Takes Up Old Age Pensions.

New York, May 20,-A dispatch to

the Tribune from London says: Everybody has forgotten the old age pension issue which Joseph Chamber-lain brought into the political canvass after the overthrow of the Rosebery ministry six years ago, but he suddenly returned to the subject at Birmingham lately at the annual Odd Fellows' meeting and discussed it with an air of sincerity, as though it were something new which intersted him deeply. He urged that it should not be taken up as a mere bribe to electors, nor as a principle of universal application, but as a prac-tical policy for the promotion of thrift with the help of great friendly so-

cieties. His speech was not important as a his speech was not important approximately practical exposition of any principles of state socialism, but was interesting as a fresh proof that the strongest and most ambitious men of the ministry still consider, old age pensions to be a good working asset for the tory democracy.

China, is at a hotel here. He says that the six mills there, each having 40,000 spindles cannot compete, even with their cheap Chinese labor, with the American manufacturers.

The originators of the plants in China expect large profits, but by the practice of the most rigid economy they have been unable to earn more than 3 per cent on their investment.

The women in the Chinese mills, Porter said, are paid 15 cents per day. He explained that competition with American-made goods is unsuccessful because an American operative can do better work and four times more in a given time than a Chinese. Conse-quently American products are cutting out Chinese goods in Chinese markets.

Horse Trade Reviving.

New York, May 30 .- The notable rethe horse trade here vival of n other large cities is becoming a matter of much comment. The public sale stables are having an unusually large attendance, with prompt demand fo fair priced and more expensive animals. Scarcity of horses helps to account for the strong conditions of the trade. The South African war drew away from this country fully 25,000 head, but a strong reason for the diminished supply is the apathy of many farm breed-ers who fancied, with a host of other people, that the coming of electric or other motor power for vehicles would put an end to the demand for horses. This has materially reduced rearing and consequently stocks have run down in a wide area of farm districts, while

town supplies have become perceptibly worn out with use All prime, sound horses of proper age, are fully 50 per cent higher than

they were three years ago.

Col. Dietsch of Cincinnati Causes Somewhat of a Commotion.

New York, May 29.—At the conven-tion of chiefs of police here today Chief Dietsch of Cinc Mati read a long paper on police organization and discipline, the prevention of crime and the treat-ment of criminals. The paper discussed the question of the social evil and favoted localization and careful control Objection was made to the paper and after some confusion an attempt was made to shut it off by a vote. The convention decided to hear it through, however, and it was read.

Chief Dietsch in his paper referring to money paid for police protection said: "A man who profits in this way s nothing less than a common loafer He should be publicly disgraced and sent to the workhouse. A poor devil who steals to satisfy his hunger or to keep his family from the workhouse is

Lake Mohonk, N. Y., May 29.-The seventh annual Lake Mohonk conference on international arbitration was begun here today. More than 200 delegates, representing many sections of the country, were present. Albert K. Smiley, the founder of these yearly conventions, delivered an address of welcome. J. H. Stines, chief justice of the supreme court of Rhode Island, as elected chairman; Clinton Rogers Woodruff of Philadelphia and W. J. Roper of Boston were named secre-taries, and Alex. C. Wood treasurer. The chairman's introductory address was an exhaustive resume of what had bene accomplished in the cause of arbitration and an earnest plea that as nations were in favor of settling disputes without war, those present should offer suggestions of a practical character for such settlements, Dr. Edward E. Hale emphasized the brotherhood of nations and rejoiced that all the great industries favored peace. He cared less for idealism and more for practicable means.

PIG IRON PRODUCTION.

U. S. Steel Co. Will Experiment on

Pittsburg, May 29.—Preparations are being made by the United States Steel corporation for the erection of a refrigerating plant at the Lucy furnaces of the Carnegie company, which will probably figure largely in revolution-arv reductions in the cost of making pig iron. The idea is to deprive the air of a large percentage of its moist ure by precipitating and freezing the water before the blast is sent into the furnace. Blast furnace owners have found that in winter, when the air is cold, dry and crisp, they can make pig iron more cheaply than in summer, when the air is filled with moisture. The experiment will be watched with The experiment will be watched interest by all blast furnace men.
