THE PRESENT PHASE OF THE  
MORMON QUESTION.

The National Quarterly Review for July contains an article on "The Present Phase of the Mormon Question." The writer starts out with a parallel between the policy of the American Congress in its treatment of the "Mormons," of which an eminent publicist remarked that it was "the most fully equipped legislative machinery to anything good and wise."

To this we offer no objection, although we view the matter in a different light to that of the National Congress in its treatment of the "Mormon" question, has exalted it into a matter for world-wide consideration. It has magnified it not only into national, but universal importance. All nations look upon it as one of the issues of the age, and the social life of a few individuals, forming but a portion of a small community dwelling in the remote valleys of the Rocky Mountains, is talked of, written about and made the subject of thought by the statesman, the social scientist, the popular lecturer, the editor and the theologian all over the civilized world. The result is most advantageous to the "Mormon" Church and the "Mormon" people. The Church and its doctrines are advertised to the ends of the earth; members are pressed into greater unity, sympathy and consequent strength, and the "problem" becomes annually harder to solve.

The National writer does not take this view of it. Strange to say, with the sentence we have quoted, before him, and which he starts out with as a text, he advocates a continuance of the policy of repression, and can see no way to the settlement of the "Mormon" question other than a still more forcible pursuance in the path of the past. If we might venture a guess, we should say the article came from the pen of a man framed from the suggestions of a Utah Federal official. Although bearing evidences of some acquaintance with the country and the situation, it is blotted all through with misstatements of fact, is weakened by misapprehensions of our principles and objects, and manifests the same fear of the admission of Utah into the rights of Statehood as is exhibited by all of his class. (If Utah were a State their occupation would be gone), and he repeats the stale and stupid statement which they generally utter, that on the formation of a State government, "there will be no more room for Gentiles in Utah." He also indulges in fulsome adulation of the late Judge McKean as is their wont, notwithstanding the fact, that he made more egregious blunders while on the bench than any jurist of whom we have an account.

There is something pitiful, too, in the tone of the article. Notwithstanding all that has been done and said against "Mormonism," it is admitted to be spreading rapidly, overflowing into surrounding States and Territories, surviving all the agencies that were expected to accomplish its destruction, and flourishing in spite of the "theories without number" which have been advanced to repress it, and which are pointed out as utter failures. The efforts of the "Liberals," who are described as a "long-suffering" set, year after year, are referred to as "resulting generally in flat failure or the passage of ineffectual laws." The history of Corlaine is cited as another triumph of "Mormonism" over its enemies. The writer says that the Prophet Brigham carried the place in the beginning. Whether this is a sign of a perverted imagination or not, the decline and fall of the boasting burgh on the Bear, which was once the resort of Federal officials and others on orgies bent, give evidence that its fortunes are blighted and its doom is sealed, whether the wrath of heaven was ever invoked upon it or not. The intelligent "Mormon" and observing Utah "Gentile" will discern in what we have cited the ear-marks of the author of the article.

There is one thing that the numerous essays on the "Mormon" question fail always to take into account. They have much to say about "dialogue and dissent among the faithful," "blind obedience to the dictates of Church officials," "women entrapped into polygamy," "a system of ecclesiastical espionage" and so forth, all of which are notions of writers like this of the National, and used as spice to an anti-Mormon pamphlet which otherwise would be insipid, but they never get at the root of the matter. They do not examine into the real cause of "Mormon" devotion, loyalty and stubborn adherence to an unpopular faith. They admit, like him, that the "Mormons" are "domestic in their habits and devoted to a pastoral life; that they are attached to the soil; and have little in common with what is termed 'life' in mining camps and railroad towns; that they exhibit 'a degree of faith that is truly wonderful,' etc., yet they attribute the cohesion of this people, their adherence to "Mormonism" and everything that has been successful in Utah, to the dictation and domination of a few designing men, or, as the National writer says, "an illiterate and corrupt clique" for whose support the people are "drained of their scanty earnings."

Why is it that thoughtful men whose minds are trained to look from effect to cause, do not search a little deeper for the source of "Mormon" unity, submission and earnest faith. They speak about the

not exist, and if it did, the people who have gathered to these mountains out of devotion to ideas and principles, are of the wrong stamp to submit to it. This notion about the people being taught for the sustenance of such dictators is entirely erroneous. And the influence to which they attribute what has been done in Utah and the attitude of the "Mormon" people, could not possibly accomplish these things, especially with the human elements, originally discordant, of which this community is composed.

The secret source of "Mormon" union, tenacity, obedience, devotion, self-sacrifice, firmness and calm trust in future results, is a powerful internal influence that pervades the whole body of the Church, which is a reality to its members, which belongs to all ages and both sexes without regard to priestly authority, differing in degree according to faithfulness in the observance of principles they believe to be divine. They are perfectly satisfied in their own hearts that this is the Holy Ghost, and that it has been bestowed upon them through the laying on of the hands of the Elders in consequence of their submission to the first principles of the Gospel of Christ. The testimony of this spirit is the key to their acceptance of any doctrine, counsel or requirement of those in authority. It is to them the voice of God. Its effects are the same in all nations. It produces in them similar fruits to those in the Hebrew Scriptures. Convince them that they have been deceived, and the "Mormon" problem will be solved. Prove to them that their experience is a mistake, and the "Mormon" question will be settled.

But this cannot be done by maligning their leaders, nor by misrepresenting their motives. Such a course only confirms them in their faith. Ridicule will not turn them. Denunciation cannot swerve them. Least of all will obnoxious laws, packed juries, partisan judges, persecution, proscription, prison and penalties of any kind drive out from their souls the convictions stamped thereon by more than human power, nor lessen their faith in the ultimate triumph of the system for which they live and labor. This misapprehension of "Mormonism" is worth searching out. "Flat failure" and blank disappointment will follow all endeavors to uproot "Mormonism" if this is ignored. All the plans that have been invented to this end have come to naught. So they will in the future. The National writer's nostrum for the settlement of the "Mormon" question is the following, about which we may have something to say on another occasion: "It moves the legislative power which apply peculiarly to this Territory, remodel the jury law, restore the right of dower, abolish female suffrage and make polygamous cohabitation, rather than the mere ceremony of plural marriage, a criminal offense." All this and more may be effected by persistent badgering of our national legislators. But this will never settle the question that troubles the problem solvers. It has a deeper root than they have ever reached, and they persistently shut their eyes to its existence.

The "present phase of the Mormon question," is the same it has always presented—the spectacle of a people who, in this skeptical age, have profound faith in a special Providence; who live for the establishment of a system which they are convinced is divine, and to the interests of which they made all things subordinate; and whose social and political life is so bound up with their religious existence that they all tend to one common and paramount object. And to those who misrepresent them and seek by force and falsehood to overthrow the work in which they are engaged, we quote the words which the writer in the National cites at the conclusion of his paper, with the request that he will apply them closely to himself. "For every false word and unrighteous deed, for insult and oppression, for lust and vanity, the price, has to be paid at last. Truth and justice alone endure and live. Falsehood and injustice may be long-lived, but doomed to come to an end in the end."

BY TELEGRAPH.  
EASTERN.

From the San Francisco South.  
MEMPHIS, 31.—Ten new cases were reported to the board of health to-day. Four persons have died of fever since Sunday night. There are several other cases of fever in the city which will be reported to the board of health to-morrow. The city authorities are sending poor people out of the city, having made arrangements to get half fare over the Louisville and Nashville roads. Dr. Dudley De Starn, acting president of the board of health, states that the fever is not so malignant as last year, and yields more rapidly to treatment. Citizens continue to leave in large numbers.

The Memphis and Paducah R.R. closed running trains to-day. The *Acropolis*, *Appalachee* and *Adelphi* will from date only leave half speed.  
Later—Fifteen cases were reported to the board of health this morning. Among the most prominent are W. S. Campbell and wife, Geo. Nail and two Misses Ross. Two deaths have occurred, Dr. J. C. Harris and W. C. Coppinger. The epidemic of citizens in full progress. Business is almost entirely suspended and generally the outlook is anything but cheering.  
Nashville.—The health of Nashville was never better. In consequence of the inspection and quarantine at Memphis, the authorities will take no steps to impede the travel to this place. The State board of health will meet here to-day to consider the various matters connected with the fever at Memphis.  
Cincinnati.—Dr. Linco, health officer of this city, will publish an order to-morrow declaring the establishment of quarantine against the infected train at St. Louis. Bonds will be stopped in mid stream, 10 miles below the city and examined, and railroad trains will be subject to rigid inspection.  
St. Louis.—The health authori-

ties decided to-night on putting in force a partial quarantine against Memphis. A corps of physicians and sanitary officers was sent down to the quarantine, 15 miles below the city, to stop the Memphis boats, inspect the passengers and make use of disinfectants.

FOREIGN.  
GREAT BRITAIN.

LONDON, 31.—The International Art Exhibition was opened at Munich, on Saturday, with great ceremony. The French Chamber of Deputies by a vote of 383 to 103 passed Ferry's second educational bill, which provides for excluding the religious element from the superior council of education.

A representative of Peru has arrived at Madrid. It is stated he has come with a view to establishing diplomatic relations between Spain and Peru. The existence is denied of a commission charged with drawing up a scheme of reforms. It adds: "before the new political reforms can be considered, it is essential to purify the sources from which the must spring, but even criminal association will not prevent the government's quietly pursuing the path of wholesome reform as is shown by the recent abolition of the poll tax."

The Bonapartists, yesterday, adopted a resolution declaring that by the death of the Prince Imperial, Prince Jerome Napoleon becomes head of the Bonaparte family. It is also decided to adhere to the plebiscitary principle.

The Spanish Congress by a vote of 152 to 83, has approved the bill removing the disabilities of Cuban senators while the bill is in force, to enable the senators to take seats, as they do not all possess the qualifications required by the law. The Russian note to the Porte urges a settlement of divers pending questions.

The Sultan has accepted the first of the Khairiddin political programme, and it is expected that to-morrow, will ratify the second part, which gives the Grand Vizier the right of appointing members of the ministry himself.

## BRITISH AMERICA.

HALIFAX, 31.—The government steamer *Glendon* arrived at 2 p.m. last night, from Sable Island with 79 persons from the wrecked steamer *State of Virginia*, being all the passengers on board of her, and the crew. The *Glendon* reached the island at 5 p.m. yesterday, and in 5 hours had all on board and started for Halifax. The vessel is much crowded, but the passengers are in good nature and were glad to reach the mainland last night. The wreck had not gone to pieces when the *Glendon* left. Captain Moody and his crew remained on the island to endeavor to save the property. The vessel is filled with water, but if fine weather continues some of the cargo may be saved in a damaged state.

The following is the substance of the statements of the passengers and crew: We left New York on the 10th at 10 a.m. All went well until 7.50 p.m. on Saturday when the ship was felt to strike something. The engineer at once stopped and reversed at full speed. Loading the crewing the ship, we found the depth of water, and a boat was lowered and sounded all around the ship. A ledge was run out and used to assist the engines. It was of no use. The passengers remained quiet, but refused to go below. There was no hurry or confusion of any kind. The crew started to getting the boats out and the anchors ready. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use. They then got the boats ready for the lower anchor with about 25 fathoms of chain. All being ready for heaving, the stream anchor was started pulling the cable over the side. Throwing the cable overboard then began, and continued until about high water, when they endeavored to heave the vessel off, but it was no use.
