MEETING OF FARMERS. Sugar Plant Discussed-Court Notes - Parker-Patterson Nuptials.

Special Correspondence. Provo, Jan. 12.-There was a large attendance at the meeting of beet growers, held last evening, for the purpose of reporting progress on preliminaries connected with the establishing of an auxiliary plant of the Utah Sugar company near Provo.

Mr. J. P. R. Johnson, of the finance committee, reported subscriptions from business men towards helping pay the bornus required to purchase the Bun nell farm from Mr. J. W. Knight for site for the crushing station. The com-mittee had been promised \$525, and believed about \$100 to \$150 additional would be subscribed, as there were some who had promised to subscribe, who had not yet done so. The committee on canvassing for beet

acreage reported an increase, bringing the total up to 934 acres and reported that some of the farmers had stated before the erection of the crushing station was certain they would double their acreage. This, in the opinion of the meeting, would easily bring the acreage up to 1,000 acres.

Secretary Bunnell reported that the Oregon Short Line railway engineer had, during the day, made a survey for a spur from the Oregon Short Line track to the location of the site. Manager Cutler, of the Sugar company, had also informed him that the Sugar company intended to purchase all the land of the Bunnell farm, but would only ask for a bonus of \$1,800,

A motion was carried to the effect that the beet growers obligate them-selves to pay the \$1,800 bonus, pro rate on the acreage of beets grown, the amount collected from business men had been deducted.

Chairman Knudsen announced that the impression had gone abroad that the \$1,800 bonus, which the Sugar company asked from the beet growers, would be returned to the beet growers. This idea had been advanced by some of the citizens who had been asked to subscribe towards the fund, as an excuse for not subscribing. Mr. Knudsen stated that the supposition was entirely erneous in which he was supported by Johnson and others who have taken a leading part in the movement to se-cure the crushing station. The meeting adjourned for one week.

SUIT FOR MAINTENANCE.

Provo, January 12 .- Mrs. Ella Chipman of American Fork, has commenced suit against her husband, Stephen Chip. man, for separate maintenance. Plain-tiff alleges that the parties married at Provo July 9, 1896, and that one child had been born, a boy named Maylon. That about four months after the marriage the defendant deserted plaintiff and has since refused to support her; that defendant is worth \$20,000 and of sufficient ability to support plaintiff. The latter asks for \$100 per month pending suit for her support; \$10 for the sup-port of the minor child; for suit money and attorney fees, and for a decree giv ing her the custody of the child and for such a sum of money for her support and the support of the child as may seem just to the court. Saturday, the 19th, has been set for hearing plaintiff's application for temporary support; for \$150 attorney's fees and for \$25 costs.

AGRICULTURAL COLLEGE NOTES. The term opened Tuesday morning at the Agricultural College, with a rather light attendance. The fear of vaccina-tion, and the sudden storm co-operate to keep many students away.

Director Widtsoe has just returned from Cheyenne, whither he went a week ago on the invitation of Elwood Mead, charge of the government plans of irrigation throughout the west.

President Kerr returned Wednesday from Salt Lake City, where he went on Saturday, to present the biennial report of the college to the trustees, and through them to the governor. Mr. Robert Stewart, though braying the perils of the Philippine war single handed, wanted help to fight the

battles of civil life, and recently secured as such help the estimable daughter of Editor Gordon of the Journal, Mr. Stewart, besides doing the work of the unior class in the college, is also comnandant of college cadets. STIRRED UP THE PEOPLE. Schools Close Rather than Submit to Compulsory Vaccination.

Special Correspondence, American Fork, Utah Co., Jan. 11 .-Vaccination is a red hot topic here. Matters were brought to a climax by the arrival of Dr. Baker, of Ogden, yesterday. His advent caused the school poard to recede from the position they had taken, viz, not to enforce Vacci-nation. The schools opened yesterday with practically a full attendance, but when the order to vaccinate was given, the pupils began flocking home. A meeting was called for the parents in the Central school building yesterday evening. The house was packed. Dr. J. F. Noyes of the local board of health and Dr. Baker defined the position of the State and local boards of health on this question. The purpose of the meeting seems to have been to alter the

the land. The idea was carried by the doctors that it was only a matter of time when the people WOULD BE COMPELLED TO SUB-

among the people. In the course of his talk, Dr. Baker charged the Deserct News and Prof. J. T. Miller as the chief instigators of the pronounced ideas

against vaccination that is so prevalent

and they might just as well do it now A number of questions were asked the doctors at the close of the meeting and several citizens were very emphatic in their denunciation of the order of the board of health. Schools were sus-pended today, and the opportunity for free vaccination given by the school board. Fifty-four pupils availed them-selves of the privilege. The same opportunity will be given tomorrow and the indications are that more will take

advantage of it.

A meeting of the citizens was called for tonight to protest against the enforcement of the order and petition the Legislature for relief against the au-tocratic rulings of the board of health. but as the call was not generally known, the meeting was but slimly at-tended. Nothing was accomplished beyond the appointment of a committee to notify the people of the time and place for another meeting.

Want Better Mail Service. Special Correspondence.

Snowville, Boxelder Co., Jan. 11 .- The leasures of the holiday season were nterrupted by two deaths, one the two-'ear-old child of Mr. and Mrs. George aly, of Stone, and the other a son of fr. and Mrs. William Harris. The ormer died of croup and pneumonia, and was buried on Dec. 26; the latter's leath was caused by typhoid. He was a most kind, gentle, affectionate, stud-lous, and dutiful child. He seemed to have been recovering from the typhold nicely, when his parents had occasion to move to a ranch on Locomotive Springs, and it is feared he may have taken cold, which caused a relapse and

astened his death. . Webb and sons have been here several days, tuning and repairing or-gans, pianos and other musical instruments, and incidentally delighting that young with the sweet strains of the violin and accompanying instruments.

RIGBY, IDAHO.

A THRIVING COMMUNITY. Abundance of Water-Room for Industrious Homeseekers.

Special Correspondence. Rigby, Fremont Co., Idaho, Jan. 10 .-Rigby, (a name which is Insignificant and gives no adequate Idea of our town and surroundings), is located on the St. Anthony branch of the Oregon Short I have allowed the oregon Short Line railway, fifteen miles north-east of Idaho Falis, and is about two miles south of the south fork of the Snake river. At this point the tillable snake river. At this point the thindic and desirable land of this great country has a greater width from east to west than at any other section of the valley—it being from twenty-five to thirty miles wide. On the east of us there is a tract of fine agricultural land fifteen miles in extent, while on the west it extends almost an equal distance. There are some eight or nine settlements all around Rigby, the names of which are as follows: Lewisville, Menan, La Bell, Rudy, Popular, Shelton, Leorin and Grant. The people of these places all centralize at this point to do their shipping. For most of these forms their shipping. For most of these towns Rigby is also the mail distributing point. All of the people south of the south fork of Snake river and between that line and Idaho Falls, used to do all of their shipping at the lat-ter town and go there to do all their business prior to the comple-tion of our new railroad. Idaho Falls has a population between 1,500 and 2,000, which heretofore has been supported by the business coming from the section of country mentioned. If Rig by had some large mercantile house If Rigall of this business would immediately gravitate to this point, where a great deal of the shipping is now being done, thus it can be seen that an excellent opportunity exists here for investment of capital. We also need a flouring mill the wost kind. A good natural millsite for water power fies just south of town, right on the railway tract, and a free use of the water necessary to run the mill can be secured. The land tributary to a mill if established here produces several hundred thousand bushess of grain annually. We also need a lumber yard and plaining mill; butcher shop, another blacksmith or two, shee shop, and many other like appendages to a thriving community. sugar beets grow well here, containing as high as 19 per cent of saccharine matter, and if a sugar factory was erected it would be supplied with all the necessary beets. A number of industries would thrive here, for the resources of this country are such that lightly is destined in herome a large Rigby is destined to become a large

The climate is about like that prevailing in Salt Lake valley. and large fruit grows nicely and ripwell. Corn and watermellons also thrive. The water supply is simply limitless. Last year while a drouth existed nearly everywhere, we never lacked for this life-giving fluid. This country is threaded with large canals, many of which are not fordable by team when carrying their capacity of water. We have one which we boast of as being the largest frigating ditch in the world. It is 100 feet wide and will swim a horse clear over. This is the Great Feeder, and supplies the other smaller canals. Each farmer here uses two, three and four large streams of water all the time (that is, when he needs it) and such a thing as turns pression is made upon the vast amount of water running in that stream. Snake river is larger than all the streams in Utah combined, so some idea as to our blessing in this regard may be obtained. No stream could be easier of access than this river; our canal water of a miles of a miles.

ers land within a quarter of a mile from its head. There is no land to be taken up here now, but nearly all the farmers have so much that they will and can afford to sell forty and fifty acre tracts, and thus allow more to live in this goodly land. The prices range from \$10 to \$40 per acre, according to location and quality. A good and sufficient water ight as a rule accompanies the land The lowest priced real estate is un-broken and generally unimproved. Good improved land with dwellings, etc., on can be had for about \$25 per acre. There are not many desiring to sell, but quite a number could be in-duced to part with some of their acres, In order to build up the country faster. There is no need of people going so

far away to secure homes while room exists here.

Good coal has been discovered in the hills east of us, and up the river timber abounds, which is rafted down, making it much easier and quicker than hauling. Some eight new houses have been built in Rigby during the past summer and fall, a number of which are commedious brick and stone dwellings. A fine large stone meeting to nearly a large exists here house is nearing completion; a large dancing and amusement hall has just been erected. We have one of the fin-est quality of building stone extant in the foot hills near by. It is exceedingly light, of a light gray color and a team can haul at one load eight perch.
