THE EVENING NEWS.

PUBLISHED DAILY, SUNDAYS EXCEPTED, AT HALF-PAST THREE O'CLOCK.

Tuesday, - - Sept. 30, 1873.

DAVID O. CALDER, EDITOR AND PUBLISHER.

NEWS OF THE DAY.

Financial improvement reported in New York, but many brokers anxious and more failures expected.

In Chicago great improvement, nearly all the banks resuming business.

A fatal railroad collision near Pittsburg.

A Lowell bank has suspended because of a dishonest cashier.

The large wool firm of Bullock & Sons, Philadelphia, has suspended.

The New York Stock Exchange re-opened to-day.

The financial excitement is increasing in Washington.

The Pittsburg postmaster has defalcated $30,000.

The public debt increases this month.

A New York factory hand was caught in a revolving wheel and mashed to a pulp.

The New York *Tribune* wants an immediate resumption of specie payment, and an extra session of Congress to legislate for it.

Gen. Converse, paying teller of the Working Men's Association, New Orleans, is charged with embezzling $11,000.

More trouble is expected from the Kickapoo Indians.

Indian raids are reported from Texas and Wyoming.

The panic is causing suffering among the working people at Naton, N. J.

Financial matters are healthy in San Francisco.

McCrea, the San Rafael lawyer, still missing, and is believed to be murdered.

Third Annual Horticultural Exhibition opens to-day in San Francisco.

A prisoner at Fort Yuma, attempting to escape, was shot dead by the guard.

Andrew Lusk was elected Lord Mayor of London yesterday.

The rate of discount is five per cent in London.

Large amounts of specie are leaving England for the United States

The surrender of Carthagena is expected.

The consecration of the Count de Chambord as Henry V. of France is talked of.

AGRICULTURE AND THE FAIR.

AGRICULTURE is acknowledged to be the most important of all industries. It is the basis of all safe and certain material prosperity. The productions of agriculture are necessities, while the productions of all other industries are conveniences, comforts, luxuries. The products of agriculture people must have or must cease to exist. The products of other industries people can live without, though they would be very averse to such a primitive condition of existence. The highest life consists in a judicious blending of all useful industries, whether that usefulness be immediate and direct, or remote and indirect. Hence, in the establishment and arrangement of the annual Fair, agriculture holds the first place, and is properly supplemented by other arts, and by manufactures and mining matters. In the earlier history of the Territory, agriculture was the almost sole employment of the people, and necessarily so, or they could not have sustained themselves. As long as they desire to be self-sustaining, and to have the prosperity of the Territory on a safe and steady basis, they will continue to give agriculture a large and prominent place in the industries of the Territory, bestow upon it a liberal amount of capital, thought, enterprise and energy, and make available the researches of chemistry and the inventions of mechanical ingenuity, so far as they can be profitably applied.

The capabilities of the soil, and of the varying kinds of soil, are but imperfectly understood, and the improvements which enlightened industry can make in the varied productions of the soil are not much better known. We hear of and see extraordinary crops of grass, hay, grain, roots, and fruits, and we hear of and see extraordinary specimens of the various kinds of domestic animals—horses, mules, cattle, sheep, swine, etc. But what is the proportion of such crops and such animals to the whole? Not enough to very greatly influence the average. Why are they not more common? Because the same means are not employed to produce them more commonly. There are certain causes which produce these admirable effects, and it is the business and to the advantage of the farmer to search diligently after these causes, that the superior effects may follow more commonly than they do. What man has done, man may do, is true in a very large degree. If one man raises a hundred bushels of wheat or corn to the acre, as a rule another man can do the same, with the same knowledge, industry and tact. And so of other crops—barley, oats, hay, potatoes, beets, cabbage, onions, fruits of various kinds, etc.

While this country has made great progress in mechanics and various other manufactures, the usual progress in agricultural matters has been in a backward direction. A rich and virgin soil has been found by the successive families or companies of the westward advancing population, but by the almost universal skinning process that soil has been rapidly robbed of its fertility and the crops have as surely diminished year by year. Few are the farms throughout the whole of the United States on which the soil is as productive now as when first taken up and cultivated, and fewer still on which the soil has increased in productiveness. In many cases the crops have woefully decreased. This should not be. It is the proper duty of man to multiply, and replenish the earth, not rob it and leave it comparatively sterile.

Ninety years ago, in New York State, farmers were accustomed to reap thirty or forty bushels of wheat to the acre, where the production now does not average more than a third of that amount. The average for the whole State now is twelve bushels to the acre, and the average for the United States is twelve and a half bushels to the acre. This is by no means sufficient.

On the other hand let us produce instances of different kinds of cultivation. During the last three quarters of a century the average crop production in England has increased fifty per cent., and the average wheat crop to the acre is now thirty bushels. During the same time Scotland has increased her average crop production sixty per cent., and the average production of wheat is now twenty-eight bushels per acre. In England, in a series of carefully conducted experiments, one crop of 108, and another crop of 162, bushels of wheat to the acre were raised.

This shows what has been done by intelligent farmers. But much more than the best recorded average is possible to skill, capital and industrial energy. The annual average money value of English crops is £3 10s. per acre, but the value of the crops grown by Mr. Mechi, on his Tiptree Farm, originally but indifferent and unproductive soil, is £11 15s. per acre.

In the State of New York, when the annual average of the wheat crop was twelve bushels an acre, William Hotchkiss, of Niagara county, on six acres, raised 851 bushels, or 63½ to the acre, and the same season Thomas Powell, of the same county, on seven acres, raised 489 bushels, or nearly 70 to the acre.

In 1870 the average of the corn crop in the United States was 28 bushels to the acre; the highest average for the State was 39.6 bushels in Vermont. In 1860 a crop of 293 bushels, weighed early in October, obtained the premium at the State Fair in Indiana; a crop of 132½ bushels, raised by Wm. Rabb, obtaining the second premium. In 1824 a crop of 118 bushels was raised by C. Van Horn, of Romulus, Seneca county, N. Y. In 1869, D. H. Bronson, of Guthrieville, Pa., raised a crop of 127 bushels to the acre. In South Carolina, it is said, 200 bushels to the acre have been raised.

These figures are from an address by Hon. J. Stanton Gould, of Hudson, N. Y., before the Connecticut Board of Agriculture at New Haven, May 29, 1872, and they serve to show the possibilities within the reach of careful and intelligent farmers. Agricultural fairs show what is being done, and they thus incite cultivators to renewed efforts in the direction of improved cultivation and superior crops.

MUSICAL JUBILEE AT LOGAN.

WHEN in Logan, Cache Co., in the latter part of June last, the president of the Salt Lake Sabbath School Union, Hon. Geo. Q. Cannon, while addressing the children, suggested to the superintendents and teachers of Sabbath schools the propriety of getting up a musical jubilee, to be participated in by the scholars of

ALL THE SUNDAY SCHOOLS

in the county. With the promptitude and energy characteristic of the citizens of Cache, the suggestion was carried out, and its fruits were seen on Sunday last in the Logan City Bowery, where was held perhaps the most pleasing and delightful children's musical festival that ever took place in this Territory.

The morning was cool, but notwithstanding this, teams laden with

JUVENILE CHORISTERS

and older folks were to be seen at an early hour, coming from every direction into Logan City, and when the time for the commencement of the festival had arrived not less than

FIFTEEN HUNDRED CHILDREN

were assembled to participate in, and about twenty-five hundred adults to listen to, the exercises. On the stand were the authorities of Logan, Hon. Geo. Q. Cannon, and nearly every bishop in the county.

THE PROGRAMME.

The concert opened with that well-known and favorite song—"In Our Lovely Deseret," and, besides this, the programme included "Oh, the Sabbath Morning," "Oh, Zion for ever, "Oh, we are Volunteers," "Love at Home," "Give us Room," "Ringing, Sweetly Ringing," "The Daisy," "Never from Thee will we Stray," "Hard Times" (sung as a quartett), and "Ring the Merry Bells."

The exercises, throughout, were of the most delightful character,

THE SINGING OF THE CHILDREN

surprising everybody. They kept time with a precision that would have done credit to well trained adult amateurs, while their unison was all but faultless; and the volume of harmony from

FIFTEEN HUNDRED VOICES

was beautiful beyond the power of words to express. Many of the pieces were encored, and to both singers and listeners the festival was an affair of unalloyed pleasure and enjoyment.

Between the songs short

ADDRESSES WERE DELIVERED

by Bp. L. W. Hatch, Presidents Geo. Q. Cannon, and B. Young, Jr., Elder Parley P. Pratt, Bps. Wm. Hyde and Samuel Roskelly, and Elder Moses Thatcher.

The musical conductor on the occasion was

PROFESSOR WM. KNOWLES,

of Logan, to whom great praise is due for the proficiency which the children attained under his training and tuition. Elder Moses Thatcher, Superintendent of the County Sunday schools, took a lively interest in making the festival successful, his efforts being warmly seconded by the various branch school superintendents and to all concerned—Children, teachers, superintendents and musical tutors, the highest praise is due.

The festival was in every sense of the word a success, and it will be long remembered by all who had the privilege of being present on Sunday. Cache County has set an example which it is to be hoped, many other counties will follow.

BY TELEGRAPH.

Last Night's Dispatches.

EASTERN.

The Kickapoos.

ST. LOUIS, 29.—Col. Mackenzie, who raided on the Kickapoo Indians in Mexico, has arrived from Ft. Clark. He states that only a part of the Kickapoos have left their old reservation in Kansas, the other part of the band has gone still further into Mexico. It is expected they will return and cause more trouble on the border.

Clearing House Certificates.

LOUISVILLE, Ky.—The financial condition is better. A clearing house was established by the banks to-day, all the banks but four are connected with it, they are the old ones. They continue to transact their business as usual, having no fears of any trouble. They are the First National, German, Kentucky, and the Bank of Kentucky.

Suspension.

ALBANY, N.Y., 29.—The banks are working under the New York plan.

Ford & Fuller, brokers, announce their suspension until further notice.

In Consultation—Indian Massacres and Raid.

The president and secretary Richardson were in consultation to-day on financial matters. There were drawn from the Freedman's bank during ten days, $375,000, and from other banks in this city about $80,000.

Col. Wood, of the 11th Infantry, commanding Fort Richardson, Texas, reports from the army headquarters, Sept. 14, that twenty-seven Indians attacked three citizens, at Little Salt Rock, on the 7th inst., and killed and mutilated two. Capt. Little was sent in pursuit, with orders to spare neither men nor horses in his efforts to overtake and punish the Indians. Captain Little found the trail at daybreak on the 14th, and started at once in pursuit. Since then nothing has been heard from him.

The war department has information that on the 17th inst., a party left their camp on Powder river, Wyoming, for the purpose of depredating in Wind river Valley, being the same band that killed two women near old camp Brown.

Distress among Working People.

NATON, N.J., 29.—The condition of financial affairs here causes great distress among the working people. A number of firms will pay off their hands, as they can get but little money from the banks; all the banks, however, are sound.

WESTERN.

Filed for Probate—Horticultural Exhibition—Finances Sound—Held to Answer—Still Missing.

SAN FRANCISCO.—The will of Edward Kennedy was filed for probate this afternoon. The testator bequeathes one half of his estate to his wife Amelia, the remaining half he bequeathes to T. B. Hopkins and L. L. Blood, who are named as executors in trust for the use and benefit of his three children, each to receive his or her portion upon attaining the age of twenty-one years.

The third annual horticultural exhibition will open to-morrow night, in Horticultural Hall. The list of entries is large, one exhibitor alone from Sonoma has made an entry of five hundred plates of fruit, and, in addition, he will exhibit branches of all the rarer fruits. Professor E. S. Carr, of the University of California, will deliver the opening address. The fair will last five days.

To-day was the semi-monthly collection day, and merchants report money easy, and say that collections and disbursements have been made with promptitude, and with less postponements than often occur. This shows that our commercial system is sound, and that the panic in eastern cities has not affected California. Bankers are drawing coin drafts on New York to-day at ½ @ 1 per cent, and telegraph transfers at 2 per cent.

Joseph Ennis, who was lately arrested for stealing property valued at six hundred dollars, on the steamship *California*, has been held to answer before the United States grand jury, on the charge of felony.

As yet no information has been received of the whereabouts of Henry McCrea, the missing lawyer of San Rafael. The story that he was seen in Santa Barbara by Mr. Rodman was incorrect. Detectives Ellis and Lees have been engaged on the case since the day of McCrea's disappearance, but have made no report of their search. The friends of McCrea believe that he was murdered on the San Rafael boat, and thrown overboard.

In the case of Julia Hartley vs. the Guardian Mutual Life Insurance Company, in which the plaintiff, some weeks ago, recovered a judgment for $3,848, the United States Circuit Court this morning granted the defendant a new trial.

Dead Body Identified.

SACRAMENTO, 29.—Lieut. Fleming and sixty soldiers came through by to-day's train, en route for Benicia, from St. Louis. They were taken to their destination by the steamer *Julia*, which was held here until the train arrived.

Sanford's Occident was sent down to San Jose this morning to be exhibited at the fair.

The body found in the brush of China Slough, yesterday, has been identified as that of Charles Sanders, who had been in the city but about one week.

Shot Dead.

SAN DIEGO, Cal., 29.—Private advices from Fort Yuma say that private Cassel of Company G, 23d Infantry, being a prisoner and attempting to escape, was shot and instantly killed, on the 24th inst., at Fort Yuma, by Corporal Hammond of the post guard. The Yuma *Sentinel* says that Cassel was drunk and resisted the sergeant of the guard. An investigation by the proper authorities will be had.

FOREIGN.

GREAT BRITAIN.

Lord Mayor Elected.

LONDON, 29.—The election for Lord Mayor of London to-day resulted in the choice of Andrew Lusk, at present alderman and member of parliament.

Shipments of Specie for America—Failures.

The rate of discount in open market, for three months' bills, is 5 per cent., which is the same as the Bank rate.

£2,000 pounds in bullion was shipped from Plymouth for N. Y. on Saturday.

The steamer *America*, which sailed for N. Y., took out £80,000. It is said that £500,000 is booked for shipment this week. £120,000 of the £338,000 drawn to-day, is for shipment to America.

The failure of three brokers, in consequence of the fall in Erie, has just been announced.

The increase in the rate of discount in the Bank of England, announced at 4.30 p.m., caused much surprise in financial circles.

SPAIN.

Bombardment and Loss of Life.

MADRID, 29.—The insurgent frigates *Numancia* and *Arapiles* have left Algeria for Carthagena. The commanders of the *Numancia* declare there was a heavy loss of life on the vessel before the bombardment of Algeria on Saturday. It is believed they (the officers of the *Numancia*) intend to make Algeria their base for future operations.

FRANCE.

Imperialist Intrigues.

Paris, 29.—The Duchess [illegible] Bonaparte left Rome to-day on a visit to Count de Chambord at Frohsdorf. Imperialist papers assert that the object of the visit is to form plans which will be carried out by the Bonapartists in France next month. Legitimist papers deny this statement.

VICTORY! VICTORY!! VICTORY!!!

THE

WILSON

Sewing MACHINE

TAKES

Five Medals

AT THE

WORLD'S FAIR at VIENNA.

Three separate dispatches from Vienna confirm beyond all doubt as to what sewing machine has won the first honors at the great Exposition. The first was a special to the New York papers on Monday, and was as follows:

VIENNA, August 18, 1873.

The Wilson shuttle sewing machine was awarded the grand prize at the Vienna Exposition for being the best sewing machine MAYBEM.

The second was the regular Associated Press report, compiled from a long special to the New York *Herald*, in which the "Wilson Sewing Machine of Cleveland, Ohio," was named as among the exhibitors which received "gold medals for merit," the highest class of premiums awarded at the Exposition.

The third was a private cable telegram received yesterday from Vienna by Mr. Wilson himself, which was as follows:

VIENNA, August 18.

You have received five medals—two for merit and three co-operative.

The meaning of this is then explained to be that the Wilson Machine has received the gold medal *as the best sewing machine*, and a second gold medal for the machine best manufactured—that is, embracing the best mechanical workmanship. Besides these, a special medal was given for excellence of workmanship on the machine, another for the best sewing on leather, done by the Wilson, and the other medal for best samples of family sewing and embroidery, done on the Wilson machine.

This sweeps the entire board. Not only has the Wilson Sewing Machine been pronounced the most capable and efficient sewing machine in the world, but its work, on both dry goods and leather, is pronounced superior to that of all other machines. This verdict at a World's Fair, where all the leading sewing machines of both continents have competed before a thoroughly competent committee for more than three months, is the most complete triumph ever won by a sewing machine.

The above is taken from the Cleveland *Leader*, of August 20.

FOR SALE $20.00 CHEAPER

Than any other First Class Machine, and can be obtained for a few dollars paid Monthly. AGENTS WANTED.
