MINING, BUSINESS AND STOCKS.

MENDHA DEVELOPS ANOTHER RESOURCE

Independent Ore Body Encountered 325 Feet South of the Shaft on The 800 Foot Level.

For some time it has been understood that the Mendha-Novada mine at Pioche has been working in a new ore Considerable work has been done and the vein is now opening out in excellent shape. With this new resouropening up the Mendaa new looks bet ter than it ever did, itelative to the new are body at the mine, the Phoche

econd says: Although he was not prepared to say Affining he was not been all case, hever-belies Manager John R. Cook when he came in from the mine Wadnesday hight felt reasonably certain that an-other independent ore body had been encountered south from the shaft 325 feet on the 800-foot level.

feet on the 800-fact level,
"We have broken into something," de-clared Mr. Cook, and he exhibited a specimen of one which gave ontward in-dications of containing good values in lead, silver and gold. "We are just get-ting into it," said he, "and there is every reason to believe that we are right on to an ore body of a good deal of importance."

The south 800 drift, as it is commonly referred to, has penetrated a region litherto unexplored and the discovery of payable ore there is just cause for exultation on the part of Manager Cook and associates. The north drift on the same level is also showing up most encouragingly and the management is backless on breaking into ore from its and the part in a sanking on breaking into ore there in a

Down on the 900 work is progressing as usual in the winze, which is down 25 feet. Here is exposed the bedded fissure referred to in a previous issue of The Record. It is fully five feet wide, is displaying better gold and silvervalues with depth and a recent sampling of the face gave returns of \$15 in gold, 30 ounces in silver and 28 per cent lead. Everywhere in the Mendha conditions

suld not be more satisfactory than at he present time. Ore shipments are saving about the same as usual. STOCK TRADING IS SLUGGISH.

Business on Local Exchange Is Far Below the Standard.

Trading on the local exchange this morning was far below the usual standard, wille prices were fairly steady. The range of the various stocks was nominal and within a few cents. The market seemed to readily absorb any stocks that were brought out.

Colorado was slightly stronger today

Colorado was slightly stronger today nd 1,800 shares were sold at \$1.30 and 1,8256. Columbus Consolidated was quite active, although the prices moved about considerable. The stock sold as high as 78 cents and as low as 75 cents. There was considerable margining of the stock. Iron Blossom was traded in within a range of 4 cents after open-ing at 69 cents. It closed slightly high-

The total number of shares disposed of this morning was 46,466, and the price paid was \$15,216. This was an average of 20 cents a share for the stock sold. On the curb market there was some trading in Federal Ely. This stock changed bands in two 500-abare lots at 125, and 14 cents. A bid of 2½ cents was made for Old American.

GOOD SPRINGS TO BE GREAT ZING DISTRICT

Engineer Asserts There Is Plenty of High Grade Zinc Ore in Various Properties.

Within the next five years I expect to see Good Springs the most active lend-sine camp in the country," says J. B. Jenson, manager of the Ninety Nine Copper company at Good Springs, in a letter to James T. Hammond. Ac-cording to Mr. Jenson there is unusual activity now being shown in the dis-trict, which has a great variety of

In a letter, Mr. Jenson asserts that In a letter, Mr. Jermon asserts that he recently made an examination of a number of properties on the west or Hoosler side of the district, and he was surprised at the showings that are now being made. In one of the properties, one man had taken down close to a car of 55 per cent zinc ore in a week, and with two weeks work he will have a good sized freight car of ore ready for the market.

When it is considered that 55 per cent ore at the present price of zinc means

When it is considered that \$5 per cent ore at the present price of zine means \$68.20 a ton and that a carload of 50 tons the regulation size, would mean something ever \$3,000 not to the company for two weeks work for one man, the earnings are enormous.

At the Hoosier property, which is owned by Salt Lake people, it is declared that there are now about 400 tons of ore on the dump. A large amount of this ore carries 50 per cent zine, and it is asserted that by sorting it could be shipped. There is also considerable 50 per cent lead ore that could be sorted. The company also has one containing \$50 per cent metal, but this is a blende of zine and lead. With the new separating process it is With the new separating process it is declared that the ore could be worked at a good profit. Mr. Hammond says that there is plenty of high grade gine ore in the Good Springs district and within a few years people will begin to realize what immense values there in the ores of the Good Springs

At the Ninety-Nine Copper property the company is now drifting east off the 250 foot level to catch the ore body. This property has shipped some rich copper ere in the past.

HUNDREDS GOING TO BANNOCK. Teams and Automobiles Pressed Into

Service at New Strike. Hundreds of people are going into Bannock, near Battle Mountain, Nov., on the strongth of the new strike. It is on the strongth of the new strike. If in doclared that every team and automobile at Battle Mountain is busy taking people to Sannock where the Omaha-Nevada company opened up its unusually rich ore. The town is growing up rapidly and tents are to be found everywhere about the new townsite.

New strikes are also being rande also. everywhere about the new townsits.

New strikes are also being made almost daily in other parts of the country around Bannock. Persons who have just returned, declare that the country is highly mineralized throughout, and that nearly every precious metal and semi-precious motal can be found within a radius of two miles. Sait Lake people were among the pioneers of the district and own considerable property within a few thousand feet of the place where the rich strike was made from which over \$100,000 has been taken in the past 30 days. and that he and and semi-precious of and semi-precion of the district and own to siderable property within a few thousand feet of the place where the rich strike was made from which over \$100,-600 has been taken in the past 50 days, Jesse W. Fox, president and manager of the Iron Canyon Gold Mining company, which is about 1.700 feet from the recent strike, in Philadeiphia can recent strike, in Philadeiphia can year of the when it arrived, but that when he left for Sait Lake he was the only passanger in the car. The entire car load of people were coming into the district to see the strike at Bannock.

wada Comolidated Mining company have agreed to extend the bond and lease the Pioche Metals Mining company holds on the Point property, for

E. P. Mathewson, general manager of the Anaconda Smelter and who is also in charge of the International Smelting and Refining company uf-fairs, is in the city for a few days looking after the interests of the com-nance.

At the local offices of the Rye Paich Consolidated Mining company, which took over the famous group or old pro-ducers near Rye Patch station, Hum-boldt county. Nev., it is stated that a mill of between 75 and 100 kms. apacity will be put up at the property by next spring.

O. A. Turner, who is chief owner of the tangsten mines at Osceola, Nev., and E. L. Fletcher, his manager, are in the city purchashis machinery for the property. The are is to be con-centrated on the property and the tungate acid will be shipped to easi-ery chemical works.

According to Manager R. J. Jarvis, According to Manager II. I darvis, who is down from the Itsinhow mine at South Afta. The tunnel has gone through eight or 19 feet of nightly mineralized ground carrying 6 her cent lead and 30 ounces in silver, acti it is expected that the contact will be reached almost any time now. The tunnel is now nearly 400 feet long.

The big pump for the Majestic Mines company has arrived and is now on its way to Beaver county, where no time will be lost in installing it. This is the last pine of marinesy necessary before sonding the shaft below the water level. Vice President John M. Dich Internal in Plantage. M. Dick intends to remain in Ctab on til the machinery is working and work has been started below the water (evel

R. A. Margetts has just returned from a trip to the Copper Acres prop-cry, near Hattle Mountain and about 8 miles north of the new camp of samows. Mr. Margetts declares that after an examination of the one on the dump he is convinced that it can be shipped to the smeller at a good profit. Mr. Margetts declares that it is not uncommon in the properts to find boulders weighing 100 pounds and carrying 20 per cent copper and 30 nunces in allow.

According to Manager W. C. Orem, eight miles of the 14 miles of railroad from Wabuska, Nev. to Yarington has been graded. One wile of the track laying has been completed Rails and ties are now on hand for the fire-ishing of the work and it will be pushed through as fast as possible. It is expected that the ramaining work to be done will be a matter of but a faw weeks. The first engine for the company has arrived at the work and is now 16 use. IN MANY IS HAVE

Clothes bought right are bought at Siegel's

It's the rendezvous of Salt Lake's well dressed men-men who want the best-men who know style and, by the way, know values.

Our overcoats and suits embrace the best styles designed for the winter of '09 and '10-every new idea in modeling nicely brought out—and the fabrics and shades are all that the most critical could ask. Prices, of course, the Siegel way-lower.

The store with the overcoat stock.
