FORENOON ON THE EXCHANGE

Beck Tunnel Goes Higher, While Colorado Remains Steady at Yesterday's Prices.

CROWN POINT WEAKENED.

Sioux Con. Sold Up to 68 Cents Trading Among the Unlisteds-Closing Quotations and Sales.

Yrading on the mining exchange began today by the transfer of 50 shares of Columbus Consolidated at \$5.25. Following it came Daly Judge with 200 shares going for \$5.85. But the interest, as usual, was centered upon the Tintic issues. Beck Tunnel Consolidated opened strong and advanced from \$2.55 at the beginning to \$2.6714 at the close. Colorado lost no ground, but reclose. Colorado lost no ground, but re-mained firm at yesterday's prices. Crown Point weakened, the price tum-bling to 35 cents. Sloux Consolidated sold up to 68 cents, while South Colum-bus found takers at \$2.85. Among the unlisteds, trading was started by the sale of 1,000 shares of East Crown Point at 6 cents; Ohio Cop-per was offered down to \$5.35 at which price 200 shares were nurchased. Emma.

price 200 shares were purchased. Emma Copper was bought at 17½ cents; Mas-on Valley at \$2.25; Seven Troughs Daisy at 25; East Tintic Con. at 16 and The closing quotations and sales

READY FOR BUSINESS.

East Crown Point Company Will Begin Development at Once.

The East Crown Point Consolidated Mining company is getting ready to inaugurate an active campaign of de-velopment at the property of that cor-poration, which is situated in the part of the Tintic district which is attracting so much attention at the present time. Sup. J. W. Reese, accompanied by an engineer, departed for camp last night for the purpose of deciding on a loca-tion for the shaft to be sunk and to al-so make the preliminary surveys for patent.

COPPER CAMPS ACTIVE. In Aribona the Future for Mining Looks Very Bright.

Special Correspondene.

Prescott, Ariz., July 6.—Reports received here from leading copper mining camps throughout the territory indicate a decided change of sentiment as having come about in the last few days on the part of eastern investors towards Arizona mining interests. Capital for development purposes is again flowing freely into the more important flowing freely into the more important flowing freely into the more important copper camps, this being especially noticeable in the case of the camps situated along the Arizona-Sonora belt through Yavapai, Maricopa, Pinal and Santa Cruz counties. Similar reports have also come from Cananea and other points across the Mexican border. Heavy July dividend disbursements Heavy July dividend disbursements distributed throughout the country by the producing copper mines are credit-ed with being responsible for much of the favorable sentiment towards the industry. It is also pointed out that the big consumers of copper, such concerns as the General Electric, the Westinghouse, the Roeblings and the New England sheet copper and brass companies, will be compelled to come into the market with heavy buying orders at a very early date, and that no material concessions from the present selling price of the metal are within the the favorable sentiment towards terial concessions from the present sell-ing price of the metal are within the range of probability. With prices at anywhere near the present figure the mining of low-grade ores must con-tinue to be immensely profitable. This condition is well understood among promoters of new enterprises and in-vestors in general, with the result that the producing mines are enlarging the producing mines are enlarging their facilities to the limit, while the developing properties are straining ev-ery nerve to place themselves on the producing basis at the earliest possible

BUTTE'S DEEPEST SHAFT.

The High Ore Mine Bears This Distinction-Output of Camp.

tinction—Output of Camp.

The deepest mining shaft in the Butte district is that of the High Ore mine of the Anaconda company which Is about 2.850 feet deep. It will be sunk 75 feet further and then work will be stopped and a station cut at the 2.850. from which point the veins will be developed. The deepest mining is being done on the 2.400 foot level of the Anaconda mine. The shaft of that mine is below the 2.500 foot point. The company is also sinking on the St. Lawrence and doing development work in the Never Sweat. The mines of Butte are now pulling out 15.000 tons of ore dally, which yields an average of about 65 pounds of copper to the ton making a little less than 1.000,000 pounds of refined copper. copper

UTAH DIVIDEND.

Directors Will Post One at Meeting

This Afternoon. The directors of the Utah Mine at Fish Springs are scheduled to meet this afternoon when they will post the usual monthly dividend of 3 cents a share, or \$3,000. The date of distribution will be the 15th inst.

This Fish Springs property is a regular as clock work about the distribution.

lar as clock work about the distribution of bread money and there is every indication that the practise will continue indefinitely. Conditions at the mine are of a very satisfactory character.

Denver smelters, on the immediate out-skirts of a large and handsome city, and by the five smelters at work in the thickly populated environs of New York

JOPLIN ZINC DISTRICT.

ing district. The articles of the Ibex Aggregated Output More Than \$15,-000,000 During Last Year.

Joplin, Mo., July 11.—The meeting of the American Mining Congress in Joplin next October is likely to prove any event of very far-reaching significance for the lead and zinc mining interests of the Missouri-Kansas district. The convention will be a ended by about \$500 representative mining men from all sections of the United States, the majority of whom have never previously visited this section or had opportunity for first-hand acquaintance with its resources. In spite of the fact that the lead and zinc output of the southwest field amounting to over \$15,000,000 in 1906, is greater than the total annual gold output of Alaska, it is probable that even among mining men there is little realization of the wonderful richness of the lead and zinc camps embraced within the little circle of 25 miles' radius from Joplin. Joplin, Mo., July 11 .- The meeting of

GRAND CENTRAL DIVIDEND.

Special Correspondence.

Provo, July II.—The Grand Central posted a 4 per cent \$10,000 dividend at a late hour yesterday afternoon, payable on the 15th, books close on the 12th. The Victoria dividend was again passed on acount of the expense of development work.

DISTRICT ACTIVE

Provo Men Have Taken Hold of

The Old Ibex Mine and

Will Operate It.

HEADQUARTERS CHANGED.

Adjoining Property Acquired-Work

On An Extensive Scale to

Begin Soon

Provo, July 11.-Provo mining men

are now taking hold of the Ibex and

other properties in the old Detroit min-

Gold Mining company have been

amended changing the place of the

principal office from Salt Lake to

Provo, and increasing the capital stock

from 250,000 shares of \$1 each to one

million shares of \$1 each. In addition

to the Ibex ground the new company

has secured the properties of the Des-

eret Gold and Silver Mining company

eret Gold and Silver Mining company and the Alte Mining and Smelting company adjoining the Ibex. Work on an extensive scale will be commenced, and it is expected that one of the biggest mines in the country will be developed. The directors and officers of the reorganized company are Jesse Knight, president, Reed Smoot, vice president; C. E. Loose, David Evans and J. William Knight, Eugene Allen is secretary and treasurer.

Special Correspondence.

PROJECT ABANDONED.

S. & R. Diverting Equipment, Ordered from San Bruno to Lly

We have reason to believe that the plans of the Guggenheims to build a big smelter close to San Francisco have miscarried, say the Mining & Scientific Press. Work is being stopped at San Bruno. A large part of the machinery intended for this plant has been diverted to Ely and to other smelters controlled by the American Smelting & Refining company. In their decision to drop the project it is probable that two factors were responsible; the first being the failure of the Dairy Farm mine in Placer county. Cal., from which a large supply of copper ore was expected. At 500 feet the ore body became lean and it is how quite evident that this mine cannot do what was expected of it. The other reason for stopping work at San Bruno was the strong protest and organized opposition of the citizens of San Majeo, who claimed that We have reason to believe that the work at San Bruno was the strong protest and organized opposition of the citizens of San Mateo, who claimed that the sulphurous and arsenical fumes would kill vegitation and cattle. This was based largely on error and prejudice, assisted by a professor of chemistry who was an expert witness against the Anaconda company; it seemed to us that the position of the smelter people was strong, for they were entitled to complete their plant and to prove that, with the sulphuric acid annex, they could mitigate any possible nuisance caused by obnoxious fumes. However, that problem will not be tested, it appears now, and the people of San Mateo will be able to buy the smelter site and erect upon it a chemical beauters and erect upon it a people of San Mateo will be able to buy the smelter site and erect upon it a chemical brewery, an oil refinery, a tannery, or some other sweetly smelling manufactory. Most of the grading, retaining walls, and foundations, besides railroad tracks, have been completed, so that the smelter company has done a good deal of work that will be useful to others. The episode is regrettable. A large smelter near San Francisco would have stimulated local industry and emphasized the importance of the city as a technical center. In the opposition to the project, the Guggenheims suffered from their own exaggerated talk of the tonnage to be treated, 5,000 tons per day being mentioned at one time, although the plant was to begin with a capacity of 1,000 tons daily. This had the effect of warning possible competitors, such as Schwab and others, to keep off the field, but it excited the owners of villas and orchards at San Mateo and Burlingame. In the meanwhile the flasco of the Dairy arm mine was probably the most decisive factor and it goes to prove that smelters dependent on single mines are in a precarlous condition unless amplie precautions are taken to prove the ore reserves. The decisions in the smeltersmoke cases at Sail Lake were given after the San Bruno project had been er site and erect upon it smoke cases at Salt Lake were given after the San Bruno project had been started, as also the indement obtained by the state of Georgia against the Tennessee smelters. These afford un-pleasant precedents. In this matter the pleasant precedents. In this matter the smelting companies have suffered from blackmailing and ignorance, as much as from their own doings, but back of it all is their carclessness and lack of consideration for the rest of the community. To put smelters in the middle of a distinctlively agricultural region like that of the Salt Lake valley was to invite trouble. There is plenty of desert land in the same state where fumes could injure only sagebrush and rabbits. or the San Bruno enterprise there was much better excuse; the projectors of it wanted to be at tide-water and near a large distributing center. They chose a site least at tide-water and near a large distrib-uting center. They chose a site least likely to interfere with others and they purposed to employ every known de-vice to mitigate injury from the smoke. They have suffered from the reckless action of the smelter managers else-where. It is time for metallurgists to tackle this subject earnestly. All of us that are interested in the welfare of the mining industry appreciate the im-portance of the smelting department; if the spelters are driven out of busi-ness, the mines and miners will suffer. In the first place, we refuse to believe that fine skill of the chemist and metal-lurgist is beaten, we expect to see the that fire skill of the chemist and metallurgist is beaten, we expect to see the
invention and application of devices
perfectly able to prevent the destructive escape of noxious fumes. The
manufacture of sulphuric acid is one of
them; it can be used for making superphosphate, which is a valuable fertilizer, more marketable, however, on
the Atlantic coast than here. Next,
sites must be chosen where the ineffective smothering of smoke will not render the smelter liable to blackmail and
persecution. It is argued that if a
smelter makes a desert within a radius
of 15 inlies, the owners of such an establishment ought to buy a tract of
desert land of equal dimensions and
erect their plant there, where none will
molest them and they will molest none.
This is the last resort. Smelters need
water and fuel, besides labor and supplies. These are more expensive in
fewarts than in fruittive value.

The total sales of yesterday's ses-sions of the mining exchange aggre-gated \$79,825,22. The Uncle Sam Consolidated Mining company was in the market yesterday with a car of ore which netted about

General Manager Lafayette Hanchett of the Newhouse mines is making an inspection of the Cactus property in Beaver county.

Manager G. H. Dern of the Consoli-dated Mercur Gold Mines company is in the city from camp on a brief business trip.

A. A. Ball, cashier for Gordon, Stimmel & Company at Round Mountain, Nevada, has arrived from the west to spend a couple of weeks at home. S. J. Paul has gone to Daggett, Cali-fornia, where he has accepted the posi-tion of consulting engineer for a com-pany operating a lead mine near that

A letter received at the offices of the Desert Wonder Mining company, operating near Modena, conveyed the information that ground has been broken for a double compartment shaft.

The smelter of the Balaklala Copper company in Shasta, county, Cal., will be placed in commission about Sept. I Ore from the Trinity mine, operated under the control of Thomas W. Law-

son, will be sent there for treatment. Charles D. Rooklidge departed today for the property of the Wheeler Gold Mining company near Yerington, Ne-vada, where he will inaugurate ore shipments. Mr. Rooklidge expects to send out at least two cars monthly.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrates, \$25,000; base bullion, \$70,000. Captain O. A. Tibbitts has gone to Portland, Ore., to spend a few weeks with his family.

Articles of incorporation were filed yesterday by the Russell Mining company, with heal offices at Salt Lake City, to engage in a general mining business. The capital stock is \$66,000, divided into shares of the par value of 10 cents each. The officers are: Georga Hackett, president; Joseph Christensen secretary, treasurer and director; William Charles and Sarah A Hackett, directors. directors.

The Tacoma Mines company of this city today filed its articles of incorporation with the county clerk. The capital stock of the company is \$500,000 (divided into shares of the par value of \$1 each. A. A. Moule is president; Benner X. Smith, vice president; F. B. Stephens, secretary and treasurer. These, with R. B. Porter and J. O. Cross, constitute the board of directors. The company owns the Sunset, Tacoma and six other claims located in Tacoma and six other claims located in the Lucin district, Boxelder county.

Joe Mower and associates have taken block 6 on the Mazuma Hills property and have commenced active develop-ment work. A shaft has been started ment work. A shaft has been started on the ledge which outcrops on the ground and the owners intend losing no time in thoroughly exploiting the property. On either side of the Tower lease high values have been found and it is the firm belief of the owners that it will only require a little work before they encounter the same pay shoot.—Vernon (Nevada) News.

LOCAL MARKET REPORT.

The usual midsummer conditions obtain in the local markets this week. The advent of hot weather has greatly stiffened the price of lemons owing to the largely increased demand for the fruit all over the country, and lemons are now selling at \$7 per case. Strange to relate, watermelons are selling slow, so that it is not easy to get rid of car load shipments. This is due to the presence of so much small fruits on the market; but prices hold up well, the melons bringing retail, 50 cents and \$1 each. The shipments of cantaloupes from southern California are increasing, while Moapa is beginning to compete with that section in are increasing, while Moapa is begin-ning to compete with that section in this particular line. Bananas have been slow and rather poor for the first part of the week; but the arrival this afternoon of two cars from New Or-leans relieves the local stringency. Utah growers are now shipping in the growers are now shipping in plentifully, so that there is no danger of any scarcity, for the present anyhow. The prices obtaining, today, are as follows:
