The trio went to the Ald-wych theater, Oct. 24, and on coming out farbara became separated in the crowd from her companions, and has not since been seen, although the cass was immediately reported to the po-lice, and the foreign office, acting at the argent request of the Russian gov-ernment, ordered that no effort be spared in the search for the missing girl.

Since Miss Laponkhin disappeared

Since Miss Laponkhin disappeared the governess has received a note in a handwriting which she recognizes as Barbara's, saying that she had been kidnaped outside the theater and was now a prisoner in the cellar of a house in the northwest part of London, the address of which she was unable to ascertain. The girl added that she was wounded and suffering so severe-iv that she intended to polson herself. ly that she intended to polson herself.

M. Laponkhin has been the police department has been director of the police department in Russila, and Miss Russell suggests that revolution-ists planned the kidnaping, with the object of bringing her father within their reach. He is now on his way to

London. The Russian officials here are in-clined to the belief that the girl was carried off for purposes of blackmail. The police are nonplussed. They say they are unable to linearine how a wo-man of 15 years old could be carried off against her will in the crowded precincts of a theater.

WITH URIC ACID POISON

RHEUMATISM

THE BLOOD SATURATED

A disease so painful and far-reaching on the system as Rheumatism must have a deep and well-laid foundation. It is neither an accidental trouble nor one caused by outside influences, it is in the blood and system before a pain is felt.

Rheumatism is caused from an excess of uric acid in the blood which has gotten into the circulation because of a torpid or sluggish condition of those members whose duty it is to carry off the daily collection of refuse and waste matter of the body. This being left in the system sours and generates uric acid, an irritating, pain-producing poison, which the blood absorbs and distributes to all parts of the body. This acid, circulating through the system, acts as an irritant to the different muscles, nerves, bones and tissues of the body, and produces the inflammation and swelling and the terrible pains of the disease.

When the blood is overburdened with uric acid it continually grows weaker and more acrid, and poorer in nourishing qualities. Then Rheumatism becomes chronic and not only a painful and distressing disease, but a formidable and dangerous one as well. The general health is always affected, the oils and fluids which lubricate the joints and muscles are destroyed by the acrid matter which the blood is continually depositing in them, the muscles shrink and lose their elasticity, the lining of the joints becomes hard and thick, and the sufferer is often left a hopeless cripple. But worse still, when the blood becomes fully

Mrs. Ida Palmer, of 196 Fulton St., Brooklyn, N. Y., writes as follows: "I wish you to know what great benefit I received from the use of S. S. S. I have been afflicted with Rheumatism for twenty years, sometimes being entirely laid up by it and always lame in some part of my body. It grew worse until it was misery to attempt to walk at all; my right knee was nearly twice its natural size and was drawn up considerably shortsr than the other one. A friend advised me to take S.S.S. which I commenced. I had tried so many things that I must say that I had very little faith that it would do I must say that I had very little faith that it would do me any good, bat I was willing to try anything that promised relief. Before I had been using it long I was greatly relieved, and continuing the medicine I soon found that I was entirely cured. The lameness and soreness all left, I can straighten, move or bend my log as well as any one and I have never known what Rheumatism was since. I am 65 years old and feel deeply grateful to S. S. S."

saturated with the uric acid poison the heart is attacked, the corrosive matter settling on the valves and muscles of this vital organ, and then Rheumatism usually proves fatal.

Some persons inherit a predisposition or strong tendency to Rheumatism, for like all blood diseases it can be transmitted from generation to generation; but whether the disease is inherited or is brought on by a torpid, inactive condition of the system, the cause is always the same-the blood is filled with uric acid poison.

Temporary relief from the suffering and torture of Rheumatism is often afforded by the application of plasters, liniments and other home remedies, but as such treatment does not reach the blood, no curative or preventive effect can be expected. The next exposure to

VEGETABLE

cold or dampness, or a spell of indigestion, or other systemic irregularity, will cause the old aches and pains to return, while the real disease is all the while getting a firmer hold on the system.

There is but one way to cure Rheumatism, and that is to cleanse the blood of the utic acid poison. S. S. S. is the proper treatment, because it goes down and attacks the disease at its head, and by filtering out every particle of the poison and strengthening and enriching the blood, cures Rheumatism in every

form. S. S. S. changes the sour, acid-burdened blood to a rich, healthy stream, which quiete the pain-racked nerves, muscles and joints, and gently but surely removes every particle of the cause of Rheumatism from the circulation. S. S. S. reaches inherited cases as well as those which have been acquired, and good results are always experienced from its use. S.S.S. is the greatest of all blood purifiers, and it is an absolutely safe remedy because it contains no strong minerals to damage the system.
