Shares and \$313,027 Recorded.

## DALY-WEST THE FEATURE.

Advancing Sensationally from \$19.30  
To \$28.10—Market is Much Im-  
proved by Outside Orders.

The past week on the mining ex-  
change has been exceptionally active  
and interesting. It closed today with  
the market in a much improved condi-  
tion due to the fact that outsiders have  
taken a substantial interest in the  
movements of certain stocks. Without  
doubt this interest and increased trading  
has been stimulated by the actions  
of Daly West which have been alto-  
gether sensational. In the face of the  
fact that long and tedious litigation  
has been threatening. Late develop-  
ments, however, seem to point strongly  
towards a compromise of some sort  
with the Quincy and thus the move-  
ment upward from \$19.30 to \$28.10  
can be satisfactorily explained.

Other stocks whose movements have  
been of special interest are Ajax, Con.  
Ayer, Martha Washington and Yan-  
kee. Ajax has been heavily bought  
during the entire week and it is stated  
that fully 75,000 shares have been pur-  
chased for eastern investors. The stock  
has advanced from less than \$3 to \$31,  
however, part of that is accounted for  
by the fact that the 5 cent assessment  
on the part of the week is now paid.  
Con Mercur with the strong proba-  
bility of monthly dividends being paid  
beginning in April, has gone up consid-  
erably and closed at 1.36. Martha  
Washington early in the week tumbled  
from \$4 to 4 cents at which it closed this  
morning.

Sparked, upon rumors that the stock  
would be placed upon the Boston ex-  
change, with quotations about \$3.00,  
advanced to 2.75 from which it receded  
today to 2.46.

Other stocks were more or less ac-  
tive. May Day, Washington leading  
with considerable strength, and the  
market closed with the following quo-  
tations recorded:

"OLD RELIABLE"  
ORE SHIPMENTS.

Enormous Tonnage Leaves Bing-  
ham Daily for Smelters.

## LEADS ALL OTHER CAMPS

In Utah—Park City Ships Over Six  
Million Pounds Weekly and Bing-  
ham Over Nine Millions.

No other camp in Utah ships such an  
enormous tonnage of ore as does Bing-  
ham. The mines in that camp average  
over 500 tons of ore daily and yet there  
are a number of properties in a posi-  
tion to ship that do not. The great  
Highland Boy sends out nearly 500 tons  
daily to its own smelter in this valley,  
and the Bingham Co. about 350 or 360  
tons to its smelter. The Ben Butler,  
Tiewaukee, Neptune, United States  
leasers, the Buttefield and a number of  
others reach the market occasionally  
with a few cars of ore, and the weekly  
shipments total over 9 1/2 million  
pounds of ores bearing good copper  
values.

Besides the ore shipments a number  
of cars of concentrates are received at  
the smelters here every week and the  
tonnage is greatly on the increase.  
The Bingham Co. has not yet reached  
its limit of production, and there is  
the great property of the United States  
Mining company, the property of the  
Boston Consolidated, and various others  
yet to join the shipping list. From  
the United States mines a thousand  
tons or more will be shipped daily as  
soon as the great smelter of that com-  
pany shall be completed and a score  
of other properties have ore in quanti-  
ties bearing fair values.

## NEWS FROM BINGHAM.

Bingham and Eastern May Start  
Work Again—Other Notes.

John C. Dugan, superintendent for the  
Bingham & Eastern C. M. Co., has  
received a dispatch from headquarters  
at New Haven, Conn., stating that one  
of the directors will be here within a  
few days to inspect the company's  
property (Jersey Lake group), and pre-  
sumably to arrange for beginning de-  
velopment work—suspended upwards  
of a year ago.

Two cars of concentrates, made from  
Columbia lease ore at Rogers mill, are  
being loaded at depot.  
Jones & Cook are putting on dump a  
good grade of shipping ore from their  
Winnamuck lease.  
Andy Christopherson is hauling to  
depot a 30-ton lot of ore from a claim  
of the Stewart & Easton C. M. Co.  
The last shipment of Ben Butler con-  
centrates carried 48 per cent lead, 6.2  
ounces silver, 60 cents gold per ton,  
with 12 1/2 per cent iron excess.

The late storms have so effectively  
closed up roads that very little ore  
is being moved by wagon. The Dowsy  
mill will start in on another lay-off to-  
morrow.

The Erie tunnel, following a fissure,  
this week tapped the bedded vein for  
which it was drilled. It is reported  
that the tunnel is showing at present a  
promising layout of high grade ore.  
The work of clearing out the old  
Franklin tunnel and putting it in shape  
for connecting with the Erie tunnel  
will now be done by three shifts and  
will be completed early in April.  
A large body of lead carbonate is be-  
ing opened up in the 800-level of the  
Sampson. After all the years it was  
reserved for the present company to  
discover that the Sampson is a gen-  
uine bonanza. Results from present de-  
velopments suggest that the property  
will make a big shipping record this  
season—Bingham Bulletin.

## N. Y. EXCHANGE SEATS.

Now Held for \$15,000 Less Than the  
Price Two Months Ago.

For some unexplained reason there  
has been a decided "slump" in the price  
of seats on the New York Stock Ex-  
change.  
A seat sold yesterday for \$60,000,  
which is \$5,000 below the last sale re-  
ported and \$15,000 below the high level  
price two months ago.

Brokers ascribe the break to the fact  
that the market was low and for some  
time past has been wholly "professional," or  
in other words, the speculative public is  
standing aloof.  
Because of this marked apathy on the  
part of the general public the spring  
opening of the market has been post-  
poned far beyond the usual date,  
and brokers who generally at this  
season dine on diamond-baked terrapin  
at \$18 per dozen are now content to  
partake of spring lamb at 15 cents per  
pound—New York Journal.

## Week's Settlements.

Ore and bullion settlements for the  
week ending yesterday amounted to  
\$393,100, as compared with \$234,400  
for the preceding week. So far this month  
settlements in Salt Lake total \$1,037,000.

## MINING NOTES.

One car of Star Con. ore will be mar-  
keted Monday or Tuesday.  
The Lower Mammoth is on the mar-  
ket with two cars of copper ore.

Manager George Moore of the Sun-  
shine came up from camp last night.  
Four cars of ore from the Horn Sil-  
ver will be marketed tomorrow or Mon-  
day.

The Conklin sampler reports the re-  
ceipt today of four cars of ore from  
Tintic.

The Tiewaukee of Bingham and the  
Diamond of Eureka, Nev., are each on  
the market with a car of ore.

The Mammoth has another car of ore  
at the sampler today and it is stated  
that further shipments will be made  
when more cars can be obtained.

The Taylor and Brunton sampler re-  
ports the receipt of five cars of ore from  
Tintic, four from Price, one from  
Bingham and one from Nevada.

C. E. Bradd, formerly superintendent  
at the Alpha mine at Mount Pleasant,  
Montana, accompanied by an assistant,  
has left for Thunder Mountain to look  
up some properties for Colonel George  
W. E. Dorsey.

Manager Prentiss of the E. and  
F. company, operating near Pioche,  
has returned from Denver, after making  
arrangements with the Nevada Smel-  
ting & Refining company to have the  
E. and F. ores accepted at the Pioche  
smelter for treatment.

## BUSINESS NOTES.

The stormy weather during the week  
has had rather a dampening effect on  
general business, though the trade in  
millinery lines and ladies' goods has  
been surprisingly large. Collections are  
reported as fair, and merchants are  
now beginning to put themselves in  
readiness for the conference trade. The  
rush of city announcements to country  
visitors through the medium of the  
Semi-Weekly News has already begun,  
and they indicate that city dealers ex-  
pect the usual heavy business.

In local stocks the activity has been  
confined almost exclusively to Utah  
Sugar, which has advanced at rapid  
steps from \$16, a few weeks ago, up to  
\$17 1/2, the figure at which it closed  
last night. The dividend of 30 cents  
last night is payable on the 1st, but  
brokers say that judging from the  
present demand there will be less than  
the usual falling back in the price af-  
ter the dividend is paid. Other stocks  
in the list have reached the highest  
point in their history, notably U. S.  
Deseret National, and Deseret Sav-  
ings. Following are the latest quo-  
tations:

## BLAZE AT JOINT BUILDING.

City Treasurer Morris has been hav-  
ing one of the woodwork in his office  
polished up and that fact indirectly was  
the cause of a blaze last night. The  
workmen left near a radiator a small  
box containing varnishes and spirit,  
which were ignited by the heat. Smoke  
filled the corridors of the joint build-  
ing but the firemen were unable to  
locate the source of it for some time.  
After a search embracing almost every  
nook and corner of the structure the  
floor of the city treasurer's office was  
discovered to be burning. A two-foot  
hole was the result before the blaze  
was extinguished with chemicals.

OPENING WAS  
IRREGULAR.

Still the Gains Outweighed the  
Losses.

## SUGAR SCORED AND LOST.

Good Demand for St. Paul, Union  
Pacific and Lesser Steel Stocks—  
Bonds Active and Erratic.

New York, March 22.—There was  
some slight irregularity in the open-  
ing price changes but the gains out-  
weighed the losses. There was a good  
demand for St. Paul, Union Pacific,  
the minor steel stocks and the rubber  
stocks. Colorado Fuel ran off 2 1/2. Sugar  
scored a point rise and a lost it. Amal-  
gamated Copper ruled a point lower.  
St. Paul advanced 2 1/2 on heavy deal-  
ings. The active specialties rallied vig-  
orously. Traders took their profits in  
St. Paul before the bank statement ap-  
peared, carrying it back 1 1/2, and sev-  
eral other stocks declined 1 to 1 1/2. The  
market steadied after the bank state-  
ment, but the buying was not renewed  
with any force. National Salt sold at  
1 1/2 compared with 2 1/2 previously. The  
bond market was active and irregular.
