The pipe line to bring water from Water canyon, three miles, has been surveyed and the pipe ship-ped, and the line will be completed about Jan. 15. There is a strong enquiry in the district for copper prop-erties, among the recent buyers being J. E. Norman of Denver and R. M. annon of Colorado Springs. An important development has occurred this week in the Ray Consolidat-ed mines. In the east drift on the 300 foot level a winze is being sunk 170 feet

east of the main shaft and the pay shoot has opened out to 30 inches wide. carrying average values from \$200 to \$300 per ton in silver, gold and lead, thus demonstrating the oft expressed theory that depth was the only thing required to prove the values in this district. There is great activity in this district consequent on recent develop-ments and several important transac-

tions are in course of negotiation. This week's returns from the rallond show a large increase in ore shipments, the total amounting to 1,648 tons sent out by the following companies: Tonopah Mining company, 645 tons bulk, 87 tons sacks; Belmont, 190 tons bulk; Montana-Tonopah, 20 tons bulk, 89 tona sacks; Tonopah Exten-sion, 50 tons; Southwest Nevada, Recille, 70 tons; Lucky Baldwin, Gold Mountain, five tons; Quincey mine, Crow Springs, 30 tons, Goldfield.--The Jumbo leases, Richards, 16 tons, Bowes 155 tons, McDonald-Fuller 104 tons.

Combination mine 40 tons, January 44 tons, Florence 103 tons, The Tonopah Light & Power company is now installing at the electric light station a new and powerful plant which will enable them to supply all require-ments for electric lighting in Tonopah. The present demand amounts to from 1.160 to 1.200 16 candle power lamps per month, and the new plant will give 175 horse power and easily generate suffi-cient electricity for 3,000 16 candle

IN BULLFROG DISTRICT. Sensational Discoveries Continue and

lamps.

.14%

Camp is Rapidly Filling Up.

The news from the Bullfrog district continues excellent and although only location work is being done on most of the claims, good values are being opened up, says the Tonopah Bonanza. The Builtrog Mining company have a large force of men on development work and their claims are opening up well, every shaft showing increased values and free gold being visible in the ore clear across the bottom. A new vein has been found on the Indian Springs group which pans gold clear across. The Lonsway claims have been bonded to Prescott Ely and partners for \$60,000, of which \$10,000 will be paid in \$0 days. Knox and Moorman have discovered a three-inch stringer run-ning from \$5,000 to \$10,000 per ton dipping into a big vein that outcrops on the surface. The influx of people to the district is unabated. H. H. Clark, manager of the Bullfrog Mining company, has this week purchased the fran-chise and equipment of the Sodaville, Tonopah and Goldfield telephone and clegraph line and men today com-senced the work of building the line to Amargosa and the Bullfrog Mining company's main camp, which will be in operation by Dec. 15. This outlay of from \$8,000 to \$10,000 by H. H. Clark, who is one of the largest stockholders in the Bullfrog Mining company, is the best evidence of his unbounded faith in the district and the mines in

To The District.

Will wonders never cease? Only a short time ago Goldfield and Tonopah ware comparatively unknown. Today they are the admiration of the mining world. Nor have they become so through talk alone. Discoveries which have made men wealthy in a twinkling have been opened up there and they are daily continuing, to the bewildering astonishment of the most sanguing. The latest strikes in the district are reported in the Sandstorm and Ives groups, which show ore valued at from \$500 to \$1,000 a ton, with some running ns high as \$50,000. Here is the story, as told by the Miner of Tonopah: Two of the greatest strikes ever made

in the Goldfield district were reported this week, one in the Loftus & Davis lease on the Sandstorm and the other in the Wilson lease on the St. Ives.

In some of its features, aside from the wonderful values encountered, the strike on the Sandstorm is the most sensational of all the remarkable discoveries that have occurred in Gold-field. About two weeks ago J. P. Loftus and J. R. Davis visited the Sandstorm, and in examining the material on the dump of lease No. 5, which was abandoned six or eight months ago. Mr. Davis discovered that what was supposed to be waste carried very high values. Loftus and Davis at once took steps to secure a lease on the aban-doned ground, obtained it without difficulty, and for the past 10 days have been prospecting on the surface and in the abandoned shaft, which is 50 feet leep, with the most astonishing results the dump, which was considered 'waste" by the former leasers, con-The "waste" by the former leasers, con-tains about 200 tons of rock which, when acreened, will run from \$400 to \$500 a ton. All of the surface dirt within an area of 50 feet from the shaft carries gold and it is being screened preparatory to sacking. Three well-defined ledges have been found within

the limits of the lease, all of which yield phenomenal values. One of the ledges has been uncovered and shows a width of from 4 to 7 feet. A careful sampling of this ledge gave an average of \$3,406.80 a ton. Four samples taken

ment. A case in point was the rise in United States Steel to 374, while the preferred was hammered down to 53%. In other parts of the list the diversity of movement was not so pronounced, but was noticeable in some of the coalers and western steeks, Profit taking was on a

THE BIG BEAR MINE.

Thunder Mountain Property Shows High-Grade Gold Ore.

Reciting the history of the Big Bear mine in the Wilson creek district near Thunder mountain, the Roosevelt News says that the property, from which ore was shipped some time ago netting \$40 per ton in gold, is now owned by A. D. and John Cameron, George W. Bruce and James N. Nolan. The mine consists of three claims, the Big Bear, Reliance and Top Notch. On the Big Bear the surface croppings give assays of from \$20 to \$25 per ton in gold and the quartz ledge is 40 feet wide. On the Reiance the croppings stand 30 feet high above the wall rock and 40 feet in width. An addt 15 feet in length has been run in this vein and assays run-ning up to \$128 per ton have been ob-tained. The Top Notch is the east claim of the group and laps over the top of the high ridge between Rattlesnake and Wilson creeks. This is the claim from which the ore was originally taken years ago that gave the returns of \$40 per ton it gold milled in the aras-tra. Its assay value shows it to be worth \$58 per ton. The width of the vein does not exceed six feet. In connoction with the mine the owners have a millsite one-fourth mile below, or the middle fork of Salmon and her they have water power enough to run 1,000 stamps both winter and summer.

STRIKE NEAR SODAVILLE.

Ore Runs from \$100 to \$2,000 Per Ton -Increased Shipments.

Discussing conditions in and about Tonopah for the week, the Bonanaa says that a strike of exceedingly rich gold ore near Sodaville is reported on most reliable authority. The discovery was made about four miles from Sodaville, between there and the Silver Sta mines, in September, but was kept quier opened up in several places for a dis-tinuce of 5,000 feet on the surface, the pay streak being from two feet to sim fee wide, the ore resembling the rich wid field ore and assaying from \$100 to \$2,000 per ton. Some of this will be treated at Stewart's mill and samples placed on exhibition at the Sodaville Mining Mining bureau are attracting great attention. The Stewart mill is now running stead-fly on ore from the Motio group. Wil-

Utah Consolidated Sued.

which he is interested.

The Utah Consolidated Mining company has been made defendant in two more damage suits med in by L. J. court yesterday afternoon by L. J. The The Store of the Store Mantle and George H. Thaxton. former asks for \$1,896 damages for injuries to his farm, stock and crops by reason of the smelter smoke and deadly fumes from the smelter. The laiter asks for \$1,638 damages for the same PERSONS.

PAYMASTER DEAL.

Story of Its Lease to Samuel L. Adams Of Provo, Confirmed.

Special Correspondence.

Provo, Nov. 29.-On his late trip to St. George, Samuel L. Adams, Jr., of this city, secured a lease on the Paymaster group of copper mines, situated 16 miles from St. George and 40 miles outh of Medena on the Salt Lake toute. Mr. Adams and associates will at once obtain the necessary machinery to prosecute a vigorous campaign on this property, and expect to make it a paying proposition. Some twelve years ago \$50,000 worth of copper was taken from the property, but the fall in price of copper and the long wagon haul to get the ore to market caused a suspension of operations. Now that copper brings a higher price, and the railroad brings a higher pirce, and the ratioad is close, it is believed good returns can be realized from working the property. Mr. Adams, and his father, Samuel L. Adams, of St. George, are the orig-inal discoverers of the Grand Guleh copper mine, near St. George, which they with Sait Lake parties operated as worke as 1575

early as 1877.

from various points gave assays of \$802.40, \$52.564.40, \$19,854 and \$15,846.80. Numerous pannings made at the points from which the samples were taken corroborate these figures. The original easers put their shaft down thitugh t large vein, in ignorance of its value, and the present leasers are developing a big body of ore running from \$300 to \$500 a ton. The news of this strike has created great excitement in Goldfield, and is pronounced by the best-informed mining men to be the most important discovery ever made in the district.

The strike on the St. Ives was made last Sunday, in the old Wilson leas, now owned by O. B. Glover and J. B. Harrington. In the 50-foot drift, about 40 feet from the shaft, a rich body of ore was encountered which has since been proven to be 7 feet wide, between strong, well-defined walls. The values run from \$500 to \$1,000 and are found in the rock as well as in the seams. It is a most important strike, in its bearing on adjoining properties, particularly the Algae, which has the St. Ives ledge.

CONCENTRATES.

A shortage of provisions is reported at Thunder Mountain. The Taylor Brunton sampler had five cars of ore from Tintic, one from Bingham and four from Tonopah today.

The United Bingham today sold a shipment of ore showing 30 per cent lend, 23 ounces silver, 2.7 per cent copper and \$4.20 gold.

The Guiffles group on Thunderbolt mountain, Idaho, shows a large body of quartz assaying all the way frem \$7 to \$70 in gold. Today's receipts at the Pioneer sam-

pler consisted of five cars of ore from Tintic, three from Alta, one from Oasis and one from Marysvale.

Col. W. G. Page, the well known Hailey, Idaho, mine manager, is a guest at the Kenyon, having come down on a periodic business trip.

A. C. Briggs, J. C. Tirvia, and E. A. Day of the Congress mine in Arizona, and W. A. Evans of Phoenix, are guests at the Kenyon.

T. W. Farnam, treasurer of the Bingham and New Haven Mining company, is again out at the mine, after an absence of several weeks in the east.

The many friends of William Roy Ridge, formerly of Salt Lake but new of Tonopah, where he amassed a fortune in mining, will be pleased to learn of his forthcoming marriage to Miss MaryLouiseHopkins of Kansas City, the nuptials to be celebrated tomorrow night, Nov. 20. The ceremony will be a most elaborate affair and will occur in the South Prospect Christian church, Kunsas City.

A great body of ore has been discovered in the Trapper's Flat mine on ThunderHolt mountain, Idaho. The ledge is 36 feet wide and the mineral assays \$17.62 to \$60 in gold and is perfectly free milling.

The Sunnyside mill at Thunder Mountain, will commence dropping stamps the first of December, 10 days sooner than at first expected. It is estimated that the mill will handle at least 160 tons of ore daily, and as this will av-erage \$30 per ton, the company ex-pects to realize a monthly profit of \$140,000. This, it is predicted, will do much for the new camp.
