A SMALL vor wheel, bearing evidences of very aucient workmanship, was found the other day by a gentleman of this city, in a scuttle of coal. It has doubtless been buried for centhe Churc turies. The fact that the hole in the centre through which the shaft runs, as triangular in shape, indicates that it was made before the method of securing wheels to round shafts by means of a key, was discovered. It is quite a curiosity.

Substitute for Lye .- Many housekeepers urge as a reason for the use of lye in the family, that without it they are unable to cleanse tinware, ketties, sluks, etc. An easier and better method is to pour a little coal oil ou a rag, rub the article to be cleaned with it, and then wash with warm water and soap : the smell of the coal oil will entirely alisappear in a few minutes. The tinused, such a small quantity of coal oil is needed, that there is no danger whatever with ordinary care.
