In addition to the above goods, we sell the Peerless Reapers and Mowers, California Concord Harness, Buffalo Barbed Wire, also a great variety of Farm and Garden Hand Implements, consisting of Rakes, Forks, Hoes, Lawn-Mowers, etc., etc.

The Mitchell Farm and Spring Wagons and Road Carts are manu-factured expressly for the Utah, idaho and Montana trade, of the very best inaterial that monay can buy and under the superintendency of Henry Mit-chell, a practical wagon manufacturer of over fifty years experience. We personally guarantee that they are first class in all respects, and second to none in the market.

The Walter A. Wood's Harvesting Machines are absolutely unequalled for strength. Durability, Easy Running and Simplicity. Read the following record of inschines made and sold by the Wood Company. I. e • 1860-27,903; 15–1, 40,413; 1882, 44,226; 1883, 45,632; 1884, 48,315; nothing but the superiority of the machines could possibly cause such extensive and constantly increasing sales. The above figures speak londer words if praise than anything we could possibly say. They have enlarged their factory so as to be able to fill increased orders for 1885.

The John Deere Ploys have a world-wide reputation for excellence. The fact that Deere & Co, have the argest steel plow manufactory in the world is sufficient guaranty of the superiority of the goods they manufacture.

Russell & Co's Threshers, Engines and Saw Mills, are fast taking the lead, an 1 in the near future will stand without a rival. A person that has ever used a Massilion Thresher will never use any other. Every Machine we have sold has given the most perfect satisfaction.

The Gilpin Sulky Plow is the only single lever sulky plow made. Th "Glipm" to-day stands without a rival for strength, lightness of draught, standicity and quality of work. No person having any regard for horse flesh will purchase any other sulky plow after using the one-lever Glipin.

The Gale Manufacturing Company spare no expense to make their Sulky Rake superior to any in the parket. Call and examine their goods, and be convinced of the superiority of their Rakes also of their Chilled Plows.

We shall Incorporate our Business in April.

GRANT, ODELL & CO.

of the medical faculty of Tortosa. Drs. Jimeno, Colves and Garin, convinced by seeing the results, next presented themselves for vaccination. The oper-ation is, simple and produces effects not dissimilar to those of smallpox vaccination. The Medical Institute of Valencia, in public session, unanivalencia, in public session, unani-inously voted an enthusiastic message of congratulation to Dr. Ferran, after

of congratulation to Dr. Ferran, after having considered the results of his investigations. Much of the land cultivated in this Territory is subject to "baking," or forming a subject to the sawing of the sawing o forming a crust on the surface. We to the sawmill. Of course he went,

and after his return to the fort, Sutter have known of good results to follow appeared to be in quite a peculiar huthe use of a heavy brush drag over mor, talking about his secret a great young grain on such land, and we find deal. I did not care much to be made acquainted with what he said would a similar practice advocated in a Caliprove to be a thing of great import-ance, for I knew, if it was anything fornia paper. Here is what it says: "When the land is kept thoroughly worth knowing it would not remain a pulverized in this section it has been secret long, consequently I did not practically demonstrated that good question him in order to find out what

crops can be raised in very dry seasons BUILDING OF THE SAWMILL The same theory recommends itself in

Was carried on, Sutter had to send at the Continental Bank. Here he paid the successful production of wheat. This cereal is suffering at present from the bank of teams up with provisions and other England, taking French and German This cereal is suffering at present from drought all over the State, from the fact that the surface soft is crusted, cutting off the moisture from the sub-soil and pinching the young grain / remedy is being extensively discussed among many scientific California far-mers, and all who have tried it with one accord recommend the practice. Harrowing wheat after it is up is espeengaged by Sutter as a head teamster. original fraud. George Bidwell under He was to see to it that the teamsters took what may be called the manufaccially recommended, when, as now, chally recommended, when, as now, the soil is crusted. It is positively asserted that no injury can result to the grain by the operation, while it re-vives the growth, brings the moisture to the surface and shows the good re-sneak the truth; he could not help it.

vives the growth, brings the moisture to the surface and shows the good re-sults in a surprisingly short time." One who reads the daily dispatches concerning the condition of General Grant can scarcely fail to be impressed with the facts that doctors' opinions in regard to the fatal effects of disease and the powers of the human system to withstand the same are frequently very unreliable, and that their practice consists of a series of experiments, intelligently made perhaps, but yet without any definite knowledge as to the results. How many times during without any definite knowledge as to the results. How many times during the past two weeks we have been in-formed by the bulletins issued by the medical attendants of the afflicted hero that he could live but a few hours at the most while solice other men, of whom one was fludson the wagon maker, John the most, while subsequent dispatches Maot, a Frenchman, who was then have given us to understand that he overseer, and a young man named was comparatively happy and free from pain. Realizing their fallibility, some doctors, like certain ancient Charles Burch. Filleld and Hudson

wizards or magicians, are shrewed of Witner's exaggerations about the finding of a quart of gold in one day, enough to pass very carefully-guarded and then we asked him why he did not opinions or predictions, that may be bring at least some of it with him. enough to pass very carefully-guarded opinions or predictions, that may be construed in more ways than one, and be sure of fulfilment whether the patient recovers or dies. It the patient recovers or dies. It would seem that Doctors Douglas and Shrady are learning from their many failures in the past to guess cor-rectly as to the time of their patient's betweed

demise, to adopt this plan. At 7 p.m. showed

yesterday the former said the end was EIGHTEEN SPECKS OF YELLOW METAL near. At 9 p.m. the latter said he was The largest of it being about the size of prepared for all emergencies.
