

MINING, BUSINESS AND STOCKS.

SOLID FACE OF ORE AT DEPTH OF 55 FEET

J. H. Merrill Reports Pined in Property of Little Butte Mining Company, Teocoma District.

A solid face of shipping ore in the tunnel at the depth of 55 feet from the surface would seem to be sufficiently encouraging in the Little Butte property in the Teocoma mining district, Nev., according to the story brought to the city Saturday afternoon by J. H. Merrill, E. D. Hale and John Bowker of Blackfoot, Idaho. Associated with the parties is also M. Roberts of Provo and Lamar Nelson of Salt Lake, all of whom have visited the above district and are quite elated with what they saw.

Development work is said to be satisfactory on the properties of the Iron Mask Mining company and the Mineral Mountain Mining company, both of which are contiguous to that of the Little Butte. Excellent surface indications have been found in the district and the developments thus far in the properties warrant the belief that the experience at the Black Warrior, which at one time shipped nearly \$500,000 worth of ore, will be duplicated. The ore is a lead-silver, and is found largely in the form of carbonates.

The Copper Mountain, in the same district is said to be giving a good account of itself. The company is taking off the top of a mountain and has been shipping about 150 tons of ore daily by means of its three miles of rail tramway from the mine to the cars.

DEMAND LIGHT TODAY.

Buyers Lacking on Exchange This Morning—Prices Unchanged.

Trading was light on the mining exchange this morning and prices were practically unchanged from those of Saturday. Lower Mammoth was a little weaker this morning, sales being made as low as 50. Columbus Consolidated opened strong but flattened at the close. Sales were made from 1.6 1/2 down to 1.60. Colorado was unchanged at 80 and Iron Blossom was a light trader at 68.

Sioux was weaker today, selling from 44 down to 42, but Uncle Sam showed an advance from 49 to 51 on news that a new ore body had been uncovered. Indian Queen sold at 3 and Utah Consolidated at 4 1/2. Silver King was in good demand at 54.

UNLISTED STOCKS.

Trading in the unlisted was confined to Federal Ely, Bingham Central and Utah and Utah Treasury Hill. Four thousand shares of the first named was passed out at 18. Bingham Central sold at 24 and 23 1/2, 2,000 shares going at the above prices. Utah Treasury Hill let go a lot of 3,843 shares at 10.

Closing quotations were as follows:

KEARNS IMPRESSED WITH ELY.

In Company With C. E. Allen and J. F. Pearson Smith is Examining Mines.

Thomas Kearns, former United States senator from Utah, and one of the heaviest owners in the Success mine in Duck Creek, as well as the principal owner of the McDonald Ely in Robinson mining district, reached Ely last night in company with former Congressman C. E. Allen, manager of mines for the United States Mining and Smelting company, and J. F. Pearson Smith, chief of the company's staff of mining experts, to make a careful study of this district, says the Ely Examiner.

Mine Manager, Allen is here for the purpose of making contracts for the delivery of lead and other ores to his company at Salt Lake City. Mr. Smith accompanies him in an advisory capacity.

The members of the party will be shown about the district by Mayor D. C. McDonald, manager of the McDonald Ely. Today is being spent in an examination of the McDonald Ely mine. It is expected that a visit may be made to the Success property if the road is open.

Senator Kearns has been deeply interested in this district for many years and has frequently expressed the greatest confidence in the future of this district. This expression has taken the form of the investment of many thousands of dollars in the mining properties in which he is interested.

It is expected that the chance for a return of interest on the investment was most remote.

"Ely is a bright," said Senator Kearns last night, "it not only has a great future, but it has a great present. You people who are here all the time should take a little trip and see what the camp really is. Compare it with other camps by visiting the other camps and you will see that you are not fully appreciated. Some people talk about the big things to come. I say you have the big things right now."

The members of the party will probably remain in the district for a week or ten days.

COPPER PRODUCTION.

Great Gains Shown This Year—Increased Consumption Looked For.

The visible supply of copper in Great Britain and France, which comprises the bulk of the world's supply, shows an increase for the month of November of 14,291,200 pounds, says the Boston Financial News. The increase in the first of January amounts to 121,411,120 pounds. The total on December 1 is 238,857,600 pounds. The increase in the hands of American producers up to the end of October was 31,152,660 pounds, making a combined total of 143,293,480 pounds increase in stocks since January.

These figures in themselves do not seem very encouraging, but when it is remembered that we have had a new high record production, they seem less unfavorable, and furthermore, the increase is only about 10 per cent of our production alone, and an increase of that percentage in the consumption would offset the gain in the surplus.

The prospects are that next year we shall see more than a 10 per cent increase in the consumption as compared with 1909, with little or no rain in the production. It is on this basis that the best posted copper interests feel confident that the outlook for the next year or two, and have been large buyers of the shares of the producing companies.

UTAH-ARIZONA MILL.

Company Arranging to Start Its 50-Ton Mill on Lucille Ores.

John W. Geiger, secretary of the Utah-Arizona Gold and Copper Mining company, which is developing a large group of claims in Mohave county, Ariz., states that preparations are being made to start up the 50-ton mill on the property. The company is negotiating with a mill man in Salt Lake to go down and take charge of the company's mill, as the superintendent has written that enough ore has been

blocked out in the Lucille claim to operate the mill steadily for some time. The assays of rock taken from the Lucille claim show upwards of 5 per cent copper and around 35 in gold per ton. In addition the company has developed some good ore in the Leopold claim carrying about 35 per cent copper, six ounces silver and \$5.00 in gold. Some assays show even a larger percentage of copper than the above.

The recent assessment of 1 cent a share, being assessment No. 2, does not become delinquent until Dec. 9, three weeks later than the notice given out when the assessment was levied. The sale occurs Dec. 21.

NOTES FROM POCHE.

Pioche, Nev., Dec. 4.—The mill purchased by Frank and Lamont, the lessees of the Poorman mine, from Frank, Morse & Co. of Salt Lake, has been shipped. It will have a capacity for the treatment of from 10 to 20 tons of ore per day. Mr. Frank has decided to close his assay office in town and move to Pioche. It will have a capacity for the treatment of from 10 to 20 tons of ore per day. Mr. Frank has decided to close his assay office in town and move to Pioche.

Supt. Lloyd reports that the shaft of the Centennial Pioche, of which Murray Godbe of Salt Lake is manager, has attained the depth of 225 feet and that the bottom now shows a mineralized limestone formation.

Supt. David Lemmon of the Point mine of the Pioche Metals Mining company is raising from the 100 foot level to the surface. Several sets of timbers have been put in and things are in shape now so that rapid progress can be made.

In spite of the bad condition of the road teams have been kept busy hauling about 50 tons of manganese ore per day from the Prince Consolidated mine.

UNCLE SAM'S NEW ORE.

Disclosure of Seven Feet of Shipping Ore West of Old Workings.

Seven feet of shipping ore in a new part of the Uncle Sam Mining company's domain is the latest result of the strike mentioned of which was made by President John Derr last week. At that time only a foot of ore had been encountered, but during the past few days it has widened to 7 feet and gives every promise of developing into a big body. Supt. Griggs, who is not given to jumping at conclusions, says the find promises well for the future.

The disclosure was made to the west of any other workings in the mine, and was undertaken by Supt. Griggs, in spite of the fact that some of the largest stockholders expressed the lack of faith in the developments in that direction. That his judgment is now backed by results is very gratifying to the management. The ore carries better than 30 ounces silver and 90 per cent lead and about \$3.00 in gold.

ORE SAMPLING COMBINATION.

Deal Under Way to Unite Taylor-Brumton and Pioneer Companies.

Unless the unforeseen occurs during the next few days, the ore sampling business of Utah will pass into one management. Ernest R. Woolley, president of the Pioneer Ore Sampling company, is working up a proposal, which he returned last night from Denver where he has been for several days in connection with the purchase of the works of the Taylor-Brumton Ore Sampling company. It is stated that the deal involves nearly \$200,000, and it is intimated that the consolidation will most probably be made this week.

THREE CAUSES OF ACTION.

Drunkennes, Cruelty and Failure to Provide Ailleged.

Mrs. Emily Christensen seeks a divorce from Andrew Christensen, charged with drunkenness, cruelty and failure to provide in a complaint filed in the Third district court. For the last six years, Christensen has spent his money for liquor. It is charged, and when he was intoxicated and also when he was sober, he has been cruel to his children. They were married in Mant, June 6, 1892, and have three children, Mary, 14; 11, and Leah, 6 years old.

Christensen owns a lot in Salt Lake valued at \$1,000. She asks for a division of the property, stable alimony, the custody of her children and the restoration of her maiden name.

Evelyn I. Vandiver charges her husband, William C. Vandiver, a railway conductor, with having failed to provide for her in the Third district court. They were married here on March 16, 1906, and have no children. She asks for \$25 a month alimony.

PLEADS NOT GUILTY.

L. E. Driskell, Charged With Murder Of Officer Riley, Arraigned.

L. E. Driskell, charged with the murder of Special Police Officer C. C. Boyle on Oct. 4 last, was arraigned this morning in Judge T. D. Lewis' court. He entered a plea of not guilty and his trial will be set in the February term.
