FOREST GRAZING PERMITS.

Increases and Reductions for 1908 on Uintah Reserve.

Special Correspondence.

Provo, Utah Co., Nov. 14.—The following circular has been issued by the forest service of the department of agriculture, respecting sheep grazing permits on the Uintah forest for the coming year:

The allotment for sheep grazing on the Uintah National forest for the season of 1908, based on the number of grown sheep grazed in 1907, (with the exception of the allotment for districts 18 and 19) will be about as follows:
All permits for less than 1,000 head will be increased 20 per cent, provided that this does not in any case increase the number to more than 1,100 head.
All permits for from 1,000 to 1,400 head may be increased 10 per cent, provided that this does not advance them to over 1,400 head.
All permits for from 1,400 to 2,000 head will be renewed without reduction in number.
All permits for from 2,001 to 2,000 head will be reduced 5 per cent, provided none are reduced below 2,000 head.

All permit holders on districts 18 and 19 will be given the same reduction as permit holders on other districts.

On account of the range being fully occupied on all nearby districts and it is found necessary to reduce all large grazers in order to provide for an increase for the small grazers, but very few grazers will be considered the coming season, each one granted a permit being given a limited number and none to exceed 500 head. As all the nearby range is already occupied by regular users of the forest, any new grazers who are considered will be allotted range in the head of Lake Fork, Rock Creek, and districts 6 and 7 on the Wyoming slope. No new grazers need, therefore, make application for or hope to secure range other than that above described.
