

JUDGE WHITAKER ON POLICE BENCH

In Consequence Morning Grind
Goes Through in a
Hurry.

WOMEN CONFESS VAGRANCY.

Batch of Continued Cases Wiped Off
The Docket—Trespass—
Given "Floater."

Judge J. J. Whitaker occupied the bench in the city police court this morning in the absence of Judge Bowman, who left yesterday for a week's vacation at Brighton, and the docket went through in a hurry. No time was wasted in learning the pedigree and past history of four drunks, what they have done or what they intend doing, or if they have families, with the result that the one question as to whether they had been arrested before for drunkenness, answered in the negative, sufficed for the order for their dismissal.

With the vagrants it was the same. Seven of them pleaded guilty and as quickly accepted the opportunity to leave the city as it was given.

CONFESS VAGRANCY.

Marguerite Lannigis and Pauline Noble, with their modish gowns and stylish appearance belied their admission of being vagrants. Marguerite, however, had had a private conversation in the chief's office preliminary to her arraignment in court and she seemed to know what was wanted of her. Pauline, too, seemed to understand the lesson under the chapter headed "When you don't look good to the police," and she was a vagrant, also. The police do not want to be gentlemenly, however, and the two young misses may remain in Salt Lake until Monday morning.

CASES DISMISSED.

The feature of the docket was the hurried wiping out of a batch of continued cases, some for vagrancy, others for fighting and disturbing the peace. Prosecutor Rogers got into the mood and asked that a number of the continued cases be dismissed.

Charles Johnson, George Larson and W. E. Herschberger all admitted that they had trespassed on the property of the Ogden & Salt Lake railroad, but as proof that they would not do it again agreed to leave the city before tomorrow morning.

CHARGES DESERTION.

James Grantham seeks a divorce from Mrs. Cora E. Grantham on the

ground of desertion in a complaint filed today in the Third district court. They were married at American Fork on Jan. 21, 1901, and the complaint alleges that Mrs. Grantham deserted him on Feb. 1, 1907. They have two children of whom Grantham asks the custody.

DISTRICT COURT NOTES.

The West Mountain Placer Mining company has filed suit in the district court against Thomas J. Connery, administrator of the estate of Sarah Ann Connery, the Ringham Gold Placer company, the Utah Copper company, the Denver & Rio Grande Railroad company, and Nicholas and Margaret Treweek to quiet title to Schovelles & Co.'s placer claim United States lot seven in the West Mountain mining district.

Judge C. W. Morse of the district court today gave judgment in favor of Alice Buebe, trustee of the bankrupt estate of Harry W. Earl against T. J. Davis. Earl was declared a bankrupt with no assets on Nov. 2, 1907. It was shown that to give certain creditors the preference he had transferred to Davis on Sept. 13, 1907, the sum of \$173.24. The court found that Davis had paid out to creditors in good faith all of this sum but \$57.94 for which sum judgment was given Mrs. Buebe with interest amounting to \$86.50.

SINGERS ATTENTION!

Members of Ward Chorus Wanted at
Tabernacle During Seattle Trip.

Prof. Evan Stephens today issued the following call: Two hundred and over of the tabernacle choir members will be away on the northwest tour both next Sunday and the following Sunday. It would be a matter of pleasure and pride to us and the Church if their places will be entirely filled up by the tabernacle choir and ward choir members of the city (as it was when we went to the Chicago world's fair). To this end I especially invite all who are or ever have been choir members to rally to the choir seats in the tabernacle for these two Sundays. Prof. Evan Arthur will take charge, and Assistant Organist Tracy Y. Cannon will preside at the organ.

Selections well known to singers generally will be used.

EVAN STEPHENS.

LOOKING FOR FORGER.

Sheriff James A. Bennett of Boise, Idaho, is in Salt Lake today and assisted by the local police is looking for a forger wanted in Idaho. Sheriff Bennett, who has been in Ogden the past few days as a witness in a criminal case, learned that the man wanted in Idaho for forgery was in Salt Lake as late as last Tuesday.

MAY BUILD NEW BRIDGE.

County Commissioners John C. Mackay, Walter J. Burton and Chairman J. E. Clinton, with city officials, went down to Twelfth South street this morning to investigate the bridge which is reported full of holes and unsafe. The bridge is owned jointly by the city and county, and a proposition will probably be made to build a new structure. This afternoon the commissioners went to Emigration canyon with Road Commissioner Willard Snow to look into the extent of the damage as a result of cloudbursts.

BERTHA BEERS' TALE OF WOE.

She Asks the Police to Help Her in Her Sad Plight.

Miss Bertha Beers has drunk of the cup filled to overflowing with the bitter with more than a dash of misplaced confidence. She might get over the draft, however, if in the dregs of the cup she could only see the sparkle of a white stone, worth something like \$50. Miss Beers, in her blushing confession, admitted that she had thought kindly of one Will Lane. In fact she thought so much of him that when he had admired her diamond ring, just to please him she permitted him to wear it over night.

According to all accounts Will forgot his protestations of love and growing weary of the burden of the ring, left with a pawnbroker, exchanging it for greenback in some localities. A warrant was issued for Will last night, but Will so far as can be learned has found the climate of Nevada much more to his liking. He has forgotten the girl, and is probably trying hard to forget the ring.

TO INCREASE CAPITAL.

The Jordan State bank filed with the county clerk today minutes of a meeting held July 28 last at Riverton at which it was decided to increase the bank's capital to \$10,000 to \$15,000 in shares of \$10 each.

AMENDS ITS ARTICLES.

The Indian Creek Cattle company, a Grand county corporation, filed amendment to its articles of incorporation with the secretary of state this morning increasing the amount of its capital stock from \$100,000 to \$200,000 in shares of the par value of \$100 each.

BILL COMING UP AGAIN.

The city board of works will meet this evening to consider a number of estimates of contractors and to discuss the now celebrated bill of P. J. Moran for repairing the wood stove outlet pipe of the intersecting sewer. This bill, which is over \$20,000, has been handed back and forth between council and board for two months, neither caring to accept the responsibility of vouching for it.

EAST SIDE AGAIN FLOODED.

After the damage by washouts had been nearly cleared away on the east side streets yesterday, another cloud burst on the northeast bench covered them with mud so that they are in a worse condition than before. Joe Raleigh, who is acting supervisor of streets in the absence of his brother Jake, rushed a gang of ten teams and 30 men to Seventh and Tenth East and South Temple street to clear away the debris this morning. Lawns, streets and sidewalks in many places are covered with mud several inches deep.

LAMOREAUX TUNES PIANOS.

1360 So. 5th East. Ind. 3231.

WEATHER IS WARM

But Humidity Is Less Consequently Heat Is Not Offensive.

The weather continues warm, but with less humidity, so that yesterday's heat was not so severely felt. The local weather office records "a trace" of rain for yesterday, when nearly an inch fell not two miles away. An area of low barometric pressure prevails over the north Atlantic coast states this morning, and another "low" covers the plateau region, the center of depression being over the Province of Alberta. This disturbance has caused only light, local showers in Utah, Colorado, New Mexico, Kansas and Nebraska, fair weather having been general over the remainder of the country, except in the lower lake region and north Atlantic states, where showers and thunderstorms are in some localities.

The indications are for fair skies on the morrow.

NOTICE TO EXCURSIONISTS.

Tickets Must Be Secured Not Later Than 11 a. m. Saturday.

Secy. George C. Smith of the tabernacle choir issued the following notice to excursionists this morning: "All desiring to go to Seattle with the tabernacle choir must secure tickets from George C. Smith at the Presiding Bishop's office, not later than 11 a. m. Saturday. The office will be open until 6:30 this evening. It is located in room 25, Brigham Young Memorial building. Trains will leave the O. S. L. station Saturday, Aug. 21, at 8 p. m. sharp."

SPECIAL COMMITTEE NAMED.

Governor William Spry has appointed as members of the special committee to assist in promoting the interests of the state fair this fall in their respective districts: Mrs. E. C. Jensen, Mount Pleasant; Mrs. Teenie Brown, Mrs. Kate Snow, Mant; Mrs. Thomas Doe, Ogden; W. O. Knudson, Brigham City; Moroni Mortensen, Bear River City; James M. Bolitho, Richfield; Mrs. M. J. Loving, Monroe; Mrs. H. C. Hansen, Richfield; Mrs. C. E. West, Salina.

REQUISITION HONORED.

Governor William Spry this morning granted extradition papers on the request of the governor of Montana for John Patten now under arrest in Salt Lake. Patten is wanted in Butte for strong arm work by which he is said to have taken from Marcus Horak \$510 on Aug. 7 last, near the postoffice in Butte. William Newton appeared before the governor for Patten and opposed the extradition. Under Sheriff Mike Murray of Silver Bow county will take the prisoner back to Butte this evening.

ENGINEERS' SOCIETY.

Engineers Ashton, Kelsey, McCaffrey, Moore and Sidney Bamberger, constituting the program committee of the Utah Society of Engineers, meet tomorrow afternoon, to arrange for topics programs for the coming season. They will cover mining, electrical, civil, hydraulic, sanitary and other branches of the engineering profession, each topic to be presented by the ablest talent obtainable. The Utah society is becoming one of the most valuable organizations of the kind in the west.

WAS HOT IN KANSAS.

Short Line officials returning from the east report last Sunday as the hottest day seen in Kansas and Nebraska in 20 years. At Omaha it was 93 in shade and high in humidity so that 10 people died in that city on that day from the effects of the heat. Even on the great bridge over the Missouri there was no air stirring, and had it not been for electric fans in Mr. Hancock's car, the Short Line officials occupying it would have fared badly. The western sections of Nebraska and Kansas were found short on rain and long on aridity, but the corn is so well advanced that it will require but little more rain for its maturity.

REAL ESTATE TRANSFERS.

R. T. Patty et al to Albert H. Kelson, part of lot 1, block 2, Enrich's Sub. 10
R. W. Samsen et al to Hubert W. Inv. Co., all of lots 15 and 17, block 4, Oakwood Add. 5

PANGUITCH HAS DISASTROUS FLOOD

(Special Correspondence.)
PANGUITCH, Aug. 17.—It rained all day yesterday. A heavy cloud hung over Little Creek Peak, and at 6 o'clock p. m. Mrs. Crosby, who lives at Three Mile Creek, telephoned to Pangutch that they were about to be swept away by a flood that had just reached them. In a few moments horses and men in wagons rushed to the Crosby farm. They met the flood coming down the slate road at the Gebbs' farm, nearly a mile from Three Mile Creek. Continuing through the flood they met Mrs. Crosby's where they found the house surrounded by water and the men folks and some of the women wading around in the water trying to save the turkeys and chickens. The cellar was filled with water. No such flood has been known before to come down that creek. It spread for about a mile each way. Knocking down fields of crops and covering up patches of potatoes with mud.

The damage can hardly be estimated at this writing. The rains have been so bad this season that a good deal of hay has been spoiled. No mail from the north yesterday, the train not coming at Marysville.

The sale of the state land under the Hatch reservoir project, will commence Oct. 1 next, at the courthouse.

HAS FIVE CHICKENPOX CASES BUT NO SMALLPOX

(Special Correspondence.)
PAYSON, Utah, Aug. 19.—A wrong impression has gone out relative to the health of the community, which has done considerable harm to the city. There are a number of chickenpox cases up and in all, and an unsettled question with the local medical men as to the certainty of one or two cases being smallpox, so that the local health officer has not yet placed anyone under quarantine for smallpox. Dr. Beatty, the state health officer, was here Tuesday night last and examined a few cases of eruptive diseases.

WIMMER-HUIH NUPTIALS.
PAYSON, Aug. 19.—Miss Clara Wimmer and Thomas Huish, two estimable

young people of this city, were married in the Salt Lake temple Wednesday last, Aug. 18.

PAYSON BRIEFS.

The Central school building is being

remodeled to accommodate the high school, about \$2,500 is being expended and when completed it will be one of the best high school buildings in the county.

The Payson Second ward will hold a

reunion Friday, Aug. 20, in honor of the retiring bishopric.

Threshing is well under way and the grain crop is reported good.

There are embroidered linen effects, laces, silk trimmed, tabends, knotted effects—white and dainty colorings—all the pretty ideas you could imagine. It's the best neckwear offer Salt Lake ever saw at 29c

The Agricultural College of Utah

The New Education for Men and Women

THE Agricultural College of Utah constitutes part of the public school system of the state. It comprises five different schools, the school of agriculture, the school of domestic science and arts, the school of commerce, the school of mechanic arts, and the school of general science; also the agricultural experiment station, which, while not providing directly for instructional work, is one of the most important departments of the institution, which carries the work of the college to the very doors of the people.

THE SCHOOL OF AGRICULTURE.

Agriculture has ceased to be a vocation which tolerates the inefficient man. Agriculture has become a profession most emphatically. The farmer today if he succeeds must know the special thing he is to do as well as any man. The farm has become the laboratory of the man with intelligence, industry and high purpose. The farm is taking back the greatest men of the nation.

The western states are developing thousands of happy, prosperous farmers. They are men who farm scientifically, they are specialists. They raise pure bred sheep, hogs or cattle or apples or peaches, or garden truck or what not. Whatever they do they do it on a business basis. The old unscientific or slovenly methods of the last century are gone for good. The Agricultural college trains men for success on the farm. The courses of instruction in agriculture include: Soils, farm crops, arid farming, farm management, seed judging; judging of market types of horses, cattle, sheep and swine, breed types, animal nutrition, principles of breeding and feeding, dairying, poultry work, insect pests; fruit growing, gardening, plant breeding; irrigation and drainage; veterinary science; plane surveying, farm mechanics, rural engineering, and road construction. These courses, with a liberal training in general science and literature, lead to a degree. Short, more practical courses are also given.

The college has a large number of graduates engaged in agricultural research, in state and national service. The government pays from \$1,200 to \$5,000 and more for work of this kind. The college could place many times the number of men it is now able to recommend.

THE NEW COLLEGE FOR WOMEN.

The state is building at Logan the greatest college for women in the west. A new epoch in the educational career of the state will be inaugurated when the Agricultural college opens its doors next fall. Heretofore there has existed no adequate facilities for the thorough

THE UNDEVELOPED WEST NEEDS MACHINISTS.

training of young women for home life. Next year at the college an entire building will be devoted to woman's work. A most modern equipment will be installed, including private lockers and baths, and automatic electric elevator, and all the modern apparatus for work in cooking, laundering, home construction, home art, sanitation, nursing, sewing, millinery, and dressmaking. A new director of the school of domestic science and arts has been employed for next year. The lady comes most highly recommended from three of America's greatest universities, where she has studied and taught with marked success. She will be assisted by eight members of the faculty.

Besides this most important result that the college is achieving—the training of the future mothers of the state to a broader and more sympathetic conception of their great work—the college aims to furnish the schools of the future with teachers in the domestic science and arts. It already has scores of workers in this field and yet has not been able to supply the

SEWING AND DRESSMAKING.

Science Has Taken the Drudgery from Home Life.

ally, is the greatest of attainments, the course of study will be arranged especially to develop a spirit of intelligence combined with high morality.

THE SCHOOL OF COMMERCE.

The object of the school of commerce is to train young men and women in typewriting, stenography and accounting, which includes bookkeeping, banking, expert accounting and auditing, and commercial arithmetic. In the college courses through training is given in economics, political science and other subjects that prepare for business leadership. The west is one great storehouse of opportunities for the man who is trained. The college aims to develop men who will realize the greatest results from these advantages. The future superintendents, and business managers of great enterprises in the west must be men who have received just such a training as the college gives.

THE SCHOOL OF MECHANIC ARTS

The college shops are the best equipped, for instructional purposes, in the west. Instruction is given in wood, iron and steel work. The courses cover mechanical drawing, machine building, cabinet making, carriage building, machine work, foundry work, sloyd and woodcarving. Elementary and advanced work is given in all these trades. The college is furnishing the state with machinists, carpenters and general contractors and builders. Modern life demands that we know how to do something that needs to be done. The wage of the skilled workman is usually \$5 or more per day; the unskilled workman gets \$2 or less. Of the hundreds of men who begin work in the college shops, few comparatively speaking, remain to finish the course. The industries of the west need these men; they are offered lucrative positions even before they are thoroughly prepared.

THE SCHOOL OF GENERAL SCIENCE.

In this department of the college training is given in chemistry, physics, zoology, botany, mathematics, English languages, history and economics. Large and well equipped laboratories for work in each of these fields are provided for the college to offer work excellent by none. The library is as large as any in the state. This school supplies broad and liberal culture, and excellent preparation for men who intend to study medicine.

THE FACULTY.

The faculty of the college is a well trained one. Represented in its curriculum are graduates of the greatest universities of America and Europe. It is a young and loyal group of workers who are building of the young men and women of the state a citizenship of high efficiency. The attention of parents and young people is invited to the Agricultural College of Utah; to its modern courses of study; its modern and complete equipment; its well trained faculty; its location in an ideal college town; its almost wonderful record of its graduates; and to the purpose of the college, which permeates all its work, namely, to prepare men and women for useful lives. The Agricultural College of Utah is rapidly becoming one of the greatest institutions of learning in the west.
