LOCAL AND OTHER MATTERS.

PRESIDENT YOUNG'S DISCOURSE .--- In today's issue appears a discourse, delivered last Sunday morning by President Brigham Young. It should be read by the ladies everywhere, but especially by those in the Kingdom of God, being devoted, chiefly, to showing the extent of the influence they possess and the direction in which it should be exercised.

TERRIBLE AFFRAT ABOUT A SQUAW .-The S. F. Chronicle, of the 10th inst., says that on the day previous a dispute occurred at a farmer's residence, six miles from Tehama, between William Jackson, and John Butler, a negro. Jackson stole Butler's squaw, and when Butler demanded his squaw Jackson attacked him with a knife, whereupon Butler blew Jackson's leg off with a double-barreled shot gun, and Jackson, for want of timely assistance, bled to death. Butler gave himself up to the authorities and will have an examination to-morrow.

MADAME SCHELLER,-By letter, dated Corinne, Aug. 12, from J. G. Methua, Esq. we learn that he and Madame Scheller were then in that city. They expected to leave to-day, Saturday, Mr. Methus for Helens, Ma., Madame Scheller for Salt Lake City, where she will take a short rest from pro-fessional labors before going to Calfornia.

"A. C." OF BRIGHAM CITY.-Our thanks are due to oar correspondent "A. C.," of Brigham City, for his letter dated August 10th, in relation to the election for county officers recently held at that notorious burg Corinne. Being a matter so utterly void of significance, we do not wish to attach a seeming importance to it by publishing it in the NEWS.

THE MINSTRELS ARE COMING.-As may be seen, by posters and an advertisement in the NEWS, Messrs. Clawson & Caine, Lessees and Managers of the Theatre, intend giving a series of Nigger Minstrel entertainments, commencing on the evening of Wednesday next, having secured the services of the celebrated troupe of Murphy and Mack. The public may depend on hearing the best of music and fun without stint at these entertainments. The members of this troupe are all A 1 in the profession, having no superiors and few equals on the Continent. The fact of their having performed an engagement of five months at Maguire's Opera House, in San Francisco, Maguire's Opera House, in San Francisco, is sufficient to show that they are not shams, but the genuine article. Each one is an acknowledged "star" in the profes-sion, and they will certainly give such entertainments as have never been heard before in Salt Lake. There may be a few before in Salt Lake. There may be a few here who, in the large cities of the East or Europe, have heard the equals of this troupe, but the great majority of the people have never had an opportunity to do so, and we sincerely hope to see the enterprise evinced by the Management, in thus cater-ing for the public amusement, meet with the response it deserves and that there will be full houses every night of the engage-ment

LEARNED FOLLY .- Professor Owen, one of the leading philosophers of Great Britain, is trying to express his faith in that most foolish of all theories, ever discussed by learning-made-mad philosophers, - meanly, the theory of spontaneous generation, or generation without agency or parentage, about which the Schools are now so car-nestly contending, discourses in the follow-ing truty learned style:

"It seems to me, then, more consistent with the present phase of dynamical sci-ence, and the observed graduations of liv-ing things, to suppose that sarcode, or the "protogenal jelly speck," should be forms-ble through concurrence of conditions favoring such combination of their elements, and involving a change of force productive of their contractions and extensions, molecular attractions and repulextensions, molecular attractions and repul-sions—and that sarcode has so become from the first period when its imitative repetition resulted in the vast, indefinite mosses of 'ecocon,' exemplifying the earliest process of formification, or organic crystallization— than that all existing sarcodes or 'proto-gens' are the result of a genetic descent from a germ cell, due to a primary act of miraculous interpositi on."
