MINING, BUSINESS AND STOCKS

PRODUCTION OF GOLD IN THE U. S.

Waldemar Lindgreen Says Production of Country Last Year Exceeded $84,000,000.

WHAT ALASKA MINES HAVE DONE

The Largest Producer of Placer Gold —Utah Made Some Good Gains —So Did Colorado.

Although detailed statistics for the production of gold during the last year are not yet available, Mr. Waldemar Lindgren, of the United States geological survey, has made some interesting prognostications as to the distribution of the production among different classes of ore deposits. A preliminary estimate of the production of each state and territory was given out by the Director of the Mint at the first of the year. According to this estimate, the production of gold in the United States during 1904 amounted to $84,551,300.

After a period of very rapid advance in the gold production from 1892 to 1900, inclusive, during which an increase from $33,000,000 to $79,000,000 took place, there were two years of nearly stationary output and one year of decided decrease. It is therefore very satisfactory to find that the production of the yellow metal has risen again, $84,551,300 against $73,591,709 for 1903.

Mr. Lindgren finds that the sources of this increase are easily traceable. In the first place, Cripple Creek, the greatest gold-mining camp of the United States, has gained about $3,000,000 due to renewed mining activity following the successful completion of a new drainage tunnel, the cessation of the strike which interferred with the production of 1903, and new discoveries of rich ore bodies. In the second place, a new mining district of great promise, named Goldfield has been discovered in Nevada, and this, during the first year of its existence, has added at least $1,500,000 to the value of the output for that state. In the third place, the production of California has risen nearly $3,000,000 compared with the production of 1903. This increase is due in considerable degree to the wonderful development of the dredging industry in the Sacramento valley. Lastly, the smelting of auriferous copper ores has received a great impetus in Utah, augmenting the gold output in that state by $1,000,000. These four factors, together with moderate gains in the production of Alaska, Montana, and South Dakota, are sufficient to account for the increase of nearly $11,000,000 in th production of the last year compared with that of 1903.

Mr. Lingren classifies the gold production acording to its derivation from placers, dry or quartzose ores, copper ores, and lead ores. He estimates the production of gold from placers as $12,500,000, from quartzose gold and silver ores at $62,754,000, from copper ores at $1,600,000 making a total production of $84,554,000, a sum that practically agrees with the estimate of the director of the mint.

Alaska is the largest producer of placer gold and should show a gain of at least $200,000, the output being estimated at $5,800,000. California will show an increase which may reach $800,000, the production being estimated at $4,800,000. This is partly due to a favorable season for hydraulic mining, but chiefly to the great development of the dredging industry. Unexpectedly large areas in Yuba, Sutter, Nevada, Butte and Sacramento counties have proved suitable for the diredging process, while the dredging machines have been greatly improved and enlarged and the expenses correspondingly reduced. At the same time the output due to drift mining and hydraulic mining is on the whole slowly decreasing. Idaho, Montana, Colorado, and Oregon have probably maintained their production at the value reached for a great number of years. During 1903 these states, respectively, yielded $750,000, $482,000, $400,000 and $207,000. Since 1902 New Mexico has contributed over $100,000 annually in placer gold, derived from veins of unknown age and obtained by dredging operations in Colfax county, but none among the other states has exceeded $100,000 in output.

The production of gold from quartzose gold and silver ores is subdivided by Mr. Lindgren into the production of pre-Cambrian quartz veins, $5,454,000; of Mesozoic quartz veins in the Pacific coast belt, $21,600,000; and of Tertiary gold quartz veins in the Rocky Mountains and Great Basin, $35,700,000, making a total of $62,754,000. Auriferous quartz veins of pre-Cambrian age are, so far as known, confined to the Atlantic States, South Dakota and Wyoming. The bulk of the yield from the Atlantic states comes from North Carolina, South Carolina and Georgia, and is derived from gold bearing pyrites. In south Dakota the great low grade deposit of the Homestake mine is considered to be of pre-Cambrian age. The small production of Wyoming should probably also be credited to the same class of deposits.

Auriferous copper ores occur throughout the United States in deposits of widely differing age and form. Some of the greatest copper deposits, however, such as those of Arizona and Michigan, are practically free from gold. The gold from California's copper deposits is estimated at $272,000 and from Montana's copper ores at approximately $1,100,000. The mining of auriferous copper ores in Utah has received a great impetus during recent years, and the production of gold from this source has steadily increased. It is estimated at $2,100,000 for 1904, but this includes some of the smelting ores from Tintic, which are apt to contain both copper and lead. The gold from copper ores in Colorado is difficult to estimate, as no exact statistics are available, but it probably does not amount to $500,000.

From Colorado and Utah come the principal gold-bearing lead ores. Colorado contributes about $4,000,000 of gold from its lead ores, one-fourth of which is derived from the Leadville mines. Utah gains about $400,000 of gold from lead ores, nearly the entire amount of which is obtained from the Park City silver-lead veins.

Good advice to women. If you want a beautiful complexion, clear skin, bright eyes, red lips, good health, take Hollister's Rocky Mountain Tea. There is nothing like it. 35 cents, Tea or Tablets. Ask your druggist.

SMELTER SMOKE SUITS.

Two More Filed Yesterday Against Bingham and Utah Consolidated.

The Bingham Copper & Gold Mining company and Duncan McVichie have been made defendants in two smelter smoke damage suits filed in the district court yesterday. Jesse Argent is plaintiff in one action, and he asks damages in the sum of $1,992 for injuries alleged to have been caused to his farm and crops and also to the health of his family because of the smoke and gases of defendants' smelter. Valentine Bateman is plaintiff in the other action, and he asks damages for the same reason in the sum of $2,000.

Mr. Bateman also filed suit yesterday against the Utah Consolidated Mining company to recover $2,000 as damages from injuries to his crops alleged to have been caused by the smoke from defendant's smelter.

SMELTER SMOKE SUIT.

Defendants Cited to Appear Before Judge Marshall on Monday.

Next Monday is the date set for the defendants in the injunction suit, filed some time ago, against the several smelting companies operating in the Salt Lake valley, to appear before Judge Marshall in the U. S. district court, to show cause why their plants should not be closed. This is the case in which a large number of farmers in the southern part of the county seek to have the smelting concerns abate and remove the smoke nuisance; together with damages for the destruction of vegetable and animal life upon their premises.

FIND NEAR ELKO.

Sensational Gold Ore Discovered in Bullion Canyon.

From Elko, Nevada, the information comes that a strike of sensational gold ore has been made about 27 miles from that place in what is known as Bullion canyon. The discovery was made by Charles Montgomery, a prospector. It is claimed that parties interested in the Amalgamated Copper have bonded the ground.

For Purchase of Smelters.

New York, May 29.—A transfer of $3,000,000 to San Francisco was made today through the sub-treasury by Laidlaw & Co. The transaction aroused some curiosity in financial circles. Its exact purpose could not be learned, but the bankers declare the transfer has no connection with the payment of the latest Japanese loan.

San Francisco, May 29.—It is supposed that the transfer from New York to San Francisco of $3,000,000 is to provide money for the purchase of the Selby smelting works. Negotiations for the sale of the big smelting works to M. Baruch of New York have been in progress for several months, and it it known that they have been completed with the exception of the purchase price.

Got Off Cheap.

He may well think, he has got off cheap, who, after having contracted constipation or indigestion, is still able to perfectly restore his health. Nothing will do this but Dr. King's New Life Pills. A quick, pleasant, and certain cure for headache, constipation, etc. 25c at Z. C. M. I. Drug Dept. guaranteed.

CONCENTRATES.

Frank Dalton of Marysvale, is in the city.

Sessions of the mining exchange will be resumed at the usual hour tomorrow morning.

William Ochs pulled out for Idaho last night to give his attention to mining matters.

Manager John A. Bagley of the Shoshone Power company came down from the north yesterday.

Manager L. A. Amsden of the Yankee Consolidated went out to that Tintic property during the day.

It is reported that the Minnie Moore mine at Hailey, Ida., will close down indefinitely about June 15.

Fred Lyon, constructing engineer for the United States Mining company, will return to California during the day.

Broker DeWitt B. Lowe and wife departed for California this afternoon. They will be absent several weeks.

Frank H. Officer, field representative of the United States Mining company, is expected home today from a roundup of the Nevada camps.

Manager C. H. Doolittle of the Utah and Eastern Copper company, is expected home from the mines of that corporation in southern Utah tomorrow.

The Gold Hill mine in the Deep Creek country has resumed operations again under the direction of James McVichie. The mine is owned by the estate of the late J. F. Woodman.

The ore and bullion settlements reported late yesterday by McCornick & Company, were as follows: Crude ore and concentrates, $59,900; base bullion, $26,700; gold bullion, $20,000.

Roy Bemis has returned from a trip to California, where he went after closing up the recent deal for the sale of a large block of stock in the North Bingham Copper to Samuel Newhouse.

The ore shipments over the Tonopah railroad this week aggregated 1,762 tons, all of which came from Tonopah mines. The shipments are divided as follows: From Tonopah: Tonopah company, 1,180 tons; Tonopah Extension company, 230 tons; Montana-Tonopah, 212 tons; Belmont, 140 tons.—Tonopah Miner.

Major W. A. Stanton returned from the Bullfrog country yesterday, having spent a week among the big properties. In a conversation with A. A. Berlini he said among other things, that the Tramp, and Tramps 1 and 2 were as promising, properties as he ever saw. The major also examined the Eclipse and pronounces it and A 1 mine.—Goldfield Review.

Supt. Charles L. Rood of the Ontario mine at Park City came down from camp last night and reports that the second cave in the tunnel has been cleared and that it has been penetrated to the distance of 3,000 feet. At this point the men encountered so much foul air that they turned back. Just where the next obstruction is, of course, has not been determined. About 4,000 gallons of water per minute is coming out of the tunnel.

Like Finding Money.

Finding health is like finding money —so think those who are sick. When you have a cough, cold, sore throat, or chest irritation, better act promptly like W. C. Barber, of Sandy Level, Va. He says: "I had a terrible chest trouble caused by smoke and coal dust on my lungs; but, after finding no relief in other remedies, I was cured by Dr. King's New Discovery for Consumption, Coughs and Colds." Greatest sale of any cough or lung medicine in the world. At Z. C. M. I. Drug Dept. 50c and $1.00; guaranteed. Trial bottle free.

PROSPERITY OF NEVADA'S CAMPS.

The Copper Mines of Ely Are to Be Equipped With Facilities For Smelting.

NEW RAILROAD TO BE BUILT.

Contracts for Grading Will be Let Soon—Old Eureka Picking Up—Activity in Humboldt.

W. A. Scott, western representative of the Engineering & Mining Journal of New York, came in this morning from a roundup of the various mining camps of Nevada. He covered all the new camps in the western and southern portions of the state and carried his investigations to the mines of the old Comstock.

Mr. Scott also visited the districts of central Nevada, and was particularly struck with the activity being displayed in the counties of White Pine and Humboldt. In the former, at Ely, the prospects for the construction of two copper smelters at an early date are exceedingly bright. In fact the Gereaux Copper company is already taking in equipment, hauling it overland from Wells, a distance of 150 miles, the company having decided to commence making copper matte before the camp is connected with the outside world by rail. The other company having the building of a plant for the reduction of its ores in contemplation is the White Pine Copper company, but it is hardly likely any more will be made until it is possible to bring material and equipment of the plant in by rail.

The citizens of Ely feel quite confident that the railroad is going to be built before the close of this year, and that not very many weeks will expire before the contracts for grading will be let and actual construction work started. The route selected is through Steptoe valley to the town of Toano on the main line of the Southern Pacific. The distance from Toano to Ely will be 156 miles.

With the prospect of a railroad coming into the camp there is a decided increase in activity noticed on every hand; prospectors are on the alert, and men who have held onto property there from year to year by doing their assessment work find themselves possessed with renewed feeling of hope.

The old camp of Eureka, Mr. Scott says, is also picking up and the year will show an increased output of ore. Humboldt county has been struck with the wave of prosperity, and conditions show marked improvement compared to those in existence a year ago.

While Mr. Scott heard some complaint in Tonopah and Goldfield about dull times; he looks upon this as being a good sign, and considers that it is nothing more than the natural quieting down after a lively boom. "I think it is simply this," said he. "Business is settling down to a solid, substantial basis, and the result will be good. The development of the mines at Tonopah has thoroughly demonstrated the permanency of that camp and, I think, too, the same can be said of Goldfield. Bullfrog, of course, is yet a new district, but I see no reason why it should not come out all right as conditions seem to be more encouraging there than they were in Tonopah in its first stages."

Conditions in Bullfrog.

Thomas E. Edwards, who recently sold his half interest in the great Montgomery-Shoshone property at Bullfrog to Malcolm L. Macdonald and associates, says the Tonopah Miner, came up from the south Tuesday and brought most satisfactory news from the Bullfrog district. Mr. Edwards states that nearly every property that is being developed is showing splendid results, and he is confident that Bullfrog will soon take its place in the front rank of the world's great mining districts. Outside of the two big properties, the Bullfrog Mining company of Nevada and the Montgomery-Shoshone, Mr. Edwards says that the best showings are being made on the National Bank and the Gold Bar. The Gold Bar, formerly known as the Benny Hazeltine group, is opening up a large body of ore of a good milling grade, while the National Bank is developing a good grade of shipping ore. The Stehway, which is situated within 1,000 feet of the Montgomery-Shoshone, is also looking well and is quite likely to develop into a shipper in the near future. Dr. Withes of Ogden, who recently purchased a group of claims on the east side of the river, is pushing development work energetically and is meeting with excellent results.

Do Not Be Imposed Upon.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. Ask for FOLEY'S Honey and Tar and refuse any substitute offered as no other preparation will give the same satisfaction. It is mildly laxative. It contains no opiates and is safest for children and delicate persons. Sold by F. J. Hill Drug Co., Salt Lake City.

It is ten times easier to cure coughs, croup, whooping-cough and all lung and bronchial affections when the bowels are open. Kennedy's Laxative Honey and Tar is the original Laxative Cough Syrup. Gently moves the bowels and expels all cold from the system. Cuts the phlegm, cures all coughs and strengthens weak lungs.

Bicycle races tonight at Salt Palace saucer.

PORTLAND EXCURSIONS

NO DOUBT ABOUT ROAD TO BULLFROG

Las Vegas Times Says Line to Borax Fields of Death Valley Is a Sure Go.

INDICATIONS ARE FAVORABLE.

Option on Buol Lots for Building of Station and Freight House Has Been Lifted.

Further details regarding the new feeder for the Salt Lake Route at Las Vegas are forthcoming in the Times to hand today, which says:

"The railroad for Bullfrog and borax fields of Death valley will be a sure go. The option on the Buol lots has been lifted by the interests who negotiated for a round house, station and freight house site. The lots in question are the possession of the railroad interests, besides having station, freight depot, round house they also have extensive yards and repair shops at this point or near the Armour ice plant. These improvements and added enterprise to Vegas means much that will militate in favor of the good side of Vegas. It means at least 200 additional railroad employes, with good pay and steady work, over and bove the 300 railroad employes that wil be regularly stationed at Vegas through the employment of the Clerk railroad."

TWO GOOD STORIES.

Vouched for by Rock Island's Traveling Freight Agent.

John Trewchela, the irrepressible traveling freight agent for the Rock Island in Montana, is in town with a brand new collection of stories. Speaking of Helena this morning he stated that the Northern Pacific some time ago gave its old depot to the Presbyterians in that city to be used as a church. The gift was accepted and the structure moved to the church lot where a gable and part of a steeple were added. Funds, however, ran out before the job was completed and the painting of the place of worship has been postponed. Under these conditions the church is a standing advertisement for the Northern Pacific as it is plastered with the old painted signs of the railroad company and altogether presents a most incongruous appearance.

Speaking of Butte he tells a story of the plumbers' strike there that is somewhat funny. It appears that the strikers hired several men to carry banners with lists of the "unfair shops" on them and also to stand outside of the shops in question and inform the public of the state of affairs. These fellows soon come to the conclusion that the strike was to be a long drawn out affair. Accordingly they organized a union among themselves and struck for higher wages. They were getting $2.50 a day for their banner-bearing work; they demanded $3.50. The union was promptly recognized and they got their advance.

AMBITIOUS JAP.

Son of Minister to Netherlands Working As a Section Hand.

G. Kaiwai, reputed to be the son of the Japanese minister to the Netherlands, is working as a section hand on the San Pedro between Caliente and Las Vegas in an endeavor to obtain a practical training as a railroad engineer. He entered a technical college in Japan several years ago, from which he graduated with honors. He then determined to come to America and complete his course by working as a common laborer. In this capacity he has worked on the Salt Lake Route for the past 18 months. While his companions have been contented to use a pick and shovel and spend their spare time in sleep, he has been taking copious notes of all he saw. This ambitious little brown man has a brother and sister at Stanford university, the former in his senior year. He leaves in a few months for Japan, where a good government position awaits him.

SUITS BY EMPLOYES.

Short Line and Rio Grande Are Each Made Defendants.

The Oregon Short Line Railroad company has been made defendant in a damage suit filed in the district court by Joseph Slater, who asks judgment in the sum of $5,000 for injuries received while in the employ of defendant. The compaint alleges that Slater, while wheeling truck, stepped on a broken bottle which was carelessly left on the floor.

Suit has been filed in the district court by Hilma G. Malmstrom and her children against the Rio Grande Western Railway company to recover $25,000 damages for the death of Peter Malmstrom, the husband and father of plaintiffs, who was killed at Pallas on July 22, 1905, while in the employ of defendant as conductor of a freight train. It is alleged that through the negligence of the engineer and fireman on the train, Malmstrom was thrown from a car and run over and killed.

Raise in Lumber Rates.

San Francisco, May 29.—An increase in freight rates has been ordered by the owners of steam schoonersp lying in the lumber trade on this coast. The new schedule of rates that has been adopted by steam schooner owners specifies that the tariff on lumber carried from Columbia river, Puget Sound or Grays harbor to San Francisco shall be $4.50 per thousand feet and to San Pedro and southern ports $5.50 per thousand feet. The new rate is a 50-cent increase on the former tariff.

Harry M. Adam Resigns.

Portland, May 29.—Harry M. Adams, assistant general freight agent of the Oregon Railroad & Navigation company, has resigned his position and will leave on June 1 for Seattle, where he will take charge of the office of assistant traffic manager of the Great Northern on the vacancy of that office by J. C. Eden, the incumbent.

Warning.

You cannot have good health unless your kidneys are sound, for the kidneys filter the blood of impurities which otherwise act as irritating poisons and break down the delicate organs of the body and cause serious trouble. If you have kidney or bladder trouble and do not use Foley's Kidney Cure, you will have only yourself to blame for results, as it positively cures all forms of kidney and bladder diseases. Sold by F. J. Hill Drug Co.

WATER RIGHTS AND IRRIGATION.

The New Irrigation Law.

An act codifying and revising certain laws providing for determining and recording water rights passed by the sixth session of the Legislature of the State of Utah, 1905. Postpaid to any address, 25c.

DESERET NEWS BOOK STORE,
Salt Lake City.

UTAHNA MANAGER NOT RESPONSIBLE

Damage Suit for Closing of Restaurant Decided in His Favor.

J. P. GUNN DEMANDED $1,500

Latter Has Lease on Building but Was Forced Out to Make Way for Theater.

The jury in the case of J. P. Gunn against W. R. Gourley, which was tried in Judge Lewis' court, has returned a verdict in favor of defendant. The action was brought to recover $1,500 damages for interfering with his restaurant business. He had a lease on the building now occupied by Utahna theater and was conducting a restaurant when the defendant commenced to alter the building and compelled him to move and surrender his lease.

RICHARDS GUILTY.

Supreme Court Finds That Crime Was Committed in the Night Time.

The judgment of the lower court in the case of the State of Utah vs Samuel Richards, appellant, has been affirmed by the supreme court. Richards was convicted of burglary in Sanpete county, the crime being committed at Fountain Green on the night of Sept. 27, 1904. The appellant contended in his appeal that the evidence did not show that the crime was committed in the night time. The supreme court holds that the evidence shows that the crime was committed between sunset on Sept. 27, and sunrise on Sept. 28, and hence according to the law was committed in the night. The judgment is accordingly affirmed. The opinion of the court was written by Chief Justice Bartch.

No Cases in June.

During the month of June there will be no cases tried in the criminal division of the district court as Judge Armstrong will leave on Saturday for a month's vacation which will be spent at his old home at Boscobel, Wis. Judge Armstrong will attend the commencement exercises of his alma mater, the University of Wisconsin. Judge Armstrong's probate calendar will be handled by one of the other judges during his absence.
