

Correspondence.

Cattle Driven Off—Men Missing.

GLENWOOD, Sevier County,
June 28th, 1877.

Editor Deseret News:

Dear Sir—I started out, in company with four others, on the 10th of last November, with the expectation of going to New Mexico. We crossed the Green and Grand Rivers, where we found a fertile valley, and thought it a good place to winter our stock, as we had some over two hundred head of cattle and horses. After fitting up suitable winter quarters, three of us returned home, leaving George and Cyrus Green, two brothers, in charge of the stock, and in the month of March I sent out two men with a supply of provisions. On their return they reported all well. In the month of April a company of men, with a herd of stock from Castle Valley, went to Grand Valley, and found the camp of the Green boys vacated, and the stock run off. It was supposed to have been by Indians, as they found in going up the valley several head of stock killed, and one mule with his throat cut. They immediately brought word back, and I, with a company of fifteen men well armed, started out to Grand Valley to reconnoitre the country and find out what was the matter. When we arrived in the valley we went to their cabin and found it deserted and their guns broken in pieces and everything carried off. The next day we travelled up the valley and found cattle all along the trail, that had been killed. We travelled a distance of about fifteen miles, where the Indians made their first camp. There we found one gun broken in pieces and several head of stock killed. We searched in vain for the boys and no trace of them could be found. I would have made further search, but the rivers were on the rise and we were obliged to return. As soon as the rivers are down, I am intending to renew the search for them. I have delayed having this published before, in hopes of hearing something respecting them, and I now forward this for publication.

George and Cyrus Green were born in the Eastern States, but I do not know to what State they belonged. I wish the eastern papers to copy this, that the relatives and friends of the above two men may learn of their fate.

For further particulars address
NATHAN PIERCE,
Glenwood, Sevier County, Utah.

Hot Weather—Good Crops—Jail Escape, etc.

ST. GEORGE, Utah,
July 1st, 1877.

Editor Deseret News:

The weather here is extremely warm, with more hot winds from the sandy deserts than usual. The state of the weather causes some sickness, though there are no serious cases that I am aware of.

Presidents McAllister and Eyring returned last Friday from their western tour. The former preached a long sermon this morning, giving an account of their trip. They report a good spirit among the Saints in both Utah and Nevada.

Fruits are beginning to ripen, wheat is mostly harvested. The farmers report good crops, above the average for Dixie.

"Baon," a noted thief, "dug" out of the county jail a few nights ago, making his escape. Some efforts were made by Deputy A. P. Hardy to recapture him, but without success.

AMRAM.

THIRD PAPER.

Earthenware—China—Glass—Our Industries, etc.

Editor Deseret News:

It is necessary, to secure the highest social conditions, that we should not only be nearly self-sustaining, but that all the necessities of life be cheap and easily accessible, that is, in profusion.

There are three classes of industry indispensable to this end—the farmer, the miner, and the manufacturer. All these vocations are mutually dependent. Their harmonious development ensures the success and weal of all.

The farmer produces food, the miner raw products, the manufac-

turer tools, machinery, and the appendages of civilized life.

A lack of farmers renders food scarce and dear. A lack of raw products precludes manufacture, and the possibility of supply in tool, machinery, or other goods.

The balance thus destroyed brings in its train idleness, poverty, and peradventure crime among the masses of the population, and all the social body suffers. These unequal conditions exist among us to-day, nationally and extensively locally. How shall we remedy his prostration? is the anxious inquiry of the time. Even among us in Utah, thousands of young men and young women and maturer persons are seeking employment. It is imperative on us to supply it. Our social condition demands the earnest endeavors of all in application of means to relieve the pressure.

Our farming interests are prosperous. Food is plentiful, cheap and good.

Our mining interests, though only partially developed, are supplying many staples, are prosperous so far as developed. Gold, and silver are being produced in plenty, but these are only valuable so far as they tend to develop and equalize other industries. Their too great production, without the others, ultimately tends rather to deteriorate or destroy. Mexico and Spain are most fearful examples to this point.

Our manufactures—ah! there's the rub. There has been no determined systematic effort, wisely applied, for their general introduction, or only in a solitary instance or two. They are far from prosperous. We are to-day in the condition of a man constantly bleeding at an artery, not seeking to staunch the blood, and having little food to produce more of the life fluid.

How long shall these monstrous and anomalous conditions continue? How long shall we be blinded to our folly? Millions of dollars are being drained from us for imports of all kinds. When our true interests require only to be imported those things we have not the means or raw products to produce at home.

The manufactures designated in our heading, next to food and clothing, are among the most important and most necessary in every department of life, and the materials are perhaps as abundant and accessible and good as elsewhere. We all want glass for windows, and many other indispensable uses. We have an abundance of the purest silica occurring in veins, mineralogically called granular quartz. This is almost glass to begin with. We have also fine sands. These sands and quartzites are about ninety per cent. pure, the other components being mostly lime and alumina, and therefore not detrimental; our smelters produce unlimited supplies of oxides of lead. We have also abundance of the alkalis. Soda and potashes can be obtained, as elsewhere, from vegetable combustion. The other wants for glass-making are few. Thus we have all the necessary raw products for this manufacture. We have every facility to rival Pittsburg at our doors.

Our imports of glass foot up some \$500,000 annually, and we are in a centre, to tap the trade of this mountain region, and even to encroach on the east and west. In the matter of labor all know its cheapness and abundance. We have no long transportation to pay, that cost alone being a handsome business profit. Here is a chance to realize for moderate capital an immense fortune.

Considering our favorable position and resources, our own and the wants of all the neighboring territories, here is an opening for "What shall we do with our Boys?"

OSMOND B. SHAW.

Error—Big Fire—High Winds and Dust.

RICHFIELD, Sevier Co.,
July 4, 1877.

Editor Deseret News:

I wish to correct a mistake in my last news from the Richfield U. O. I stated that every department of business in the U. O. was taking care of itself, etc. I have been told just now that such was not the case. I had been told by some friends, who should have known better, that it was so, whereas it is only on debate and not decided as yet.

A great fire has been raging in the mountains south of Richfield

these past few days, and huge clouds of smoke were rolling over the valleys. At present the fire seems to have gone down.

Great winds from a S.S.W. direction have prevailed these past two or three weeks, raising clouds of dust, sometimes mountain high. In fact Sevier Valley is subject to periodical high winds in the month of June and early part of July.

Hoping you will excuse my error, I am respectfully yours,
HENRY EDWARD DESAULES.

P.S. Since writing the above I have learned that the mountain fire attacked the United Order sawmill, and the employees had to hasten to bury the most combustible valuables in the creek and then run away to save their lives, leaving the fire to devour the sheds, lumber and other timber that was around. This will be a great loss to our community.

The smoke was seen to issue again from the cañon this afternoon, but has now abated.

Thermometer 78 degrees after sundown.

Respectfully, H. E. D. S.

A Sure Cure for the Piles.

A sure cure for the Blind, Bleeding, Itching and Ulcerated Piles has been discovered by Dr. Williams (an Indian remedy), called Dr. Williams' Indian Ointment. A single box has cured the worst old chronic cases of 25 and 30 years standing. No one need suffer five minutes after applying this wonderful soothing medicine. Lotions, instruments and electuaries do more harm than good. Williams' ointment supports the tumors, gives instant and painless relief, and is prepared exclusively for Piles, and nothing else. Over 20,000 cured Patients attest its virtues and Physicians of all schools pronounce it the greatest contribution to medicine of the age.

WENT TO THE NOTED HOT SPRINGS.

Cleveland, O., Dec. 27, 1876.

DEAR SIR:—I suffered more or less for years with the itching or ulcerated Piles. I tried remedy after remedy advertised in the newspapers, and consulted physicians in Philadelphia, Louisville, Cincinnati, Indianapolis, and this city, and spent hundreds of dollars, but found no relief and comfort until I obtained a box of Williams' Indian Ointment some four months ago, and it has cured me completely. I had a part of the box left which I gave to a friend of mine who had doctored with many physicians without relief, and as a last resort went to the noted Hot Springs, of Arkansas, for treatment. He informs me that the Indian Ointment has also cured him of the piles. It is certainly a wonderful discovery and should be used by the many thousands who are now suffering with that dread disease.

JOSEPH M. RYDER.

For more certificates of cures see large circular around each box of ointment.

\$10,000 REWARD

Will be paid for a more certain and sure remedy. Sold by all the leading Druggists and country storekeepers everywhere. Warranted a sure cure or money refunded. Beware of imitations. Ask for Dr. Williams' Indian Ointment, and take no other. Depot, 338 Superior Street, Cleveland, Ohio.

C. Godbe, Pitts & Co., Wholesale Druggists, Salt Lake City, Sole Agents for Utah.

SALT LAKE CITY IRON WORKS,

One Block South of U. C. R. R. Depot,

T. PIERPONT, Supt.,

Are now prepared to manufacture and repair all kinds of

Steam Engines, Boilers, Mining, Milling and Hoisting Machinery, Agricultural Machinery, Mowers, Reapers, Threshing Machines, &c., &c. Iron and Brass castings of any description made to order.

CASH for old Cast Iron, Brass, &c.

\$80 A MONTH SALARY IN ADVANCE and expenses paid. Address John S. & Co., 119 Nassau St., N. Y.

KINGSFORD'S OSWEGO STARCH

Is Perfectly PURE—free from acids and other foreign substances that injure Linen.

W 13

The Frazer Axle Grease

Is now recognized as the

Standard Axle Grease of the United States.

Is sold in every State and County in the Union, and is to-day without a rival. So universally is this fact recognized that numerous imitations have been made, all claiming to be as good as the FRAZER, thus virtually admitting its superiority. Some imitators even using the name to palm off a spurious article; yet, as every package bears our trade mark, dealers and consumers will be able to distinguish the genuine from the imitation, and thus protect themselves against the intended fraud.

For sale by all dealers.
FRAZER LUBRICATOR CO.

BAIN WAGONS!

Oliver Chilled Plows! Moline Plows!

Cultivators, Single and Double Shovels, Harrows, etc., etc., etc.

WISNER 95

"TIGER" SELF-OPERATING SULKY HAY RAKE,

Wood's Reapers and Mowers,

Buggies and Light Spring Wagons, Wagon Material and Hardwood Iron, Steel, Horse and Mule Shoes.

All of the above standard goods and many more can always be found and SOLD CHEAP FOR CASH, at

FIRST WAGON DEPOT

South of the Theatre.

HOWARD SEBREE,

Salt Lake City, Utah

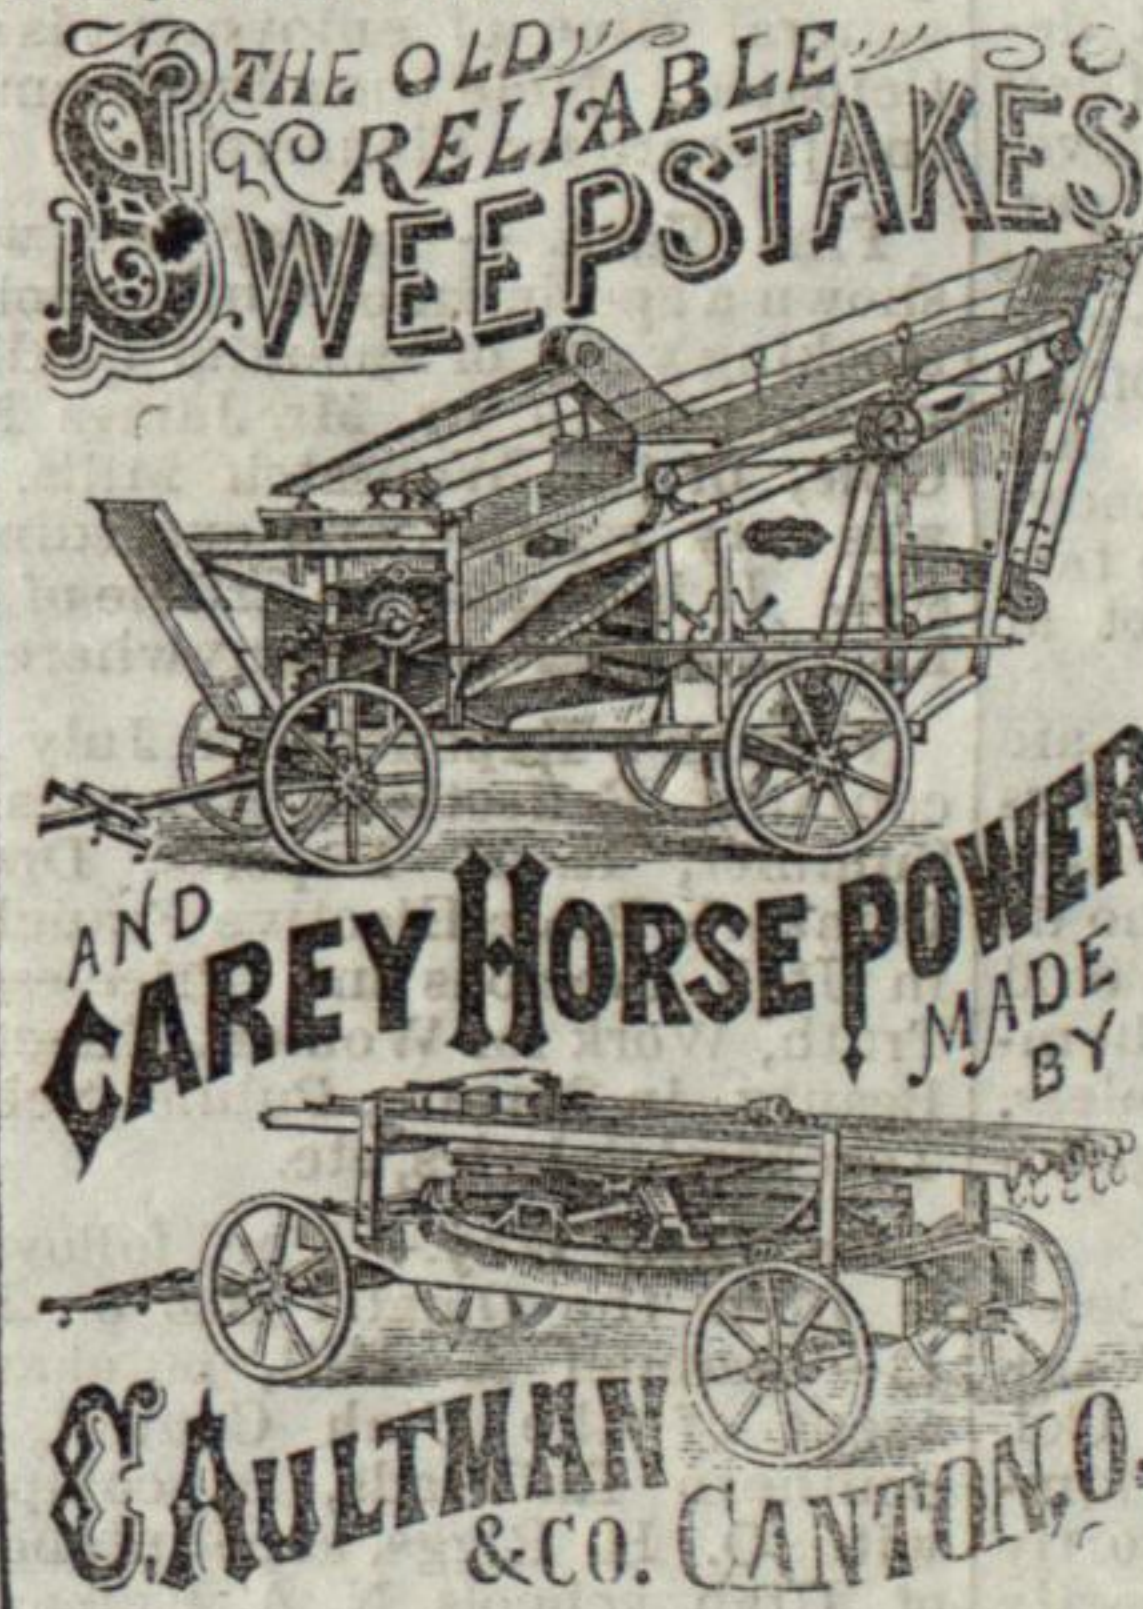

SCHUTTLE WAGONS.

MY Stock of these justly CELEBRATED WAGONS is complete, embracing every size and style of Farm, Spring, Freight and Ore Wagons, all of which are constructed in the most improved manner, with all the latest improvements of thoroughly seasoned stock, and each wagon is fully warranted by me for ONE YEAR, both as regards Quality of Material and Workmanship.

I HAVE ALSO ON HAND A FULL STOCK OF THE

NEW BUCKEYE MOWERS AND REAPERS,

Which are now constructed entirely of Iron and Steel, with the exception of the Tongue and Doubletrees. These machines are simpler in construction, more durable, lighter in draft, and in every way calculated to give better satisfaction than ever; the rearing is all covered and protected from the dust, and they are, without a doubt, the best machines in the market.

SWEETSTAKES THRESHER.

The leading machine of its class in the market; constructed from the best material, and with new improvements, has enlarged riddles, and elevators, belt tighteners, etc. The Sweetstakes Machines which I sell in Utah, are built expressly for service in this country, and are warranted to give entire satisfaction in every respect. My stock of Hay Rakes, this season, will include the

Furst & Bradley Sulky Rake,

Furst & Bradley Self-Dumping Sulky Rake,

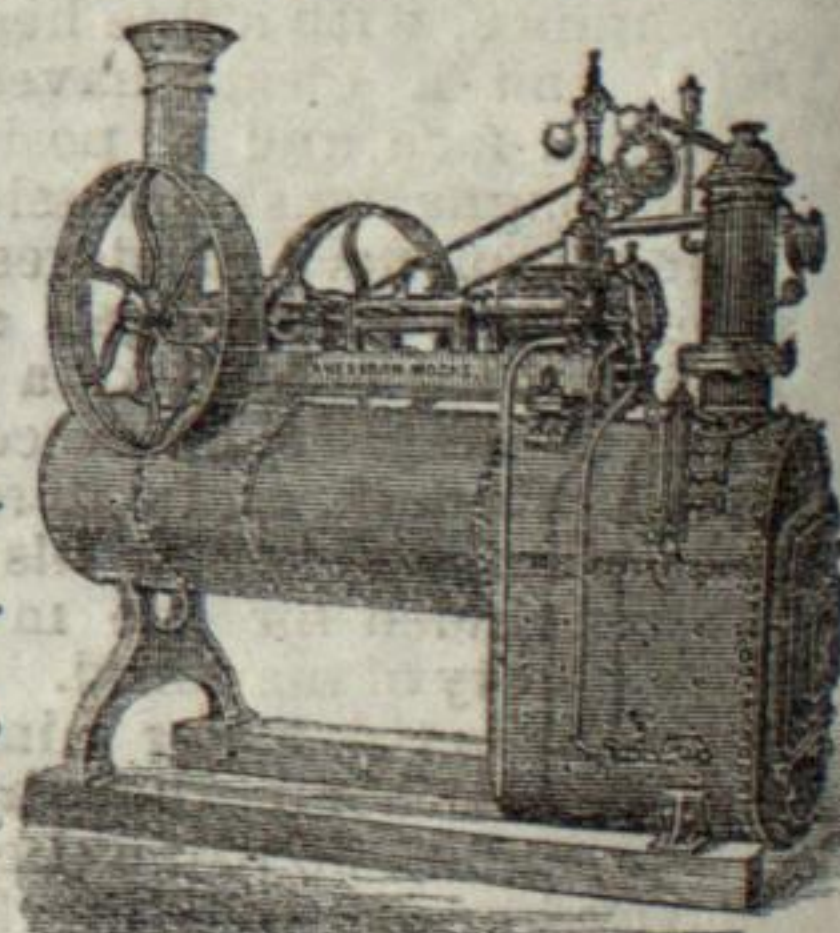

Archer Self-Dumping Sulky Rake.

All of which are First Class, and practical use will prove them the Best Rakes made. Having the Agency of the

A. M. E. S.

Steam Engines.

Known everywhere as the leading Engine manufactured, I offer them at factory prices and actual freight added, upon which terms of price I also sell the best makes of

TURBINE WHEELS.

I keep in stock at all times, a full line of Gang, Sulky and Walking Plows, Riding and Walking Cultivators, Grain Drills, Combined Grain Drills and Water Furrows, Harrows, Corn Planters, Single and Double Short Plows, Hay Presses, Feed Cutters, Old Mill, Iron, Steel, Spokes, ellies, Harrows of all description, Horse and Mule shoes, Horse Nails, Bolts, Etc., Etc., and full line of repairs for all machines I sell. For circulars and all desired information, address

GEO. A. LOWE,

Salt Lake City, or Corinne, Utah.
