

wood camp, has recently come again into prominence. The production of lead, silver and gold from the old Em-ma and Flagstaff properties during the seventies and early eighties amounted to millions. After a period of less ac-tivity, recent developments in this distriet are disclosing enormous ore zodies, and it is now claimed that Alta is des-lined to be a second Park City; a natur-al comparison because of their corre-sponding position and similarity of ore. High grade shipping ore has recently been found in the Columbus Consolidat-ed mine, and upwards of \$300,000 worth of this product has already been shipped to the Salt Lake smelters. This company and the Continental Alta are perating concentrating mills on the alling ores of their properties. An in theresting occurrence, and also a profit-able one for the Continental Alta, is that of wulfenite, the molodate of lead in this district. The mineral concen-trates readily and has a high value, mainly for its molybdenum. Alta is the scene of great activity at present

THE TINTIC DISTRICT.

greater number of dividend-payers are to be found in the mines of the Tin-tic district than of any other district of the state. There were 35 shippers during 1995, the total output of which amounted to 300,000 tons. Among the most important producers may be menmost important producers may be men-tioned the Centennial Eureka, Mam-meth, Buillon Beck, Uncle Sam Consoli-dated, Gemini, Eagle and Blue Bell, May Day, Swansea, South Swansea, Beck Tunnel, Carisa, Eureka Hill and Godiva. This district has always been an interesting field for the mineral col-lector as it affords a great variate of ctor, as it affords a great varie rare copper and arsenic minerals of de-

Beaver county are located the In Horn Sliver and the Cactus mines. The former has produced principally lead, sliver and zinc ore, while the latter is a copper mine. Many other mines of less importance from the standpoint of ore produced, are to be found in this dis-trict. The Cactus mine, owned and op-erated by the Newhouse Mines and Smelter company, has been developed on a plan which at first strikes one as financially daring to the point of au-dacity, and yet on closer examina-tion appears to be based on a careful scientific study of conditions and cost. It is stated that the development of the mine, the building of the necessary rallroad connections, plant, etc., cost Morn Silver and the Cacius mines. The railroad connections, plant, etc. the promoters over a million dollars before they were in a condition to obdn any returns from the reduction heir ore. On the other hand they laim to have in sight two million one their ore. undred thousand tons of ore which will carry, on an average, 3 per cent copper. Recently in the development of the property an extensive ore body 225 feet wide of higher copper content has been encountered on the three lower the feet. levels of the mine. The outlook for the future of this district is very

gratifying. The Gold Mountain district of Plute county is represented by two important producers, the Annie Laurie and the Sevier Consolidated Gold Mining company. These companies are mining gold ore averaging seven or eight dol-

to be the largest surface showing of iron ore known. Good fluxing iron ore, containing some gold, is found in the Tintic district and shipped to the smelters in Salt Lake county.

ITS GREAT COAL MINES.

Utah is putting on the market over a million and a haif tons of coal per year. This supply comes principally from the Book Cliffs coal field, em-braced within Sevier, Emery, Carbon and Grand counties, in the east central part of the state. Three other coal fields of less importance are the We-ber river, the Sanpete and the Iron county fields. Coal has been discover-ed in many other places in the state. ed in many other places in the state, but up to date these have only pro-duced coal for local consumption. The number of these discoveries may be estimated when it is known that the state timated when it is known that the state coal mine inspectors' reports 155 coal mines in Utah for 1994. The Utah Fuel company of Salt Lake City owns and operates all the producing mines of the extensive Book Cliffs field. The coal field extends over an area of about 7,000 square miles, although the entire extent is not yet definitely known. A overy locality investigated for a dis At tance of more than 100 miles in this field the beds of coal rangs from three to 25 feet in thickness, is free from shaley matter, and is decidedly mas-sive. Seams or lines inflicating stratifactions are scarcely discernable. Im-mense blocks of massive coal from these fields have made striking ex-hibits at the recent fairs at St. Louis and Portland. No other state in the and Portland. No other state in the Union displayed such massive chunks of solid coal as were snown by Utah. The coal is of excellent quality, re-markably uniform in composition, showing very low ash and sulphur con-tents. That from the Supersulta mine

showing very low ash and sulphur con-tents. That from the Sunnysdie mines its readily burned into an excellent grade of coke. The extensive output of these mines, amounting to more than half a million tons per year, is now entirely used for coking, the pro-duct comparing more than favorably with the best Pennsylvania variety. The market for Utah coal and coke ex-tends throughout the intermountain states and the entire Pacific coast. states and the entire Pacific coast.

SALT LAKERS IN YERINGTON.

The McConnel mining property Yerington, Nev., has been acquired by a Salt Lake syndicate making one more property in which Utah people will figconspicuously in the developmen t this wonderful copper district. Among those interested in this deal

Among those interested in this deal are: E. W. Clark, superintendent of Senator Clark's Ophir mine, E. M. Clark, his brother and a prominent mining man of Mexico, Frank Pierce, E. B. Critchlow, both prominent in Sait Lake legal circles, and Walter G. Filer, extensively interested in Utah and Ne-vada properties. vada properties.

CON. MERCUR FIRE.

Property at Mercur Destroyed of Value Of \$8,000.

The Consolidated Mercur Gold Mines company suffered a serious loss by fire last night in which about \$5,000 worth of property was consumed. The saw mill was completely destroyed, the motor house and a part of the sheds leading up to the big mill building. the latter only being saved by the tear. ing out of a section of these sheds. Manager G. H. Dern has arranged to use horses to move ore cars in place of the destroyed motors and says there will be no reduction of tonnage on account of the disaster.

in a radius of three nilles, there is considerable activity, since the recent strikes on the Searchlight-Wyoming and Colorado company estates, tofore this district was con was considered valueless from a mining standpoint, but development at depth has shown up several valuable ore bodies. The Boulder, Golden Crescent, Golden Rod, Searchlight-Wyoming, Searchlight-Belle, Sunny Jim, Golconda and Kohi-noor Mining companies are now ac-

tively developing, E. J. Locke of Hollwood, Cal., has bonded the Golden Rod group from John Wheatley for \$25,000. This group consists of the Nebo, Last Chance and Golden Rod claims, situated two miles wast of Searchickt adjusting the Wiwest of Searchlight, adjoining the Wyoming Searchlight on the east. Supt. E. J. Roberts will resume work on the Eldorado Nevada at Noh hill, on Nov. Ist. The company will re-sume with machinery, including a 20 h, p. gasoline boist, air drills, com-pressor and electric plant. The com-rany has approximately 20.000 tons of sulphide ore blocked out that will aver-age better than \$35 a ton.

ON MINING EXCHANGE.

Tintic Stocks Softened During This Forenoon's Sessions.

Although a great many stocks par-ticipated, the forenoon sales of the Salt Lake Stock and Mining exchange were not as beevy as they have been during the preceding days of the pres-ent week. Thile stocks were active but there was a slight softening all along the line. Of the Park City's Daly Judge remained fairly firm and Stress Sheld of Bingham did humans Daly Judge remained fairly firm and Silver Shield of Bingham did business around 20 cents a share. Stray Dog of Nevada went at 50 and 59, while Century of Park Valley was a seller up to 25 cents up to 25 cents.

The closing quotations and sales were:
