

is very dry, and during a portion of the time a north wind has prevailed, doing some damage to the wheat, though on the whole but little injury is reported in this city. The heat has reached the unusual degree of from ninety to ninety-nine degrees. A fatal case of sunstroke is reported to a railway hand at South-Valley. He had been drinking ice water freely.

The *Times* London special says, it is reported here that Count Schouvaloff repeats his assurances that the Russian government has no intention to interfere with British interests in the east; but it is beginning to be generally understood that Russia is endeavoring to subsidize the press, and that she is evidently preparing the public mind for her forthcoming occupation of Constantinople. Meanwhile the rumors of decided Turkish successes on the line of the Danube, and of the improvement of Turkish prospects in Asia, continues to gain ground. The financial prospects of neither of the belligerents are particularly hopeful. The reports of great suffering, alike at St. Petersburg and Constantinople, are fully credited. It is said that important negotiations are on foot between the English government and the Khedive in reference to the protection of British interest in Egypt.

The *Tribune's* Washington special, alluding, to-day, to the position of affairs likely to grow out of the new policy says, Evans said, "I anticipate no trouble with Mexico. All we desire is the observance of our rights as a sovereign power and the inviolability of American soil. These we must have, and as the Mexican government has expressed the determination to see that these two requests are observed, there can be no cause for complication; at the same time, the United States forces, from Laredo to Brownsville, will be vigilant. They have their instructions."

The *Herald's* London special says, it is a fact, pretty generally understood, that Russia is determined to emancipate Bulgaria at all hazards from the rule of Turkey. It is said the Czar has come to a perfect understanding with Germany and Austria on this point.

On Friday, divers from the Turkish ships succeeded in picking up torpedoes placed by the Russians in the channel below Widdib. The Danube has been so thickly set with torpedoes by the Russians as to neutralize, to a great extent, the presence of Turkish ironclads.

CHICAGO, 12.—The *Tribune's* London special says, there are no new war developments in England. There never was such a diversion of English sentiment on the question of war or peace as at the present time. A declaration of war at this moment would, without doubt, meet with vast opposition in the great centres of the population all over England. The only chance of seeing a union of all parties would be in the Russians taking advantage of their victories to push conquests which would injure the English commercial interests.

BALTIMORE, 12.—An excursion train came in collision with the Winchester train, near Potomac Rocks. Charles Kefey, Richard Dutrow, Dihn, and Walker were killed, and Louis Schley, Cotral, and others seriously injured. The train was from Baltimore conveying passengers to the dedication of a monument in the confederate cemetery at Hagerstown.

The cause of the accident was a misunderstanding between the train men.

WASHINGTON, 12.—The Attorney General has called upon the accounting officers of the Treasury for a copy of the accounts of Brigham Young, the Mormon leader, filed in the Treasury some twenty years ago, when he was Indian Agent, appointed by the government. These accounts are called for at the request of Howard, U. S. Attorney for Utah, who will examine them carefully in connection with the Attorney General. It is intimated that they will furnish important testimony against Young, and upon them a prosecution will be based for various illegal acts committed by him while acting as Indian Agent.

WASHINGTON, 12.—Secretary Sherman furnishes the following as his views on the silver question. It will be observed that the Secretary advocates the purchase of silver bullion at its commercial value, and the issue of silver coins, freely to all who will accept such coin in exchange for

legal tender. The Secretary says, "The silver question gives me no uneasiness. There are two extremes of opinion upon it, equally threatening, and, as usual, each supported by honest conviction and plausible reasoning, like most disputes. These opinions are now localized, one in the east and one in the west. When two black clouds, angry and threatening, approach each other, we see lightning and thunder, and soon a fierce storm, and a refreshing rain or gentle shower is followed by sunshine. This dispute about silver will be followed by a refreshing supply of silver coin."

YANIKTON, 12.—Gen. Hammond, Superintendent of Indian Affairs for Dakota, with the balance of the commission appointed to locate the Spotted Tail and Red Cloud agencies, returned here to-day, having completed their mission. It is understood they have selected ground at the old Whitstone agency for one of the bands, and at the mouth of Bad River for the other, both being on the Missouri River.

ST. LOUIS, 12.—Thomas Bolly, a gambler and confidence thief, suicided in a pawn-broker's shop, last night.

To-day, E. H. Schorr, a drinking German, shot himself in the head in precisely the same way.

Andred Schenck, stone mason, was found dead in his house this morning from the effects of paris green, which he had taken.

SAN FRANCISCO, 12.—A dispatch from Lompoc, Santa Barbara Co., says an extensive fire is raging in that vicinity, burning over many miles square, destroying the grass and grain crops. A great number of cattle were overtaken by the flames. The fire will necessitate the slaughter of a great deal of stock on account of lack of forage.

A Los Angeles dispatch says an extensive forest fire is burning in the mountains east of that city, extending down to the plains. Details are wanting, but it is known that many homesteads have been destroyed, and a great amount of hay, lumber, and other property burned.

A Los Angeles dispatch says a volcanic eruption occurred in the mountains opposite the Flowing Wells station, on the Southern Pacific, about sixty miles from Yuma, at nine o'clock yesterday morning. It was preceded by a violent vibration of the earth; about half an hour after which a dense volume of smoke and huge black and broken boulders were observed to issue from the mountains. It continued in an active state all day, but became nearly passive at nightfall.

NEW YORK, 13.—The *World's* Washington special says, United States District Attorney Howard, of Utah, left for Salt Lake after a full understanding with the President and the Attorney General, and with assurance that he will be supported in the prosecution of Brigham Young in any competent evidence implicating him in the Mountain Meadows massacre. He has also been directed to prosecute the prophet on the charge of misapplication of government funds while he was Indian agent, provided the alleged crime is not barred. The papers on file in the Comptroller's office, covering his disbursements, were supplied to the Attorney General to-day, and certified copies will be forwarded to Utah.

CHICAGO, 13.—Captain Lee, of the Tenth Cavalry, has forwarded to Gen. Sheridan, from Fort Griffin, Texas, an account of his engagement with a band of Comanche Indians, near Lake Quemado. The skirmish occurred on the 4th of May. Four Indians were killed and six squaws and fifty-six head of mules and horses, and fifteen lodges, with a large supply of powder and provisions, etc., were captured. Sergeant Charles Butler was killed.

The *Tribune's* Bucharest correspondent has seen a private letter from a high Russian official, at St. Petersburg, to one of the Grand Duke's staff, protesting earnestly and with great bitterness against the idea that the Czar will make peace and evacuate Roumania. He considers it a great ignominy which the Russian people would not tolerate. It adds that the Czar, before he left the capitol, personally informed the writer that a Russian new era of conquest had begun.

The *Tribune's* London special says, the speeches of Derby and Salisbury, last night, have caused much interest. Derby's views can hardly be gathered from his speech, but his feeling is doubtless inclined

rather toward peace than war. The war party's sole and constant argument is that England cannot remain quiet now that her commercial interests are threatened. A division of the country into two new parties on the war issue is not improbable. The radicals present a determined front and are outspoken and vehement, but cannot prevail in Parliament at present.

The Secretary of the National Rifle Association, of London, writes that at a meeting of the council of the latter body, it was resolved that as no separate teams from Scotland or Ireland had this year been able to enter for the international long range match, or championship of the world, at Creedmoor, the National Rifle Association had accepted the invitation and would send a team representing the United Kingdom of Great Britain and Ireland, to compete in the match at Creedmoor.

Captain Charles Macdon, of the ship *Geneva*, which was sunk at Huanillos in the great earthquake on the Pacific Coast on the 9th ult., has arrived. He says his ship became entangled with others as they tossed wildly about, crashing against each other, sinking her almost immediately in fifteen fathoms of water. On the first alarm he came up from between decks. It was about half past eight p.m. There had been several shocks in the previous twenty days, but he had completed his cargo of guano, and was expecting to sail next morning. Aside from a frightful rumbling sound, his attention was attracted by the extraordinary phenomenon of the mountain above being so much agitated that great rocks became detached and rolled down toward the sea, resembling balls of fire. The water at the anchorage suddenly receded so that ships in eight fathoms touched the bottom. The *Geneva*, too, swung round at the rate of eight or ten knots an hour in great circles, until she struck against a rock which tore out part of her bottom. The ship was forced violently in an opposite direction and went down. Other vessels were as violently driven ashore. Captain Macdon says it seemed to him from the sulphurous or electrical appearance of the mountains that the volcano was bursting out of its side. Rocks were tumbling about with frightful noise, and everything was lighted up. He thinks the damage to the shipping was caused not so much by the tidal wave as by the upward rush of water and rotary currents driving the ships repeatedly against each other.

SAN FRANCISCO, 13.—Two ladies were sunstruck in this city, yesterday, but neither case was fatal. It is cooler to-day, with a fresh sea breeze.

Grasshoppers are reported in portions of San Joaquin Valley. They are too late to harm the wheat, but are destroying everything green.

DIXON, Ill., 13.—The jury in the case of Rev. S. H. McGhee, who for the past ten days, has been on trial here on a charge of poisoning his wife, brought in a verdict, this morning, of guilty, but fixed the penalty at the lowest period of imprisonment by law, fourteen years. McGhee was pastor of a Christian Church in Ashton. The motive for the crime was supposed to be a desire to marry a young lady parishioner.

Mr. Evans remarked that he had heard and known a good many Ohio people, but had never seen their Reserve. General Sherman smiled.

ESTRAY NOTICE

I HAVE in my possession: One dark bay or brown HORSE C LT, two years old, without mark or brand. If not claimed before Saturday, June 24, 1877, he will be sold to the highest responsible bidder, at the Estay Pound at Kanosh. GEO. CHANE, District Poundkeeper. Kanosh, Millard Co., June 13th, 1877. ds&w

THE ENEMY OF DISEASE! THE FOE OF PAIN

TO MAN AND BEAST Is the Grand Old **MUSTANG LINIMENT.**

Which has stood the test of 40 years. There is no sore it will not heal, no lameness it will not cure, no ache, no pain, that afflicts the human body, or the body of a horse or other domestic animal, that does not yield to its magic touch. A bottle costing 25c., 50c., or \$1.00, has often saved the life of a human being, and restored to life and usefulness many a valuable horse.

For Men, it will cure Rheumatism, Burns, Scalds, Bruises, Cuts, Frost-bites, Swellings, Contracted Cords, Pain in the Back, Lumbago, Sciatica, Chilblains, Strains, Sprains, Stiff Joints, Sore Nipples, Eruptions, Pains, Wounds, Ulcers.

For Animals, it will cure Spavin, Galls and Sores, Swinny, Ring Bone, Windgalls, Big Head, Poll Evil, Humors and Sores, Lameness, Swellings, Scratches, Distemper, Stiffness, Strains, Soreness, Open Sores.
