nesses. That of George L. Lane of Mansfield, O., a former employe of the Standard Oil company, was re-garded as particularly important. Ac-cording to his evidence, Lane was for about 14 months, in 1901 and 1902, employed by the Standard Oil company for the particular purpose of driving Standard's oil, because the Standard's agents threatened to start another store lose and sell every article he sold in competition. employed by the standard of company for the particular purpose of driving all of the independent oil peddlers in a dozen or more of the principal cities and towns of northern Ohlo out of

Charles A. Ricks of Cleveland, em-ployed in the Cleveland office of the Standard Oll company from 1889 to 1901, his last position being that of assistant general manager, denied upon create companion that a large amount

and towns of northern Ohlo out of business. He said he was employed by C. M. Lynns of the Cleveland office of the Standard Oll company to go to cer-tain designated places and use every means, fair or foul, to force the inde-pendents to quit. He described the methods pursued in detail. "My instructions," he said, "were to kill them, and I was told that if I could not do the job somebody else would be sent to take my place. I worked in Youngstown and surround-ing small towns. Canton, Girard, War-ren, Ravenna, Massillon, Mansfield, Elyria, Oberlin and other places. In all of the towns, with the exception of Youngstown. the independent ped-dlers were forced to abandon their bushness. assistant general manager, denied upon cros-examination that a large amount of Standard Oil literature was prepared in his office and offered to papers throughout Ohio. George L. Lewis, a lubricating oil salesman of Chicago, toid how he lost a contract with the Dayton and Troy Traction line because the Standard agents promised enough freight to more than pay for the oil. C. B. Duffy, purchasing agent of the Hocking Valley railroad, was called to testify concerning the buying of lubri-cating oils. Asked If he had not said recently that his road would lose from \$150,000 to \$200,000 a year in freightage stopping that his road would lose from \$150,000 to \$200,000 a year in freightage if he bought lubricating oils from any other company than the Standard, or from the Actaa, he replied that he might have made such a remark, but he had no positive recollection of it. Ham H. Vahey was encountered and despite everything we could do he held his trade. We gave oil away by the barrel and tank load, but it did no good. Vahey's customers threw it

No Upheaval on Isthmus.

Isham Randolph says there are ruins on the ithmus of Panama 300 years old which demonstrate that the isthmian canal has nothing to fear from earth-quakes. This recails the story toid by Chief Engineer Wallace. It is that he has seen there the ruins, 300 years' old, of a shurch with a remarkable vide has seen there the ruins, 300 years' old, of a church with a remarkably wide and flat arch. It is said to have been built by a priest, who built it several times, but that it fell down from its own engineering defects as often as he built it. He then engaged in a long course of prayer for divine assistance, after which he built it in the same manner and it stood fast. The priest always regarded it as a miracle, what-ever other beenle may think of it. Mr. always regarded it as a miracle, what-ever other people may think of it. Mr. Wallace says that it looks as if the slightest wind might topple it over, and he was convinced from looking at it that there had been no serious earth-quakes on the isthmus for hundreds of years and that the isthmian canal should be built without any regard whatever to such dangers -Chleago whatever to such dangers,-Chicago Chronicle,

MALARIA AN INSIDIOUS FOE

Malaria is an atmospheric poison which we unconsciously breathe into our lungs through the impure air arising from low, marshy places, stagnant ponds, damp cellars, sewer pipes, improperly ventilated houses, decaying vegetable matter, etc. Day after day these germs and poisons are taken into the lungs, and as the blood passes through them it becomes infected with the poison and in its circulation distributes the microbes of disease to all parts poison and in its circulation distributes the microbes of disease to all parts of the body. Malaria is a very insidious disease; it gives no warning of its coming until the circulation is filled with the poison and this foe to health has the system at its mercy. The blood becomes polluted, thin and weak and its slow, irregular circulation fails to properly nourish and strengthen the body. Then the entire system is attacked, and if the germs and poisons of Malaria are allowed to remain the strongest constitution will break down. Malaria are allowed to remain the strongest constitution will break down. No one can feel well when the system is in a malarial condition; the vitality is weak, the appetite poor, digestion deranged, the complexion grows sallow and the entire body feels the effects of the poison. Malaria must be removed from the system through the circulation and the only medicine that can accomplish this is S. S. S. It not only cleanses the blood of all unhealthy, morbid matter, but destroys the germs, cures Malaria and restores this vital

fluid to a strong, healthy condition. S. S. S. is made of roots, herbs and barks combining purifying and tonic properties which keep the PURELY VEGETABLE. Blood free of all poisons and the system in perfect condition. While destroying the germs of Malaria and building up the weak.

"We had a young girl here a year The Pain Family

> You know them; they are numerous, and make their presence felt everywhere. The names of the family are Headache, Toothache, Earache, Backache, Stomach ache, Neuralgia, etc. They are sentinels that warn you of any derangement of your system. When the brain nerves become exhausted or irritated, Headache makes you miserable; if the stomach nerves are weak, indigestion results, and you double up with pain, and if the more prominent nerves are affected, Neuralgia simply makes life unendurable. The way to stop pain is to soothe and strengthen the nerves. Dr. Miles' Anti-Pain Pills do this. The whole Pain family yield to their influence. Harmless if taken as directed.

"I find Dr. Miles' Anti-Pain Pills an excellent remedy for overcoming head-ache, neuralgia and distressing pains of all sorts. I have used them for the past seven years in this capacity with the best of results." MRS. JOE MERRILI, Peru, Ind.

Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk.

Miles Medical Co., Elkhart, Ind

"We had a young girl here a year ago with a most obstinate attack of hysteria which took a very curious form. She would never lie down in her bed, but invariably sat bolt upright with her back against the foot rail, constantly turning her head from side to side like an automaton. "I had watched her do this many times, and one day I asked her way she continued it, to which she replied that there was a string in her head which pulled it from side to side, and that until it was cut she would have no that until it was cut she would have no rest. "This remark gave me an idea, and I asked if she would allow me to ex-amine her head. She was perfectly willing, and after an inspection last-

lives may be saved.

hysteria.

willing, and after an inspection last-ing 20 minutes I gravely announced that she was quite right, and that the only cure was a slight operation in order to sever the string. "She clapped her hands with delight, like a child, and declared that it was what she had told several doctors, but that they had all laughed at her. Would I perform the operation at once? I thought it better, however, to defer doing so until the morning, after I had consulted the visiting surgeons. "Having explained the circum-I had consulted the visiting surgeons, "Having explained the circum-stances, the imaginary operation was agreed upon, and the following morn-ing the young woman was led into the surgery, placed upon the operating tuble and anesthetics were adminis-tered. Part of her luxuriant brown hair was cut off, and a portion of the back of the head two inches above the mane of the need was shaved arouth.

back of the head two inches above the nape of the neck was shaved amooth. "Then, in order that there should be something to show for the imaginary operation, the scalp was lanced until the blood ran, leaving a cut about two and a half inches in length. This was bound but not strapped, and the pa-tient was conveyed back to her bed, where she remained for 40 minutes be-fore returning to consciousness.

where she remained for 40 minutes be-fore returning to consciousness. "Meantime I had taken a piece of an ordinary E violin string about four inches long and soaked it in water un-til it resembled a raw sinew, the ob-ject of this, of course, being to show the patient the actual string taken out of her head. When she returnd to consciousness she was told how en-tirely successful the operation had been, and shown the string which had been the cause of all her trouble, after which she fell into a natural sleep and awoke perfectly restored. From that
