MINING, BUSINESS AND STOCKS

M'MILLAN ON TINTIC MINES.

Star Consolidated and Lower Mammoth Both Show Improved Conditions.

SHIPMENTS FROM LATTER.

Are Coming From the Fifteen Hundred Level-Three Car Loads Per Week.

Henry G. McMillan, president of the Star Consolidated company, and also a director of the Lower Mammoth both located in the Tintic district, has returned from an inspection trip to those mines and expressed himself today as being very well pleased with the progress of development work at both places,

At the Star Consolidated, work is being pushed on several levels, and the 450 has the best showing of ore at the present time. Here a large stope of low grade lead ore has been opened into, and recent tests indicate values of about \$5 to the ten. President Me. of about \$9 to the ton. President Mc-Millan anticipates a change for the bet-ter when the shoot is opened further. On the same level is a second shoot of lead ore that carries better values, but development has not progressed sufficiently to determine its extent or permanency. A large shoot of iron ore has also been opened on the 450 level that carries some values in gold.

silver and lead, which, Mr. McMillan says, looks as it would develop into something of value.

The 800 drift, which is being pushed ahead as rapidly as possible, looks favorable for ore; it has been run for a distance of a little over '900 feet, and the distance of a little over 200 feet, and the shoot towards which it is directed should be cut within the next 60 feet.

On the 200 level some ore is being taken out for shipment. On the whole, Mr. McMillan states, the Star Consolidated mine has materially improved during the past 60 days and he will be greatly disappointed if the mine does not make a very good account of itself during the coming year.

coming year.
On the 1,500-level of the Lower Mammoth mine, the drift to the south from

moth mine, the drift to the south from the shaft has been in a good grade of lead ore for more than 100 feet and it is from this portion of the mine that the shipments under the new contract with Salida smelters is being made.

In both the winze and the raise being made from the drift better values are coming in. The winze has been sunk 40 feet, while the upralse has been run for more than 25 feet. As far as explored, the shoot of ore shows a width greater than the shaft; and, in width greater than the shaft; and, in some places, it is three or four times

The nature of the ore is sand car bonate and is silicious and of a nature that is impossible to sort.

Generally speaking, Mr. McMillan

Generally speaking, Mr. McMillan says, the improvement in the Lower Mammoth has come fully up to expectations. While the company is still handicapped to a certain extent in the speedy handling of ore, under the present conditions it is an easy matter to get out three car loads per week for market. But plans are being made for the more economic extraction of the ore, which will greatly facilitate matters.

MEAR THE HOLIDAYS.

Trading on the Mining Exchange Not So Brisk Today.

The near approach of the holidays in being felt on the floor of the Mining Exchange. As is usually the case a this time of the year, there is a slack-ening up of orders for stocks coming from investors.

During the forenoon calls today a to tal of 20,500 shares were transferred which was paid out the sum of 26,50. The feature of the regula call was furnished by New York Bonanza, which displayed considerabl activity at a slight advance in price Little Bell fell off, the stock selling down to \$4.55. The heavlest trading was done on the open board but near ly all the stocks were slumpish. The closing quotations and sales were a

the properties so worked have proved very profitable.

size and value as they go down. In that district men have kept up their

assessment since 1881. There is probably no other district in the coun-

think of the lead belt that traverses

from a railway, but they propose to develop their property and be prepared to operate it when a market for their ores shall be secured. Probably they will be able to ship much, just as the

Will be able to ship much, just as the Glimore is doing, but they must have transportation in order to operate the mine as it should be worked to return

TENNESSEE COPPER.

What That Company is Doing To-

wards Increasing Copper Supply.

A Boston brokerage firm, Hayden,

Stone Co, has issued a circular con-taining considerable interesting data

about Tennessee copper, of which J. Park Channing, is manager, which is

not lacking of local interest, considerable stock being held by Salt Lake

According to the circular, the company has \$600,000 in cash on hand; with 200,000 shares of stock outstanding and \$450,000 worth of bonds.

A statement from Mr. Channing says: Our enlarged smelting plant is prac-

tically completed, awaiting only the finishing of the tall stack. We expect

finishing of the tall stack. We copen during the year 1906 to smelt 500,000 tons of ore, which will produce at the low-est estimate 18,000,000 pounds of pig cop-

est estimate 18,000,000 pounds of pig copper. The cost of this pig copper, f. o. b.

New York, will not exceed 7.5 cents
per pound. For this pig copper we
should receive not less than 16½ cents
per pound for the year, thus showing
us a profit of nine cents per pound,
or a total of \$1,620,000 for the year.

This would amount to a trifle oveh \$8
per share.

per share.
"I am of the opinion that toward the end of the year we will be smelting at the rate of at least 50,000 tons per month, so that for the year 1907 there is

no reason why the ore treated should not exceed 600,000 tons with the same

average yield and with undoubtedly de-

ing well. Our deepest working will at that date only be 600 feet, and every-

thing in the district indicates that we can expect our ore shoots to continue

sand feet without any diminution as to size or richness. This prediction is

borne out by the persistency in depths of our class of deposits the world over, I can see for our mines a very long and

a brief business trip.

near Logan.

"The first of January, 1906, will show us with about 4,000,000 tons reserves, with the bottoms of the mines all look-

them satisfactory returns.

Railroad Construction Would Open Among the cloud of railway rumors the one which credits the Short Line with a purpose of extending its Mackay branch to the Salmon and down that stream and the Snake to Avenue and nearly a point in Brooklyn Lewiston is of interest because it Transit. The market otherwise was irsuggests that the desirability of open- regular with fractional losses predominat-

Transit. The market otherwise was irregular with fractional losers predominating.

After a good deal of wavering and an extensive raily in the boan tractions, the market began to move with more uniformity upwards, but made inthe progress outside on the stocks which were in special demand. St. Paul, Bardinge & Ohio and Pennsylvania were taken held of in turn and carried strongly upwards. The industries group was quieter and less of a feature than for a long time. Ball move & Omo and Vinginia-taroning themarked allowing the progress of the particular time for a long time. Ball move & Omo. Colorado & Schillerin school preferred. St. Paul, Reading and Pintsburg, C. C. & St. Louis 19, and Pennsylvania, Norfolk & western, Chesapeare & Omo. Colorado & Schillerin school preferred confined yesterday sbig break and lost bearly 3 points, but hade up a good deat of its a cline.

The money rates had only a transfent effect on the prices, the appearances of dige orders for Sculbera Parine, and local tractions and United States Stell stocks checkingly overcoming the hesitation of the list. Trading broadened considerably, but the strength was of a rather more congested character, funning more particularly to the Pennsylvania and local group. Metropolitan Scurities gamed 6 points; Matropolitan Scurities gamed 5, Saulte Ste Marie 2, Smeling and Sugar 19, and Southern Pacific. People's tas and Colorado Fuel 1.

Honds were steady at noon.

Kumors that the control of the Metropolitan Rallway system had passed to the Interborough interests attended the buying of the local traction stock. At the high prices over high gains, cached by in Manhattan, 1% in Brookyn Transit, exin Metropolitan Scurities.

On the curb interborough jumped ever 10 points to 20. The general market snared but moderately in this exhibition of strength and snowed heaviness in spots. Illinois Central lost a point Union Pacific's return to 149%, its ing up the central portion of Custer county may be in the minds of the men who plan and build our railway systems, says the Boise Statesman. There is another plan for construc-tion of a line and the construction of a line through Lemht and Custion of a line through Lemhi and custer counfies, the survey for which was made during the past summer and fail. What will come of it no one knows, but it is interesting to find that two projects for building into the section are among the many rumored raliway extensions affecting this state. this state.

There is no more inviting field for railway building than is afforded in those conuties. They are rich in many resources, but especially in those mine products which make heavy tonhage for railway lines. It is very freely predicted by competent authorities familiar with the mineral resources of that section that, if a railway be constructed through there, the silver-lead districts of the two countries. way be constructed through there, the silver-lead districts of the two counties will eclipse the Coeur d'Alenes. There are a large number of ledges of great size carrying ores high grade in both silver and lead. Some of these properties have been extensively developed and have tens of thousands of ore blocked out. thousands of ore blocked out.
It has been impracticable to mine

It has been impracticable to mine those ores because they will not bear transportation to the railway, while smelting on the ground has been expensive. Much ore has been treated there, the bullion being hauled out, but the conditions under which the business has been conducted has rendered it discouraging, though some of the properties so worked have proved very profitable.

But all the known properties in half a dozen districts would be worked vigorously if shipping facilities were at hand and the districts would attract the attention of mining men from all sections. This is especially true fa view of the high price of lead and the increasing price of silver.

It is said of the Sea Foam district that it has a show far beyond anything found on or near the surface in the Couer d'Alenes, and where development has been done the results are such as to warrant the statement that the ore shoots maintain their size and value as they go down. In

LIVESTOCK.

probably no other district in the country where such a thing has been witnessed evcepting in cases in which the property was in a producing section and the work was kept up by men having an opportunity to find employment in near-by mines a portion of the time. There has been no production at Sea Foam for many years and not much at any time, but claim owners have gone in regularly year after year and performed their work because they know they will have fortunes if the country ever be opened by a railway. CHICAGO.

CHICAGO.

Chicage, Dec. 22.—General seiling by commission houses caused weakness in the wheat market here today. Shipments from Argentina for the week were in excess of the amount previously estimated, and this was the chief cause of the seiling pressure. May opened unchanged to a shade lower at \$1% to \$75,485% and declined to \$1%.

Minneapoils. Duluth and Chicago reported receipts of 198 cars against 637 one year ago.

The corn market in general was weakneed by profit taking in the December delivery. May opened unchanged to a shade lower at 44% 44% and sold off to 4444%.

Oats were a trifle easier in sympathy with other graims. May opened unchanged to n trifle lower at \$1% to 31% 49.22, and sold off to 21% 47.21%.

Selling by packers and pit traders caused moderate weakness in provisions. A small decline in the price of live hogs brought out a considerable amount of offerings. May park opened off 2% at 13.69 and sold down to 13.50. Lard was unchanged at 7.42%. Ribs were a shade lower at 7.22%.
