A STORY BARNUM DOESN'T TELL.

P. T. Barnum tells in his autobiography a great many stories illustrative of his own sharpness, but omits as many more in which the laugh happens to be at his own expense. One of these omitted incidents occured in the Spring of 1866, when Barnum was a member of the Connecticut House of Representatives. It was the second week of the session, and David Clark, of Hartford, being in town-the Legislature met in New Haven that year-gave a very elegant dinner at the Savin Rock House, in honor of Governor Hawley, who had just been inaugurated. Twenty or thirty gentlemen were invited, among them P. T. Barnum, and Ike Bromley, now of the Hartford Post, then editor of the Norwich Bulletin, and representative from Norwich. Barnum, as usual, was very conspicious, doing most of the talking, and making himself as prominent as possible. Brom., who had never met the showman before except once, causually, at the beginning of the session, was a good deal disgusted with him.

By and by, after the dinner had been disposed of," Mr. Clark proposed the health of Governor Hawley, and the Governor responded in a little speech. One or two other distinguished gentlemen were toasted and responded, and then Barnum's health was proposed. The great showman rose with the manner of a man who was to say the funniest things of the evening and was confident he could fill the bill, and with an air of mock embarrasment began: "Mr. Chairman-You know I am not in the habit of making speeches-" Here he commenced examining his pockets, as if looking for his manuscripts; not finding any, he turned to ful than here. > "Since reading Mr. Cullom's speech in the House yesterday in favor of his antipolygamy bill, we think worse than ever of his scheme and his bill. His speech shows the grossest misapprehension of the Mormon character as well as of the Mormon idea, and gives proof that he is well aware his bill will involve us in sanguinary difficulties. It is true that he is all ready to plunge into a fight with the Mormons, and is quite sure that this great and glorious governwho, he thinks, cannot raise more than 8,000 fighting men, and who could be kept in subjection by a few companies of regular troops. All this looks very impressive and bellicose; and we might suppose it would frighten the Mormons if they did not know better than to be frightened by a man who, knowing so little, can talk so loudly. We ourselves are firmly convinced that the United States could "lick" the Mormons in a standing-up fight, but we know also that it would be a harder and more costly job than Mr. Cullom makes out. The only parties who would profit by the war would be the contractors and plunderers, who would have several years' work on hand World.

the gentleman near him and enquired: "Who's got my notes?"

The question had not left his lips before Brom., sitting way at the other end of the table, without lifting his eyes from the nuts on his plate, shouted in answer: "Chauncey Jerome!."

The effect was electrical. The crowd stamped and yelled until the dishes danced, and Barnum, for the first time in his life, was really embarrassed. He had not anything to say. After a while, when the uproar had sufficiently subsided to give him a chance, he managed to say, he "owed the gentleman from Norwich one," and with a few words sat down. But he was extinguished for the evening, and gave up for once the position of head centre.-Norwich Bulletin.

"The picture of the disorganized condition of Utah, as presented by the Chairman of the House Committee on Territories in the debate on the abolition of polygamy in that Territory, painful as it is, hardly justifies the proposition to send a small army there. The situation in Utah is largely owing, as our letters from Salt Lake City have shown, to the dissentions among the Mormons themselves. There is not much danger, as the Chairman thinks, that the Gentile population will be driven out unless troops are sent to protect them. On the contrary, in the inevitable conflict between the old Mormon settlers and the new Gentile emigrants which the completion of the Pacific Railroad hastens, polygamy will disappear, we trust without acceleration from either the bayonet or bowie-knife."-N. INTOLERANCE IN LONG ISLAND .- A telegram from the East to-day, received over the W. U. wires, says Mormon preachers have been warned out of the village of East Meadow, Long Island, by a Vigilance Committee, on pain of being mobbed. The telegram says they left for Patchogia, but expected to return when the disturbances had ceased.

This is the old story. The priests, the ministers of a bogus gospel, as usual, are using their influence against the truth; their arguments being, now as ever, in the history of "Mormonism," physical force.
