CLUB CHAT

The most important event in club circles during the week was the meeting of the Cleofan on Tuesday, the session being devoted to a discussion of the federation work, and the federation officers being present to explain the various branches comprised in its efforts. Mrs. C. D. Moore spoke on the subject of the state federation and outlined the work it hoped to perform in civic lines; Mrs. F. D. Bickford discussed the general federation, the states that are represented, and the state, district and city federation. Mrs. Hutchison, chairman of education, talked of the effort being made to have domestic science taught in the schools, and said there was a desire on the part of a great many to have the class in science continued at the University this coming spring. She also dwelt on the need of free kindergartens in connection with the public schools. Mrs. Emily Richards, chairman of the state kindergarten committee made an interesting talk upon the efforts being made to promote an interest in the establishment of kindergartens throughout the state, and Miss Mary C. May spoke of the importance of the work, and the beautiful effects to be demonstrated. Mrs. Lydia Alder's talk was upon the important subject of the Consumers' league, and Mrs. Volmer read a report submitted by Mrs. W. A. Nelson on the Free Traveling library. A large number of visitors were present to enjoy, with the

members, the most interesting discussion.

In a report read before the Illinois state federation, Mrs. S. Noble King of Bloomington said of the work accomplished in the state by the Association of Domestic Science: "Much has been said of the emancipation of women from household labor by the use of machine-made goods. But the question is asked: Is this freedom and release an unalloyed good? It has been said that girls now do not even make their own clothes. Be that as it may, there are thousands of women who cannot make their children's clothes—women, too, who have to earn their living by manual labor. Thousands of women cannot make a loaf of sweet bread, or bread, women whose husbands are bread earners and who need all the strength that food can give.

What training can girls receive in a modern home, and these, and what will their future homes be? The school that has control of the formative period of a girl's life gives the equipment that shall for ever make her content with her own ability to be a useful, respected woman."

The association has succeeded in securing a household science department in the University of Illinois, and has secured a free scholarship in that department for one young woman in each county in the state, the result of a school for housekeepers, known as the "Housekeepers' Conference," held at the university.

The Sphere publishes an interesting article on the various residential clubs for women workers, which are a distinctive feature of London life. Says the Sphere:

"London has equipped itself in this respect in a remarkable way. One of the most recent experiments is Brahmam House, a new residential club for educated girls and women who are earning small incomes in London. The house, which was opened in June, is situated in a quiet street near Victoria station. It is admirably planned for 50 or 60 residents, and is most up-to-date in such matters as electric light, heating and bathrooms. The terms are so moderate as to bring it within the reach of the girl earning, say, 25 shillings a week.
