

have to carry only one thousand, and shall want to burn a great deal less. I calculate my eight thousand pounds oil will last twenty days, long enough to travel two and one half times round the earth.

The *Graphic* people say they cannot be diverted from their plans now to consider that of M. Parisel, but Mr. Donaldson says, if he succeeds in landing the cotton balloon safely, he will then surrender it to M. Parisel to make his Montgolfier experiment with it.

AMERICAN IRON IN ENGLAND.—Apropos of the statements concerning supplying England with American iron, and underselling her in her own market, the following, from the Washington correspondence (Sept. 18) of the *New York Herald*, is not inappropriate—

The Chief of the Bureau of Statistics says in reference to the alleged sale of American bar iron in Liverpool, that he has caused a careful examination of the statements of domestic exports from the United States during the thirteen months ended July 31, 1873, to be made, which resulted in the discovery that not a single pound of American bar or railroad iron had been exported from the United States to England direct during that period. If any reached England it must have been through Canada, to which five tons of bar iron and 326 tons of rails were exported during the fiscal year 1873.

CROSSED THE RUBICON.—The Prescott *Arizona Miner* man has "been and gone and done it"—he has taken to his heart and home and changed the name and somewhat the nature of "Miss Flora P. Banghart, of Chino Valley, in this county and Territory," that is, Arizona Territory. If he and she think so, it is the very best thing they could do, and we wish them joy in their new relationship. The people here are marrying people themselves, and consequently right friendly to marriage elsewhere.

LOCAL AND OTHER MATTERS.

FROM TUESDAY'S DAILY, SEPT. 30.

THE SITUATION.—As in the East, so here, the financial situation is improving steadily. There is quite a buoyant feeling on the street today, and general hopefulness prevails.

KEEN FROST.—We learn that the frost of Saturday night extended over a very large portion of the Territory. Corn and potato vines at Bountiful, Centerville and vicinity were killed, but the crops were fortunately too far advanced to receive serious injury from this cause.

AT A STANDSTILL.—Work on the Salt Lake, Sevier Valley and Pioche railroad is *in statu quo*, the progress of the enterprise being hampered by the current financial crisis. The company expect to get out of their present position of embarrassment in a few days and resume work.

SOMETHING NEW.—Mr. Barker Child, of the Eleventh Ward, informs us that his raspberry bushes are now giving forth a second crop this season. The bushes are in all the stages of bearing, from bloom to ripe fruit. This is considered very unusual.

PISCICULTURE.—Last Saturday Hon. A. P. Rockwood, Superintendent of Fisheries in Utah, received a telegram from Mr. Livingston Stone, stating that he had two million of salmon eggs and asking how many would be wanted by Mr. Rockwood. The latter telegraphed back telling Mr. Stone to send along thirty thousand.

Mr. Rockwood is laboring energetically to make pisciculture a success in Utah, and he is entirely confident that it will be, so far as the raising of fine healthy fish is concerned. As to its being a profitable pursuit financially is not yet so clear, but the matter will be thoroughly tested every way.

A POWERFUL ARGUMENT.—The accident which occurred to Mr. Robert Gardiner on Sunday is a powerful appeal for the people who reside away up on the north bench. Mr. Gardiner resides there, and is under the necessity of hauling his water in barrels by means of a horse and wagon, and, being a hard working man, is often compelled to do this on Sundays. He was thus engaged when the animal he was using became fractious and he was thrown from the wagon and run over. Mr. Gardiner was on the committee which drafted the petition which was presented to the

City Council on the water question.

None but those who live in the locality indicated can form an idea of the hardship to which the people are subject in the matter of getting a sufficient supply of water.

CHURCH ISLAND.—On Friday last Bishops C. Layton and E. F. Sheets and Brethren I. Brockbank and J. C. Walker visited Church Island, sailing from the nearest point to Kaysville. They reached the objective point after a pleasant sail of five and a half hours. They examined the large flock of sheep in care of Bishop Layton, and counted 4154 of the animals, there being quite a number besides that were scattered and therefore not counted.

The sheep were in splendid condition. A large proportion are last spring lambs, many of which reach as high as sixty pounds, without having attained their full growth. This is a new breed, being a cross between the Cotswold and the native sheep. It would be well for sheep farmers to note this fact.

The party left the Island at one o'clock on Saturday, arriving at the Kaysville shore of the Lake at five in the evening.

WIFE BEATING.—John Kremer diversified his usual career this forenoon by beating his wife. The particulars are these: Kremer, who went up town this morning, came home again during the forepart of the day, partially intoxicated, and commenced abusing his wife; his abuse was patiently borne by her till he commenced threatening their little boy, who was lying sick, and on whose account the mother had sat up a portion of the night; she took the boy's part, which so enraged Kremer that he struck her, knocking her down, and then beat her about the face and head in an outrageous manner. After satisfying his rage he went up town with the avowed intention of hiring a job wagon to come and take away the household goods, telling his wife that he would not live with her any more.

Complaint was made to the proper officer and Kremer is doubtless under arrest by this time.

PIOCHE AND BULLIONVILLE RAILROAD.—Yesterday we met with A. M. Mortimer, recently in from the Pioche and Bullionville Railroad, of which he has been roadmaster for several months. When he went there in the fore part of the summer he found the road could not be operated, owing to a large part of it being poorly constructed. Having had considerable experience in railroad building he set to work and tore up and reconstructed about seven miles of the line, and placed it in general good condition. It is a line that will pay well in time. A great fault in it is that the iron is too light. The road is twenty miles long. J. W. Nesbitt, Esq., is the superintendent of the road, vice General Page, resigned.

Providing Mr. Mortimer does not get some employment here at home in railroad building, or something in that line, which is the business to which he has been accustomed, he will return to the Pioche and Bullionville road.

A CROWD OF VILLAINS.—The fact was noted in the *News* of yesterday that the steamer of the Fire Department was taken to the fair grounds, near Jordan Bridge, yesterday, and the race track watered with it.

It happened that the penitentiary prisoners, numbering twenty-four, were at work there yesterday when the engine was taken down. One or more of the convicts damaged the hose by piercing several holes in it. Besides this the small hose through which the boiler is cleared of sediment, was cut in two places, apparently by means of a small pen knife.

Warden Rockwood has under his charge at the present time as precious a set of villains as ever were seen in any country. Some of them, however, behave themselves excellently. They certainly have no room to find fault with the treatment they receive at the hands of the warden, who sees that they are well fed and cared for.

Some of these fellows seem to be so degraded that they are lost to almost every better feeling, having apparently no control over their propensity to destroy.

AN UGLY CUSTOMER.—Yesterday afternoon there was a passenger on the Utah Southern up train from

Sandy who refused to pay his fare. The gentlemanly conductor, Mr. Eugene Callay, informed him that he must adopt one of two alternatives—pay his fare or get off the train. The fellow then commenced to be abusive when, the conductor started to put him off. At this juncture he drew a pistol, but, nothing daunted, Mr. Callay took the weapon from him and jerked him out of the regular passenger car into the smoking car, there being no ladies in the latter. He was a cowardly fellow after all, for he soon commenced to apologize for his bad conduct, and paid his fare.

Such occurrences are not infrequent on the Utah Southern line, there being desperadoes traveling that way occasionally who think they can intimidate people by their cowardly braggadocio. Mr. Callay, the conductor, is well known for his uniformly courteous deportment, but when he has an ugly customer like the one of yesterday to deal with, he never fails to bring him to terms. Such fellows soon discover they have mistaken their man when they commence on him.

FROM WEDNESDAY'S DAILY, OCT. 1.

LIFE MEMBERS OF THE AGRICULTURAL SOCIETY will be furnished tickets of admission for themselves and families on application at the gate of the 13th Ward Assembly Rooms. W. WOODRUFF, Prest.

THAT LOGAN JUBILEE.—In our notice of the Logan musical jubilee, in yesterday's *News*, we forgot to state that the several songs were accompanied on the organ, in excellent style, by Mr. Joseph H. Goddard.

IN A NEW ROLE.—Sol. Gee, of Bingham tragedy fame, appeared in a new role this morning. He was brought into the police court and fined \$10 for being intoxicated and disturbing the peace.

BIG BUNCH.—This morning we saw a bunch of grapes, designed for exhibition in the Fair, which weighed twenty-four ounces. They were of the Californian or mission kind, and raised by Mr. Thomas McIntyre, 20th Ward.

FOUR EVENTS.—Zion's Savings Bank and Trust Company commenced business this morning, the Theatre opens this evening, the Fair opens to-morrow noon, and Conference commences next Monday morning.

EFFECTS OF BRUTALITY.—Mrs. Kremer, wife of John Kremer, alias Dutch John, was so ill from the effects of the beating he gave her yesterday that she was unable to appear against him in court this morning, and the trial was therefore set for this afternoon.

THE IDAHO.—The Utah Northern engine "Idaho," which for two months has been laid up in the engine house at Logan for repairs, made its trial trip this morning, and worked like a charm. It rendered material assistance to the heavily loaded train which came in from Logan while it was coming up the heavy grades.—*Corinne Reporter*, Sept. 25.

"FOOTLIGHTS."—This theatrical paper comes out this morning in a new dress and much improved in appearance. It is not so large as formerly, but its present size is much more adaptable for a theatrical programme than if it were larger. It is surmounted by a very neat and unique design, drawn by Jos. A. Ursenbach, late of this city, and engraved by Baker & Co., of Chicago.

MAIL FAILURES.—Evidently there is something wrong in the mail arrangements between Salt Lake and this place. Quite frequently of late has communication between Pioche and the City of the Saints been cut off entirely. We hope that by calling attention to these failures a remedy will be found and applied. Several of our most interesting exchanges come in from the east of us.—*Pioche Record*, Sept. 25th.

DEVILISH OUTRAGE.—Sometime during last night some fiendishly disposed person entered the premises of Bishop Samuel A. Woolley, 9th Ward, and poisoned one of his cows. This is the third cow that has suffered by the machinations of some worse than contemptible person or persons in the 9th Ward, within a short time. It will be remembered that an animal belonging to Mrs. Taft was mutilated by

having its tongue cut out not long ago, and subsequently another belonging to Mr. C. Webb was poisoned.

TRIED AND FINED.—It was Garry Freeman who committed the burglary at the planing mills of Oakley & Johnson, State Road, on Saturday night. He offered the stolen tools for sale at the secondhand store of Mr. Crane, Commercial Street, but did not make a trade. Yesterday he returned to Mr. Crane's and offered a bed quilt for sale, when Mr. Crane sent his wife out for the police, and the latter got him.

For the burglary he was fined \$50 to-day, and he will have another trial for stealing the quilt, which is the property of Mr. James Bourne.

ACCIDENT.—Yesterday a six-year old daughter of Mr. and Mrs. Scankner, who reside in the 7th Ward, met with a somewhat severe accident. She was climbing upon the banisters of the upper landing of the staircase, when she lost her balance and fell to the floor of the entrance hall, a distance of about twelve feet. She was taken up insensible and remained in that condition for about three quarters of an hour. Surgical assistance was immediately called in, but we did not learn the extent of the injuries of the little girl, which, however, from the nature of the fall must have been severe.

ORCHARD ROBBERING.—Mr. R. F. Neslen had visitors last night. They did not honor him by entering his house, however, but contented themselves by remaining in the orchard. He did not particularly object to their helping themselves to a few peaches, although of the opinion that if the latter are worth taking they are worth asking for. He seriously objects, however, to plundering parties of the kind alluded to getting upon the trees and breaking down the branches. This, he thinks, is going a little too far, in addition to hunting up the best trees and stripping them.

Considerable orchard plundering has been done, during the present season in different parts of the City.

ZION'S SAVINGS BANK AND TRUST COMPANY.—This much needed institution commenced business this morning, next door south of the Z. C. M. I. Dry Goods Department (Eagle Emporium), East Temple street, under highly favorable auspices. The officers of the company are well-known and respected citizens, old citizens all, of widely acknowledged probity, vitally interested in the welfare of the community, persons in whom the community has a large amount of confidence. This confidence was very gratifyingly displayed to-day in the hearty manner in which the people came forward and placed their savings on deposit in the institution. At three o'clock to-day the bank had received \$5,876.20, placed thereby forty-six depositors. This is highly encouraging, especially at this particular juncture, in the midst of a financial crisis in the East, and the general lack of confidence thereby engendered. Z. S. B. & T. C. promises to be one of the most important and beneficial institutions ever established in the Territory or in this part of the Union. The interest paid on deposits is ten per cent. per annum.

CITY COUNCIL.—Council met, quorum present, Mayor Wells presiding.

Petition of D. Hutchinson, asking the privilege of putting a platform over the sidewalk in front of his paint shop opposite the California stables, on which to paint buggies, etc; referred to committee on streets and alleys.

Petition of Mr. Hibbard, Supt. of Western Union Telegraph office, asking the privilege of putting a row of telegraph poles along North Temple Street, from the depot to East Temple Street, thence to the Western Union Telegraph office; granted, on condition that the poles be set under the direction of the supervisor of streets.

Petition of H. Arnold, bath-house keeper, asking the privilege of building suitable rooms for invalids who wish to try the curative properties of the springs; referred to committee on improvements.

A statement, rebutting evidence contained in a petition regarding nuisances deposited in the adobe yard an allusion to which appeared in the *News* some time since, was read to the

Council and referred to committee on public grounds.

Petition of Mr. Fandrich, asking that his licence as a beer saloon keeper, be transferred to certain parties to whom he had sold his saloon; granted.

A number of bills were allowed, and Council adjourned till Tuesday evening, Oct. 7th, 7 p.m.

HOME-MADE SOAP.—Messrs. Philip Pugsley and A. M. Cannon have purchased, for Utah and Montana, the patent right to manufacture soap by the Thomas patent method. This soap, specimens of which will be exhibited at the Fair, is said to be unsurpassed by any article of the kind in the market. By the peculiar process of manufacture the glycerine is retained in the fat, instead of being evaporated, as by the old method, rendering it not only more cleansing in its nature, but very healing and salutary in its effects upon the skin, being curative in cases of cutaneous diseases.

The soap factory of Messrs. Pugsley & Cannon, which is at Pugsley's Mill, is expected to be in operation in a few days, when 2,000 pounds of the article will be turned out from it daily.

It is a subject for congratulation that the manufacture of excellent soap has been commenced on so extensive a scale, as it will probably keep a large amount of means in the Territory that has for a long time been drained out of it. Perhaps it is not generally known that \$100,000 is sent out of Utah for soap yearly. One establishment alone imports 50,000 pounds of the article a month.

If this new soap has the qualities claimed for it the gentlemen who have entered upon this enterprise should be liberally supported; in fact there can be no valid reason, should price and quality justify, why it should not be used in preference to any imported soap.

The staple material from which it will be made will have the advantage of being raised here, which will preclude the probability of any diseased fat entering into its composition, which has been the cause of disease arising from the use of some soaps manufactured abroad.

DIED.

In the 9th Ward of this city, Sept. 29th, of teething and summer complaint, JAMES FREDERICK, son of William and Nancy Breckenshaw, aged one year and six months.

In this city, of teething, summer complaint, and inflammation of the lungs, at 10.45 a.m., Sept. 30th, BRIGHAM L., infant son of Bishop F. F. and Elizabeth L. Sheets. Born June 26th, 1872.

Funeral services at the 8th Ward Meeting House, to-morrow, at 2 p.m. Friends are respectfully invited to attend.

At South Cottonwood, Sept. 26, of lead poisoning, JAMES REYER, born March 15, 1854.

Deceased emigrated two years previous to his death, and his parents are expected to arrive with the last company, in October, from Germany. He leaves a wife, to whom he was married only five weeks. He lived and died in full faith of the gospel. (COM.)

In the 17th Ward, Sept. 28, of teething and summer complaint, WILLIAM H., son of Jas. A. and Ann M. Peck, aged 15 months and 12 days.

At Coalville, Summit county, U. T., September 23d, of teething and putrid sore throat, SUSANNAH ELIZABETH, daughter of Thomas and Mary Ann B. Copley, aged seventeen months and twenty-two days.

In the 16th Ward of this city on the 26th of September, of teething, Robert, son of Henry and Maria Walsh, aged 10 months and 20 days. Funeral to-morrow at 10 o'clock.

In Richmond, Cache Co., Sept. 20, LARA ATKINSON, daughter of John J. and Elizabeth Bullen, aged thirteen months and fifteen days.

Oh, how sadly we'll miss from our circle
Her that nestled so close to our hearts,
Filling home with her sunbeams of pleasure;
Why, oh why, were we thus doomed to part?

Yet a light through the clouds gently
Screamed—th.
For the bitter and sweet both are given,
And to us there's a sweet voice that sayeth

We'll meet our dear angel in heaven.

SAVINGS DEPARTMENT DESERET NATIONAL BANK

RECEIVES DEPOSITS OF ONE DOLLAR
and upwards.

Interest at Eight Per Cent.

Per annum, compounded semi-annually
on the 1st of March and September.
