

MINING, BUSINESS AND STOCKS

NEW YORK STILL IN THE ASCENDANT.

Park City Stock Continues Its Meteoric Rise on the Exchange.

SOLD TODAY AT 26 CENTS.

Reported Strike is Somewhat Mysterious, but There Are Those Who Believe It to be Genuine.

New York's meteoric rise still continues. From ready offerings of 204 yesterday afternoon, the stock took on new strength during the night, and at this morning's call sold in bunches at figures ranging from 24 to 26 cents. While the reported strike is still somewhat mysterious, there are those who contend that it is genuine, and that the stock will grow stronger instead of weaker. Others again are firm in the belief that conditions do not justify the inflation and are therefore cautious about picking up more than they really need. During the call a total of 7,600 shares found takers and the stock closed at 25 1/2, and offered by a few at not less than 25 3/4.

Aside from the movements in the stock indicated, the call was devoid of special features. Sacramento took part in the trading at 10 1/2, while Butler-Liberal closed hands at 12, and closed with the stock offered at 11 1/2. The market remained fairly firm, but the volume of business done was rather small. The closing figures were as follows:

STRIKE IN NEW YORK.

High-Grade Ores Encountered in Winze Below 400-Level.

It came to light late yesterday afternoon that the cause of the activity in New York was the discovery of high-grade ores in this promising Park City producer. The ore is said to have been encountered in the winze below the 400-foot level and occurs in such quantities as to warrant the assertion that the mine will report soon with shipments which may continue for an indefinite period.

The New York is in a great neighborhood, lying as it does not more than a stone's throw from such bonanzas as the Daily Daily-West, Ontario, Silver King and others of like character. Its development has demonstrated the presence within its depths of ore calculated to make its owners wealthy, and the latest strike is only in line with what has been expected for some time.

GREAT IS BINGHAM.

Eastern Journal Lays in Its Praise of Utah's Copper Camp.

An eastern publication says that no copper camp in the country has made greater progress the last two years and given greater promise of future growth than the Bingham camp of Utah.

The State of Utah this year should show a production of about 50,000,000 pounds of copper, compared with about 30,000,000 pounds last year, an increase of 66 per cent.

Good authorities estimate that by 1908 Utah will be producing 125,000,000 pounds of copper per annum and practically all of this will come from the Bingham camp, exceptions being the Cactus property in Pinalo, owned by Samuel Newhouse, which by that time should be producing 15,000,000 pounds of copper per annum, and the Majestic Copper Mining company of Milford.

Utah, which may by that time outgrow its financial troubles and be upon a producing basis.

It is not to be expected that the Bingham camp will increase its production again for some time to come, but the United States, Bingham, Boston Consolidated, Yampa, Ohio Copper company and the Utah Copper company should all have increased output within three or four years. Probably the Utah Copper company will make the greatest record of new production in its treatment of the Bingham porphyry deposits. It is the expectation of the Utah Copper company management to have an output of 35,000,000 pounds of copper per annum within three years.

A table of prospective production of the Bingham properties including the Cactus, within three years, is as follows:

	Pounds	Annual
Utah Copper company	35,000,000	
Highland Boy	15,000,000	
Cactus	15,000,000	
United States Mining	15,000,000	
Bingham Cons. (from its own mines)	10,000,000	
Boston Cons.	10,000,000	
Yampa	10,000,000	
Am. Smelt & Refining	10,000,000	
Total	125,000,000	

To this list there promises to be added long before the period comprehended in these estimates, a list of copper producers more imposing even than is included in the list above. Many of these will be developed at Bingham, a cluster in Beaver county and will scattering others throughout the state.

THE PIONEER GROUP.

Property Near Alta Is, Undergo Process of Patenting.

Arthur Murphy is down from Alta and American Fork canyon, where he is in charge of operations at the Pioneer group, upon which work is being done, and prior to securing patents to the ground.

Mr. Murphy speaks enthusiastically of the recent strike in the property of the Pittsburgh Mining company, at the head of American Fork canyon, and says without a doubt it is one of the best discoveries made in that region in a long time. The vein encountered has been cross-cut for a distance of 12 feet in all solid galena ore. The Pioneer group adjoins the Pittsburgh, consequently Mr. Murphy is more encouraged than ever that he is going to develop something good in a little time.

The Little Mendah.

What is to be known as the Little Mendah Mining company, will file its articles of incorporation with the county clerk in the course of the next day or so. The company, which owns valuable claims adjoining the original Mendah mine near Pinedale, will have a capital stock of \$500,000 divided into shares of the par value of \$1 each. The officers will consist of W. A. Wright, president; L. A. Copeland, vice president; John Zink, treasurer, and B. S. Rivers, secretary. These, with James Langston, will form the directors.

Tonopah Ore Shipments.

The ore shipments from Tonopah for the week ending Thursday last, as reported by the Goldfield Review, were as follows:

From Tonopah-Tonopah Mining company, 442 tons; Montana, 29 tons; Belmont, 100 tons; Tonopah Extension, 10 tons; Tonopah Gold Mountain, 3 tons.

Goldfield-Combination, 23 tons; January lease, 10 tons; Zinn, Jumbo lease, 30 tons; Riley & Kries, Quartzite, 18 tons; Florence lease, 31 tons; McDonald & Fuller, Jumbo, 122 tons. The total amount shipped was 823 tons.

CONCENTRATES.

Copper was quoted slightly higher today, the figures being 13 1/2.

A body of high-grade galena is reported discovered in the Utah-Apex at Tintic.

W. H. Goss, a prominent mining man of Salmon City, Ida., was in town today.

The Pioneer sampler received today four cars of ore from Tintic and one from American Fork.

The Pioneer sampler had on hand today several cars of ore from Tintic and two from American Fork.

The Taylor-Brunton sampler today reported 5 cars of ore from Bingham, 3 from Tintic, 4 from Tonopah, and one from Milford.

D. P. Bohling, the well known mining expert, has gone south to inspect the Lulu, Frisco Contact and other mines in the vicinity of Milford.

Manager Tony Jacobson of the Columbus Consolidated Mining company went to Alta this morning. He was accompanied by his brother, J. A. Jacobson.

The first lot of concentrates from the new Columbus Consolidated mill at Alta is being delivered to the Pioneer sampling works at Sandy. The product is worth about \$40 per ton.

The Milford Times says: The Gold Mountain mine in Star district is rich enough in gold and silver ore to pay for development. The men at work on the prospects now are taking out some very rich ore.

The Estelle mine and mill are behaving splendidly. The mill is being made to crush from 15 to 20 tons of ore per day, of which 71 per cent of the gold is saved. This is remarkably good work, and makes the mill a paying proposition. The mine improves with development, both in the quantity and quality of the ore which is ample for any demands that may be made upon it—Milford Times.

UTAH MINES PAY GOOD DIVIDENDS.

Daily-West and Grand Central Come Forward Today With \$84,500.

BOTH IN SPLENDID CONDITION.

Former Distributed the Sum of \$72,000, While the Latter Checked Out \$12,500.

Two of Utah's leading mining companies today checked out to their stockholders the modest sum of \$84,500 in dividends. The greater portion of this was paid by Daily-West, which handed out \$72,000, as its regular monthly instalment to the state circulating medium, while \$12,500 of the sum named was paid by Grand Central, which for some years has been one of the best mineral producers in this section. Both properties are understood to be in excellent physical condition, and stockholders look for a continuation of such movements for an indefinite period.

Heinze and Amalgamated.

William Scallon, former manager of the Amalgamated Mines in Montana, was in the city yesterday afternoon for a few hours accompanied by Miles Fulton of Butte. As to the reported sale of the Heinze interests to Amalgamated, Mr. Scallon says he does not believe that a sale has been actually consummated, but that Heinze has probably made an offer of his properties. He does not believe any transactions have progressed beyond that stage.

Majestic Mines Doing Well.

The Majestic Mining company continues to keep up its regular shipments of ore. The office was in receipt of the proceeds of two car loads yesterday, which netted \$500.35 from the Harrington-Hickory, and one car from the Old Hickory which netted \$487.65. This is the kind of work that counts and speaks volumes for the merit of the property. These regular shipments are made from ore extracted in the course of development of the properties. The O. K. Old Hickory and Harrington-Hickory, upon which about 100 men are employed, are each responding splendidly to the work of development now being directed by Supt. Freudenthal. The physical condition is all that the most optimistic could hope for, as already mentioned of large bodies of profitable shipping ore has been and is being uncovered in each of these producing mines—Milford Times.

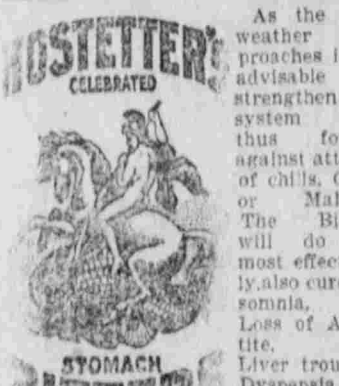

Telegraph Rate War.

Seattle, Wash., Nov. 14.—The latest move in the rate was the Dominion Telegraph company and the government cable system is the organization of local business men to "boost" business on the government line. A large number of business and commercial houses of Seattle doing business with Alaska are about to bring the matter before the chamber of commerce and it is probable that decided action will be taken by that body toward increasing commercial business over the American cable. It was stated today on good authority that the Dominion people have given the public to understand through their local representatives that the cable was out of order all along the line and that as a consequence, it could handle no dispatches. The truth of the matter is that messages are being taken by the signal corps as far as Sitka, the cable being out of repair north of there.

REVOLUTION IN BRAZIL.

Movement Has Been Suppressed, Many Being Killed.

Rio Janeiro, Nov. 15.—The revolution movement has been crushed and order is completely restored. Senator Lauro Sodre and Deputy Barbosa Lima, leaders of the movement, have been arrested. Other leaders have been killed or wounded. Many persons have been killed or wounded.

DR. CASSELL'S FOOD

STOCK MARKET EXTREMELY ACTIVE.

Southern Pacific at Opening Was In Big Demand at an Advance

INDUSTRIALS CONSPICUOUS.

The Buying of Standard Stocks Largely Concentrated in Rock Island.

New York, Nov. 15.—Industrials and specialties held a conspicuous place in the opening dealings in stocks today, but Louisville & Nashville rose strongly 1 1/2, Atlantic Coast Line 3/4, and there was a very active demand for Southern Pacific at an advance of 1/4. Hide and Leather preferred rose 1/4, Manhattan 1/4, Linseed 1/4, Biscuit 1/4, and Colorado Fuel 1/4. Five thousand shares of Corn Products, which closed hands at 25 and 25 1/2, compared with 24 1/2 last night. United States Steel rose a quarter on running sales of 4,000 shares, and Amalgamated Copper 1/4 on running sales of 1,000 shares. With the course of the morning the market took on the same aspect as yesterday, namely, sensational advances in usually obscure stocks and realizing in the standard railroad stocks. Later on there were heavy purchases of St. Paul and Union Pacific at 11 1/2 and 11 3/4, and the usual favorites came into general demand. The realizing carried a number of railroads below last night's close, including the Rock Island, which fell 1/4, and the local favorites were strong. Hide and Leather preferred jumped 5 and New York Airbrake 4 1/2. Pacific Mail lost 3 and Mexican Central a point.

The market became more irregular and under cover of the rise in St. Paul and Union Pacific, which extended a fraction further, some of the industrial stocks were pressed for sale to take profits along with the railroads. United States Steel lost its rise and the coalters sagged below last night. New Airbrake, Rock Island and Quick Silver Mining 3/4, and Southern Pacific preferred 1/4.

Bonds were firm at noon. The buying of the standard stocks was largely concentrated for a time in Rock Island, the reported sale of \$25,000,000 of the Rock Island bonds helping the stock. It sold at 27 1/2 and Union Pacific at 11 1/2, but did not materially strengthen other western stocks. Various specialties were pushed energetically to new high levels. New York Airbrake responded with a jump of 4 1/2. Southern Pacific preferred and Steel Foundries preferred 2, and a long list of others a point or more. Amalgamated Copper, after being neglected during the forenoon, was taken in hand and pushed up to 7 1/2.

LIVESTOCK.
