EDITORIAL NOTES.

All the stars and insignia of the different decorations bestowed on Napoleon III, by other sovereigns, are to be sold among the French crown jewels.

A St. Louis "scientist" has ciphered it all out and found that the world is presently 20,000,000 years old. It is Chicago gets to figuring on it that he is best that by several millions.

Nobody seems to know exactly where the Arabi Pasha or what he is doing and the troops that are to attack him appear to possess just about the same amount of information as people at this end of the telegraph line.

Some interesting objects have just been found in Neufchatel, which are considered to throw a new light on the history of the lake dwellers. Among them are a carriage wheel with iron rim, iron axles, and many human bones.

The Boston Post well says, "the man or woman who is thoroughly impressed with the idea that he or she is a fountain of wit to be played on all special occasions, is in imminent danger of becoming a nuisance."

Each and every person who is in any way concerned in firing of fireworks in a public street is responsible for the injuries inflicted upon innocent persons, so says the Supreme Court of New Jersey, in the case of Jenne vs. Sutton.

Turkey is going to have a finger in the Egyptian pie after all. According to the dispatches, the Porte will send troops to support England in the scrimmage with Arabi. It will be agreeable to the Cairo Ulema. That "if" amounts to considerable.

During the first six months of 1882 the deaths announced in the obituary columns of the Philadelphia Ledger of persons who had lived to or beyond the advanced age of eighty years, numbered 480, of whom 173 were men and 311 women.

The Council of the British Royal Geographical Society have decided on equipping an expedition to Eastern Africa for the exploration of the snow-capped mountains Kema and Killmanjaro, and the country between them and the eastern shore of the Victoria Nyanza.

The Duke of Edinburgh, second son of Queen Victoria, who is an Admiral in the British navy, has been cruising around the world for some years looking for a fight, but who has never smelled powder burned in earnest, should have been afforded an opportunity to distinguish himself at Alexandria. Instead, he is smoking cigarettes in the shade of the royal oak at Windsor Castle.

Utah's fruit crop this season is very poor, but California seems to be rejecting in plenty. The Oakland Independent says: "The Riverside cannery has been putting up 8,000 cases of fruit per day, the Colton cannery 4,000 cases, and the Los Angeles 8,000 per day. The Riverside cannery has employed 270 hands in its cannery and drying department. Never has the southern counties had a better fruit season."

A summary of the number of fires in the United States resulting in a loss of \$10,000 and upward has been prepared by the Commercial Bulletin, from which it is gathered that in the past six months there have been 885 conflagrations of that magnitude resulting in a total loss, including a reasonable estimate for the damage done by smaller fires of \$48,700,000. The list of larger fires includes 140 in January; in February, 123; March, 164; April, 141; May, 169; June, 138—an average of approximately, 43 daily. Placing the annual loss from these causes at \$100,000,000, and reckoning the yearly expense of maintaining the departments at another \$100,000,000, the Bulletin asks if there is no "easier, better, wiser, cheaper way" of reducing \$200,000,000 per annum to the common wealth than by putting some brake on the carelessness that is costing the country just that much money every year?

"EVILS AND DEBILS" OF "CONSPIRING MEN."

It is pretty well known that the "Mormon" Church discourages the use not only of alcoholic stimulants but also of tea and coffee as beverages. The authority for these teachings on this subject is derived from a revelation generally known as "The Word of Wisdom." This divine communication was not given by commandment but by counsel or advice, with certain promises conditioned on its observance; hence its title. One of the reasons advanced for abstaining from the stimulants mentioned in the Word of Wisdom is, "in consequence of evils and designs which do and will exist in the hearts of conspiring men in the last days." While the forbidden articles themselves were not designed for the use to which they are commonly put, and are therefore more or less injurious, "conspiring men" make them still more harmful to the body through adulteration. Intoxicating drinks are frequently adulterated with doctors' and poisoners' compounds, that do more

BY TELEGRAPH.

THE WESTERN UNION TELEGRAPH LINE.

AMERICAN.

WASHINGTON, 28.—The Senate today confirmed J. G. Tolman to be Surveyor General of Oregon, George A. Johnson, Collector of Customs at San Diego, Cal., and S. W. Rathburn, Postmaster at Mitchell, Dak.

New York, 28.—The highest temperature 97, lowest 75. The rain promised by the weather bureau has not arrived. The heat is oppressive and steady. Night brings no relief. Nearly 200 deaths have occurred here in the twenty-four hours, closing at noon today.

CHICAGO, 28.—John Raper, a young Englishman, for years in the employ of the Chicago Cattle Co. Jewellers, on State Street, has succeeded with about \$3,000 shortage. He was chief bookkeeper and the firm trusted him as a man of honor. His stealing began when he seemed likely to lose the sight of the other eye. It is supposed he fled to some place where his sister lives.

Forest Fires.—An East Tawas, Mich., special says: The forest fire to the northwest and south are burning fiercely. Fields, grain, farm houses, fences and orchards, together with immense tracts of cedar and pine are burning. The smoke is such that it is impossible, and no one can get out of their homes.

Forest Fires.—The fire above Oacoaca is threatening the town to-day. Kin-kardall's place is reported entirely destroyed.

A Manly Story.—The Tribune says a returned Mormon shop, with nine female converts, was seen on a street car, yesterday afternoon, making for the west-bound train. The bishop created a scene by shouting that he had converted the woman to his faith and ideas of matrimony, and he would marry all of them as soon as they got to Salt Lake City, where "people were more civilized."

Fatal Death of a Child.—A quarrel between two children named Campbell and Rourke, living on Willow Branch, in Barry County, culminated a few days ago in the former assaulting and killing the latter with a knife. Campbell was arrested and lodged in jail.

Murdered by a Minister.—Fort Worth, 28.—The Rev. Harvey Stearns, in an affray with a farmer named Jefferson, inflicted a fatal wound with a club, and has been lodged in jail.

FOREIGN.

LONDON, 28.—A report of the Standard in an edition issued today to the effect that the Arabi Pasha's reported offer has been received by the British government, as it is believed that the offer will be only to gain time.

Corruption Bill.—Gladstone informed parliament yesterday that government had abandoned the hope of passing the corrupt practices bill this session.

Alexandria, 28.—Lord Charles Belfour states that without the assistance of the American marines he would have been unable to hold the numerous duties of suppressing the fires and preventing the looting, burying the dead and clearing the streets.

Talk of Turkish Intervention.—The Egyptian minister has risen 4 feet since last evening. Reports are circulated on the stock exchange that Arabi has declared that he will not resist the Turkish troops if they operate without European auxiliaries, and that Austria and Germany have also reverted to a plan of exclusive Turkish intervention.

Another Ten Thousand.—The Commons last evening agreed in a supplementary vote for 10,000 men for the army.

Less Crops.—ALEXANDRIA.—Persons competent to judge believe that half the cotton crop of Egypt will be lost and also the greater part of the wheat crop in Lower Egypt in consequence of neglected irrigation.

Remonstration of Abouker.—The Infelix has gone to announce the Abouker forts to surrender and to bombard them if they do not surrender.

Remonstration of Abouker.—The water in the canal continues to fall at such a rate, that the city and crops in one week will be entirely dependent on the wells, cisterns and condensors.

One of the most ferocious and sanguinary ruffians implicated in the murder of a British official, was killed by a British official. Owing to the evidence against him was given by a respectable Mussulman, who evinced the greatest emotion and indignation as he testified the outrage he had witnessed. He reported that he saw the prisoner, who believed to have committed the crime, murdered, dash out the brains of a European who had already been slain by the mob.

Abouker Pasha, governor, who attempted to allow two prisoners to escape, obstructed the police, Lord Charles Belfour called the Egyptian's attention to his conduct. The Khedive at once summoned Abouker and rebuked him severely, and ordered the arrested prisoner, who he said had fled the post, to be executed.

Abouker Pasha, governor, who attempted to allow two prisoners to escape, obstructed the police, Lord Charles Belfour called the Egyptian's attention to his conduct.
