SETON THOMPSON LECTURES

Famous Animal Student Talks This Afternoon and Again Tonight.

This afternoon a large and enthusiastic audience of children interspersed with many grown people, listened to the lecture on animals by the famous artist, author and lecturer, Ernest Seton Thompson.

Mr. Seton was introduced by Mrs. Susa Young Gates in a few appropritae remarks and proceeded at once to his lecture, opening with a brief explanation of the motive of his talk. Animals, Mr. Seton said, all had their individual entity, and no human being had any right to interfere with their happiness in any way whatsoever. Mr. Seton said he had made a study of the life of ani-mals and knew them to be possessed of both an intelligence and character-istics which should be respected. He then proceeded to give most delightful sketches of different animals, invest-ing each one described with a person-

ality that made it quite human, his audience manifesting the interest aroused by his clever talk in an unmistakable way. The lecture throughtout was illustrated with stereopticon views of photographs and pen sketches by the author, which lent a delightful flavor to the descriptive talk made by the author. lecture throughout was most entertain-ing, and proved Mr. Thompson to have the same talent as a talker that has made his name well nigh world-famous as a writer. Tonight he will lecture on "Wild Animals I Have Known." and the large sale that has already taken place promises a large audience
