

OUR OWN STATE.

OGDEN NEWS.

The branch office of the Deseret News in Ogden is at No. 465 Twenty-fourth street, where advertisements and subscriptions will be received. The "News" is delivered by carriers in Ogden every evening on the same terms as in Salt Lake City.

OGDEN, UTAH, AUG. 7, 1903.

MODEL IRRIGATION FARM.

Will Show All the Devices of Modern Irrigating Methods.

Union Depot Company Elects Officers.

—Railroad Workers on Out-Of-Strike for Better Food.

The Ogden Union Railway & Depot Company has elected officers for the ensuing year.

The directors who attended the meeting were: F. J. Kiesel, Thomas Marshall, Le Grand Young, W. L. Park and J. S. Noble. The officers elected were: F. J. Kiesel, president; S. Noble, vice president and general superintendent; Frederick V. S. Crosby, treasurer; W. J. Shealy, secretary, and Alexander Miller, assistant secretary.

MODEL IRRIGATED FARM.

Work has begun in Ogden on the model irrigated farm which is to be exhibited for the benefit of those who attend the National Irrigation Congress next month. The plans have been made by the special commission composed of State Senator David McKay, State Engineer A. P. Doremus, F. M. Driggs, superintendent of the state school for the deaf, dumb and blind, and O. H. Hickenlooper.

The model farm will be laid out on the land belonging to the school for the deaf, dumb and blind, about 20 acres being used. The method of taking water from the river, the canal and laterals will all be shown in a compact way. Modern devices for measuring and apportioning water will be shown, as well as the different methods of irrigating by furrow, flood or check. Losses in transporting water will be measured.

All these things will be practically demonstrated with various kinds of measuring crops, including grains, vegetables and fruits.

STRUCK FOR BETTER CHUCK.

A strike occurred yesterday at one of the camps on the Ogden-Lincoln cut-off, at which 32 men refused to continue their work, the result being the closing up of the camp for the present. The strike is in the hands of the men who were employed over a Chinese cook, who was employed to do the kitchen work. Of late they claim his cooking has been very poor, and the men complained to their foreman but he refused to discharge the Chinaman the consequence being the men refused to work and the strike was closed down. The strikers are in Ogden waiting until they can secure other work.

SUIT FOR DAMAGES.

An action has been filed in the Second district court by A. G. Larson and J. D. Call against William Taylor to recover for damages in the sum of \$150 for said horses and special damages in the sum of \$50.

DIVORCE GRANTED.

Two suits for divorce were heard yesterday by Judge Rolapp and divorce granted.

The first case heard was that of H. A. Gibbs against Rose A. Gibbs, who were married Sept. 6, 1895. The plaintiff and other witnesses testified to the defendant's desertion of the plaintiff and the court ordered the dissolution of the bonds of matrimony existing between them.

BRIEFS AND PERSONALS.

Mrs. Ann Martin has gone to Denver to be absent several weeks. The Richard J. Rose Minstrels come to Ogden next week.

Mr. and Mrs. George Watts left yesterday for the coast to spend several weeks.

Mrs. Harry Cohen of San Francisco and Mrs. Guy Cranmer of Omaha are visiting in Ogden the guests of Mrs. E. Gibson.

This morning several scores of Hollanders left Ogden for the Lagoon for an outing.

Charles T. Wright has gone east on a business trip.

Poley's Kidney Cure will cure all diseases arising from disordered kidneys or bladder.

Eczema, scald head, hives, itchiness of the skin or any sort instantly relieved, permanently cured. Doan's Ointment. At any drugist.

LOGAN.

CACHE CO. TAX LEVY 7 1/2 MILLS.

Wedding Bells—Dr. Roberts Elected Chairman Republican City Com.

Special Correspondence.

Logan, Cache Co., Aug. 5.—Dr. R. Roberts has been elected chairman of the Republican city committee to succeed Joseph Knowles.

Mr. E. T. Hyde has purchased from William Edwards the property two doors east of the Methodist church on center street. The present building will be utilized for a time until arrangements can be made for the erection of a modern brick building.

All that was mortal of the late "Timote" Arnold was laid to rest Tuesday.

BECOMING A MOTHER.

Is an ordeal which all women approach with indescribable fear, for nothing compares with the pain and horror of child-birth. The thought of the suffering and danger in store for her, robs the expectant mother of all pleasant anticipations of the coming event, and casts over her a shadow of gloom which cannot be shaken off. Thousands of women have found that the use of Mother's Friend during pregnancy robs confinement of all pain and danger, and insures safety to life of mother and child. This scientific liniment is a god-send to all women at the time of their most critical trial. Not only does Mother's Friend carry women safely through the perils of child-birth, but its use gently prepares the system for the coming event, prevents "morning sickness," and other discomforts of this period.

Sold by all druggists at \$1.00 per bottle. Book containing valuable information free.

agreement specifies that the building shall be completed by Feb. 15, 1904. The building will be of sandstone taken from the quarry near Coalville, and its dimensions will be 23x30 feet.

Burlock Blood Bitters gives a man a clear head, an active brain, a strong, vigorous body—makes him fit for the battle of life.

EPHRAIM.

FUNERAL OF PETER THOMPSON

Impressive Services Held in the Tabernacle Largely Attended.

Ephraim, Sanpete Co., Aug. 6.—Impressive services were held in the tabernacle yesterday over the remains of Peter Thompson, whose death so shocked the community by its suddenness. The funeral services were held in the tabernacle, which was filled with sympathizing friends who gathered to show a tribute of respect to the memory of a noble and brave man.

His funeral services were held in the tabernacle, which was filled with sympathizing friends who gathered to show a tribute of respect to the memory of a noble and brave man.

STARTING IN POULTRY.

In many of the newer settled parts of the country, and in the older ones, the improvement of poultry has been neglected. Some of the best breeds of poultry are now being raised in this country, and the people are beginning to realize the importance of having a good supply of fresh eggs.

The district school teachers who have served under the trustees of the school district, and who are now in the hands of the trustees, are being paid for their services.

OUR NEIGHBORS.

POCATELLO, IDAHO.

FATAL BRIDGE ACCIDENT.

John M. Ramsey Crushed to Death Under Steel Bridge Girder.

Pocatello, Ida., Aug. 6.—Through the falling of a 23-ton steel bridge girder, which was being put in place on an O. S. L. bridge over Ham's Fork, near Pocatello, yesterday John M. Ramsey was fatally injured and died in the hospital here this morning. Another of the bridge men, Herbert Forney, who was working on the bridge, was sent to the hospital at Salt Lake.

The accident was caused by the collapse of a part of the temporary trestle which was being used to support the bridge. The trestle was made of heavy timbers and was supported by a large pile of logs.

John M. Ramsey was a 28-year-old man, who was working on the bridge. He was killed by the falling of a 23-ton steel bridge girder, which was being put in place on an O. S. L. bridge over Ham's Fork, near Pocatello, yesterday.

ANOTHER RAILROAD FATALITY.

Word was received yesterday that James Adams, a carman, in the employ of the Short Line at Kemmerer, Wyo., was killed by the cars.

Mark Brennan, an employee of the R. M. Bell Telephone Co., died about 3 o'clock last night, from the effects of a walking typhoid fever. He is from Minneapolis, Minn., but has a brother living at Shelley, Brigham Co., Idaho.

Many persons in this community are suffering from kidney complaint who would avoid fatal results by using Poley's Kidney Cure. Sold by Johnson-Pratt Drug Co.

HOW GOOD PEACHES ARE GROWN

The subject of growing good peaches that will bring fancy prices in the market is one which ultimately concerns all who are in the business of growing this fruit. There are many who think they are in the peach business, but who in reality are in the seed business.

They grow far too large a proportion of peach seeds and far too little of the valuable part—the delicate flesh which surrounds the seeds. This is the key point that brings the returns when the fruit is sold or that is valuable when used at home.

Prof. H. E. Van Deman tells in the Fruit Growers' Journal how to grow good peaches. In the first place, he says, the climate must be suitable and the soil must be good. A sandy or light or slightly sandy soil is better than very stiff clay. Indeed, some very sandy lands are sometimes well adapted and capable to produce very good peach crops.

As to the distance apart to set the trees, the old plan was to give them an abundance of room and allow them to spread almost at will. In rich soil they were now too far apart at 20 to 25 feet under this method. But experience has taught a peach grower a number of ways. The trees are set as close as 12 to 15 feet in either hand, and from 15 to 20 feet in now considered ample distance for the trees to be allowed to grow to full size with long branches.

The fruit is hard to gather and the trees are apt to break down by the weight of the fruit. A big crop of fruit spraying and thinning are also more difficult than on smaller trees. The peach tree that is pruned so severely that its fruit can be gathered without a ladder of any kind is getting to be one that is liked best because it pays best.

Thinning the fruit when it is about the size of peach seeds is getting to be almost universal with good peach growers. The prevailing idea is to grow as small a number of peaches on little trees rather than a great number of little peaches on big trees.

There are good peach soils that will not produce big peaches although there may be but few of the trees. It is the experience of a good many peach growers, and I have seen cases in mind that have come under my observation, that rich virgin soil often does not bring as good peaches as that which is rather poor and has been brought to a good state of fertility by manuring. There are cases where this has been well tested by clearing new land beside old fields and planting the trees out of the same lot over both. Of course it was generally necessary to fertilize the old land quite heavily but it produced enough better fruit to pay for the extra expense. If the new land is even a little thin it will pay to mature it also.

not compelled to adopt such business methods, says a writer in *Deseret Journal*. The stock should be bought from yards as close as possible to the place where they are to be raised, not only on account of the saving in express charges, but also from the fact that climate influences the quality of the stock as well as other stock, and little from one extreme will not thrive as well as those which were raised in a climate similar to the one in which they are shipped.

The poultry business grows in importance every year and there is yet large amount of country as large as some of the New England states without a single brooder of fine poultry. The planter in this industry will be a sure winner if he turns the right methods.

POULTRY REMEDIES.

The South Carolina agricultural experiment station recommends the following remedies for common complaints:

When chickens are from one to two weeks old a great many die from bowel trouble. This can be corrected by giving castor oil and water and giving scalded milk instead.

A great many young chickens are killed by lice. To get rid of lice mix one part kerosene oil and one part lard and grease the heads. If this is put on when the chickens are first hatched it will keep lice off.

To prevent cholera in summer, put 10 drops of sulphuric acid in one gallon of drinking water twice a week.

To keep away diseases, keep everything perfectly clean where poultry is kept. Use lime freely.

RUINOUS FORESTRY POLICY.

The best thing expressed by the party of German agricultural experts who recently visited this country was the remark of one of them who said: "We consider your policy toward forests absolutely ruinous to the interests of your country. With us the forests are among our most valuable assets and not a single tree may be cut without the permission of the government inspectors. To cut trees from mountains and hillsides as you do brings direct damage to the estate of soil and an indirect loss to the less certain result in lessening the rainfall. We cannot condemn your forest policy strongly enough. Germany will be selling you lumber some day. While we are taking precautions to save our timber you are cutting yours recklessly."

Walter A. Wyckoff, professor of silviculture at Princeton, recently married Miss Leah Eicher of Colorado Springs.

SCENE IN A TUNNEL.

When the unfortunate young man called that evening to receive the happy acknowledgment of his sweetheart he was very quickly shown off the door-step by the young lady's father—Chicago Journal.
