THE OLIVE TREE FOR OUR SOUTHERN SETTLEMENTS.

OUR southern settlements have a climate as congenial to the growth of various southern productions as any part (Cal.) Union that the people in that section are engaged in setting out olive slips. It is expected that there will be more than two thousand of them set out in that county this year. They can be had there very cheap, and, it is said, they grow with no more attention than

is paid to the willow. They hear in about two years from the time they are planted—live almost forever, and will always be a source of revenue to the cultivators. They make a fine shade tree and are ornamental as well as useful.

We would like to see the day when we can have in this Territory pure olive oil of our own production and manufacture. There is probably no community of our numbers, outside of the olive growing countries, which article as ours. Yet the wretched, ranging and sourced in the hold, injuring the olive growing countries, which article as ours. Yet the wretched, ranging and is sold among us by that title, bears no more resemblance to the genuine article than hog's lard does to fresh, ine article than hog's lard does to fresh, sweet butter. There is very little olive oll about it. Like everything else, almost, in these days of strychnine whisky, shoddy and sham, it is, basely adulterated, and we need not expect to obtain the pure article until we produce it ourselves. We hope our fellow-citizens in the Southern settlements will find it convenient to pay attention to the cultivation of this noble tree. In countries where it is extensiveabout not eating animal fat, we know accur between the citizens and the surrounding houses. Sheriff and a posse of colored militia. By all means let us have the olive tree planted in every part of our land where it will grow.
