his whereabouts was futile, and the  
search is now being carried on by offi-  
cers in three counties without any defi-  
nite plan, except to watch for develop-  
ments. The house at Vine street,  
where he roomed is being watched in the  
hope that he will return there to  
get clothing and belongings to take to  
his mine, and the hills north of the city  
are being scoured by men from the  
sheriff's office in the hope of finding him  
in hiding somewhere in them. Mur-  
phy knows every foot of the mountain  
country between Salt Lake and Boun-  
tiful, and may elude his pursuers for  
an indefinite period by hiding in the  
deserted tunnels and hollows of the  
north hills. Residents of Bountiful  
and of the northern part of the city  
are aware of the fact that a danger-

great deal of aid in establishing irri-  
gation.  
He was assigned to a regiment which  
spent some time in the vicinity of  
El Paso—the valley at that time was  
in a higher state of cultivation than  
it is at the present time. While do-  
ing duty as a soldier there Mr. Mc-  
Lellan had an opportunity to study  
the irrigation system then in use  
with the result that when he after-  
wards joined the colonists he had a  
world of valuable information for  
them. After the war was over he  
made his way to Salt Lake, where he  
joined his friends just three days after  
they arrived there.

Salt Lake valley at that time was a  
dry, barren waste, thought to be unfit  
for use by those who had seen it.  
However, when Mr. McLellan arrived  
he explained what he had seen on  
his trip with the army and was put  
in charge of the development of the  
irrigation system, and using the sys-  
tem in use at El Paso as his model,  
he developed the irrigation system  
that resulted in the transformation of  
the Salt Lake valley.

Bishop McLellan is now about 50  
years of age, yet is enjoying the best  
of health and is still a great enthu-  
siast on the subject of irrigation. He  
will attend the Twelfth National Irriga-  
tion congress at El Paso, Novem-  
ber 13-15, as a delegate.

## ABOUT IRRIGATION.

"Mormons" Were Taught the System  
By the Mexicans.

## Special Correspondence.

El Paso, Texas, Oct. 15.—Very few  
people who are familiar with the irri-  
gation systems in the west know that  
at Colonia Juarez, Mexico, there re-  
sides the founder of the irrigation sys-  
tem in the Salt Lake valley, and that  
the irrigation system which has been  
in use in the Rio Grande valley below  
the city of El Paso for centuries was the  
system from which the system in the  
Salt Lake valley was taken.  
When the "Mormon" people emigrated  
from Illinois to Utah in 1847, the  
United States, which was at that time  
at war with Mexico, made a draft on  
the "Mormons" for men, among the  
number taken from the colonists, who  
were then on their way to Utah, was  
W. C. McLellan, who is now a Bishop,  
and lives at the "Mormon" colony near  
Cusam Grandes.  
Mr. McLellan was an observing man  
and had taken notes on the country  
through which he passed while in the  
war. Afterwards he rendered the  
colonists in the Salt Lake valley a

## SAFEST FOOD

## In Any Time of Trouble Is Grape-Nuts.

Food to rebuild the strength and  
that is pre digested must be selected  
when one is convalescent. At this time  
there is nothing so valuable as Grape-  
Nuts for the reason that this food is all  
nourishment and is also all digestible  
nourishment. A woman who used it  
says:  
"Some time ago I was very ill with  
typhoid fever, so ill everyone thought  
I would die, even myself. I left me  
so weak I could not properly digest food  
of any kind and I also had much bow-  
el trouble which left me a weak, help-  
less wreck."  
I needed nourishment as badly as  
anyone could, but none of the tonics  
helped me until I finally tried Grape-  
Nuts food morning and evening. This  
not only supplied food that I thought  
delicious as could be but it also made  
me perfectly well and strong again so  
I can do all my household work well.  
I can eat anything without any trace of  
bowel trouble and for that reason alone  
Grape-Nuts food is worth its weight in  
gold." Name given by Postum Co., Bat-  
tle Creek, Mich.

Typhoid fever like some other dis-  
eases attacks the bowels and frequen-  
tly sets up bleeding and makes them  
for months incapable of digesting the  
starches and therefore pre-digested  
Grape-Nuts is invaluable for the well  
known reason that in Grape-Nuts all  
the starches have been transformed  
into grape sugar. This means that the  
first stage of digestion has been me-  
chanically accomplished in Grape-Nuts  
food at the factories and therefore any-  
one, no matter how weak the stomach,  
can handle it and grow strong, for all  
the nourishment is still there.  
There's sound reason and 19 days  
trial proves.

to Wellville,' in each pkg."

## NOT YET LOCATED.

Madman Murchio Still at Large—Of-  
ficers of Three Counties Searching.

The early part of today developed no  
new elements in the search for Thomas  
Murchio, the insane man from the Pro-  
vo asylum. Deputy Sheriff Sharp and  
Guard Bonnett returned last night from  
a weary tramp over the foothills to  
Bountiful, and across into Hardacre  
canyon, through Ward and Arthur can-  
yons, where were the former haunts of  
the insane prospector. No traces of  
him were found, although the officers  
scoured all the trails and bypaths lead-  
ing into the section where his mining  
claim is located. Murchio went insane  
digging in the walls of Hardacre, and  
lived there a life of solitude for  
many years before he was taken to  
Provo six months ago. He shunned all  
companions, and warned off prospectors  
who came near his claim, as he did  
hunters and fishermen who came there  
for rest.

The return of Sharp and Bonnett  
proved that the only definite clue as to
