

No. 19—HEROES OF HISTORY.

(Written for the Deseret News by Albert Payson Terhune.)

Richard Lion Heart—Hero Who Won Fame and Nothing Else

RICHARD COEUR DE LION (Lion Heart) would have no rightful place in a series of "Heroes Who Made History" if it were not for the effect his example had on later warlike generations. He is usually looked on as one of England's greatest kings. As a matter of fact, he was nothing of the sort.

But son, son husband, bad king and bad man; great fighter and poor general; strong of body, weak of principle; hero in battle, bafe in peace; an English king who could not speak the English language; someone whose most boast was on him; merciless in all his times—he embodies all that was worst and roughest of his rude age.

Nearly a century had passed since Duke William of Normandy had wrested England from the Saxons. More modern French customs and culture were replacing primitive heathenism. The Norman rule was proving a good thing for the country, yet that rule was one of *haut force* rather than of any especial kindness or justice. One of the sternest, most brutal of Duke William's descendants was Henry II. He subdued Scotland and kept the whole island in awe. Richard was his third son and was born at Oxford in 1157. At 12 he was made Duke of Aquitaine (for the English kings still held many of their French possessions) and was henceforth brought up in France. There he learned the chivalric ideas of chivalry, music, love and adventure. At this time he was formally betrothed to Princess Alice of France, who was a mere baby. In 1172, when only 16, he joined his two elder brothers in rebelling against their father's harshness and went to war against Henry. The rebellion was put down and Richard was pardoned, although his father never fully trusted him again.

The two elder brothers died and Richard in 1181 thus became heir to the English throne. Henry II wanted him, in view of this, to give the duchy of Aquitaine to his younger brother John, Henry's favorite son. Richard refused. Henry threatened to disinherit him and make John heir to the throne. Richard joined forces with Philip Augustus, King of France, and, on Philip's advice and by his alliance, he again made war on his father. Philip had always been Richard's evil genius and moulded the weak, violent youth to his own purposes. Richard and his French ally overcame the aged Henry and forced him to sign a treaty giving Richard his rights. Two days after the treaty was signed, Henry died heartbroken. Richard was crowned King of England in September, 1189, under the title of Richard I.

Two years earlier he had been influenced to pledge himself to join one of the crusades against the Saracens rule of the Holy Land. Philip of France and many other European leaders were also partakers in the crusade. Richard, to raise money for this purpose, sold many high offices, released Scotland from allegiance to England and levied many taxes. Then he joined the French King and they started for the east. During a halt at Sicily, Richard quarreled with the King of that country and captured Messina. Then he quarreled with Philip and refused to keep his promise to marry the latter's sister Alice. By the time the crusaders fairly began operations in the orient, their leaders were nearly all involved in disgraceful squabbles with each other, and Richard was at the bottom of most of these disputes. Where leaders are at odds their subordinates can seldom accomplish much. So it proved in this case. Despite their disagreements the crusaders captured the city of Acre, in the early summer of 1190. Then Philip tired of the sport and went back to France. Richard was now foremost man in the expedition. The Moslems were led by the Sultan Saladin, who had worked his way up from a menial position and who had recently captured Jerusalem from the descendants of the first crusader. Saladin had surrendered Acre under certain conditions which he later forgot to fulfil. Richard jogged his memory by massacring 2,700 Mahometan prisoners. Saladin tried to avenge their death, but Richard beat him in battle at Arsuf and marched on Jerusalem.

When the crusaders were within sight of the Holy City the French allies refused to advance further, and Richard was forced to fall back on Acre. There he offended Duke Leopold of Austria, who returned home vowing vengeance. The allies had another quarrel as to who should be King of Jerusalem were the city ever taken. This further weakened the army and a second advance on Jerusalem proved a worse failure than the first. Just then Richard received news that his old enemy Philip, had stirred up John to claim the English throne in his brother's absence. In view of this Richard made a truce with Saladin and sailed back posthaste for England, having accomplished nothing in the Holy Land except to help in the taking of Acre. He was shipwrecked in the Adriatic, and continued his journey by land.

Knowing how many European rulers he had offended, he feared capture, so he disguised himself as a pilgrim and started across the continent on foot. And now he was to pay the price of his wholesale insolence. Down swooped Leopold of Austria upon the disguised monarch, captured and turned him over to the emperor of Germany. The emperor held Richard in high ransom and forced him to surrender to the German throne the kingdom of England, then to receive it back as a mere vassal to Germany. The payment of the ransom nearly impoverished England and placed her people under heavy taxes. Moreover, John and Philip, by influence with the emperor, prolonged Richard's imprisonment for two years.

In March, 1194, Richard was released, and hurried home to find his brother John in virtual possession of the island. Richard crushed the rebels and was a long time crowned King. In a freak of generosity he forgave John but his magnanimity did not extend to Philip. He at once set about levying unbearable taxes, raised an army and attacked France. For five years the war between Philip and himself dragged on. Then a truce was made, and Richard, in a quarrel with a French vassal over the ownership of a new-found treasure, besieged the castle of Châluz. During the siege he was killed by an arrow.

So died Richard Lion Heart, English King, who had spent in England less than one year of his fruitless 10-year reign. He had done nothing for his country, nothing for his people, nothing for the world at large. But the tale of his deeds, magnified in the telling, made England respected among the nations and spurred Englishmen on to greater courage in battle in an effort to emulate their hero's ferocious courage and reckless disregard for life. In life Richard was a failure. In death he merely set a doubtful example.

Best Mtg. Co., Traction Engine

Pulling 24 feet of plows at 2½ miles per hour.

The cut represents the New Castle Reclamation Co. Best engine plowing on their farm at Modena, Utah, and has plowed 3,000 acres at an expense of 50 cents per acre. One of them will do it for you. Let us show you. Sold on trial and guaranteed.
