and Wabash preferred showed losses of a point or more. Pressure relaxed in a duil period of trading which followed but the market showed little raily power.

Bonds were heavy at noon.

The inability of the buil laders to force the raily encouraged more aggression by the bears and prices yielded to a lower level ah around. St. Fam and Sugar extended their losses to 1½ and baltimore & Ohio and United States Steel preferred to 2. Amalgamated Copper and Missouri Pacific, which had received some measure of support later also ran off a point.

Kaliles and reactions alternated in a small way. Selling was concentrated at intervals against important market leaders such as Pennsylvania, Rock Island, St. Paul, Sugar, United States Steel preferred and Amalgamated. The low prices indicated losses quite generally of a point or more and approached 2 in some half dozen favorites.
