Organs Without Them.

THE MASON & HAMLIN ORGAN COMPANY HAVE

L entered into Competition with American and European

makers of Organs at all the World's Great Exhibitions with their various styles of Organs, from one stop to the [most their various styles of Organs, from one stop to the [most claborate, and at each one of them they obtained the First PRIZE and HIGHEST DISTINCTION OF DEMONSTRATED SU-PERIORITY over all of the Most Celebrated Makers of Organs in Europe and in America. The most eminent Musicians, Organists, Artists and Musical Critics in all countries have declared, in written communications, that these organs are unequalled by any others in the world. The organs are unequalled by any others in the world. The principal musicians in the Territory, recognizing these facts, have purchased the Mason & Hamlin Organs for their own use in preference to all others. There are makers, and they are in the great majority, who never presumed to compete with first-class manufacturers at any of these exhibitions, some of whom now advertise that they "Never exhibited their instruments to compete for premiums" for the reason that "Awards are made the subject of the Grossest Misrepresentation and are but a source of jealousy, corruption and faisehood." These charges cannot apply to the Mason & Ha nlin Organ Company, because a Jao-simile of all the medals and diplorias awarded to them, and the certificates of the inverse are published in the official documents of the Ha niln Organ Company, because a 700-matter of all the medals and diploras awarded to them, and the certificates of the jurors, are published in the official documents of the directors of each of the World's Expositions, and sent board-cast throughout Europe and America, (copies of which can be obtained at my office.) It is not probable that European jurors would have permitted an American firm to carry away evidences of so many victories over their own countrymen, if they could have honestly prevented it. If "management, intrigue and bribery" could have been used to influence the jurors in their decision, who will doubt that the awards would have been retained on the other side of the Atlantic? If, as one firm has the effrontery to aver in its own case, the non-competition for awards is to be regarded as good evidence of greater honesty and a hitheer standard of uprightness in business, and superiority of instruments, then the vast majority of manufacturers are to be congratulated. But for the energy and success of the Mason & Hamlin Organ Company, resulting in the opening of an antrance for American made Organs to the Markets of Europe, these non-competitors and self-proclaimed makers of a superior class of Organs would not today have an agency in England. They sailed in under the colors of the Mason & Hamlin Organ Company. cess, everyone can have teeth that they can wear. Satisfaction guaran-teed. Dr. Van Aukin, 10th East and 2nd C.
