The engineer of the work train, George Becker, had orders, it is said, to pass the freight at Mackinew, and was on his way there. The work train was about five minutes late and was run-ning at full speed in order to make up time. When about two miles from Ninert and entering a cut, both en-gineers saw the approaching trains, and, realizing that it was impossible to stop, they threw on the emergence thrakes, whistled twice and then leaged from their cabs. The collision was great from their cabs. The collision was seen by Russell Noonan, who hastened to a nearby house and telephoned to Tre-

In Praise of Public Highways.

Kansas City, Mo., Nov. 20 .- At the annual banquet of the Commercial club Gov. Montague of Virginia spoke on 'The Supremacy and Opportunity of the American Republic." He said:

"What will best give American peo-"What will best give American peo-ple their best opportunity? We have neglected largely the old fashioned pub-lic highway. No civilization has ever outlived the common road. Our public highways should not longer remain a social and industrial blockade to our people. We want a wider and more practical system of public school edu-cation. Our system is for opportunity to serve. We are too prone to make education a short road to leisure. The colored man has seen the white edu-cated man the only man in his com-munity who did not work. It has been a stumbling block to him. "Wealth has not made men, but " is the conscientiousness in men that make them winners. The American wage earner produces twice as much as any other in the world and our cap-tains of industry would not be such in any other country. The most efficient labor the world ever knew originated in the American republic and goes to build up that unification of people, pa-triotism, which is the duty everywhera to stand for all that is best for the American people." ple their best opportunity?
