NO EUROPEAN CONCERN.

The latest dispatches from the various centers of the world do not bear out previous assurances of a better understanding between the powers interested in the fate of the Chinese empire. In Germany the view is expressed that the territory occupied by the Chinese is not German territory, and that the Chinese are not German subjects. In the United States, the view is expressed that the Chinese are not American subjects, and that the territory occupied by the Chinese is not American territory.

The Chinese are not American subjects, and the territory occupied by the Chinese is not American territory. The Chinese are not American subjects, and the territory occupied by the Chinese is not American territory. BOYCOTTED BY TAMMANY.

At a late meeting of the New York Democratic club, the head of which is John A. B. Croker, the following resolution was unanimously adopted: "Resolved, That, following the example of all respectable citizens, we exclude from the rooms and strike from the newspaper the Democratic club of the New York World, an immoral and defamatory sheet, published in this city, for the reason that such publications are unfit for place in any club or room of self-respecting people."

The Chicago Times-Herald, in reproducing this resolution, says: "Now, then, should this be regarded as a settlement to the World or not? The paper thus boycotted made against Tammany one of the most terrific fights ever witnessed in the newspaper annals of America; and now the victorious organization proposes to take a post office stamp."

CUBA IN CONGRESS.

A rather stormy battle for Cuba is on in the House of Representatives, the question being as to the advisability of recognizing the insurgent as belligerents. The insurgents are said to have the galleries and the debate is marked with considerable excitement. It seems probable that the mere formal recognition of the belligerent status of the rebels by this country would not materially aid their cause, and the prospects are that they in due time will accomplish their object, whether recognized or not. The Spanish authorities in Cuba are confronted with dissension among their own compatriots, threatening a counter-revolution, and on account of the autonomy offered the Cubans. How long will Spain be able to assert her authority when assailed from two sides?

ARMY RECOVERY.

The following excerpt appears in a Chicago paper, and doubtless has been printed in many others, because it is a good dispatch. It is dated Milwaukee, Indiana, Jan. 12:

"The Chautauque Gold Mining Company has been incorporated here with a capital of \$100,000 to develop one of the most valuable claims in Colorado, the Mine. The company has been organized, and the first step was made, it is claimed, through the efforts of a Springfield, Mo., man."

Edward H. Curtis, a miner since the early '80s with a large share of success, came west recently to visit his wife, who, during his absence, had become a devoted follower of the "New" man. At her request, Curtis visited Mrs. Huntington, who was credited with possessing several valuable claims in this line. The medium passed into a trance and saw and mapped out a vein of silver extending from his present position to Colorado. Curtis was able to travel over 1,200 miles in a single trip, which was very owing to the medium's accurate description of the surrounding country.

colleagues have never been candidates for an honest position nor a refuge for the feeble-minded, yet who will support him in a "gold mine" limited by "stagnation." If there is a single individual in the community who will support him, it is a pity that the community is so small. The "gold mine" is a very small one, and the "stagnation" is a very small one. The "gold mine" is a very small one, and the "stagnation" is a very small one.

LENACY AND MURDER.

Although we in the United States justly enjoy the reputation of being far ahead of our friends across the ocean, in some particulars we might profit by adopting their methods. For instance, in the case of a murderer, the law in some countries is such that the murderer is not only executed, but his family is also executed. This is a very interesting method, and it is one that we might profit by adopting.
