

# MINING, BUSINESS AND STOCKS

## COULDN'T REACH HERE ON TIME.

Officers of Western Ex. Company  
Delayed and Tomorrow's Meet-  
ing Will be Postponed.

PROBABLY OCCUR SATURDAY.

Honorable Mine in Excellent Physical  
Condition—Drain Tunnel 9,700  
Feet In.

The special meeting of shareholders of the Western Exploration company, which was scheduled to meet at the local offices of the company tomorrow, will be postponed for several days on account of the inability of Messrs. Baird and Buhl, representatives of the largest stock interests, to arrive here on time. The meeting will probably be held on next Saturday, at which time affairs concerning the future operations of the company will be discussed in addition to the confirmation of the deal through which William F. Snyder, the former manager, disposed of his interests in the corporation.

Plans will be talked over relative to the future operation of the Honorable mine at Stockton, which, after years of costly endeavor, is now in position to respond in a substantial manner. Supt. Haddatt, who is in from camp, stated during the day that the ore body recently opened in the Honorable drain tunnel level is undoubtedly an extensive one; a drift having proved it continuous for a distance of about 95 feet. The face shows a full breast of high grade ore that will average considerably better than 50 per cent lead in addition to the silver values which are not at all insignificant. The ore is of a much more uniform grade than that found in the rich shoots out of which ore has been extracted on the upper levels.

Mr. Haddatt says the drain tunnel has been completed to the length of 9,700 feet, and is being gradually pushed further into the mountain.

### BACK FROM BULLFROG.

D. H. Perry Says the Boom is on in  
Earnest in Nevada Camp.

D. H. Perry, the promoter of the Montgomery Mountain Mining company at Bullfrog, Nevada, returned from that camp this morning accompanied by M. M. Johnson of the Nevada house staff.

Mr. Perry says the camp of Bullfrog is moving to the front rapidly and that the boom is on in earnest there. In mining circles today the impression prevails that Mr. Newhouse will likely become identified with Mr. Perry in the development of the Montgomery Mountain; it having been stated that Mr. Johnson came away very favorably impressed with the possibilities of the property.

### OUT AT GARFIELD.

Power Plant Building at New Snelter  
Nearing Completion.

An arrival from Garfield this afternoon brought in the information that the power plant building at the new copper smelter is nearing completion and that another week will find the structure practically finished. The main smelter building is also well along and the structure which is to contain the McDougall furnaces, is rapidly taking form.

### CON. ALTA TRAMWAY.

Repairs Being Made and Will be Fin-  
ished in a Week.

Henry M. Crowther, manager of the Continental Alta mines at Alta, returned from camp last night and while there put out a force of men to work repairing the aerial tramway, which has been out of commission since the recent snow slides. Mr. Crowther expects to have the buckets traveling in about a week.

### BACK FROM THE COAST.

Charles Lammerdorf, to whom the world is indebted for the discovery of the Sevier Consolidated property in the Gold Mountain district, accompanied by Mrs. Lammerdorf, has returned from a pleasure trip of several months' duration on the Pacific coast.

While away, Mr. and Mrs. Lammerdorf spent much of their time in southern California, and also went on a journey across the border line into Mexico. "The vacation was enjoyed hugely," was the way Mr. Lammerdorf expressed it, in response to a query. His appearance was demonstrative of this, as the veteran mining man came back in robust health. But he has none the least of Mrs. Lammerdorf.

### FAILED.

All efforts have failed to find a better remedy for coughs, colds and lung troubles than Foley's Honey and Tar. It stops the cough, heals the lungs and prevents serious results from a cold. J. N. Patterson, Nashville, Iowa, writes: "I had a bad cold on my lungs and sired at least half a dozen advertised cough medicines and had returned from two physicians without getting any benefit. A friend recommended Foley's Honey and Tar and I used it. It cured me. I consider it the greatest cough and lung medicine in the world." For sale by F. J. Hill Drug Co.

### ON MINING EXCHANGE.

Daily Judge Sells at \$10—Columbus  
Con. on the Open Board.

The former sales of the Salt Lake Stock & Mining exchange amounted to the transfer of 28,810 shares for which was paid the sum of \$8,785.35. Daily Judge, offered at \$10, was quickly taken and a 200-share lot of Mammoth went at \$1.30. May Day opened with a sale at 20 cents, and advance to 22 cents, after which the price softened, closing with 1,500 shares going at 19 1/2 cents.

On the open board, considerable inquiry was indulged in for Columbus Consolidated and the stock was furnished at \$1.90 @ \$4.25.

The closing quotations and sales were as follows:

### A. S. CAMPBELL.

Stock Broker, 216 D. F. Walker Block.

### NEW COMPANY FORMED.

Articles of incorporation of the Clark Virginia Mining company of Summit county, were filed in the office of the state secretary today. The capitalization is placed at \$75,000, and the value of the shares is 50 cents each. C. H. Spreng is president, W. A. McDonald, vice president; U. S. Beck, treasurer, and H. F. Townsend, secretary.

### PIRATING FOLEY'S HONEY AND TAR.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. Ask for FOLEY'S Honey and Tar and refuse any substitute offered as no other preparation will give the same satisfaction. It is mildly laxative. It contains no opiates and is safe for children and delicate persons. For sale by F. J. Hill Drug Co.

## MOVEMENTS OF COLE AND RYAN.

Plan Being Worked Out Among  
Producers to Insure Stability  
Of the Metal Market.

SELLING AGENCIES NOT IN IT.

Big Combination of Copper Mines at  
Globe, Arizona, Among the  
Probabilities.

A Boston correspondent of Pollock & Co., wires an interesting story to-day about the movements of Thomas P. Cole and J. D. Ryan, the two most conspicuous figures in the mining world at the present time.

"T. P. Cole and J. D. Ryan are back of a movement to secure stability of the metal market through agreement among producers. Already producers of over 75 per cent of the copper output of the United States, Canada and Mexico, have been approached and have agreed to pool issues under the leadership of Messrs. Cole and Ryan. The large consumers of copper have for years been seeking to secure a stable market for the metal, caring not whether the price was 12, 15, 17 or 18 cents, so long as the price was maintained at sufficient length of time to remove the element of speculation from the business. At various times efforts have been made to secure this result, but a sufficient number of producers have always held aloof to prevent such a proposition being carried into effect.

"The metal selling agencies are not parties to this agreement, which will provide that in the times of restricted business the price of copper will be maintained at a level sufficient to offset a falling off in consumption, under restricted business conditions, 15 cents would be a minimum low price and 17 cents a maximum high price. It is understood that Cole and Ryan have made considerable progress in getting the producing interests to fall into line with their plans. So far, only one company, apparently, has agreed to enter into such a compact, being a local concern which sells direct to the trade controlling annual production of about 10,000,000 pounds.

"The Colorado syndicate has gone about its work on the quiet and it is reported to have succeeded in getting together 1,000 acres of mineralized territory in the Globe, Arizona district surrounding both the Colorado and the Arizona Commercial company, a cost of about \$1,000,000. Mr. Cole is on very friendly terms with the largest interests in Arizona in the Arizona Commercial Copper company and there is good basis for the belief that this company will form the basis of a big combination of copper properties in the Globe camp, with Thomas P. Cole at the head."

### THE ST. LOUIS MAGNOLIA.

Shaft Now Down Over Seventy Feet—  
Good Ore Encountered.

A Park Record representative visited the St. Louis-Magnolia (McGregor) property in the Alliance canyon a few days ago and relates an interesting story of progress since January 1. A fine hoisting house has been erected, a 30-foot galloway frame put up, a gasoline engine installed and the shaft sent down about 70 feet, cribbed in splendid shape all the way down. Superintendent McDonald has certainly made a showing of which he may well feel proud, and it is his intention to keep the good work up. Five men are working there, three shifts, and those in the shaft is down about seventy feet and some rich ore bearing rock has already been taken out. The shaft is a model one, cribbed, as stated, and this method will be followed as depth is obtained, there being practically no possibility of striking water, and unless pumps have to be installed in the shaft, this is the best method. The old 30-foot galloway frame used for some time as the American flag, has been installed and this will do all the work required of it excellently until spring, when we are assured, a steel frame will be erected. The dirt is hoisted directly from the shaft in a bucket and by means of a convenient platform and chute arrangement overhead, is dumped and "chuted" directly from the building into the hoisting house on the south side of the building, where there is plenty of dumping ground. This arrangement makes unnecessary the use of a car and is a great time and labor saver. Another feature of interest is the big horse power, Fairbanks-Morse gasoline hoisting engine which has been installed. The working and mechanism of this interesting piece of machinery was carefully explained to the writer by W. S. Williams, who placed it and understands such engines thoroughly. The engine is fed from a tank buried in the ground some twenty feet from the building, by means of underground pipes. The tank has a capacity of 50 gallons and will last four or five days without refilling. The engine uses just what gasoline is necessary for running and the surplus both carried back to the storage tank. Three water tanks of a capacity of 450 gallons each are situated inside of the building and the water from these is used to cool the engine. This water is also returned to the tanks after being used.

The shaft house is substantially put up and a visit to the property can not but convince one that Mr. McGregor has perfect confidence in making a big mine and intends doing so in the least possible time.

## DANDRUFF

Makes Thin,  
Falling  
Hair.

My head was for ten years covered with dandruff. I have used Dandruff and have no more. It is the best I have ever used. It makes the hair grow again. It is the best I have ever used. It makes the hair grow again. It is the best I have ever used. It makes the hair grow again.

Dr. H. Daniels,  
115 Hendrix St.,  
Brooklyn, N. Y.

### Free Soap Offer for Hairline Soap.

### EAST ONTARIO OFFICERS.

Directors. Complete Organization—  
Several Salt Lickers on Board.

The directors of East Ontario Mining company recently chosen to serve during the ensuing year have elected the following officers for the ensuing year: E. M. Curtis, of St. Louis, president; S. V. Derrah, of Salt Lake, vice president; S. B. Schuyler, St. Louis, treasurer; P. R. Kingston, Salt Lake, secretary, who with J. H. Dieter of Salt Lake constitute the board of directors. Byron Hartwell is retained as local representative of the company. Active work will be commenced on the property as soon as spring opens, and systematic development prosecuted, and those who are familiar with the ground are certain that a mine will be opened up.

### DAILY JUDGE IN LEAD.

Last Week's Shipments From This  
Park City Property Were Extensive.

Daily Judge headed the list of Park City shippers last week, the record showing the shipment of 1,145,000 pounds of crude ore and concentrate and 25,000 pounds of zinc middlings. The Silver King was a close second, with 1,231,150 pounds of crude ore and concentrate; the Daily West came next with 1,150,000 pounds of crude ore and concentrate. The Keith-Keane sent out 128,000 pounds of the same material, while the Jupiter shipped 30,000 pounds of crude.

The Daily Judge is earning close to \$75,000 monthly at the present time.

---

### DEEDED TO O. E. CAREY.

Special Correspondence.  
Provo, Feb. 27.—John Green et al. of Salt Lake, have conveyed by quit-claim deed to O. E. Carey, of Salt Lake, the Pure Lime and Pure Limestone Extension, the Pure Limestone No. 2 and 3 Placer mining claims, situated near Salem, in the Eldorado mining district. The consideration value in the deed is \$1.

### CONCENTRATES.

W. J. Craig is in Bingham today on mining business.  
W. B. Andrew has returned from a trip to Nevada on mining business.  
Albert Roberts, former manager of the Utah & Eastern Exploration company, is in the city today. The smelter of the Utah & Eastern Copper company at Shem City, Washington county, will be blown in a few days.

H. T. Sappington, manager of the Cyclone mine at Stockton, has returned from camp, where he reports satisfactory conditions.

A. E. Hyde, Jr., manager of the Biscuit Mining company properties at Cherry Creek, Nev., has gone to camp on an inspection trip.

General Manager Charles O. Ellingwood of the Western Exploration company departed for San Francisco this afternoon on a hurried business trip.

General Manager C. E. Allen of the United States mines has returned from an inspection trip to the several properties owned and operated by that corporation.

The expert examination of the Carissa mine in Tintic has been concluded, but the management still refuse to divulge information relative to the pending deal.

The ore and bullion settlements reported last yesterday by McCormick & Company, were: Crude ore, 325,400; gold bullion, \$35,400; gold bullion, \$3,700.

Engineer H. W. Horne has returned from a professional trip to the properties of the Consolidated Jefferson Mining company near the mouth of Little Cottonwood canyon.

The May Asphalt Mining company with the home office at Myton, Utah, on the reservation is one of the new incorporations by Park City men. There are 100,000 shares of the par value of \$1.50 per share, which include the company's holdings, which include some very valuable ground near Myton, will begin in the early spring. Samples of the mineral mined there have been on display in this office and have excited no little comment. George Lindsay, Francis M. Bellevue and Victor Pearson are the original locators of this property and are confident that a big paying proposition is in store for them and the rest of the stockholders. The officers and other details will be given later.—Record.

The Original Laxative Cough Syrup is Kennedy's Laxative Honey and Tar. It expels all cold from the system by acting as a cathartic on the bowels. Kennedy's Laxative Honey and Tar is a certain, safe and harmless cure for colds, croup and whooping cough.—Sold by F. C. Schramm, druggist, where the cars stop.

## MARKET IRREGULAR BUT NOT WEAK.

Depression in London Had Little  
Effect Prices Inclining to  
Advance.

### GENERAL RISE AND REACTION.

Fluctuations Either Way About Even,  
Stocks Coming to a Stand-  
still.

New York, Feb. 27.—The tone of the opening stock market today was not affected by the depression of the morning market in London and prices were inclined to advance. Recent speculative favorites continued prominent. Reading, Union Pacific, Wabash preferred, Sugar and Central Leather were up large fractions. The gains otherwise were small and dealing on a moderate scale. Consolidated gas broke 1 1/2 on the first sales.

The early market was very irregular but with a good undertone. After the opening prices slipped off, Reading led its gain. This was followed by a general rise in which Consolidated gas sold nearly a point above last night. Another reaction at 11 o'clock brought prices back again to about where they ended yesterday, but below for some leaders. The various fluctuations of the hour were indicated by the following changes:  
Advance—Colorado Fuel & Sugar 1 1/2, and Union Pacific, Missouri Pacific, Delaware & Hudson, Northern Pacific and Republic. Pacific Coast, 1 1/2. Decline—Northwestern 2, Great Northern preferred 1 1/2 and Canadian Pacific and Rock Island preferred 1.  
The market became unsteady and then receded during the second hour. The New York public utilities and the Hill railroads were under pressure. Losses in Great Northern preferred reached 3 1/2. Metropolitan Securities 2, St. Paul 1 1/2, Northern Pacific 1 1/2, Transist 1 1/2 and Metropolitan St. Railway 1. The average level receded to below last night's closing. In the afternoon, in prominent stocks were yielded. The market came to a standstill at noon.

The market manifested as much heaviness in the early afternoon as it did strength in the morning, stocks coming out pretty regularly from all quarters. Northern preferred suffered a loss of 6 1/2 by 1 o'clock. Northern Electric 1 1/2. The Silver King, Illinois Central, Anaconda and Tennessee Coal & Iron.

A revival of the demand for Wabash preferred which was the feature of yesterday's dealings, failed to check the steady drift downward and prices sold considerably lower and the offerings were small. Anaconda fell 4 1/2.

Bonds were irregular at noon.

### LIVESTOCK.

#### OMAHA.

Omaha, Feb. 27.—Receipts—5,000; market steady. Native steers, 4.00 @ 5.00; cows and heifers, 3.00 @ 4.00; canners, 2.00 @ 3.00; stockers and feeders, 3.00 @ 4.00; calves, 3.00 @ 4.00; bulls and stags, 2.50 @ 3.00.
