JOSEPH E. TAYLOR,
CHARLES W. PENROSE, Presidency of Stake.

DRUG STORE TELEPHONES

Proposition to Make People Pay a Nickel for Future Privileges.

Persons who are in the habit of drop-

ping into drug stores for no other purpose than to use the 'phone will soon have to stop their little game, or else put up-at least drop into the slot-a nickle for the privilege. A dozen of the wholesale and retail dispensers of drugs and medicines met with Prest. George Y. Wallace and Superintendent Murray of the Bell Telephone company at the Kenyon last evening and talked over the lephone. President Wallace referred feelingly to the overworked drug store phone and suggested either a vacation or an increase in salary. The latter proposition took most favorably with the truggists, who, while admitting that they had dispensed with many things, said they would not say well discovery. they could not very well dispense with the 'phone. It was stated by President Wallace that one drug store in town had to call up "central" no less than 157 times in one day. The calls came principally from parties who had no connection with the store, and the talks, in the majority of instances, were those usually carried on between spooney youths and maidens, making dates, etc. Doctors and their patients had no show whatever, and if they wanted to talk over the phone they had to go else-where to find an instrument. The proposition of Prest, Wallace is to allow druggists and their employes

the privilege of using the 'phone in their own store, and to put in a nickel in the own store, and to put in a maker in the slot machine at the expense of his company for the use of callers. Should a druggist desire to put in a slot machine exclusively, he can have the privilege by paying \$54 a year to the telephone company. The meeting adjourned before taking definite action in the mat-ter, but it was pretty generally under-stood that the proposition of Mr. Wal-lace would be adopted. Messrs. F. A. bruchl and Fred J. Hill, representing the druggists, will continue to make further investigations and report at a future meeting of the drug store men.

A CHILD'S NARROW ESCAPE. Is Asleep in a Burning Bed-Rescued Just in Time.

Smoke emanating from a second story window in the home of W. W. Thompson, No. 844 cast First South street, attracted the attention of a passerby about 10 o'clock Wednesday passerby about 10 o'clock Wednesday evening, and he rushed into the house, alarmed the inmates and ran un stairs and into the room from whence the smoke was coming. He found a child four years old lying in a bed that was on fire. The little one was fast asked in the very arms of death, from which the man snatched her and took her out of danger. The fire was extinguished with no damage except the bed clothes, which were ruined. It is thought that the child went to bed playing with matches. went to bed playing with matches.

THREATENED TO SHOOT. Axle Saline Complains of Two Men

Who Assaulted Him.

This morning a man named Axie Saine swore to a complaint before Judge Timmony, charging Junius Fullmer and Yelmer Hogeson with assault and battery. The parties reside in the vestern part of town, and it is alleged y Saline that Hogeson and Fullmer are been trying to provoke a fight with him for ever a month.

This morning they met Saline and cold him ther wars going to "but it

and him they were going to "put it it over him," and proceeded at once

Last Wednesday Saline called at the police station and told Chief Hilton that Fullmer had held him up in the road with a shot gun and threatened to shoot him. A warrant was issued for the arrest of Hogeson and Fullmer.

FOREST PRESERVATION.

Leagues Being Organized to Protect Them From Fire.

Forest Protection Leagues are being organized throughout the southern part of the State, by Special Agent Sowers of the General Land office. This action is taken for the purpose of the apprehension and prosecution of those who set fire to the timber. Col. Sowers says that the people generally are very invious to do all they can in this direction preserving the government forests and

Marshal Miller is very much interested in the organization of the lengues, and discussed the proposition ery enthusiastically at Brighton yesterday. The smoldering embers of the fire that has been raging about

Brighton have been completely ex-tinguished by the rain. The fines that accrue from persons found guilty of desiroying timber are turned into the school fund.

RACES ARE POSTPONED.

The Program Announced for this Evening Will be Offered Tuesday.

Word was received from Munager Peters of the Salt Palace to the effect that owing to the present condition of the weather the bicycle races will be postponed until Tuesday when the same program as announced in last evening a "News" will be offered.

TURNS OUT 1,000 ENCINES A YEAR.

Growth of Balwin Works Shows the Progress in Railroading,

REQUIRED THIRTY YEARS

To Batld the First Thousand, While a Similar Number Has been Built Annualty Since '90,

The Baldwin locomotive works had, up to January 1, 1900, manufactured 17,000 locomotives of all sorts and descriptions. The works were established In 1831, and it took from that time till 1861, or a period of thirty years, to build the first thousand engines, while the same number of machines were turned out in the single year of 1890 and this performance has been duplicated each year alnoe that time until 17,000 engines from these works are in use in the world. To show the importance of this industry a list of countries is herewith given to which the engines have been furnished: Argentica, Australia, Al-giers, Bolivia, Brazil, Belgium, British giers, Bolivia, Brazil, Belgium; British Columbia, Eurma, Bavaria, Carada, Cuba, Costa Rica, Chili, China, Denmark, Ecuador, England, Egypt, Finland, France, Guatemala, Holland, Italy, India, Japan, Mexico, Nova, Scotia, Newfoundland, Nicaragra, New Zealand, Norway, Prince Edward Island, Porto Rica, Peru, Palestine, Russia, Santo Domingo, San Salvador, Sandwich Islands, Sweden, Spain, South Africa, London, Colombia, Uruguay, Uganda, Yucatan,

Africa, London, Colombia, Uruguay, Uganda, Yucatan.

In the annual production of a thousand locomotives this is the amount of energy and material used: "Men, 8,000 at 10 hours each per day; horse-power, 6,000; buildings, 29; acreage, 16; wheethe dynamos, 8, with a total of 1,600 horse-power, and ten for electric lighting, all with a grand total of 3,000 horse-power; electric lamps of all descriptions, 3,200; electric lamps of all descriptions, 3,200; electric lamps of all descriptions, 3,200; coal, 62,400 tons; fron, 104,000 tons; other materials, 35,500 tons.

All important parts of the engines built are accurately made to gauges and templates and are therefore interchangeable throughout any number of locomotives of one class. By this means new parts for engines may be obtained at any time, and a perfect fitting as-sured upon giving the construction number of the machine, with a description of the parts required. The works are located at Philadelphia, and any one who travels on railroads, should be take the pains to observe, may see one or more Baldwin engines working upon almost every line of railway in the United States and in many other coun-

RATE WAR PREDICTED.

Meeting at Glenwood Springs Next Week May Bring It About.

A complete break among the big transcontinental lines, followed by a fierce rate war, and the most victous passenger warrare, now seems prob-able as a result of the coming attempt to form a transcontinental association at Glenwood Springs, next week.

ing of all general passenger agents was the formation of a transcontinental as-sociation, to control all through busi-ness and keep passenger rates on the olg lines up to a paying level.

Western passenger agents were startled today by inside information from the East, telling that three of the largest and most important roads in the country had refused to enter the agreement. James T. Hill's Canadian Pacific and the Great Northern are the two most prominent in this startling movement, while word comes that the milwaukee & St. Paul has joined them in refusing to enter the association. The news is of the most significant nature as a break of this kind, when

the meeting is so near at hand, kad not been thought of. And le is con-ceded that President Hill, with his Canadian road, and the Great Northern are strong enough to prevent any effective agreement among the other transcontinental lines. The news seted as a damper on several rallroad men, who hoped to see a transcentinental association formed.

The idea had been to revive the old

association that existed some five or six years ago, and the movement has been diplomatically engineered in big railad circles for over three years. The ines therefore comes very near des-roying the plans of those who want to

fect an agreement. The trouble is said to have arisen over a quarrel between President Hill and the Western Passenger association over some concessions that Mr. Hill demand-ed. Failing to get them he thinks he cannot benefit traffic on his route by entering into any transcontinent agreement. The independence of the great railway magnate has been a di turbing factor in several suggested schemes in other years. With his through road, connecting the two oceans, and with a big line of Pacific steamers ready to absorb the increasing Aslatic trade he is apparently scapping als fingers in the face of other through The failure to form a transcontinental

agreement will not be pleasing to Colo-rado roads, since they form through ment that would insure a stable and paying rate on all through traffic. With such a road as that owned by Presi fent J. J. Hill outside of the trans continental association it is conceded that any agreement would be a farce, as the bars would always be down for the lowest rate and the keenest

Western roads are also much interest-ed in the stand that a transcontinental association would take on the matter of rates for Eastern tourists. The low rate of this summer has brought an immense volume of travel and it is feared that rates may be raised again thus decreasing the tourist travel.

Strike in Wales.

Because the general manager of the for union, not a pound of coving at Cardiff, and 20,000 c inoving at Cardiff, and 20,000 colliers are idle. The strike on this railway, if not speedily terminated, must have a disastrous effect on shipping and seriously ombarrass the admirstry at a time when steam coul is a very precious artisle. No better time could have been chosen by the labor union leaders to stop this great coal carrier. Welsh steam coal has siready towhed record prices and the admiralty only a few days ago was forced to pay exorbitant prices for 250,000 tons.

SPIKE AND RAIL.

Mr. Bancroft of the Short Line went north this morning.
