## FITTING A BOY FOR MANHOOD.

One of the best ways of fitting a boy for the career of manhood, and of insuring his success in it, is to enlist his young, eager, irrepressible activities in something practical. The restless energy which bursts out in all kinds of mischievous pranks, if it has no other outlet, is just what he will need in the hard work of life. It does not want curbing, but directing. Responsibility is an excellent balance wheel. Give the boy his balance wheel. Give him an interest in your business, if possible—in your farm or your store; let him have a share in the labor and profit; or, if he shows a decided taste for some other employment, encourage it. Give him every opportunity to study agriculture, or engineering, or art. Let him feel that he is going to be a man, and is preparing for man's work and position. Make him your friend and companion. We know no better means for making a boy manly, and of keeping him "out of mischief" than such a course.

The history of bad boys and bad men is, in a large majority of cases, written in these words: "They had not the proper training and incentive." Many are the prison occupants of to-day who can blame their parents for lack of proper government and direction in directing their children's minds and forming their habits. And many a child, now a bright promising boy, will look out from a grated window a few years hence, a victim to his own bad bringing up. Take warning in time, O anxious parent, to give your boys every incentive to industry and good habits, even to enlisting them as partners in your business, whatever that may be. Boys take warning in the sad, solemn histories of those youths who have perished before you by bad associations and indifference to the future.

## COAL ASHES FOR CORN.

W. S. Smedley, Leavenworth, Penn., writes thus to the *Farmer's Club*: Last winter we saved our coal ashes, sifting them and keeping them dry till spring, when we mixed with about half their bulk of ground plaster, and when the corn was well through the ground set a boy to puttin' the mixture on the hills, at the rate of about a half-handful to each hill, going over about half the field of twelve acres; and thought nothing more of it till harrowing time, when I noticed, in crossing the field a very distinct difference in the appearance of the corn—that where the ashes and plaster had been applied being very dark and healthy, the other part pale and feeble. However, the whole field made a very fair crop for a dry season; but I am satisfied that that part where the plaster and ashes were applied made fifty bushels more shelled corn than where there was none—and the ashes were coal ashes. Plaster alone had never acted so well for us.

LUXURIOUS NEW YORK.—A list of fourteen private residences, now building on Fifth Avenue, is given as an evidence of the growth of luxury in New York. These houses cost from \$50,000 to \$150,000 apiece, and that merely for construction, excluding the value of the land and the furnishing. Indeed, the sudden extravagance of Paris as a centre of luxury and fashion seems to have inspired New York with the purpose to assume that vacant place. We hear of the furniture which is going into these republican palaces as representing sums of money capable of expression only by six figures. Bedsteads whose woodwork costs \$2,000, sideboards whose value is \$3,000, etageres costing \$4,000, are among the articles; and that this is not a spasmodic extravagance is shown by the fact that a leading upholstery establishment of the city keeps on hand a stock valued at one million and does a thriving business. The man who can afford to live in a \$100,000 house and sleep on a \$2,000 bedstead may be considered well financially, and he who can arrange an entire establishment on that scale, without violating the rules of aristocratic harmony and propriety, has the best right in the world to spend his money in that way. If the millionaires of New York can wed the culture of the Old World to their money, they may succeed in reproducing Paris on this side of the Atlantic, provided they keep their streets cleaner.—*Boston Post*.

A SAILOR'S LETTER.—A sailor, writing to his mother, gave the following account of a storm: "We have been driven into the Bay of Fundy by a fierce storm, right in our teeth. It blew heavy guns, and carried away the bowsprit. A heavy sea washed away the binnacle and compass; the captain lost his quadrant, and could not obtain an observation for fifteen days. At last we arrived at Halifax. The old woman, who could not read herself, got a neighbor to read and repeat it to her three or four times, until she thought she had got it by heart. She then sallied forth to tell the story to her friends. She repeated it as follows: "Oh, my poor son!" "Why, what's the matter? He is not lost?" inquired a sympathizing friend. "No, thank heaven!" said the old woman, "he's safe; but he had a narrow escape. He was driven into the Bay of Fundy by a bamboo right in the teeth. It blew great big guns, and they carried away the bowsprit. A heavy sea washed away the binnacle of the binnacle. The captain lost his quadrant, and could not get an observation for twenty-two days. At last they arrived at Halifax."

TO PREPARE INK FOR TRANSPARENTING.—If a little sugar be added to the ink, a copy of the writing may be easily taken off by laying a sheet of unglazed paper, dampened with a sponge on the written paper, and passing over it a flat-iron moderately heated. A knowledge of this fact may be useful when a person wishes to occasionally retain a copy of a letter or other writing and is not in possession of a copying press. Common copying ink is prepared by mixing a kind of gum with ordinary ink, and does not need the aid of warmth to transfer it.

## NEW YORK TRADE

Benedict, Hall & Co.,  
BOOTS AND SHOES,  
Nos. 27 and 29 BROADWAY,  
NEW YORK.

RUSSELL & ERWIN,

## PEOPLE'S VERDICT!

Over Half a Million sold and  
in use!  
4,000 made and sold per week!

SINGER'S  
New Improved Silent  
FAMILY SEWING MACHINES  
ARE  
The Best in the World,  
Because all of them are in constant use, while  
a very large proportion of other makes are not  
used, owing to their being partially or utterly  
impracticable.

THE SINGER  
NEW FAMILY MACHINE  
Has been brought to perfection, regardless of  
time, labor or expense, and is now incomparably  
the best Sewing Machine in existence.  
It is simple, compact, durable, beautiful, quiet,  
light-running, and capable of performing a  
large and varied work never before at-  
tempted upon a single machine; using either  
Sils, Twist, Linen or Cotton thread. Sewing  
with equal facility the very finest and  
coarsest materials, or anything between the  
two extremes, in the most beautiful and sub-  
stantial manner.

The New Improved Attachments for Hem-  
ming, (any width) Braiding, Embroidering,  
Machine Knitting, Gathering and sewing on (at  
the same time) Bell-Sewing, Cording, Tucking,  
Quilting, Felling, Trimming, Binding, etc., are  
novel and practicable, and have been invented  
and adjusted especially for this Machine.

Folding Tops and Cabinet Cases.  
New designs of the unique, useful and popular  
Folding Tops and Cabinet Cases, peculiar to  
the Singer Machine, are in every variety of  
Wood, such as Black Walnut, Mahogany, Rose-  
wood, Satinwood, and from the plainest to the  
most elaborate pattern and finish. The new  
cases themselves are plain or highly orna-  
mented with pearl and gold to correspond  
with their tables or cabinets.

In the Singer the work is fed or passed  
through the Machine in the natural direction,  
namely, from the operator, permitting her to sit  
in a natural and healthy position. In many  
other Machines the work passes from right to  
left, or the reverse, compelling the operator to sit  
in a bent and unhealthy position, and thus causing  
weakness of the back, etc.

The Singer uses a SHORT STRAIGHT  
NEEDLE, which is not liable to break or miss  
the stitch. Many other Machines use a long  
needle, which is liable to break and to  
miss the stitch.  
On the Singer the Tension on both the upper  
and lower threads is absolutely under the  
ready control of the operator, thus rendering  
the Machine always available for good sewing,  
which is not the case with any other. Many  
so-called cheap Machines are really worthless,  
and so are many of their new peculiarities and  
supposed advantages.

The SINGER is the  
Oldest Practical Sewing Machine,  
Being about twenty years in the market.  
Having been constantly improved by the em-  
ployment of the most skilled agency of the  
age and unlimited capital, it is now directed  
of all unnecessary parts and possesses All the  
Very Latest Inventions and Improvements.  
It is the only Machine sold on Honest Claims,  
as all its parts are Practical and will do all that  
is claimed. Some other Machines are sold on  
Greatly Complicated, to do useless and Silly  
things, and thus are rendered Liable to Con-  
stant Derangement. The Singer, however,  
Never gives trouble, but is readily and easily  
managed by those who utterly fail in other  
Machines.

SINGER'S  
New Manufacturing Machines  
Claim the same advantages over others of their  
class as the new Family Machines. These old  
and well-tried Sewing Machines are applicable  
to all kinds of heavy and light manufacturing in  
Cloth, Leather, etc., and run in the most perfect  
and reliable manner without trouble to the operator.

Without any previous advertisement, the  
Demand for the Singer Machine is so Great  
that we have had to raise our prices. We can do  
nothing to exhibit. All sold, but a large num-  
ber are now on the way from New York, and  
WILL ARRIVE IN A FEW  
DAYS.

They will consist of the Different Varieties  
made by the Singer Manufacturing Company  
and we shall sell at Eastern Prices, with addi-  
tion of Freight only. To accommodate parties  
who cannot pay all down, we will sell on

EASY MONTHLY INSTALLMENTS  
So that all may possess one of these Machines.  
For the convenience of our Patrons we have  
engaged the services of a gentleman who has  
had twenty years experience and is one of the  
most skillful experts in the world in repairing  
and adjusting Sewing Machines. He will put  
each Machine in complete and practical run-  
ning order before it leaves the Institution and  
will also impart to purchasers all useful in-  
struction, so that they can at once commence  
work.

We report to no trickery whatever to sell  
Sewing Machines, but allow their Great  
Merits to recommend them. We can do  
this, as the demand for them is so great that  
although the Singer Company make more than  
all other first-class companies combined, they  
cannot nearly fill their orders, and are com-  
pelled to still extend their Gigantic Works.

We have been so fortunate as to secure the  
General Central Agency,  
For this Territory, we extend a cordial invita-  
tion to all to come and see the Machines,  
whether they wish to buy or not. See all  
others but not buy without you ex-  
amine the Singer.

We Guarantee every Machine we  
sell to give entire satisfaction.

THE SINGER  
BUTTON-HOLE MACHINE  
Is the only Practical one in the World.

OTHER SEWING MACHINES REPAIR-  
ed on Reasonable Terms.

## IMPERIAL

FIRE INSURANCE CO.,  
OF LONDON,  
Established 1803.

CAPITAL, \$8,000,000.00.  
INSURANCE EFFECTED ON  
Residences, Furniture, Mercan-  
tile Stocks, Factories, Mills,  
etc., at as low rates as are  
consistent with the risk  
assumed, and the

THOROUGHLY FIRST CLASS IN-  
DEMNITY OFFERED.

CHARLES S. HAMMER, Agent,  
SALT LAKE CITY.

"He that provideth not for his own household  
hath denied the faith and is worse than an  
infidel."

THE EQUITABLE  
Life Assurance Society,  
OF THE UNITED STATES.

ASSETS, - - - \$12,000,000.00.

The Leading Insurance Company of the World.

IN 1860 the EQUITABLE was the 9th Company  
in the world. For the year 1861 it was  
the 8th; in 1862 and 1863, the 7th; in 1864  
and 1865, the 6th; in 1866, the 5th; in 1867, the 4th; in  
1868, the 3d, and

IN 1869 IT WAS THE FIRST!

The volume of new business for the past year  
exceeded that of the 2d Company (*Mutual Life*,  
of New York), by over Fifteen Million Dollars  
and was greater in amount than that of any  
other Company in the world.

Sum Assured, New Business, 1869:

\$51,021,141.00.

The distinctive features of the EQUITABLE  
and its successful record of doing business  
which has rendered it the choice of all suc-  
cessful business men, will be fully explained to  
any who contemplate insuring either by in-  
surance, for the benefit of themselves, or in  
Life Policies for the assured. Independence of  
their families, by

CHARLES S. HAMMER, Agent,  
SALT LAKE CITY.

THE FOLLOWING STATEMENT made  
by the FIRST PURCHASERS of FLORENCE  
SEWING MACHINES on the Pacific Coast,  
including ALL who bought in 1863, whose  
present residence is known, is conclusive evidence  
of the great superiority and unrivaled excel-  
lence of the FLORENCE and is the best testi-  
monial ever given in favor of any Sewing  
Machine:

Statement made May, 1870:  
"Our Machines sew as well now, and are as good  
for use in every respect, as they were when pur-  
chased nearly seven years ago, and they HAVE  
NEVER COST US ANYTHING FOR REPAIRS. We  
recommend the Florence as being without ex-  
ception the best Sewing Machine we have ever  
used, and the most reliable and  
least complicated Sewing Machine in use."
