OUB CLAIMS .- We claim that there is greater certainty and uniformity in the production of good bread, biscuits, &c., in the use of Dr. Price's Cream Baking Powder, and that the articles made with it are more wholesome and digestible than if made with any other kind. That it is one-third stronger, hence requires one-third less, which may be proved by the only reliable and truthful test, a trial by the oven. We claim for it, as also for Dr. Price's flavoring Extracts, that they are just as represented, and just what the public expect them to be by the name under which they are sold.
