

TERRIBLE ARRAY OF CHILDREN'S

GRAVES

EVENING NEWS.

in our cemetery, and dismal multitude of others occupied by bodies that had not attained to ripe old age ere the owners were cut down by the grin de-stroyer, are indeed heartrending to contemplate. What are the causes of all these premature deaths? Why is it that multithat nearly one-half of the human beings born die before they reach the age of the years? And why do such a very small proportion live to a good. old age? It would be regarded as blasphemous to assert that God kills them all. That manner of expression is rather forcible, savoring too much of charging our Heavenly Father with murdering His children, out it means ist the same as though we piously it is not over-estimating to sav **SAUDRAGES SECTION 1 EXERCISE IN 15** Not over-estimating to save said that in II is divine providence he had called them hence. Let us banish such subterfuge and look the facts in excessive quantity or improper qual-ty of food. Take is no danger of called them hence, the second divine providence he had called them hence. Let us banish such subterfuge and look the facts in excessive quantity or improper qual-ty of food. Take is no danger of called them hence is no danger of the sixth chapter of Genesis that the Lord said, "Man's days shall be an hunored and twenty years." We know He permitted many in the carry times to live several hundreds of years, and to live several hundreds of years, and in over-estimating to save that about seven eighths of all human allments are produced by in excessive quantity or improper qual-ty of food. Take is no danger of called the system soon makes its wants known, but it is a very casy and common occurrence to eat too often and more finam is meeded; the nome few persons meanly a thonsend

through the intervening centuries, and even in these degenerate days, of peo-ple who have lived over one bundred years, and such should not be ex-ceptional. Nowhere in sacred wetter ple who have lived over one bundred years, and such should not be ex-ceptional. Nowhere in sacred writ or revelation do we flad any infimation that God purposed that the majority of be human family should die in early much to get rid of the waste material life; on the contrary the evidences are as it accamulates in the system, pro-

'fill up the measure of their creation."

DEATH?

more flesh we consume the more dis-Philosophers, scientists, theologians case must we have. By means of a and physicians have wrangled over the proper diet we can avoid most disminutie of this problem for ages, but cases and live out our full time; if is the verdict of reason is, stated the only universal remedy that can be maranteed to cure the aliments which caused by some violation of nature's laws and early death is the result. But, what are nature's laws of health? They are, in other words, the laws of tiot as applied to our bolies: therefore we have have have but to over exercise.

There are hundreds of honorable, intelligent men in the medical profession who themselves pro- claim that if people would duly observe the simple laws of beath there would be no need for drugs, and little employ- ment for doctors; surgeons might be occasionally required to dross wounds or set broken limbs, but the injured would soon recover if their systems were not vitiated by wrong habits of hite. I will here take the liberty of quoting a few oBSERVATIONS OF LEADING GENTLE- MEN in various branches of the medical profession, and other eminent authori- ties: Says the Rev. M. J. Savage: "In nine cases out of ten, men and women might tairly be called to account for being sitk." Dr. T. L. Nickols uses nearly the same language: "In nine cases out of ten, If people, when they found themselves becoming sick, would simply stop eat- ing, they would have no need of drugs or doctors." C. E. Page, M. D., says: "If any of wards eached to account for being sick if the same and women might	surface of his body may be. The pro- verb, "CTEANLINESS IS NEXT TO GODII- NESS," is a saving that most people consider applies especially to the outward per- son, but it is as essential that four mat- ter should not be allowed to accumulate in the system as it is also to banish filth of every kind from the dwelling house and its surroundings. The nat- ural exit for a large proportion of waste matter of the body is through the skin, therefore the whole surface of the body should be frequently cleansed: a daily spoaging, brisk rub- bing, with a coarse towel and weekly plunge bath are essential and effica- cious methods for promoting healthy action of the skin. Cleanliness should by no means be confined to the person and dwelling, but should extend to all things; adjacent. The closet, as it is generally construced, is one of the most PESTILENTIAL CONTRIVANCES that can be imagined, and yet it need not be so. Most of them are positively offensive, indecent and uncomfortable, people go to them reluctantly and the result is that very often the blood is poisoned by absorbing waste matter that the body should quickly get rid of. There is no excuse for constructing miserable, make-shift arrangements, with disease breeding vaults. Decent acd comfortable closets can be cheaply built, that should provide for the con- tents being conveniently disinfected with dry earth or ashes and easily re-	 Pills have been known and used They are middy but thoroughly.
