The French Observatory has offered a premium of \$50 a year additional salary any assistant who may discover a new planet.

In Paris the ladies are beginning to wear garlands of roses, yellow and red, on the top of the forehead, low shoes PROVISION DEALER, and short dresses. The Hon. Thaddeus Stevens once said that "only two d—d fools in the party believed the Reconstruction Acts

to be constitutional." A Missouri farmer being asked, if raising hemp was good business answered, "I can't sartin say, but it is certainly better than being raised by it."

The French minister of war has or-dered ten million sheets of cartridge pa-per to be delivered within five weeks. This is regarded as another token of

London is at present gratified by a balloon ninety feet in diameter, that will raise thirty people high enough to see a "tenth of England."

A cone of 200,000 silver five franc pie-Marseilles, France. The height was sixteen feet five inches, and the circumference at the base forty-five feet.

A chap named Lyon, of Logan, Ky., after whipping his wife severely, the other day, stripped his daughter, a heautiful girl of eighteen, and was whipping her, too, unmercifully, when she caught a pistol from his hand, and blew her loving father's head in two. The neighborhood justified the act.

From how many thousands of lips the Lord's Prayer goes up every day! Parents and children repeat it. In homes, in the crowded city, and in the quiet country, in every land, and from many a ship upon the sea, and in almost every language that is spoken on the earth this beautiful prayer is offered; and "Our Father in heaven" hears, and for Christ's sake answers that the earth this beautiful prayer is offered; and "Our Father in heaven" hears, and for Christ's sake answers that prayer when it comes from a humble and believing heart by whom a humble had believed by the humble and believed heart by whom a humble had believed by the humble had beli and believing heart, by whomsoever it may be uttered.

A curious "tell tale" apparatus is in There are four night watchmen on these premises, and they have to make ten visits to 93 stations, in all 930 visits.

On commencing his rounds a card is delivered to each watchman, which he carries about with him. At every sta-tion he has to visit is a frame of the size of the card, at which, at a given time, a stamp presents itself and impresses a stamp on the card. The marks are so arranged that when the whole are printed they form one complete design. Any delay or omission on the part of the watchman leaves a blank space on the card which tells the hour the man failed in his duty. When going off duty the men push their cards into a kind of letter-box, and as this is done the exact time at which they are delivered is printed. All this contrivance is completely beyond the men's
control, and there is no possibility of
tampering with the mechanism. No
description of the apparatus would be
intelligible without the drawings which
accompany it
