MINING, BUSINESS AND STOCKS

UTAH COPPER LETS CONTRACT.

An Order Placed With Well Known San Francisco Firm for Eighty Vanners.

GROUND SOON TO BE BROKEN.

For Second Section of New Concentrator Near Garfield—To Handle 6,000 Tons Daily.

The offices of the Utah Copper company in the McCornick bank building has been deluged with representatives of the various machinery houses during the past few days, who have been seeking the management for contracts to supply the equipment for the new concentrating mill now in course of construction out near the Garfield smelters.

For the first time in the history of the copper company, the management yesterday awarded a contract for machinery to a Pacific coast firm, the order being for 80 vanners for the old plant now in operation in lower Bingham canyon; the Risdon Iron Works company being the successful bidder. The plant now contins 52 vanners, and the new battery is to be in addition to the machines now in operation. There is to be a rearrangement of some of the present equipment, which is being done upon the recommendation of General Manager Jackling and the company's engineers.

To a representative of the "News" Mr. Jackling stated today that the machinery contracts for the first section of the big plant would be awarded at once, or as soon as they can be reached.

He also stated that the decision had been reached to commence breaking ground for the second section within the next few days. The construction of this unit is to follow closely on the heels of the first one, which is expected to be ready for operation some time in December.

The contracts for the structural material for the second section will be awarded at an early date and the Minneapolis Steel & Machinery company will probably be asked to duplicate its first order, while the firms successful in the machinery competition will likely be called upon to do the same.

Something of the magnitude of the Utah Copper company's new mill can be realized from the statement made by General Manager Jackling, who declared that the complete plant would cover ground space of 600 feet square, or about 10 acres, making it the largest building of its kind in the world.

In the two sections, equipment will be provided to handle an output of 6,000 tons of ore per day from the company's Bingham mine.

ON MINING EXCHANGE.

Bulk of Business Was Transacted on Open Board.

The bulk of the business transacted on the floor of the Salt Lake Stock & Mining exchange during the forenoon calls, was done on the open board; only Daly Judge, Eagle & Blue Bell and Victoria participating during the regular call. Daly Judge acted a little firmer, while Columbus Con., and May Day softened. There was some trading done in Tonopah stocks.

The closing quotations and sales were:

VICTORY FOR WILFLEY.

Case Involving Use of Overstrom Tables Decided in Federal Court.

The case of Arthur S. Wilfley, inventor of the Wilfley concentrating table, and the Mine & Smelter Supply company, against the Daly West and Utah Copper Mining companies, was won by the plaintiffs in a decision rendered in the federal court yesterday afternoon, and a decree covering the conditions of settlement will probably be rendered this afternoon.

While the defendants have been using the Overstrom tables the validity of the Overstrom patents are not attacked. It is alleged that the defendants have changed the ripples on the Overstrom tables so that they infringe upon the Wilfley patents. The ripples on the Wilfley tables have successive terminals, while on the Overstrom tables thye have successive initials. This order, it is claimed by the plaintiffs, was changed by the defendants on the Overstrom tables they were operating.

THE ROAD TO ELY.

Cherry Creek Station to be Located at Currie's Ranch.

Relative to the building of the Nevada Northern railroad, which is to connect Ely, Nevada, with the outside world, the White Pine News quotes General Manager Requa as saying:

"The ties and rails for the road are now at Cobre, and the rolling stock has been ordered and will be in readiness when required. We have placed an order with the Standard Steel Car company for ten hopper-bottom steel ore cars of 50 tons capacity, which will be used on the ore line from the mines to the smelter, and will be able to haul 500 tons of ore to a trip. It will probably be late in the summer before this ore line is completed.

"A station is to be built at once at Currie's ranch to handle the Cherry Creek and Ely freight, and we propose building stations at any place along the road where the volume of business will justify. It will be the policy of the company to foster and encourage every enterprise in the country through which the road passes. We will be prepared to make both smelting and shipping rates to the producers of low-grade ores, thus assuring the working of a large number of properties now lying idle because of prohibitive smelting and shipping rates."

RAILROAD MAN ON MANHATTAN.

Alonzo Tripp, of the Tonopah Road, Says Camp Has Performed Some Wonders.

IN WAY OF ORE SHIPMENTS.

New District Will be Location of Big Mill Operations—Some Complex Questions.

Special Correspondence.

Manhattan, Nev., March 25.—Alonzo Tripp, general manager of the Tonopah Railroad, over which the ores of the Manhattan are freighted to the smelters in Salt Lake City, states that the production of Manhattan in its initial three months excels the production for a like period of any mining camp in Nevada.

Manhattan is fast proving to be a great gold mining camp. A claim to claim canvas over an area of five miles, reveals milling ore of a good grade on over 60 properties, and shipping ore on 20. Shafts are now down in several instances to the 150-foot level, and, the veins are broadening out as depth is obtained.

The ore is absolutely free milling and the erection of mills is receiving the attention of the big operators. Water and fuel are as cheap as in any other mining camp in the state, and experts agree that it will pay to mill $15 ore.

Development of the properties on Gold Hill and Contention Hill, which embrace the most productive territory in the district, is being eagerly watched by the engineers who are here from all parts of the country.

Among the big operators represesnted on the ground are the Venture Corporation of London, Samuel Newhouse of Salt Lake City, W. S. McCornick of Salt Lake City, Keith and Kearns of the Silver King mine of Park City, Utah, Charles M. Schwab, the Tonopah Mining company crowd, the Guggenheims, and a number of eastern operators who have heretofore given their attention almost exclusively to coppers. Nowhere is a discordant note being sounded as to the phenomenal richness of the district, and the impression seems general that Manhattan, which within three months has gained a population larger than Goldfield in two years, and has shipped more ore during that period than Bullfrog has in a year and a half, will be the scene of bigger mine operations than any other camp since Virginia City.

On Gold Hill the attention of engineers is drawn to the Stray Dog, Mayflower, Jumping Jack, Big Pine, Indian Camp, Big Four and Annie Laurie claims, where over a score of leasers are at work, the majority of whom are sacking shipping ore. The vein system on Gold Hill seems to be very complex. Two parallel veins have been traced through the Stray Dog on one side and the Jumping Jack on the other, and all the cross fissures from which the rich ore is being sacked on the Stray Dog have been Jack and into other properties. Somewhere on this Gold Hill is believed to be a great contact, and the experts say that one of the richest mines known to history will probably be opened up by spring time.

Mr. John D. Campbell, until recently general manager for John McKane and Charles M. Schwab, is directing the principal work of development of the Stray Dog, Jumping Jack and Indian Camp claims, and his advice is being sought by the owners of adjoining properties. It is probable that Mr. Campbell will have more to do toward the discovery of the great contact tan any other individual here, and he is a busy man. Under him a large force of miners is being brought together to prospect the ledges and otherwise lend aid toward the solution of this problem which the engineers have started out to solve. On Contention Hill one great milling ore body has been opened up, and mill sites in this vicinity are being eagerly sought after.

CONCENTRATES.

Postmaster John Stillwell of Alta is in the city again on a brief business trip.

Cashier John M. Hayes of the Utah Copper company is confined to his home by sickness.

On account of wire troubles there were no Nevada or Boston stock quotations reported today.

The March dividend of the Consolidated Mercur, amounting to $25,000, reached local shareholders throughout the mails this morning.

Judge Bartch, who has been inspecting mining interests in the Crescent, Nev., district, is on the other side of the washouts on the Salt Lake Route.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrate, $28,000; base bullion, $25,000; gold bars, $30,000.

H. A. McCornick and D. H. Peery, who recently acquired a controlling interest in the Stray Dog mine at Manhattan, Nev., have returned from an inspection trip.

Andrew Mayberry, superintendent of the Eureka, Nev., mines of the United States Smelting, Refining & Mining company, is in the city to confer with Managing Director Holden.

A message from Fallon, Nev., contains the information that the Fairview Telegraph & Telephone company is about to be organized and the purpose is to build a telephone line from Fallon to Fairview.

Supt. Moffatt of the Cactus mine in Beaver county is in the city today to confer with Samuel Newhouse. He reports conditions at that property as being in much better shape than at any time in its history.

Samuel Newhouse gives out the information that conditions at the Cactus mine in Beaver county are decidedly pleasing to him. While he did not desire to go into details until he has received further information, yet he has the assurance from those in charge of the property that the present week had witnessed some important developments.

Superintendent A. O. Jacobson of the Columbus Consolidated mine at Alta is down from camp for a few days. He states that a force of men is now engaged in installing the new generator at the power plant in Little Cottonwood canyon. The capacity of the plant is to be doubled. Mr. Jacobson reports good progress being made with the sinking of the winze from the 200 to the 300 below the tunnel.

GETTING OUT OF ACTIVE SERVICE.

A Friend of George H. Robinson Says Mining Man Will Take A Vacation.

TO RECUPERATE HIS HEALTH.

Appointment of H. C. Bellinger as General Manager of Britannia Mines Announced.

A close friend of George H. Robinson, the owner of one of the larger blocks of stock in the Tintic Mining & Development and kindred concerns in this state, and the Brittannia mines on Howe Sound in British Columbia, is authority for the statement that owing to the ill health, and desiring to take a well earned vacation, after years of other active service and successful achievements, Mr. Robinson is endeavoring to arrange his affairs so that he can be relieved of the responsibilities which have long rested upon his shoulders. Confirmatory of this came the announcement a few days ago to the effect that H. C. Bellinger has been prevailed upon to accept the position of general manager of the Britannia mines and the smelter at Crofton, Vancouver Island, where his headquarters will be. Charley Dull, who has served the company as purchasing agent, has also retired, having been succeeded by Samuel McMurrin.

It is said the Britannia properties, in which millions of tons of good marketable ore have been blocked out, are for sale. At least the owners would consider any reasonable proposition from any one with the cash to plank down for them. The smelter at Crofton has done a custom smelting business in addition to treating the ores of the Britannia mines. The plant is conveniently located so as to draw patronage from the mining camps of British Columbia and also from Alaska.

TO OPERATE AT ELY.

Ely Central Copper Company Formed In Philadelphia.

Dover, Del., March 27.—The Ely Central Copper company of Philadelphia, capital $12,000,000 has been incorporated here to acquire mines of copper, gold, silver and other metals and ores and to mine, mill and refine the same for market. John W. Woodside and Frank M. Wirgman of Philadelphia and B. A. Hazel of Smyrna, Del., are the incorporators.

DARMER ON MAY DAY.

Company's Manager Entertains Some Optimistic Views.

Manager J. E. Darmer of the May Day Mining company has at last broken his silence and has made a statement concerning the physical condition of that Tintic property in which he says he believes the May Day will develop some ore bodies during the present year that will entitle it to a place among the ranking mines of the district. "As a matter of fact," he states, "the property has never, since I have known anything about it, looked as well as it does at the present time; the formation never looked as favorable for the making of large and lasting ore bodies. We have some fissure veins now with a regular dip and they appear to be going right into the contact. During the present summer the contact will be opened on the 500 level. I believe some good ore bodies will be developed where the fissures and the contact come together."

TIED UP AT MOAPA.

Gold Butte President Will Have a Flood Story to Tell.

L. A. Copeland, president of the Nevada Gold Butte Mines company, who has been spending the past week making an inspection of the property of that corporation located in the new camp of the Gold Butte in the southeastern part of Lincoln county, Nevada, is hung up at Moapa on account of the washouts on the Salt Lake route, but will probably be a passenger on the first train that comes through after the track is repaired.

LOS ANGELANS HERE.

William V. Holley and J. E. Meyer Pleased With Salt Lake.

Among the list of arrivals at the Knutsford are William V. Holley and Jacob E. Meyer, president and secretary, respectively, of the Tempered Ductile Metals company of Los Angeles, owners of the Vaughn process for the tempering of the ductile metals—gold, silver and copper.

In speaking of the process today, Mr. Holley stated: "The tempering of copper has been a lost art for many hundred years, it having been utilized by the ancients in the manufacture of nearly all their tools and implements, and its re-discovery means untold fortunes to its possessors, as its use for tempering copper is unlimited. Gold and silver have both been tempered in a slight way by hammering, but it has never before been possible to produce an instrument of either gold or silver with a cutting edge.

"The inventor of the process, Mr. Z. F. Vaughn, has spent many years of his life in experimenting in order that he might solve the problem of tempering gold, silver and copper, and about three years ago his efforts met with success. He can now temper gold, silver and copper to any degree of hardness, producing instruments from those metals with a temper equal to and with an edge more endurable than steel.

"It is almost impossible for the layman to appreciate what this means to the arts and sciences, as the uses of the process cover an unlimited field, and the control of the process means dividends as great, if not greater, than have been earned by any discovery of modern times."

Messrs. Holley and Meyer express themselves as being greatly impressed with Salt Lake and its possibilities. They spent a few hours during the day watching the operation of one of the valley smelters.

There is nothing worse than an offensive breath. It comes from bad stomach and liver. Hollister's Rocky Mountain Tea cures all liver disorders and perfumes the breath. 35 cents. Tea or Tablets. Z. C. M. I. Drug Dept., 112-114 Main street.

The Original Laxative Cough Syrup is Kennedy's Laxative Honey and Tar. It expels all cold from the system by acting as a cathartic on the bowels. Kennedy's Laxative Honey and Tar is a certain, safe and harmless cure for colds, croup and whooping cough.—Sold by F. C. Schramm, druggist; where the cars stop.

STOCKS SHOWED LITTLE STRENGTH.

New York, March 27.—There was very little independent action in the early stock operations, traders generally taking their cue from the movement of Reading, which was highly irregular. Its uncertain fluctuations restricted ventures in more stable stocks and there was little novelty to the dealings in the well known railroad stocks. An early loss in Reading of a point was recovered, but it was ruling at the lowest again at 11 o'clock. Consolidated Gas rose 1% and Smelting, Colorado Fuel, Republic Steel preferred and Delaware & Hudson 1 to 1¼. Great Northern preferred dropped 2⅜ and General Electric 1⅜.

Prices ran off to below last night when reports were circulated of a disagreement in the coal conference at Indianapolis. The movement was narrow outside of a few stocks. Reading lost 2¼. Great Northern preferred 3⅜, Northwestern 2¼. The tone was hesitating, though with some recoveries at noon.

Bonds were irregular.

The selling movement became largely extended, many stocks running off a point or more. The heavy liquidation in Reading and the support in other prominent stocks induced professional selling. Reading gave way 2⅜. Amalgamated Copper and Lead 1⅜, and Canadian Pacific, Missouri Pacific, Union Pacific, St. Paul, L. & N., N. Y. Central, Wabash, U. S. Steel preferred, Smelting and Pacific Mail 1.

The increase in the Anaconda dividend carried that stock 3 over last night; Hocking Valley jumped 5½, American Ice 4⅜, Federal Mining 5 and Distillers' Securities 1. Renewed weakness in Reading checked the rally, but the reaction was arrested above the previous low point. The closing was dull and easy.

LIVESTOCK.

OMAHA.

Allcock's PLASTERS
A universal remedy for pains in the back (so frequent in the case of women). They give instantaneous relief.

For pains in the region of the Kidneys, or for a Weak Back, the Plaster should be applied as shown above. Wherever there is pain apply Allcock's Plaster.

Wherever there is a pain a Plaster should be applied.
Rheumatism, Colds, Coughs, Weak Chest, Weak Back, Lumbago, Sciatica, &C., &C.
Insist Upon Having Allcock's

For Rheumatism or Pains in Shoulders, Elbows or elsewhere, or for Sprains, Stiffness, etc., and for Aching Feet, Plasters should be cut to size and shape required and applied to part affected as shown above.

Brandreth's Pills
The Great Blood Purifier and Tonic.
For Constipation, Biliousness, Headache, Dizziness, Indigestion, etc.
Established 1782
B. Brandreth

I CURED MY RUPTURE
I Will Show You How To Cure Yours FREE.
I was helpless and bed-ridden for years from a double rupture. No truss could hold. Doctors said I would die if not operated on. I fooled them all and cured myself by a simple discovery. I will send the cure free by mail if you write for it. It cured me and has since cured thousands. It will cure you. Write to-day. Capt. W. A. Collings, Box 299 Watertown, N. Y.

Ike Woolf
Of the California Wine company is going to let us put his picture in the paper when we collect a certain bad debt for him. We've got it brewing, and it's getting hot.
We Can Collect Some For You If You Turn Them In.
Francis G. Luke, Gen'l Mgr.
