Business closed on the Mining Exchange today with the sale of \$,865 shares for \$4,846.60. The market was somewhat sluggish and little or no change is reported in the prices quoted. Daly-West was in better demand today at prices ranging from \$19.80 up to \$19.84. Star Consolidated also did some business at a little better figures. Several small lots changed hands at from 52 to 53 cents per share.

Lower Mammoth is not buoyant on account of the 5 cent assessment. In spite of the improved condition of the property it still hangs between 40 and 41. A few hundred shares changed hands today. Joe Bowers has weakened to 2% while Martha Washington let go 1,000 shares at 2.

Yankee Consolidated was improved today when upwards of 5,000 shares sold at figures around 18.

Dexter was a little weaker today as was Eagle and Blue Bell.

Grand Central is firm around \$6, while Mammoth was held at \$2.27 with \$2.21

bid. Petro remains quite weak. The closing figures were posted as fol-

DISPUTE OVER MINING PROPERTY.

John C. Dugan is suing John T. Hodson in the Third district court to quiet title to 4.410 acres of mining ground which, it is claimed, the defendant has included in his application for patent for the Bunker Hill claim by over-lapping plaintif's Manitu location in the West Mountain mining district. One hundred dollars damages are also praced for.

RIO GRANDE RAILROAD WINS,

Late on Saturday afternoon last the Rie Grande Western Railway company obtained from Judge Cherry authority to occupy a strip of land three-three feet in width by 1,60 feet in length, owned by the Utah Nursery commany, and another strip, averaging 1,545 feet in length by 35 feet wide, owned by George Crismon for right-of-way for the railroad's change of route of its Park City branch line from Elighth South of Twelfth South.

OPPORTUNITIES IN SEVEN DEVILS.

The Stock Sold on the Exchange W. C. B. Allen Speaks Very Highly of the Idaho District.

TRIBUTARY TO SALT LAKE.

New Concentration Process - Lower Mammoth Park City Rems - Yaukes Con and the May Day.

After an absence of four months in the Seven Devils country in Idaho, W. C. B. Allen has returned to town, Mr. Allen, who is well and favorably known in mining circles, returns with excellent accounts of the mineral possibilities of the above district, of which he has prepared elaborate reports. It is a field, in Mr. Allen's opinion, where Salt Luke should exercise much influence. Already shipments of ore are coming quite regularly to this market. The Peacock and Blue Jacket mines have been shipping some high grade copper ore to the local smelters, which seems to point to Salt Lake as the natural center of great mineral district many

hundreds of miles in circumference.
In Mr. Allen's opinion there is not a more promising mineral belt anywhere than that which is presented in the Seven Devils district. In spite of adverse conditions, development work has been pushed by the above named com-panies, and some very rich copper ore has been exposed. The richest ore runs about 50 per cent in the red metal. This is shipped straight to New York for reduction the lower grade only com-ing to Salt Lake. The wagon haul is ing to Salt Lake. The wagen haul is at present about 60 miles, but Mr. Allen reports active work going on in the extension of the Pacific and Idaho Northern railway, which is being ex-tended from Welser to Council. In a short time this section of 40 miles will be completed, which will cuit down the

haul some 25 miles.

About 80 miles south of the Seven Devils district lies what is called Iron Mountain—a comparatively undeveloped country. A big outcrop of iron is found on the surface, but in every interest on far as known corper takes. found on the surface, but in every in-stance, so far as known, copper takes the place of from about 20 or 30 feet, from the surface. The copper ore is said to run from 5 to 30 per cent. The formation is lime and porphyry, and the veins are contact veins. Work has been started on a pyritic smelter at Mineral, which is only three miles from a big group in which Mr. Allen is in-terested.

The opportunities for profitable in-restments in the vicinity are said to be great. Mr. Allen will remain here nutil after election, when he expects to go north again. Meantime arrangements have been made to continue develop-

AN EFFECTIVE METHOD.

Dry Concentration Being Considered for the Low Grade Ores of May Day,

Fred A. Flindt and S. W. Mosby have returned from California, where they witnessed a new process of concentra-tion which may be used for handling the low grade ores of the May Day Mining company, on which the above named gentlemen have secured the option of a two-year lease. It has not yet been decided whether they will use the "Crown process," as the new method is called, or one of the older processes. The Crown method deals with the ore in a dry state, and threat-The basis of the invention is a fine slik belt and a stream of air which is thrown against the under side of the belt as it conveys the powdered ore up an incline. This causes the gangue to fall back, while the metals cling to the belt because of their higher specific belt because of their higher specific gravity and are eventually caught in a receptacle provided for the purpose. F. W. Woods of California perfected the machine, which is being handled on the royalty basis by Lorin B. Doe of San Francisco. In tests with 8 per cent lead ore it is said that a saving of a very large per cent has been made. It is possible that Messrs. Flindt and Mosby may decide to use the above process in the handling of the ores of process in the handling of the ores of the May Day,

ILLINOIS PURCHASE.

George Wilson Says the Final Payment Will be Made Next Week.

George Wilson of Eureka was in town today between trains presumably on business connected with the bond by business connected with the fond by
the Illinois company of his property
lying north of the Geniini. This bend
expires end it is expected that the
money will be paid over on
the 31st int. The sum is said to be somewhere around \$20,000. Mr. Wilson held
about 46 acres of ground there for
about sixteen years, when it was taken
by the Illinois company. This payLocation Notices Filed. by the Illinois company. This pay-ment at the snd of the month will af-ford Mr. Wilson ample means to enjoy his latter years, and is a source of gratification to his friends.

A NEW COMBINATION.

The Patents Covering the Cynide Process the Basis of New Company.

A company has been formed by vari-A company has been formed by verticus parties helding patents relating to the craniding of ores, which is to be known as the "Alped Cyanide Companies of America," the prospectus of which has just been issued. The directors are Wm. Forrest, of McArthur-Forrest fame, Capt. De Lamar, whose patents cover the use of gine dust instead of size dayling as a pregningar.

patents cover the use of gine dust in-stead of gine shavings as a precipitant, and Manager Henry A. Jones of the Cassel Gold Extracting company, which controls the Kendal process. The pros-pectus among other things says: The field for cyanide in America is not less extensive than in other coun-tries, figures published by the director of the United States mint showing that in 1818 the coinage value of gold pro-duced in this country was \$72,500,000, with much of this obtained through the cyanide process. cyanide process.

For the past six and a half years the

gross income of the Gold and Silver Ex-traction company of America, Limited (incorporated 1893) has been about £60. 000 90 per cent of which was from royalties and the belance from investments. When it is considered that this revenue was earned in face of such aderse conditions as hostility to the com pany's patents, keen competition from rival process owners, etc., etc., the large increase in the consolidated company returns which would be made possib returns which would be made possible by the eliminatio nof those influences is apparent. The De La Mar zino-dust is apparent. The De La Mar zino-dust process is used in what is practically the largest crude are cyanide plant in the world, viz., the Golden Gate mill in Utah, and the company owning that property has just amalgamated with

the Mercur company, which has been using the MacArthur-Forcest process on a 250-ton-per-day basis for a number of years. It is estimated that the alof years. It is estimated that the al-liance of these two processes, together with the centrel of the auxiliary pro-cesses above referred to, should yield this commany, having nowers regulative for the thorough protection of its pat-ent interests, a revenue of at least £26,-000 per annum.

THE LOWER MAMMOTH.

A Cave Containing Good Ore Has Been Encountered on 700 Level.

Atelephone message from Supt. Ball of the Lower Mammoth conveyed forday the news that a cave has been encountered on the 700 level. A great deal of debris was extracted, and it is said that excellent copper ore is found on one side of the cave and in the end. At present, the ore has been followed about 50 feet, including the distance. about so feet, including the distance covered by the cave, and in some places it is said to be cuite wide. Supt. Ball has decided to sink on the ore from the bottom of the cave. About 2 feet of sliver lead are is reported in the upraise from the 500 level, and some good ore is being piled on the dump.

PARK CITY NOTES.

Eight Hour Petition - Jupiter De-

velopments-Ore Shipments. Last week a petition was circulated among and by the employes at Anchor mill, asking for an eight-hour day, and was signed by all the men except the engineers and foremen. The petition was and before the directors, and that body decided that, under present circumstances, the request could not be granted and ordered the There was not trouble or threats of a strike, and it is supposed that after cerusin necessary repairs in the mill, now under way, are completed, the mill will resume with nearly all the old employes at work.

ployes at work.

At the Jupitor Oscar Lawrence and two men are drifting on seams of the about 1,500 feet in the tunnel, and a quantily of first-class ore is being taken out for shipment, the secondicias going on the dump. In the meantime they are developing what they expected when they started work nearly a year ago. They are now into the a year ago. They are now into the main vein, but the ore lies in chutes, and the main chute has not yet been cut. One chute has been struck, and there are two remaining chures yet to be tapped. On the chute that has been encountered a small raise has been encountered a small raise has been made, and they are now driving for the others. There is every indication, said Mr. Lawrence, of the vein going down. The main vein has been developed by meline for a distance of 200 feet on the slope of the vein, and from this incline some very high class ores. have been taken, some of it netting over \$300 per ton. No doubt of the existence of large bodies here are entertained, the ground being most favor-

Location Notices Filed.

Provo, Oct. 22.—Notices of location have been filed by the following locators of the claims named:

E. K. Walker and L. V. Smith, Detective Fraction, Second Chance. Elnors and Buzzard, in American Fork district.

J. G. Wilkin et al, Senator Nes. 1, 2 and 3, in Sliver Lake mining district.

MINING NOTES. A car of ore was on the market today from the Utah of Fish Springs. The Eureka Hill had five cars of con-

centrates on the market today. The Carisa of Tintle reached the market today with five cars of ore.

Two cars of ore were on the market today from the May Day of Tintic. The Opnir Hill had seven cars of concentrates on the market today.

The Mammoth of Tintle was on the market today with four cars of ore. Ten cars of ore will be sold tome row from the Grand Central of Tintic The Buckhorn of Dugway has

reached the market with a lot of ore. Silver was quoted today at 64% an advanced of % of a cent since Satur-

W. H. Ryan of Tintic, who is interested in the South Godiva, was in town today. The Carbonate Hill of Morgan county

was on the market today with another car of sliver-lead ore, Two cars of crude ore and four cars of concentrates will be marketed tomor-row from the Shawmut of Bingham.

ham, one from Peterson and one from Dugway,

A. H. Crampton, formerly of the La Sal district, has reached Sait Lake from Dawson City. He intends returning in the Spring.

A car of concentrates was on the market today from the Glasgow and Western Exploration company's Nevada properties.

Manager John A. Hunt of the May Day said the proposition to utilize the milling ore of the mine was to be considered this afternoon.

The Taylor-Brunton sampler reported twenty-two cars of ore from Tintle, seven from Stockton, four from Bingham and one from Nevada today.

Capt. De Lamar has reached New York and is expected to reach Salt Lake in time to take down his share of the \$110,000 dividend payable by the Con. Mercur next month. Chas, J. Devereaux of the Mercur

Mining company was expected to arrive from the East today. Mr. Dever-eaux is also vice president of the Quincy mine at Lake Superior. Manager O. P. Possy of the Bingham Copper and Gold company was ex-pected to reach here today. While here the proposition to sink further on the Shoebridge-Bonanza will be considered by him.

The new officers of the Euckeye Minthe company are George Crismon, president; Bishop George Ramney, vibe-president, and George E. Ramney, sec-relary and treasurer. P. W. Madaen and Dan S. Spencer are the other di-

Iron County Record: E. A. Thompson of the firm of Thompson and Frew, who hold an option on the Homestake copper mine, on Iron maintain, came in from the north last Monday and went out to the property the same day in company with Mr. Frew. The gentlemen expect two Colorado parties out to look at the mine shortly, and a sale is being talked of.

Capt. Egan of the Yankee Con. came Capt. Egan of the Yankee Con. came in from Tintic last evening after inspecting the Yankee Con. ore body with Secretary F. W. Muhlenbruch of the May Day, who will return this evening. The May Day people are sure that the ore has been followed into the May Day ground but there is no doubt that the matter will be amicably adjusted. A joint survey will in all probability be made, though Manager John A. Hunt, who is back from California, says that it has not yet been decided on.

FLUCTUATIONS A FEATURE

They Were Rapid in Either Direction During the Trading of the First Hour.

Steel Stocks Were Erratic-Realizing Affects Prices-Large Buying of Southern Pacific.

New York, Oct. 27 .- Rapid fluctuations in either direction marked the first hour's trading. The dealings were on an enormous scale and variations of a point or more were common in the specialties. Pressed steel car was rushed up 754 to 48 on the announcement that one-quarter of the year's dividend on the common stock would be paid. The Republic steel stocks were erratic and feverish. Professional opererratic and teverish. Processional operators unloaded heavily and there were some distinctly weak spots, notably Chesapeake & Ohio, Burlington, Norfolk & Western, Manhattan and People's Gas. The realizing began to affect prices. Pressed steel car re-acted four points, sugar was rushed up to 123%. The market steadled and became quieter. A renewed demand for the steel stocks brought some of them up notstocks brought some of them up not-ably, but as a rule the general market falled to return to the best prices and inclined lower. Baltimore & Ohio was the feature of the active railroads, ris-ing to 75½. Large buying of Southern Pacific helped it somewhat. Lake Erie and Western preferred rose four points. U. S. rubber advanced 2½ before noon and a sudden rise of 3¾ in People's gas served to sustain the market. Bands were active and strong.

served to sustain the market.

Bands were active and strong.

Heavy realizing during the final hour under cover of the strength of some of the specialties, notably the Tobaccos, the local tractions, leather and a few others, overcame the buying resistance and prices yielded sharply both in the railroad and industrial lists. The rise in the call loan rate increased the inclination to realize. Later the market steadled and became quiet. The closing was active and rather sasier and was active and rather easier and showed extreme advances considerably curtailed.

Protective Policy

Is a universally recognized fact. Patrons of the "Great overland Route" are assured that every device of human skill has been adopted to protect them against accident. Millions of dollars have been spent by the Union Paetia Railroad company in the improvement of track and equipment. The line is renowned for its unparalleled speed record, reliability for maintaining time schedule, and for the general superiority of its service.
