The book is said to have the . unqualified indorsement of Rear-Admiral Schley, who read and corrected the proof sheets. When President Roosevelt was gov ernor of New York he was present when Mr. Graham gave an account of the battle to state officials and members of the legislature, and said: "I am sure you feel as pleased at having listened to Mr. Graham as I do, for I have listened to the best account I have ever heard or read of the naval

Chicago, Jan. 12 .- A loss estimated at | partly successful, for several freight

learly \$275,900 was caused by a fire that broke out at 1:45 o'clock this morning in the plant of the J. F. Well branch of the American Malting company. The property is situated at Fifty-second street and the Pan Handie railroad tracks.

The fire started in the elevator, a great structure 150 feet high, covering an area 300 by 200 feet, and having a capacity of 300,000 bushels of grain. It was filled with barley almost to its capacity. The building was destroyed and the contents are almost a total

Just south of the malting company's plant are the Pan Handle's freight yards, and at the outset of the fire there was a serious menace to a vast amount of rolling stock. The buring elevator sent a great glare aloft, in the light of which scores

cars were destroyed. Adjoining the elevator was a pickle factory on the west, owned by J. Weil. Great efforts were made to protect this plant, but it was somewhat damaged. From the roof of this factory the firemen fought the flames in the ele-vator, but they worked at great dis-

advantage, owing to the great height of the building. When the flames broke through the roof of the elevator, large shoets of iron plates fell from the building and greatly added to the danger of the firemen. The sheet iron plates were red hot and there was a sufficient blaze to throw them clear of the building, en-

langering the lives of the men working near The American Malting company bought the elevator, with the J. Well malting plant, at the time the trust was formed four years ago. The com-

TROUBLE OVER THE LEASE.

Officers Appointed for Four Years Only and Cannot Grant Lease For Fifteen Years.

Saturday evening a meeting of the orsemen was held at the Salt Lake Saddlery company's store for the purpose of listening to the report of the committee appointed a few days ago to confer with the D, A. & M., society directors with reference to a mile track which it is proposed to be constructed at Agricultural Park. The plan of the tors nich has already been published in this paper. The committee reported that the fair people were favorable to the movement and asked that the horsemen submit further plans as to the construction of the track and the

management of it. The only addition to the proposition of the horsemen as already announced, is that they be permitted to erect a

club house within the fair grounds and have it for their use. Those at the meeting were of the opinion that a club house would add interest to the sport. The organization of an association was discussed and met with favor among those present. It was announced

that the necessary cash could be ob-tained if it was assured that the fair people would make the concessions asked for by the horsemen. It is their desire that all the im-

provements asked for be completed by the first of June and they agree to have the track built and do their part by that time. Another meeting is to held at which the committee com-osed of the following will report what action the fair directors take in the matter: H. W. Brown, J. C. Leary, W. E. Stone, Dr. Shores, Dr. Stewart and James Devine

This committee and the executive committee of the D. A. & M. society are in conference this afternoon discussing the proposition of the horse-men. Their is one feature about the matter which will cause trouble, and that is the lease. The horsemen want a lease for fifteen years, but it is doubt ful if the society could grant it if the directors were all in favor of it. According to Secretary S. W. Sears the officers of the society are appointed for four years only, and he did not think the yhad any power to grant a lease fo period longer than their time in of-

The society now has on hand \$30,000 with which to erect buildings and places for the stabling of horses and cattle during the coming season. The amount is not sufficient to erect the buildings necessary and build a mile track also. Just what will be done is a matter of speculation as the directors of the society have not taken final action in the matter yet.

The boys will enter the ring at 126 pounds and those who witness the mill will see some very fast work done.

Of Chamberlain's Speech. London, Jan. 12 .- The speech Colonial Secretary Chamberlain at Birmingham is being commented upon from the party standpoints. It was delivered at the annual dinner of the Jewelers' and Silversmiths' associations, an entirely non-party gathering. Mr. Chamberlain was in high spirits

and spoke more deliberately than usual, puffing a clgar at intervals. His references to Count von Buelow, the imperial chancellor of Germany, were calmly and even contemptuously given. Mr Chamberlain's reply meets with ap-proval from men of his own party, but Frogmore. in many quarters friendly to his policy regret is expressed that he should thrust his own personality so much to

But the paper can not forget that almose yearly Mr. Chamberlain has offended some great power. First it was Russia, then France. He irritated America by suggesting an alliance, and is now working
