

DESERET EVENING NEWS.
PUBLISHED DAILY, EXCEPT SUNDAYS,
AT 100 N. 3RD ST., SALT LAKE CITY.
THE DESERET NEWS CO.
SALT LAKE CITY, UTAH.
WEDNESDAY, JULY 8, 1891.

AN IMPENDING DUTY.

It is to be hoped that the discussion of the People's party will not have the effect of making many of its former members indifferent as to results of election time. Quite a number of them are still unacquainted with either of the national party organizations, and it may be that this will cause them to hold aloof from the polls.

This would be a grave mistake. The next election will take place next Monday and will be for school trustees. The general desire is that party politics shall not be a factor in school affairs. That is entirely proper, but the "liberal" faction is bent on antagonizing this. They want to work for "liberal" nominees. The people ought by this time to know what that means. It signifies an effort to obtain by hook or crook—principally crook—every office that can be grabbed for a "liberal."

We can see the recent voters of Salt Lake City of all shades of political faith to prefer a more active "liberal" attempt to place a more "liberal" in the office of school trustees. Vote for men who represent the idea of freedom in school matters from party influence. And all go to the polls. Let there be no objection. Every man should feel that it is his duty to record his vote against "liberalism," and in favor of unpartisan nominees.

If the respectable citizens will unite on that occasion, the "liberal" faction will receive a blow which will affect its digestion badly and sicken it for the next encounter. Let the vote next Monday be a big one and an unmistakable sign of the times.

A STUPID STORY.

Among other misrepresentations indulged in by the "liberal" faction is the story, now in circulation, that the People's party is not disinterested in fact, but only in appearance, and the falsehood is told that "all through the Territory the teachers are telling the people that in the immediate future it is to be called together again, and is to be absolutely free the Territory under the President."

"Of course there is no truth whatever in the story. The action taken by the Territorial Central Committee has been recognized by the various county and precinct organizations, and a formal dissolution of the party has followed."

The Teachers have nothing to do with the matter in any way. They are not telling the people anything in relation to the party which has been disbanded that its members may join the national political parties. They are uniting themselves with the Republican or the Democratic party as they choose, and the People's party is no more.

The purpose in view is circulating the story to which we allude, to make an excuse for the continuance of the "liberal" faction. There are still people in some parts of the Territory who can be scared by the suggestion which "liberal" schemes necessitate. It is necessary to the maintenance of the "liberal" hold upon them, to invent just such stories as this about the People's party and "pretty soon." And the "liberal" become equal to the task.

It is a poor excuse that has to be told about the "liberal" faction. It cannot last. It may linger for a while and make a great noise, but its death is sealed and the whole episode of it will be swept away. And in full view of present facts, it is really astonishing that even "liberal" there will go to such lengths as the latest story they have set on foot.

SOMETHING MORE THAN "MISXENO."

We have shown in the publication of every reasonable reader that the statement of the Salt Lake Tribune, that John Henry Smith had been "misxeno" from his political faith "by the president," and its further statement that the real was "misxeno" were utterly false and without the slightest foundation in fact. And we have cited in proof of our statement, the publication of Mr. Smith's explanations and reports of the meetings at which he has been speaking.

Now the Tribune says the News has been "misxeno" by its own editors. It says that when we said John Henry Smith had been "misxeno" from his political faith "by the president," we did not state the truth. How much "misxeno" there was in our reports of the Tribune's lying, may be seen from these paragraphs, which we reproduce from the DESERET NEWS of Monday evening:

"We supposed that the reports which are published, nearly every day, of meetings in which John Henry Smith has been speaking, were 'misxeno' by the Tribune, which we reproduce from a Republican standpoint, would be sufficient refutation, and would show even the shrewdest editors of the 'liberal' organ of falsehood."

"But they continue to repeat their untrue statements. There is not the slightest foundation in fact, and that the, in spite of the well-known publication of Mr. Smith, which have been continuous without cessation."

"John Henry Smith has been working every day, speaking every night, in the territories of Republican politics as he sees the subject, and that he is

now teaching his visit there, which reveals his name in a blaze of glory. If reports are true, our time here, as party fellow citizens, is likely to be somewhat to become a veritable American Monte Carlo king."

As the story goes, he is president of the great syndicate of American citizens who have been the beneficiaries of a grant from President Dole of the Mexican territory of Lower California. On this tract they propose to establish the largest and most magnificent gambling establishment in the modern world. It will cost, according to General Murray's estimate, not less than \$10,000,000 and it is for the purpose of raising this sum of money that he is governor has gone back to the "summit of his childhood." For, says the report, "he is the man chosen by the syndicate to lead them in the scheme to establish an American Monte Carlo in the mountains of the great and noble of the earth, who are going to make regular contributions to the 'American Monte Carlo' over which our Murray is taking."

Who can now doubt the greatness of the scheme? One can almost see in the mind's eye his princely figure moving in the grandeur of his new dignity among the throngs of the great and noble of the earth, who are going to make regular contributions to the "American Monte Carlo" over which our Murray is taking."

We can only partly conceive of the splendor that will surround him in this modern Monte Carlo, if it is all he is going to set up. But we have seen the splendid palace of the great and noble of the earth, who are going to make regular contributions to the "American Monte Carlo" over which our Murray is taking."

"UTAH IS GOING TO PROGRESS."

In an exposition of principles in the *Labor Standard*, which has just come to the front in Salt Lake Journal, occurs the following paragraph: "Utah is going to progress, Salt Lake City is going to progress, and so on, which will be in the next political movement, and they are going to progress, not because of who win, but because they have the natural resources to make a great state and a great city."

This source to us being a sensible sort of talk, which is in demand just now. If the *Labor Standard* continues to publish this kind of talk, it is to be expected that it will be a great success. We would suggest, however, that while Utah is going to progress, "the matter which will win" is something to be considered.

If to follow the party that depends for its existence upon the establishing of a reign of terror at home and abroad respecting Utah and her interests, we have a certain gang of speculators and fortune hunters. In the midst of the offices, will be the same as the others of the party, then that would be the party to support by all means. But from the sensible position taken in other things by the new labor organ, we infer that such a platform would scarcely fill in its idea of speedy progress.

The truth of the matter is, Utah will progress. With the aid of a free press and nearly policy it will progress at once and rapidly. If the government of the Territory fails to take a narrow, bigoted, one-sided and dishonest view in regard to the will of the people, the Territory will progress, then that would be the party to support by all means. But from the sensible position taken in other things by the new labor organ, we infer that such a platform would scarcely fill in its idea of speedy progress.

NEWS IN A NUTSHELL.

Benita Podes says that Stanley's book on Africa has numerous mistakes and several gross exaggerations.

Foreign interest in the Japan Fair seems to be growing. Japan and Russia will both take part.

A heavy storm of wind and hail visited Bellevue, Idaho, on the 10th inst. Fruit trees were badly damaged, but the hail killed many of the grain crops.

The man who can make two hairs grow where only one grew before may not be the greatest man in the world, but with judicious advertising he can make a lot of money at the same.

At Belle Creek, Tenn., Geo. Farmer quarreled with his son about some trivial matter. The old man became so enraged that he got a shotgun and fired a shot at his son's head.

Dr. Ziegler, a German who has been employed in the interior of Africa, has had several encounters with natives, and the danger of the worst of all. He has been badly wounded, and his horse killed.

A man of English ancestry was sentenced in Jefferson Market Police Court, New York City, on the 9th inst., to a year of imprisonment. He is Walter B. Humphrey, a member of the

old Irish family of that name, and is said to be closely related to Lord Charles Russell and Maria Russell. Five physicians attend Mr. Blinn daily, all say there is nothing serious in his malady. His eyesight is slightly affected, but this is the result of his action, which are from his exhausted nervous condition, not from brain trouble. He does not eat hearty food, he says he never did. He was always a great believer in porridge, milk, cream and good butter, and his diet, this summer, varies but little from what it did last summer.

At White Earth, Minn., Christina Tourne went to a dance against her mother's consent. When she returned the mother tried to kill her with a knife, and then beat her senseless with a club. A brother belated her with a chair and another brother struck her with a good stick, so that a frightful gash in the cheek. He then fell upon her and choked her, her arms until the blood ran in streams. The poor girl, then in a semi-conscious condition, crawled out of doors and into the trench, where she lay for some time before she was found. She is supposed to be dead. The trial will be placed under arrest and these are facts of lynching.

Ex-Senator Warner Miller says that the Nicaragua canal, when completed, will be a boon to the country, and in the Pacific coast people. He says that their full development can never take place until they have cheaper transportation for their raw materials to the markets of the United States. The distance by water from San Francisco to New York is 10,000 miles, but by the Nicaragua route by 1,000 miles and place everything on the coast at the command of the bay congress in the

The reason why Minnesota refused the title of Duke of Lauenburg was because of the \$25,000 expense attending registration for such. The fees for obtaining the title of duke in Prussia amount to about \$25,000, but of course to \$25,000 while for princes they reach the sum of \$100,000. These are legal fees in the registration and research in hereditary title. Some of the small German princes, especially the King of Wuertemberg, still titles outright at a much lower figure, but the disadvantage of these inferior titles is that they are not recognized in Prussia and anybody sporting them in this country is liable to arrest.

The Farmers' Alliance in Minnesota is in a bad way, owing, it is alleged, to the perpetration of an outrageous swindle by several of the leaders. For some time members have been furnished with a "plan" to be carried out, but it was a swindle, and the Alliance, as a supposed reduction in price. The greatest saving was to be effected on lifting twine. Alliance traders have bought a cheap article of steel twine and had it colored the color of wire, and then sold it in the market. The twine, however, was not as strong as the real twine, and the Alliance, as a supposed reduction in price. The greatest saving was to be effected on lifting twine. Alliance traders have bought a cheap article of steel twine and had it colored the color of wire, and then sold it in the market.
