Seven Troughs-500 at 68. COMPANIES FILE AFFIDAVITS. The last legislature of the state passed a law imposing a license on corporations and a number of organiza-tions, who claim to have ceased doing business, have filed affidavits in the office of the secretary of state to that hree such affidavits were filed and tificates issued yesterday. The spanies are the Pinyon Ridge ing the ing Company, organized un-the laws of Maine; the itimore Mining company, incorpor-d under the laws of Utah in 1882, i the Magnolia-St. Louis Mining apany, a Nevada corporation.

UTAH CONSOLIDATED

effect.

respondent of a Boston Concern Writes About Bingham Mine.

Writes About Bingham Mine. Under date of the 3rd inst. a cor-mondent of a well known Boston okerage firm writes his home office out Utah Consolidated and among her things is quoted as saying: T have been making an investiga-n of the affairs of the Utah Con-idated, the results of which tend to stain the calim that the Highland by values have faulted into the Yam-, owned by the Tintic Mining and velopment company. A tendency to-red declining values was in evidences th increasing depth, though evidences re not lacking indicating a second y enrichment. * The Utah Con-idated has never sunk a shaft, but y enrichment. * The Utah Con-ldated has never sunk a shaft, but the other hand has drawn upon its lues through tunnels to the eighth el, though but little ore has been ned below the seventh level. * the Utah Conselidated has commenced a sinking of a working shaft in the pestone formation, the purpose of tich is to tap the formation for min-to such denihs as will prove profit-le. A second shaft is likely to be urted later. This shaft is to be pow-fully equipped and unless the ten-ney of values changes, will command dency of values changes, will command a lower average grade of ore than is now being treated by this company."

DOUGLAS COPPER.

New Smelter Will Be Blown In Some

time In October.

New York, July 17.-Theodore Douglas, president of the Douglas

Copper company, has returned to New

York after several months spent in ex-

amining the properties of the company

in the state of Sonora, Mexico. He reports that the 23-foot vein of rich ore that recently was struck at El Cobre, while sinking an air shaft, is even richer than first supposed. Its ore values easily will average \$30 to the term

the ton

"Our new smelter, now being com-pleted at Fundicion." said Mr. Douglas "will be able to smelt 300 tons of ore per day, and figuring copper at 20 cents a pound, \$30 ore, with liberal deductions, ought to leave us a profit of \$18 net, or \$5,400 in United States money daily on 300 tons smelted. Fig-wring 25 days to the working month, the results would be \$270,000 in two months. As we expect to blow in' the smelter in October, we ought to have this revenue before the end of the year. The figures look large but they are correct."

WHEELER SHIPMENT.

Initial Car Load Now On Way to Local

Smelters.

Mines company is expected in Yering-ton today or tomorrow for the purpose of attending the shipment of ore from

the mine, says the verington Times

ELY CONSOLIDATION.

LUDWIG LOOKS FINE.

This Property is Proving to Be a Valuable Nevada Douglas Acquisition.

A report received today from the superintendent of the Ludwig mine of the Nevada Douglas Copper company

at Yerington, Nev., shows that at the close of the week ending on the close of the week ending on the twelfth instant there were 225 tons of ore in the mine bins and at the sta-lion ready for shipment, that aver-aged 14 per cent copper. This ore was taken out principally during the reg-ular course of development, as over two-thirds of the force employed in the mine is engaded in doing ex-mination work the El Salto mill at Ocampo to treat the ores of its mines in that district. The mill consists of 20 stamps and two Bryan crushers, with a total ca-pacity of 75 tons daily. A cyanide plant also is to be added.

CONCENTRATES.

George E. Gunn has zone to New York on mining business. He left for the east yesterday.

The labor trouble in the Seven Troughs district has not yet reach-ed a settlement.

William Hatfield was in the city sterday afternoon from Provo on yesterday aftern mining business.

George R. Smith, purchasing agent of the Bamberger mines, and bride, have returned from a trip east. Ernest Bamberger of the Daly West

and Ontario mines, is in Park City looking after the interests of those corporations.

Several mining claims belonging to the Mountain Lake Mining company near Alta are being surveyed for patent.

The ore and bullion settlements re-ported late vesterday by McCornick & Co. were: Crude ore and concen-trate, \$42,000; base bullion, \$10,000.

Engineer R. S. Oliver of the Utah Apex and Utah Development compa-nies of Bingham, is in the city to con-fer with Manager Walter C. Orem,

General Manager L. Hanchett of the General Manager L. Hanchett of the Newhouse mines is showing W. R. Ingalis, editor of the Engineering and Mining Journal, the Boston Consoli-dated properties today.

dated properties today. Supt. W. N. Rossberg of the Carisa and other mines under the manage-ment of Sidney Bamberrer, has re-turned from a trip to Tintic. He vis-ited the Colorado mine a few days ago and declared today that there is no mistake about it being a very big proposition. There is a world of ore, he declares, developed in this prop-erty. erty. The Osborn Consolidated Mining

The Osborn Consolidated Mining and Milling company of American Fork filed a copy of its articles of incorporation with the secretary of state today. The capital stock of the company is \$125,000, divided into shares of the par value of 25 cents each. S. Osborn is president; W. D. Loveless, vice president; A. J. Osborn, secretary and treasurer. Engineer V. P. Strange has return-ed from a trip to the Contact, Nevada, district. He says there is no doubt about it that some good copper mines will be developed there, but the great-et drawback to the development of the country at the present time is the price at which claim holders are ask-ing for their property. There is lit-tle inducement for the investment of capital under such conditions and there are very few people now-a-days who are willing to pay mine princes for prospects.

princes for prospects.

The graders have reached a point in Condor canyon above Panaca and in Condor canyon above Panaca and are making very rapid progress. The track laying outfit is now between Yoacham's ranch and Panaca, with prospects of reaching the latter point by July 24. True, much discussion is heard of the time that will be re-culted to complete the rock work in the canyon, but those in a position to know and who have inspected the the canyon, but those in a position to know and who have inspected the route of late, state that it is not at all difficult and with a sufficient force, which there will be, railroad day for Pioche may safely be set for Sept. 1. Such is the unqualified opinion of the engineers and all those in a position to know.—Pioche Record.

the mine is engaded in doing ex-ploratory work. The report indicates that the prop-erty is showing up very satisfactorily at every point of attack and that a raise from the 500 level has develop-ed a new shoot of ore showing aver-age assays for the week of 7.9 per cent couper

A new ore body has also been de-veloped on the 400 level since the mine went into Nevada Douglas hands. Another ore body has been recently opened in the north drift on the 550 level. Twenty-five tons taken from this portion of the mine within the week averaged 14.39 per cent copper.

SEATS GOING UP.

Seats on the Salt Lake Stock & Mining exchange are now held at about \$2,090. It is understood that a bid of \$1,850 was made for one yesterday.

NEW COPPER DISTRICT.

Big Belt in Northern Nevada and Southern Oregon Being Opened.

What appears to be one of the largest copper belts in the world is the est copper betts in the world is the section extending from the northern boundary of Humboldt county, Nev., for 25 miles into Oregon. This large mineral area commences near Denio and follows the course of the Pueblo mountains. Besides having great length the copper belt is over ten miles wide. A. Lundin, who arrived in Winne-mucca from Denio, says the Humboldt Star. a few days ago, brought in a Star, a few days ago, brought in a large lot of sample of copper ore which he will take sast with him to place on exhibition. The samples all show a good percentage in the red metal, be-sides carrying fair values in gold and silver. silver

the mine, says the Terington Times. The present ore developments in the Wheeler are said to be all that could be desired, and the company expects to be able to ship two carloads per month from the mine from this time on. The first car has started for the Sait Lake Smelters, and from a gold value standpoint it is expected to illustrate how finely the management is being rewarded at this time. It will be re-called that the Wheeler recently showed a fine chute of very high grade gold rock, and as work proceeds upon the same, it maintains its value extent satisfactorily. quotations on Nevada mining stocks from San Francisco today.

Plans Being Worked Out in the East By Copper Magnates.

A Boston dispatch indicates that daily conferences are being held by the Gug-genheim-Thompson-Phillips interests in conferences are being held by the Gug-genhelm-Thompson-Phillips interests in an endeavor to react an agreement in turning over all the big companies of the Ely, Nev, camp to the newly-formed Consolidated Copper companies. So far the only company taken over has been the Ely Mines company. This was taken on the basis of three shares of the Ely Mines. It is probable that Nevada Consolidated will go in on the same basis, with two and a hait shares of new stock for each share of Cumber-land Ely. There will be no insmediato attempt to take over the Utah Copper company, although it is planned to have the Consolidated Copper company eventually control the porphyty depos-its of both Ely and Bingham compa-nies. An attempt will be made to take over the Boston Consolidated. Trading of Consolidated Copper in the London of Consolidated Copper in the London market will be done in one pound shares. It is also planne to make a market for it in Paris and Berlin.
