

MINING, BUSINESS AND STOCKS

IDAHO DISPLAYS VALUABLE NUGGETS

Interesting Features in Connection With the Mineral Exhibit from the Gem State.

ALL CLASSES OF ORE SHOWN.

Specimens Brought from Various Camps—Products of the Orchards and Farms.

Idaho is getting herself talked about at the world's fair. No state makes a more interesting display of products in agriculture, horticulture, and mining than does the Gem State of the Mountains.

Other states have spent more money in displaying their charms; they have erected more costly state buildings, have used more gold leaf on their exhibits, and have covered more space on the floors of the exhibit palaces; but no one can see the Idaho exhibits in the departments named without recognizing the fact that Idaho has something worth one's while to investigate. The state legislature appropriated but \$50,000 for the display, but the commissioners have made every dollar count. In the mines exhibit there are ores shown that would sell in the market any day for \$200 a ton.

This mining exhibit is particularly alluring. In one pyramid of ores there is one huge nugget. It is a silver nugget that weighs more than five tons, is 200 ounces of silver in it, and 60 per cent of lead. There is another nugget in the same pyramid that weighs four tons. These nuggets come from Wallace, Idaho. The Halley mines furnish even a rich nugget. It weighs 2,000 pounds, contains 240 ounces of silver, and is 70 per cent lead. There are shown 170 samples of copper, and some specimens show as much as 40 per cent pure copper.

The gold nuggets are peculiarly attractive. These are chunks of pure gold just as they come from the placer mines. The beautiful gems from Idaho have been admired by all world's fair visitors who have seen them. There is the oval garnet, opal, topaz, amethyst and turquoise. They are displayed in all conditions and show that the artistic was not forgotten when nature formed the great northwestern state.

A large sign in gold letters on the wall of the mining booth shows Idaho's mineral output for 1903 to be as follows:

Gold \$2,088,992.76
Silver 9,318,886.41
Lead 9,386,213.13
Copper 236,954.01

Total \$21,128,147.31
Superintendent McBride was ready for visitors on the opening day, and Idaho was one of the six states to have all mineral exhibits in place when the world's fair opened.

HORTICULTURE NOT FORGOTTEN.

It was in the palace of horticulture that Idaho most surprised visitors who were unacquainted with that state's wonderful resources. On the opening day Superintendent Wessells displayed 206 plates of apples, covering 25 varieties. The miniature display of the delicious fruit caused every passer by to pause and admire. The winesaps were large and red; the Arkansas Blacks were apparently carved from ebony and were of the size of a peach; the Wolf River was so large and so vividly red as to cause wonderment. Then there was the Banana apple, the White Winter Pearmain, the Rome Beauty, the Newtown, the York Imperial and the Ben Davis. All were developed to the highest degree and demonstrated that apples raised on the high irrigated lands of Idaho, with its fertile soil and wonderful climate, can not be surpassed anywhere. After making this big display on the opening day there were yet a thousand boxes of apples in cold storage and these will last until fresh fruit comes to replace it.

AGRICULTURE A FEATURE.

"The Gateway to Idaho" is the design of a monumental arch that attracts attention to the state's display in the Palace of Agriculture. Here is shown in charming array everything that the wonderful soil can produce. The background of the design is green and black, and the white straw and the green grass show to wonderful advantage. In Idaho the rainless summers bleach the straw to an ivory white and cure the grasses and alfalfa, permitting them to retain their vivid green color and all their nutrition. Great sheafs of dazzling white wheat, oats and flax go to make up the design, reaching to the archway. On the walls are seed boxes showing the threshed grain beneath the sheaves, so that one can examine the grain from every standpoint. Corn is pouring forth their wealth of products from the fields.

Above the archway is the word "Idaho," formed of the seed of blue grass, millet, turnip and wheat. The letters are of rustic design. The south end of the booth is built of dried fruit, great smooth, black prunes being the columns, and the decorated being in dried peaches, apricots and apples. Elsewhere are shown the garden products. There are potatoes and beets of wonderful size and unsurpassed quality. There are Spanish onions, raised on irrigated land, that have a circumference of 24 inches. Hanging baskets made of ears of corn with the husks turned back for the baskets are suspended between the posts. There are festoons of grains and grasses so gracefully placed as to make the whole display resemble some mammoth show of exquisitely wrought embroidery.

WIDE OPEN TO VISITORS.

The portals of Idaho's state building were wide open to visitors on the opening day of the fair, and they have not been closed. The key is lost. The latch string is on the outside, and a true western hospitality is extended to all visitors, be they from the west, east, north or south. The Idaho bungalow has elicited much praise. It is a square building with all of the rooms opening on a square court in the center. The men's rooms are all finished in the natural woods of Idaho, and the decorations are mainly of Indian curios. The women's part the furnishings are elegant and tasteful. The visitor from Idaho is reminded of the beautiful scenery of his own state by the transparencies that take the places of clear glass in some of the windows. These scenes show the grand mountains, lakes and rivers of Idaho, with some splendid views of the famous Shoshone Falls, the marvelous Twin Falls, and scenes

from ranches and views of homes in Idaho cities.

BUYS MILL EQUIPMENT.

Columbus Consolidated Mining Company has purchased the equipment belonging to the Tesora mill in Tintic and will transfer the same to Alta in the near future to be made use of in the mill the construction of which will commence about June 1. The Tesora plant was operated only a short time and the machinery was left in an excellent condition. It contains five Wilfley tables, two Huntington mills, pigs, etc.

VISITED THE FAIR.

Frank B. Cook, the well known mining man, returned last evening from a business trip to Chicago, accompanied by his wife. On the way home they stopped off at St. Louis and, of course, took in the sights of the world's fair. Mr. Cook speaks well of the Utah exhibit and says the mineral display, particularly, compares favorably with the exhibits from other mining states.

AT GUFFY-GALEY WELL.

Supt. Rumbaugh is now putting in the six-inch pipes.

Alexander Rowland, son of C. K. Rowland, was at the Guffy-Galey well at Farmington yesterday afternoon, where he found Superintendent Rumbaugh making good progress again with the drilling operations. The six-inch pipe is being put down.

EXPERTS STILL AT WORK.

The Manhattan at Pioche Being Subjected To Exhaustive Examination.

Prof. George W. Maynard, and his corps of assistants, is still at the Manhattan mine at Pioche conducting a most exhaustive examination of that property. The party will probably spend another week there before proceeding to the Comet and Imperial properties in Beaver county.

In the meantime, those interested in seeing the Monarch company successfully launched, are anxiously awaiting results.

CONCENTRATES.

Lafayette Holbrook of Provo was in the city today.

Manager Ed Loebe of the Grand Central has gone to California.

Manager G. H. Dem of the Con. Mercur is at that property today.

The Ohio Copper company marketed several cars of ore today.

M. R. Pont expects to leave during the present week for Seattle on mining business.

Charles T. Harte, editor of the Milford Times, came up from Beaver county yesterday.

Supt. A. O. Jacobson of the Columbus Consolidated mines at Alta is in the city for a few days' vacation.

Eastern officials of the Shawmut company with interests at Bingham are expected to arrive shortly.

George D. Blood has returned from city of Montana today, and is en route to the mining camps of old Mexico.

Drifting west on the contact on the 400-foot level of the New York Bonanza mine at Park City is still in progress.

The ore and bullion settlements reported last yesterday were as follows: Crude ore and concentrates, \$70,700; base bullion, \$29,300.

W. S. Hayt, who is interested in the mines of Park City, is enjoying a visit from his father, who arrived yesterday from Michigan.

W. R. Smith, manager of the Contact Copper mine near Nevada, Nevada, expects to leave for that property again tomorrow morning.

Manager Rhodin of the American Flag mine of Park City came down from camp last night. He stated that shipments of ore would be resumed today.

Manager Rhodin says there are between 1,200 and 1,400 sacks of high grade ore piled up at the hoisting works of the American Flag mine at Park City.

Manager Tony Jacobson of the Columbus Consolidated is the possessor of a new steam engine, which he has just hauled to town with it last Sunday, going as far as Sand.

Mr. S. G. Skidmore, the electrical engineer, will accompany the members of the city council to American Fork tomorrow to examine the power plant of the project of Messrs. Galt & Son, of Logan, Utah.

James P. Buntin has returned from a trip to Mexico, where he went to look over a promising mineral and agricultural region for a local syndicate. He was accompanied by Adam Patterson of Ogden.

Mr. S. G. Weston left yesterday forenoon for Montana, where he goes to inspect the new strike in the interest of Capt. DeLamar, who would like to bond the property if as good as reported.—Elko Free Press.

A new feed water heater was received for the King Con. company this week. The device is arranged so that the exhaust steam from the engines heats the water before it enters the boilers, and is quite a money-saving machine. It will be taken to the mine as soon as the roads will permit.—Park City Record.

Owing to an accident to the drum and steam chest of the new hoist at the Montana-Tonopah mine, says the Bonanza, the working force at the mine was taken off at noon on the 26th inst. Until the extent of the damage has been ascertained it is impossible to say when operations will be resumed. Some heavy shipments of ore have left the mine the last few days.

Manager C. H. Doolittle of the Utah & Eastern Copper company is up from that company's properties in Washington county, Ariz. confirms the report brought to the city recently of an important strike of copper at a depth of 775 feet. A shipment of copper bullion sent over the new road to Acoma, New, for loading onto the cars of the San Pedro, has arrived at local samples.

Dancing, Saltair, Wed. eve., May 25th.

INVESTORS LOOK TOWARDS MINING.

E. Everett, an Oregon Mining Man, Found Some Favorable Conditions in the East.

AFTER NOMINATIONS ARE MADE

By National Parties Vaults Will Be Opened and Mining Investments Eagerly Sought.

E. Everett, a well known mining operator of Baker City, Ore., is in the city today enroute home from a trip to Philadelphia where he had occasion to mingle with many of the kings of finance.

Mr. Everett predicts that big things are in prospect for next year for the mining regions of the west. There is plenty of money for investment, Mr. Everett says, now locked up in the banks of the country, but the owners of it are not going to let it out until after the presidential nominations are settled. After that, he believes, the money will be poured into mining stocks and mining generally. Investors have had enough of steel and some other industrial stocks and they are going to look towards mining in the future as the safest place for their money and where, when judiciously placed, will bring them the largest returns.

The country is ripe for a general revival in mining, and Mr. Everett anticipates that the year 1905 will be a record breaker.

DALY-WEST GOES UP.

Con. Mercur on the Toboggan—Forenoon Quotations and Sales.

Daly-West was the star actor on the floor of the Mining Exchange this morning. The stock made a sharp advance and was in active demand for a time up to \$23.75 a share. Con. Mercur, on the contrary, was hurled on to the toboggan and sold at 25 cents a share, which was the closing bid. Sacramento continued weak and two board lots were sold under 14 cents a share. None of the Tonopah stocks were brought out, but they all held up firm prices. Boston Consolidated was offered at \$6.25, but no one would meet the price and it was passed over without recording a sale. The closing quotations and sales were reported as follows:

LATE FROM GOLDFIELD.

Developments of Last Week Recorded New Strikes.

There have been rumors during the week of sensational strikes in the Combination. The rumor of the camp, some of the reports stating the ore was plastered with visible gold in a prodigious manner, says the Goldfield News. Another report was to the effect that quite a flow of water had been struck in the shaft. A visit to Manager Collins proved that the rumors were exaggerated, but he stated that it was strictly within the truth to say that the Combination, which has the deepest shaft in the district, never looked before that it does today, and that the average value of the ore bodies recently exposed was greater than ever.

Mr. Collins is ultra-conservative and when the record of the Combination to date is taken into consideration, his statement shows that the mine is doing

Today's Metal Quotations.

Local settling prices as reported by the American Smelting and Refining Company:

SILVER, - - - - 55 1/2
COPPER, casting - 12 1/2
" electro. 12 1/2
LEAD, - - - - 3.50

MAHON WILL NOT RUN.

Secretary of American Mining Congress Will Retire at End of Present Term.

Portland, Or., May 24.—Irwin Mahon, for years secretary of the American Mining Congress, has announced that he will not be a candidate for reelection at the coming convention, which is to meet in this city during August next. Competition for this office is always keen and is expected to be particularly so at the coming convention, which is to meet in this city during August next. The daily output of shipping ore from the main ledge has been nearly doubled of late, and 24 tons were shipped Wednesday, almost twice that amount being still sacked on the dump.

WILL SHARE IN PROFITS.

Local Officials of American Smelters to Receive Parcels of Velvet.

New York, May 24.—Officers of the American Smelting and Refining company will, within a few days, divide \$100,000 in cash among its employees in accordance with the profit sharing scheme announced two years ago. The company is now preparing to divide the cash in proportion to the amount of earnings. Managers, superintendents, assistant managers and assistants, together with foremen, chemists, and a number of others will participate in the fund.

Payment Due Tomorrow.

Tomorrow is the date set for the final payment of \$10,000 on the purchase price of \$100,000 on the property of the Sevier Consolidated properties in Sevier county. The amount will be placed in credit of Charles Lammerford and the balance will be made by Capt. H. C. Lawrence, the manager of the company. The mill at this mine will be placed in commission again about June 1.

IN COMMISSION AGAIN.

The Yampa Smelter Ready to Make Another Demonstration.

With its plant completely overhauled and equipped with the Edwards roasting furnace, the Yampa Smelter company is ready to kindle fires and make the first demonstration with the new devices. It was stated at the offices of the company today that the plant would be placed in commission some time during the day.

GALENA KING SHIPMENTS.

Stockton Company Now Forwarding First Class Ore to Market.

Shipments of first class ore from the Galeana King mine at Stockton have been inaugurated to the plants of the American Smelting & Refining company, while the second class product will go to the Honerine mill at Buhl. The first class will run from 25 to 45 per cent lead, and from 15 to 30 ounces silver.

Jesse Knight Enters Suit.

Suit has been filed in the district court by Jesse Knight against the Richmond & Anaconda Consolidated Mining company to recover \$5,582.39, alleged to be due on a promissory note executed on Nov. 30, 1901.

BULLION FOR THE FAIR.

Utah Commission's Request Will Be Granted by A. S. & R. Co.

The Utah world's fair commission will have no difficulty in getting all the copper and lead bullion it wants to increase the attractiveness of the state's display at St. Louis. Manager Whitley of the American Smelting & Refining company, in this forenoon that it is up to the commission to say just how much is needed and he will see that the bullion is provided. The commission desires the bullion for the purpose of building an arch over the entrance to the Utah exhibit and to have it made out of bullion, the product of the valley smelters, will leave a lasting impression upon the minds of visitors and do much towards spreading the fame of Utah as a mining state abroad.

The bullion will be loaned to the commission until the close of the fair.

Utah Dividend Day.

Tomorrow will be dividend day at the offices of the Utah mine of Fish Springs. Secy. Weiler is busy this afternoon making out the checks which, in the aggregate, will reduce the company's bank account to the extent of \$1,000.

BEARS FORCED MARKET DOWN.

New York, May 24.—The lower prices for Americans in London this morning caused systematic bearishness at the opening here this morning. The market was entirely without feature and the dealings were on a small scale. Bear operators put out additional lines of stocks and forced the market to a lower level. United States Steel preferred fell 1/4 and St. Paul, Missouri Pacific, Union Pacific, Southern Pacific, Pennsylvania, Baltimore & Ohio, Erie, Reading, Amalgamated Copper, Brooklyn Transit and other stocks declined from 1/4 to 1/2. Kansas City Southern gained 1/4 and Wabash 1/2.

The decline reached about a point in St. Paul, Missouri Pacific, Union Pacific, Sugar and other stocks. The selling pressure relaxed but the market fell into dullness and showed no disposition to rally. Chicago Terminal stocks slumped suddenly, the common falling 1/2 and the preferred 3/4.

Bonds were irregular at noon. A better tone prevailed during the middle hour, but there was not enough demand to cause much improvement in prices. Chicago Terminal broke to 4 1/2, the preferred to 4 1/4 and the common slumped 3 points. During the next hour noteworthy transactions were limited to stocks of secondary importance. The liquidation had a depressing effect on prices, which continued to sag.

LIVE STOCK.

CHICAGO.

Chicago, May 24.—Cattle—Receipts, 2,000; market steady to strong. Good to prime steers, 4.50 to 5.00; heavy, 4.50 to 4.75; stockers and feeders, 3.50 to 4.00; calves, 2.50 to 3.00; western cows, 2.50 to 3.00; pigs, 1.00 to 1.25.
