

MINING, BUSINESS AND STOCKS

HEAVY TRADING
ON THE EXCHANGE

Uncle Sam Consolidated Closed Higher While Other Stocks Were Depressed.

MAY DAY GOES LOWER.

Little Done With the Unlisted Shares Today—The Closing Quotations and Sales.

A heavy volume of business was transacted during the forenoon calls of the mining exchange today, and with the possible exception of Uncle Sam consolidated, there was a general lowering of prices all along the line of stocks called. Notwithstanding the slaughter which went on, Uncle Sam was well supported and closed higher. May Day started off at 64 cents and did not stop until it had landed at 64 cents, at which figure several thousand shares were transferred. Beck Tunnel fell to \$1.62 and displayed an indication of further decline. Mountain Lake continued weak. Sioux Consolidated dropped to 51 cents, but this was followed by a slight recovery. Seven Troughs kept close to the toboggan; while Colorado dropped from \$6.70 to \$6.45.

Little was done with the unlisted stocks. East Crown Point sold at 24 cents and Silver King Coalition at 24. The closing quotations and sales were:

CAPITAL MAY BE REDUCED

Goldfield Consolidated Will Get Rid of a Lot of Unissued Stock.

MORE THAN THREE MILLION.

This Much Cash in Company's Treasury—Speculation as to Dividend.

Information of the most reliable and authentic character has been received to the effect that the directors of the Goldfield Consolidated Mining company are working on a plan whereby the capitalization of that organization will be cut from \$50,000,000 to \$35,000,000. In other words, those in charge of the company's affairs have decided there is no need of carrying \$15,000,000 of unissued stock as a dead weight and just as soon as it can be legally accomplished radical action will be taken. This news will be news to many who while hoping that this step could be taken some day by the company's directors, but not aware that its realization is but a matter of perhaps another 30 days.

Had it not been for the strike and the shut-down, the initial dividend would have been declared Aug. 31. The rate was to have been for the entire year with a distribution each month. While the amount of this dividend is known yet owing to pledges made to the directors that it would not be declared until the official announcement of its declaration was made, its publication must be deferred until that time.

On the 500-foot level, Mr. Orem states, has been opened what seems to be a lens in the limestone hanging wall. So far it has been demonstrated to be 40 feet long and 30 feet wide, the character of which is a chalcocite or black sulphide of copper, the whole mass averaging about 15 per cent.

A remarkably fine showing of copper ore has been developed in the winter from the 500-foot level.

The ore appears to be thoroughly impregnated with the native metal and of course, will assay high. In the cross-cut from the 500-level, the same character of ore is showing in the face and demonstrates beyond any question of doubt that it is a continuation of the same all the upper levels.

Mr. Orem states that the mine management is committed to the opinion that with the new equipment installed, it can within 30 days produce ore equal to the figures mentioned.

What disposition the New York syndicate is to make of its option to purchase the 1,000,000 shares of stock which expires the first week of January, 1908, for a return for the \$5,000,000 advanced to the company by the rate of 6 per cent, is as much a matter of mystery as it was six months ago. At the same time, those who are members of the syndicate are evincing a desire to know more about the property. They seem willing to admit that the company's mines are monthly becoming more valuable as development progresses and depth is reached.

The option they possess represents the 1,000,000 shares they received as a guarantee for the \$5,000,000 advanced, this figure being correct and representing a loan of \$4,000,000 more than was generally supposed the company had borrowed.

BLACK JACK ARTICLES.

Those of New Corporation Have Been Filed for Record.

Special Correspondence.

Prove, Sept. 12.—Articles of incorporation of the Black Jack Consolidated Mining company, with Provo as principal place of business, were filed with the recorder of deeds of Lincoln, Neb., on Aug. 19, 1907, and resolutions adopted at a special meeting of the stockholders of this corporation, duly called and held at Lincoln, Neb., on Aug. 19, 1907, and resolutions adopted at a special meeting of the directors of this organization, duly called and held at the office of the company, at Salt Lake City, Aug. 21, 1907, in which all the capital of the new company is \$100,000.

The company is shipping ore steadily from the Ludlow mine and the way things are showing up the chances are that the tonnage coming from that source will soon be increased.

OHIO COPPER

Stock of Old Company Should be Exchanged Without Delay.

The holders of certificates of stock in the Nebraska corporation of the Ohio Copper company should look no time in sending their shares on east to be exchanged for certificates of the new Maha corporation which is now in possession of the assets of the old company.

The Nebraska company was organized with a capital stock of 1,000,000 shares of the par value of \$1 each.

The new company has the same number of shares of the par value of \$10 a share.

It is recommended that the stockholders of said Ohio Copper company be exchanged for shares of the new Maha corporation.
