The Eyesight

Is nature's most precious gift. Its loss means living death. Great care should always be taken to preserve it. Careful, conscientious optical service is not specially. That's the kind you want. That's the kind we give. We keep only the best standard goods. Clean, perfectly ground lenses, warranted to give satisfaction when we fit them. They change as conditions in all cases. Examination free.

You Read

Your reading paper with greater or less regularity. If you have a proper regard for your eyes, you will give them the very best, and choose to optical science. We give that free of charge when we supply you with glasses.

Your Head Aches

After a long ride or walk in the sun, it's because of defective vision. The heat and glare of the sun still further strain the over-worked eyes, make them smart and burn and ache. We'll fit your eyes with the proper glasses to protect them and relieve the strain.

Nature's Nap

Is cheap even. She has awakened from her winter sleep and will soon show her spring girth. Her bright sun, with white and blue, that will remind you that you have EYES. About the first thing a person does when they open their eyes in the morning, whether they are fresh to a new world, or have just a change of colored glasses. DON'T LET IT. Come in now and find the cause and the remedy.

That Pleased Feeling.

Pleasure is a luxury, and sometimes it's expensive. No matter who goes on the pleasure trip, there is a desire to get as much as possible for the money spent. The greatest pleasure often comes from wise economy. When you buy your tickets of

GEO. W. JONES,

you save worry as well as cash, and so divide the pleasure with you.
